The medal known as the Ashburton Treaty medal was given through Lord Ashburton, in 1842, to the Micmac and other eastern Indians for services as guards and hunters, and assistance in laying out the boundary between the United States and Canada.

2 GEORGE V., A. 1912

1842. Obverse, bust of queen in an inner dentilated circle, garland of roses around psyche knot; under bust, B. Wyon; no legend. Reverse, arms of Great Britain in an inner circle, surmounted by a crowned and crested helmet, encircled by the ribbon of the Garter; legend, Victoria Dei Gratia Britanniarum Regina Fid. Def. Ribbon in lower field backed by the rose and thistle (Betts, p. 159). Silver; size, 2% in.

In 1848 the Peninsular War medal was issued, to be given to any officer, non-commissioned officer, or soldier who had participated in any battle or siege from 1793 to 1814. In general orders, dated florse Guards, June 1, 1847, were included the battles of Chateaugay, Oct. 26, 1813, and of Cryslers Farm, Nov. 11, 1813, covering the invasion of Canada by the American army in 1813. "The medal was also conferred upon the Indians, the names of the battles engraved on clasps, and the name of the recipient on the edge of the medal, with title of warrior" (Leroux, p. 177).

1848. Obverse, bust of the queen to right, crowned; legend, Victoria Regina; below bust, 1848, and W. Wyon, R. A. Reverse, figure of the queen in royal robes, standing on a dais, crowning with a wreath of laurel the Duke of Wellington, who is kneeling before her; by side of dais a crouching lion; in exergne, 1703-1814. Silver; size, 24 in, with loop for suspension.

The Prince of Wales on his visit to Canada in 1860 was received by Indians in full eeremonial dress. Each chief was presented with a large silver medal, while the warriors received smaller medals. This medal is known as the Prince of Wales medal.

1860. Obverse, head of queen to right, undraped and crowned; legend, Victoria D. G. Regina F. D.—In lower right-hand field, the three feathers and motto; lower left-hand field, 1860. Reverse, the royal arms surmounted by a helmet, crown, and lion, with ribbon better, and on the ribbon below, Data et Mon Droit; at back, roses, shamrock, and thistle; in exergue, 1860. Silver; size, 2 in , with loop for suspension.

In 1860, when the Government had acquired the lands of the Hudson's Bay Company's territory and after the extinction of the Indian land titles, the following medal was presented to the Indians under Treaty No. 1. In the Report of the Commissioners it is stated: "In addition each Indian chief received a dress, a flag, and a medal as marks of distinction." These medals at first were not struck for this occasion.

1860. Obverse, head of the queen to right, crowned; legend, Victoria Regina; under bust, J. S. and B. Wyon, S. C. Reverse, two branches of oak, centre field plain for the engraving of name and tribe of recipient, Silver; size, 34 in.

The very large Confederation medal of 1867, with an extra rim soldered on it, was used in 1872 for Treaty No. 2. It was presented to

the Indians subsequent to the acquisition of the Hudson's Bay Company's territory, at which time the Indian title to a large area was extinguished. "Twenty-five were prepared, but found so cumbersome no more were used" (Leroux, p. 219).

1872. Obverse, bust of queen to right, within an inner circle having milled edge ground, with veil and necklace; legend, Dominion of Canada; below, Chiefs Medal, 1872; below bust, S. Wyon. Reverse, in inner circle Britannia seated with lion and four female figures, representing the four original provinces of the Canadian confederation; legend, Juvenatus et Patrius Vigor Canada Instaurata, 1867; in outer circle, Indians of the North West Territories. Silver; bronze; size, 32 in.

The following medal was struck especially to replace the large and inartistic medal last described, and was intended for presentation at future treaties:

1873. Obverse, head of queen to right, crowned with veil and necklace, draped; legend, Victoria D. G. Britt. REG. F. D.; below bust, J. S. Wyon. Reverse, a general officer in full uniform, to right, grasping the hand of an Indian chief who wears a feather headdress and leggings; pipe of peace at feet of figures; in background, at back of Indian, several wigwams; back of officer, a half sun above horizon; legend, Indian Treaty No.——, on lower edge, 187—. Silver; size, 3 in., with loop for suspension.

A series of three medals was struck by the Hudson's Bay Company for presentation to the Indians of the great Northwest for faithful services. These were engraved by G. II. Kuchler of the Birmingham mint, 1790 to 1805.

1793 Obverse, bust of king to left, long hair and draped; legend, Georgius III D. G. Britanniarum Rex Fid-i. Def; under bust, G. H. K. Reverse, arms of the Hudson's Bay Company; argent, a cross gules, four beavers proper, to the left, surmounted by a helmet and crest, a fox supported by two stags; motto on ribbon, Pro Pelle Cutem (Leroux, p. 50). Silver; sizes, 1¼ in. by 3 in.

(B. E. B.)

Medicine and Medicine-men. Medicine is an agent or influence employed to prevent, alleviate, or cure some pathological condition or its symptoms. The scope of such agents among the Indians was extensive, ranging, as among other primitive peoples, from magic, prayer, force of suggestion, and a multitude of symbolic and empirical means, to actual and more rationally used remedies. Where the Indians are in contact with whites the old methods of combating physical ills are slowly giving way to the curative agencies of civilization. The white man in turn has adopted from the Indians a number of valuable medicinal plants, such as cinchona, jalapa, hydrastis, etc.

In general the tribes show many similarities in regard to medicine, but the actual agents employed differ with the tribes and localities, as well as with individual healers. Magic, prayers, songs, exhortation, suggestion, ceremonies, fetishes, and certain specifies and mechanical processes are employed only by the medicine-men or medicine-women; other specific remedies or procedures are proprietary, generally among a few old women in the tribe; while many vegetal remedies and simple manipulations are of common knowledge in a given locality.

The employment of magic consists in opposing a supposed malign influence, such as that of a sorcerer, spirits of the dead, mythical animals, ete., by the supernatural power of the healer's fetishes and other means. Prayers are addressed to benevolent deities and spirits. invoking their aid. Healing songs, consisting of prayers or exhortations, are sung. Harangues are directed to evil spirits supposed to cause the siekness, and often are accentuated by noises to frighten such spirits away. Suggestion is exercised in many ways directly and indirectly. Curative ceremonies usually combine all or most of the agencies mentioned. Some of them, such as Matthews describes among the Navaho, are very elaborate, prolonged, and costly. The fetishes used are peculiarly shaped stones or wooden objects, lightning-riven wood, feathers, claws, hair,

figurines of mythical animals, representations of the sun, of lightning, etc., and are supposed to embody a mysterious power capable of preventing disease or of counteracting its effects. Mechanical means of curing consist of rubbing, pressure with the hands or feet, or with a sash or cord (as in labour or in painful affections of the chest), bonesetting, cutting, cauterizing, scarifying, cupping (by sucking), blood-letting, poulticing, clysmata, sweat bath, sucking of snake poison or abscesses, counter irritation, tooth pulling, bandaging, etc. Dieting and total abstinence from food were forms of treatment in vogue in various localities. Vegetal medicines were, and in some tribes still are, numerous. Some of these are employed by reason of a real or fancied resemblance to the part affected, or as fetishes, because of a supposed mythical antagonism to the cause of the sickness. Thus, a plant with a worm-like stem may be given as a vermifuge; one that has many hair-like processes is used among the Hopi to cure baldness. Among the Apache the sacred tule pollen known as ha-dn-tin is given or applied because of its supposed supernatural beneficial effect. Other plants are employed as remedies simply for traditional reasons, without any formulated opinion as to their modes of action. Finally, all the tribes are familiar with and employ catharties and emetics; in some cases also diaphoretics, diureties, cough medicines, etc. Every tribe has also knowledge of some of the poisonous plants in its neighbourhood and their antidotes.

The parts of plants used as medicines are most often roots, occasionally twigs, leaves, or bark, but rarely flowers or seeds. They are used either fresh or dry, and most commonly in the form of a decoction. Of this a considerable quantity, as much as a cupful, is administered at a time, usually in the morning. Only exceptionally is the dose repeated. Generally only a single plant is used, but among some Indians as many as four plants are combined in a single medicine; some of the Opata mix indiscriminately a large number of substances. The proprietary medicines are sold at a high price. Some of these plants, so far as they are known, possess real medicinal value, but many are quite useless for the purpose for which they are prescribed. There is a prevalent belief that the Indians are acquainted with valuable specifics for venereal diseases. snake bites, etc., but how far this belief may be true has not yet been shown.

Animal and mineral substances are also oceasionally used as remedies. Among Southwestern tribes the bite of a snake is often treated by applying to the wound a portion of the ventral surface of the body of the same snake. The Papago use crickets as medicine; the Tarahumare, lizards; the Apache, spider's eggs. Among the Navaho and others red ochre combined with fat is used externally to prevent sunburn. The red, barren elay from beneath a campfire is used by White Mountain Apache women to induce sterility; the Hopi blow chargoal, ashes, or other products of fire on an inflanied surface to counteract the supposed fire which causes the ailment. Antiseptics are unknown, but some of the cleansing agents or healing powders employed probably serve as such, though undesignedly on the part of the Indians.

The exact manner of therapeutic action is as absolutely unknown to the Indian as it is to the ignorant white man. Among some tribes the term for medicine signifies "mystery," but among others a distinction is made between thaumaturgic practices and actual medicines. Occasionally the term "medicine" is extended to a higher class of greatly prized fetishes that are supposed to be imbued with mysterious protective power over an individual or even over a tribe. Such objects form the principal contents of the so-called medicine-bags.

In many localities there was prepared on special occasions a tribal "medicine." The Iroquois used such a remedy for healing wounds, and the Hopi still prepare one on the occasion of their Snake dance. Among the tribes who prepare tiswin, or tesvino, particularly the Apache, parts of a number of bitter aromatic, and even poisonous plants, especially a species of datura, are added to the liquid to make it "stronger"; these are termed medicines.

The causation and the nature of disease being to the Indian in large part mysteries, he assigned them to supernatural agencies. In general, every illness that could not plainly be connected with a visible influence was regarded as the effect of an introduction into the body, by malevolent or offended supernatural beings or through soreery practised by an enemy, of noxious objects capable of producing and continuing pain or other symptoms, or of absorbing the patient's vitality. These beliefs, and the more rational ones concerning many minor indispositions and injuries, led to the development of separate forms of treatment, and varieties of healers.

In every Indian tribe there were, and in some tribes still are, a number of men, and perhaps also a number of women, who were regarded as the possessors of supernatural powers that enabled them to recognize, antagonize, or eure disease; and there were others who were better acquainted with actual remedies than the average. These two classes were the "physicians." They were oftentimes distinguished in designation and differed in influence over the people as well as in responsibilities. Among the Dakota one was called wakan witshasha, 'mystery man,' the other pejihuta witshasha, 'grass-root man'; among the Navaho one is khathali, 'singer', 'chanter', the other izéëlini, 'maker of medicines'; among the Apache one is taiyin, 'wonderful,' the other simply izé, 'medicine.'

The mystery man, or thaumaturgist, was believed to have obtained from the deities, usually through dreams, but sometimes before birth, powers of recognizing and removing the mysterious causes of disease. He was "given" appropriate songs or prayers, and became possessed of one or more powerful fetishes. He announced or exhibited these attributes. and after convincing his tribesmen that he possessed the proper requirements, was accepted as a healer. In some tribes he was called to treat all diseases, in others his functions were specialized, and his treatment was regarded as efficacious in only a certain line of affections. He was feared as well as respected. In numerous instances the medicine-man combined the functions of a shaman or priest with those of a healer, and thus exercised a great influence among his people. All priests were believed to possess some healing powers. Among most of the populous tribes the medicine-men of this class were associated in guilds or societies, and on special oceasions performed great healing or "life (vitality) giving" eeremonies, which abounded in songs, prayers, ritual, and drama, and extended over a period of a few hours to nine days.

The ordinary procedure of the medicineman was about as follows: He inquired into the symptoms, dreams, and transgressions of tabus of the patient, whom he examined, and then pronounced his opinion as to the nature (generally mythical) of the ailment. He then prayed, exhorted, or sang, the last, perhaps, to the accompaniment of a rattle; made passes with his hand, sometimes moistened with saliva, over the part affected; and finally placed his mouth over the most painful spot

and sucked hard to extract the immediate principle of the illness. This result he apparently accomplished, often by means of sleightof-hand, producing the offending cause in the shape of a thorn, pebble, hair, or other object, which was then thrown away or destroyed; finally he administered a mysterious powder or other tangible "medicine," and perhaps left also a protective fetish. There were many variations of this method, according to the requirements of the case, and the medicineman never failed to exercise as much mental influence as possible over his patient. For these services the healer was usually well compensated. If the case would not yield to the simpler treatment, a healing ceremony might be resorted to. If all means failed, particularly in the case of internal diseases or of adolescents or younger adults, the medicineman often suggested a witch or wizard as the eause, and the designation of some one as the culprit frequently placed his life in jeopardy. If the medicine-man lost several patients in succession, he himself might be suspected either of having been deprived of his supernatural power or of having become a sorcerer, the penalty for which was usually death.

These shaman healers as a rule were shrewd and experienced men: some were sincere, noble characters, worthy of respect; others were charlatans to a greater or less degree. They are still to be found among the less civilized tribes, but are diminishing in number and losing their influence. Medicine-women of this class were found among the Apache and some other tribes.

The most accomplished of the medicinemen practised also a primitive surgery, and aided, by external manipulation and otherwise, in difficult labour. The highest surgical achievement, undoubtedly practised in part at least as a curative method, was trephining. This operation was of common occurrence and is still practised in Peru, where it reached its highest development among American tribes. Trephining was also known in quite recent times among the Tarahumare of Chihuahua, but has never been found north of Mexico.

The other class of medicine men and women corresponds closely to the herbalists and the old-fashioned rural mid-wives among white people. The women predominated. They formed no societies, were not so highly respected or so much feared as those of the other class, were not so well compensated, and had less responsibility. In general they used much

more common sense in their practice, were acquainted with the beneficial effects of sweating, poulticing, moxa, scarification, various manipulations, and numerous vegetal remedies, such as purgatives, emetics, etc. Some of these medicine-women were frequently summoned in cases of childbirth, and sometimes were of material assistance.

Besides these two chief classes of healers there existed among some tribes large medicine societies, composed principally of patients cured of serious ailments. This was particularly the case among the Pueblos. At Zuni there still exist several such societies, whose members include the greater part of the tribe and whose organization and functions are complex. The ordinary members are not actual healers, but are believed to be more competent to assist in the particular line of diseases which are the specialty of their society and therefore may be called by the actual medicine-men for assistance. They participate also in the ceremonies of their own society.

For writings on the subject consult Hrdlicka, Physiological and Medical Observations, Bull. 33, B. A. E., 1908 (in press). (A. H.

Medoctec. A former Malecite village on St. John r., New Brunswick, about 10 m. below the present Woodstock. In 1721 the name occurs as that of an Abnaki tribe. Present village is called Meductic.

Memkumlis ('islands in front'). A village of the Mamalelekala and Koeksotenok, on Village id., at the mouth of Knight inlet, Brit. Col.; pop. 215 in 1885; 90 in 1911.

Mēm-koom-lish.—Dawson in Trans. Roy. Soc. Can. for 1887, sec. II, 65. Mēmkumlis.—Boas in Bull. Am. Geog. Soc., 227, 1887.

Memoggyins (Mē'mogg'ins, 'having salmon traps'). A gens of the Koeksotenok, a Kwakiutl tribe.—Boas in Rep. Nat. Mus. for 1895, 330.

Memramcook (same as amlamkook, 'variegated') Mentioned by Rand (First Reading Book in Micmac, 81, 1875) as one of the 7 districts of the Micmac country. Name is

perpetuated in a town and a river in West-morland co., N.B.

Memruncook.-Alcedo, Dic. Geog., nt, 147, 1788.

Menawzhetaunaung. An Ottawa village, about 1818, on an island in the lake of the Woods. (J. M.)

Me-nau-zhe-tau-naung,—Tanner, Narr., 202, 1830. Me-nau-zhe-taw-naun.—Ibid , 198. Me-naw-zhe-tau-naung,—Ibid , 236.

Mer, Gens de la (French: 'people of the sea,' or Gens de la Mer du Nord, 'people of the sea of the north'). A collective term applied by the early Jesuits to the Algonquian tribes about Hudson bay. (J. M.)

Gens de la Mer du Nord.—Jes. Rel. 1670, 79, 1858. Gens de Mer.—Ibid , 1643, 3, 1858.

Mesheka (Me-she'-kă, 'mud turtle'). A gens of the Chippewa, q. v.—Morgan, Anc. Soc., 166, 1877.

Meskwadare (for Miskwādāsi, 'small waterturtle.'—W. J.). A gens of the Chippewa, q.y.

Me-skwä-da'-re.—Morgan, Anc. Soc., 166, 1877. Miskwädäs).—Wm. Jones, inf'n, 1906.

Methy. The burbot (Lota maculosa), the loch of the Canadian French, a fish common in the waters of N. W. Canada. The word is taken from the name of this fish in the Wood Cree dialect of Algonquian, the Cree proper term being mihyey, according to Lacombe. La Loche or Methy I. at headwaters of Churchill r., Saskatchewan is named from this fish; also a lake in Ungaya.

(A. F. C.)

Métis ('Mixed,' from French métis, a derivative of Latin miscere, 'to mix'), or metif. A term used by the French-speaking population of the N. W. to designate persons of mixed white and Indian blood. Among the Spanish-speaking population of the S. W. the word mestizo, of the same derivation, is used, but is applied more especially to those of half-white and half-Indian blood. The term musice, a corruption of mestizo, was formerly in use in the Gulf states. In the W. the term "half-breed" is loosely applied to all persons of mixed white and Indian blood, without regard to the proportion of each. See Mixedbloods. (J. M.)

Maitiffs.—Brevel fide Sibley (1805) in Am. State Papers, Ind. Aff., 1, 730, 1832. Mestigos.—Williams, Vt., 1, 494, 1809 (misprint). Mestigo.—Correct Spanish form; feminine mestica. Métis.—Correct French form. Mustees.—Report of 1741 in Carroll, Hist. Coll., S.C., 11, 353, 1836. Musteess.—Bermuda Royal Gazette, July 13, 1875, fide Jonr. Anthrpo. Inst., v, 491, 1876

tused in Bermuda for descendants of Indian slaves brought from the U. S.). Wissåkodéwininl.—Baraga, Otchipwe-Eng. Dict., 421, 1880 (Chippewa name: 'half-burnt wood man'; from wessåkode, 'burnt trees', referring to their mixed light and dark complexion; pl. Wissåkodéwininiwog. He gives aiabitäwisid as the literal word for 'half-breed').

Metlakatla. A Tsimshian town 15 m. s. of Port Simpson, Brit. Col. Anciently there were many towns in this neighbourhood, and while the mission station of the Church of England (established in 1857 at a Tsimshian village of the same name) was conducted by Rev. , Wm. Dunean, Metlakatla was a flourishing place. Trouble arising over the conduct of his work, Duncan moved in 1887 to Port Chester, or New Metlakatla, on Annette id., Alaska, and most of the Indians followed him. The old town contained 191 inhabitants in New Metlakatla, including whites 1911 and Indians, numbered 823 in 1890 and 465 in 1900. See Missions. (J. R. S.)

Metlah Carlah.—Horetzky, Canada on Pac, 148, 1874 Metlahcatlah.—Toln ie and Dawson, Vocabs. Brit. Col., map. 1884. Metlahkatlah.—Heming in Can. Pacific Ry. Rep. Prog., iii, 1877. Metlakahtla.— Whymper, Alaska, 59, 1869. Metlakatla.—Can. Ind. Aff., pt. II, 68, 1902. Metla-katla.—Dawson, Queen Charlotte Ids., 1238, 1880.

Metstoasath (Metstö' asath). A sept of the Toquart, a Nootka tribe.—Boas in 6th Rep. N. W. tribes of Canada, 31, 1890.

Miahwahpitsiks (Mi-ah-wah'-pit-siks, 'seldom lonesome'). A division of the Piegan tribe of the Siksika.

Mi-ah-wah'-pit-siks.—Grinnell, Blackfoot Lodge Tales, 209, 1892. Seldom Lonesome.—Ibid., 225.

Miawkinaiyiks ('big topknots'). A division of the Piegan tribe of the Siksika.

Big Topknots.—Grinnell, Blackfoot Lodge Tales, 209, 1892. Ml-aw'-kin-ai-yiks.—Ibid., 225.

Michacondibi (mitcha, 'large,' indibe, or gindibe, 'head,': 'big head' (Baraga), possibly referring to the Têtes de Boule). An Algonquian(?) tribe or band, probably a part of the Cree or of the Maskegon, formerly on a river of the same name (Albany r.?) entering the s. end of Hudson bay from the s.w. Lahontan placed them about the headwaters of Ottawa r.

Machakandibi.—Lahontan, New Voy., 1, 231, 1703. Machandibi.—Lahontan (1703), New Voy., map, 1735. Machantiby.—La Chesnaye (1697) in Margry, Déc., vi., 6, 1886. Michacondibis.—Bacqueville de la Potherie, Hist. Am., 11, 49, 1753.

Michipicoten (Mishibigwadunk, 'place of bold promontories,' or 'region of big places.'—

W. J.). The designation of the Algonquian Indians living on Michipicoten r., Ontario, N. of lake Superior, and northward. In Canada they are officially classed as "Michipicoten and Big Heads," consisting of two bands belonging to different tribes. The smaller band consists of Chippewa and are settled on a reservation known as Gros Cap, on the w. side of the river, near its mouth; the other band belongs to the Maskegon and resides mainly near the Hudson's Bay Co.'s post on Brunswick lake, on the N. side of the height-of-land. The two bands together numbered 283 in 1884, and 358 in 1906. See Têtes de Boule.

Micmac (Migmak, 'allies'; Nigmak, 'our allies,'-Hewitti. The French called them Souriquois. An important Algonquian tribe that occupied Nova Scotia, Cape Breton and Prince Edward ids., the N. portion of New Brunswick, and probably points in s. and w. Newfoundland. While their neighbours the Abnaki have close linguistic relations with the Algonouian tribes of the Great lakes, the Miemae seem to have almost as distant a relation to the group as the Algonquians of the plains (W. Jones). If Schoolcraft's supposition be correct, the Micmac must have been among the first Indians of the N.E. coast encountered by Europeans, as he thinks they were visited by Sebastian Cabot in 1497, and that the 3 natives he took to England were of this tribe. Kohl believes that those eaptured by Cortereal in 1501 and taken to Europe were Micmae. Most of the early voyagers to this region speak of the great numbers of Indians on the N. coast of Nova Scotia and New Brunswick, and of their fierce and warlike character. They early became friends of the French, a friendship which was lasting and which the English—after the treaty of Utrecht in 1713, by which Acadia was ceded to them—found impossible to have transferred to themselves for nearly half a century. Their hostility to the English prevented for a long time any serious attempts at establishing British settlements on the N. coast of Nova Scotia and s. and E. coasts of New Brunswick, for although a treaty of peace was concluded with them in 1760, it was not until 1779 that disputes and difficulties with the Micmac ceased. In the early wars on the New England frontier the Cape Sable Miemac were especially noted.

The missionary Biard, who, in his Relation of 1616, gives a somewhat full account of the

habits and characteristics of the Micmac and adjacent tribes, speaks in perhaps rather too favourable terms of them. He "says: You could not distinguish the young men from the girls, except in their way of wearing their belts. For the women are girdled both above and below the stomach and are less nude than the men. . . . Their clothes are trimmed with leather lace, which the women curry on the side that is not hairy. They often curry both sides of elk skin, like our buff skin, then variegate it very prettily with paint put on in a lace pattern, and make gowns of it; from the same leather they make their shoes and strings. The men do not wear trousers. . . . they wear only a cloth to cover their nakedness." Their dwellings were usually the ordinary conical wigwams covered with bark. skins, or matting. Biard says that "in summer the shape of their houses is changed; for they are broad and long that they may have more air." There is an evident attempt to show these summer bowers in the map of Jacomo di Gastaldi, made about 1550, given in vol. III of some of the editions of Ramusio. Their government was similar to that of the New England Indians; polygamy was not common, though practised to some extent by the chiefs; they were expert canoemen, and. drew much of their subsistence from the waters. Cultivation of the soil was very limited, if practised at all by them, when first encountered by the whites. Biard says they did not till the soil in his day.

According to Rand Micmae First Reading Book, 1875), they divided their country, which they called Megumage, into 7 districts, the head chief living in the Cape Breton district. The other six were Pictou, Memramcook. Restigouche, Eskegawaage, Shubenacadie, and Annapolis. The first three of these formed a group known as Siguniktawak; the other three formed another group known as Kespoogwit. In 1760 the Micmae bands or villages were given as Le Have, Miramichi, Tabogimkik, Pohomoosh, Gediak Shediac. Pictou, Kashpugowitk Kespoogwit), Chignecto, Isle of St. Johns, 'Prince Edward id Nalkitgoniash. Cape Breton, Minas, Chigabennakadik Shubenacadie . Keshpugowitk Kespoogwit, duplicated, and Rishebouctou Richibucto . The Gaspesians are a band of Micmae differing somewhat in dialect from the rest of the tribe.

In 1611 Biard estimated the Micmae at 3,000 to 3,500. In 1760 they were reported

at nearly 3,000, but had been lately much wasted by sickness. In 1766 they were again estimated at 3,500; in 1880 they were officially reported at 3,892, and in 1884 at 4,037. Of these, 2,197 were in Nova Scotia, 933 in New Brunswick, 615 in Quebec, and 292 on Prince Edward at In 1911, according to the Report of Canadian Indian Affairs, they numbered 2,941, of whom 423 were in Quebec province, 1,046 in New Brunswick, 2,026 in Nova Scotia, and 292 on Prince Edward id. The number in Newfoundland is not known.

The Micmae villages are as follows: Antigonish (?), Beaubassin (mission), Boat Harbour, Chigneeto, Eskasoni, Indian Village, Isle of St. Johns, Kespoogwit, Kigicapigiak, Lahave, Maria, Minas, Miramichi, Nalkitgoniash, Nipisiguit, Pictou, Pohomoosh, Restigouche, Richibucto, Rocky Point, Shediac, Shubenacadic, and Tabogimkik.

Miemissonks. Given as the name of a tribe somewhere between Bellingham bay and Fraser r., in Washington or British Columbia. Probably Salishan, otherwise unidentifiable.

Mie-mis-souks, Starling in U.S. Ind. Aff. Rep., 170, 1852. Misonk.—Ibid., 171

Migichihiliniou (Migizīwīninīwāg, 'people of the Eagle clan'; or perhaps Migisiwin-Intung, 'people with wampum', or 'people with the cowrie shells.'-W. J.). Given by Dobbs as the name of a band of (Algonquian?) Indians residing on the "Lake of Eagles," between lake Winnipeg and lake of the Woods-probably Eagle lake, about 60 m E. of lake of the Woods. He thinks they were related to the Assimiboin, "because of the great affinity of their language." As this statement is in contradiction to his subsequent assertion, known from other evidence to be correct, that the Assimiboin dwelt w. of lake Winnipeg, it may be inferred that these "Eagle-men" belong to the Chippewa, who have among their gentes one named Omegeeze, "Bald Eagle,"

(J. M. C. T.)

Eagle ey'd Indians.—Dobbs, Hudson Bay, 24, 1744. Eagle Eyed Indians.—Ibid, map Migichihilinious.—Ibid, 24

Mihtukmechakick. A name, signifying tree eaters,' which, according to Roger Williams' Key (Mass. Hist. Soc. Coll., 1st s., 111, 209, 1794), referred to "a people so called (living between three or four hundred m. w. into the land) from their eating mih-luck-quash 'trees.' They are men eaters; they set no corn, but live on the bark of chestnut and walnut and other fine trees. They dry and eat this bark with the fat of beasts and sometimes of men. This people are the terror of the neighbouring natives." The name Adirondack (q. v.), applied by the Iroquois to certain Algonquian tribes of Canada, signifies 'they cat trees.'

Mikonoh ($M\tilde{v}k\tilde{v}mk$, 'snapping turtle'). A gens of the Chippewa, q. v.

Mi'kina'k.—Wm. Jones, inf'n, 1906 — Mik-o-noh'.— Morgan, Anc. Soc., 166, 1877

Minas. A Miemae village or band in Nova Scotia in 1760.—Frye (1760) in Mass. Hist. Soc. Coll., 1st s., x, 115, 1809

Mingan (Ma'ingūn, 'wolf'). A Montagnais (Algonquian) village near the mouth of Mingan r., on the x. shore of the gulf of St. Lawrence, Quebec. It is the general rendezvous for all the Indians for several hundred miles around. The name occurs in the grant of the seigniory in 1661, and a mission was probably established there soon after (Hind, Lab. Penin., I, 43-44, 1863). The village numbered 178 inhabitants in 1884, and 198 in 1911. A Ma'ingan.—Wm Jones, inf'n, 1906.

Minishinakato. A band of the Assiniboin. Gens du Lac.—Hayden, Ethnog and Philol Mo Val., 387, 1862 Min'-i-shi-nak'-a-to.—1bid

Miramichi. A former Miemae village on the right bank of Miramichi r., New Brunswick, where it flows into the gulf of St. Lawrence. The French had a mission there in the 17th century, and in 1760 there was a Miemae village or band of that name. (J. M.)

Merlmichi.—Frye (1760) in Mass Hist Soc Coll, 1st s., x, 115, 1809 Merrimichi.—Mass Hist Soc. Coll., 1st s., 11, 100, 1794 Miramichi.—Beauharnois (1745) in N. Y. Doc. Coll. Hist., x, 5, 1858. Mishtawayawininiwak. The Chippewa name for that part of the tribe living in Canada.

Mictawayang,—Wm Jones, mf/n, 1905 (e=sh) Mishtawaya-wininiwak.—A S Gatschet, Ojibwa MS , B A E., 1882 (wininiwak = people)

Miskouaha. One of the 4 divisions of the Nipissing at the lake of Two Mountains, Quebee, in 1736. Their totem was blood, for which reason they were also called Gens du Sang.

Gens du Sang.—Chauvignerie (1736) in N. Y. Doc. Col. Hist., 1x, 1053, 1855. Mikouachakhi.—Jes. Rel. 1643, 38, 1858. (same?). Miskouaha.—Chauvignerie, op. cit. Miskuakes.—Chauvignerie as quoted by Schooleraft, Ind. Tribes, 111, 554, 1853.

Missiassik (on the etymology of the name, see McAleer, Study in the Etymology of Missisquoi, 1906). An Algonquian tribe or body of Indians belonging to the Abnaki group, formerly living on Missisquoi r. in N. Vermont. Whether they formed a distinct tribe or a detached portion of some known Abnaki tribe is uncertain. If the latter, which seems probable, as the name "Wanderers" was sometimes applied to them, it is possible they were related to the Sokoki or to the Pequawket. They had a large village at the mouth of Missisquoi r., in Franklin co., on lake Champlain, but

abandoned it about 1730 on account of the ravages of an epidemic, and removed to St. Francis, Quebec. They subsequently sold their claims in Vermont to the "Seven Nations of Canada". Chauvignerie in 1736 gives 180 as the number of their warriors, indicating a population of 800. They seem to have been on peaceable terms with the Iroquois.

Mission. One of the three bodies of Seton Lake Lillouet on the w. side of Seton lake, under the Williams Lake agency, Brit. Col.; pop. 63 in 1911.—Can Ind Aff., pt. II, 18, 1911

Mission (Burrard Inlet). The name given by the Canadian Dept. of Indian Affairs to one of six divisions of Squawmish under the New Westminster agency, Brit. Col.; pop. 221 in 1911.

Mission Valley. The local name of a band of Salish of Fraser* superintendency, Brit. Col. -Can. Ind. Aff., 79, 1878-79.

Missions. From the very discovery of America the spiritual welfare of the native tribes was a subject of concern to the various colonizing nations, particularly Spain and France, with whom the Christianization and civilization of the Indians were made a regular part of the governmental scheme, and the missionary was frequently the pioneer explorer and diplomatic ambassador. In the English colonization, on the other hand, the work was usually left to the zeal of the individual philanthropist or of voluntary organizations.

First in chronological order, historical importance, number of establishments, and population, come the Catholic missions, conducted in the earlier period chiefly by Jesuits among the French and by Franciscans among the Spanish colonies. The earliest mission establishments within the present United States; were those begun by the Spanish Franciscan

^{*} Probably in present New Westminster agency

Fathers, Padilla, Juan de la Cruz, and Descalona of the Coronado expedition, among the Quivira (Wichita), Pecos, and Tigua in 4542. Three years later the work was begun among the Texas tribes by Father Olmos. A century thereafter the first Protestant missions (Congregational) were founded by Mayhew and Eliot in Massachusetts. From that period the work was carried on both N. and S. until almost every denomination was represented, including Orthodox Russian in Alaska and the Mormons in Utah.

The New York mission began in 1642, among the Mohawk, with the ministration of the heroic Jesuit captive, Father Isaae Jogues, who met a cruel death at the hands of the same savages 4 years later. During a temporary peace between the French and the Iroquois in 1653 a regular post and mission church were built at Onondaga, the capital of the confederacy, by permission of the league. The Oneida, Cavuga, and Seneca invited and received missionaries. Much of their welcome was undoubtedly due to the presence in the Iroquois villages of large numbers of incorporated Christian captives from the destroyed Huron nation. The truce lasted but a short time, however, and before the summer of 1658 the missionaries had withdrawn and the war was again on. In 1666 peace was renewed and within a short time missions were again founded among all the tribes. In 1669 a few Christian Iroquois, sojourning at the Huron mission of Lorette, near Quebec city, withdrew and formed a new mission settlement near Montreal, at a place on the St. Lawrence known as La Prairie, or under its mission name, St. François-Navier-des-Prés, the precursor of the later St. Urançois-Navier-du-Sault and the modern Caughnawaga. The new town soon became the rallying point for all the Christian Iroquois, who removed to it in large numbers from all the tribes of the confederacy, particularly from the Mohawk towns. There also gathered the Huron and other Christian captives from among the Iroquois, as also many converts from all the various eastern Algonquian tribes in the French alliance. To this period belongs the noted Jesuit scholar. Etienne de Carheil, who, arriving in 1666, devoted the remaining 60 years of his life to work among the Cayuga, Hurons, and Ottawa, mastering all three languages, and leaving behind him a manuscript dictionary of Huron radices in Latin and French.

In 1668, also, a considerable body of Christian Cayuga and other Iroquois, together with some adopted Hurons, crossed lake Ontario from New York and settled on the N. shore in the neighbourhood of Quinte bay. At their request Sulpician priests were sent to minister to them, but, within a few years, the immigrant Indians had either returned to their original country or scattered among the other Canadian missions. In 1676 the Catholic Iroquois mission town of La Montagne was founded by the Sulpician fathers on the island of Montreal, with a welf-organized industrial school in charge of the Congregation sisters. In consequence of these removals from the Iroquois country and the breaking out of a new war with the Five Tribes in 1687, the Jesuit missions in New York were brought to a close. In the seven years' war that followed Christian Iroquois of the missions and heathen Iroquois of the Five Nations fought against each other as allies of French or English, respectively. La Montagne was abandoned in 1704, and the mission transferred to a new site at the Sault-au-Recollet, N. of Montreal. In 1720 this was again removed to the lake of Two Mountains (Oka or Canasadaga) on the Ottawa r., 20 m. above Montreal, where the Iroquois were joined by the Nipissing and Algonkin, of the former Sulpician mission town of He-aux-Tourtres. Among the noted workers identified with it, all of the scholarly Sulpician order, may be named Revs. Dépéret, Güen, Mathevet, 1746-81; De Terlaye, 1754-77; Guichart, Dufresne, and Jean Andre Cuoq. 1843-90. Several of these gave attention also to the Algonkin connected with the same mission, and to the Iroquois of St. Regis and other stations. All of them were fluent masters of the Iroquois language, and have left important contributions to philology, particularly Cuoq, whose "Études philologiques" and Iroquois dictionary remain our standard authorities.

All effort among the villages of the confederacy was finally abandoned, in consequence of the mutual hostility of France and England. In 1748 the Sulpician Father François Picquet founded the new mission settlement of Presentation on the St. Lawrence at Oswegatchie, the present Ogdensburg, N. Y., which within three years had a prosperous population of nearly 400 families, drawn chiefly from the Onondaga and Cayuga tribes. About 1756 the still existing mission town of St. Francis Regis (St. Regis), on the s. side of the St Lawrence where the Canada-New York bound

ary intersects it, was founded under Jesuit auspies by Iroquois emigrants from Caughnawaga mission. The Oswegatchie settlement declined after the Revolution until its abandonment in 1807. Caughnawaga, St. Regis, and Lake of Two Mountains still exist as Catholic Iroquois mission towns, the two first named being the largest Indian settlements N. of Mexico.

CANADA EAST; NEWFOUNDLAND, ETC .-Canada, being originally a French possession, the mission work for a century and a half was almost entirely with the Catholics. Port Royal. now Annapolis, Nova Scotia, was founded in in 1605, and the resident priest, Father Flèche, divided his attention between the French settlers and the neighbouring Micmac. 1611 the Jesuits, Fathers Peter Biard and Enemond Massé, arrived from France, but finding work among the Micmac made difficult by the opposition of the governor, they went to the Abnaki, among whom they established a mission on Mt. Desert id., Maine, in 1613. The mission was destroyed in its very beginning by the English Captain Argall.

In 1619 work was resumed among the Miemae and the Malecite of Nova Scotia, New Brunswick and lower Quebec under the Récollet Franciscans and continued for at least half a century. The most distinguished of these Récollets was Father Chrestien Le Clereq, who, while stationed at the Micmac mission of Gaspe, at the mouth of the St. Lawrence, from 1655 to about 1665, mastered the language and devised for it a system of hieroglyphic writing which is still in use in the tribe. Another of the same order is said to have been the first to compile a dictionary of a Canadian language, but the work is now lost. The eastern missions continued, under varying auspices and fortunes, until the taking of Louisburg, Nova Scotia, by the English in 1745, when all the missionaries in Nova Scotia and New Brunswick were either deported or compelled to seek other refuge. In their absence the Abbé Maillard, of Nova Scotia, ministered for some years to the Micmac and the Maleeite, at first in secret and then openly after the peace of 1760. To him we owe a Micmac grammar and a treatise on the customs of the Indians. It was not until within the last century, when international and sectarian jealousies had largely passed away, that the work was resumed, continuing without interruption to the present time.

Work was begun in 1615 by the Récollets among the roving Montagnais and Algonkin of the Saguenay, Ottawa, and lower St. Lawrence region. The pioneers were Fathers Dolbeau, Jamet, and Du Plessis, together with Father Le Caron in the Huron field. In 1636 Dolbeau had extended his ministrations to the outlying bands of the remote Eskimo of Labrador. The principal missions were established at Tadoussac (Montagnais), the great trading resort at the mouth of the Saguenay; Gaspe (Montagnais and Miemac) and Three Rivers (Montagnais and Algonkin), all in Ouebee province; Miscou, N. B., for the Micmac, and on Georgian bay for the Hurons. In t625 the Récollets called the Jesuits to their aid, and a few years later, withdrew entirely, leaving the work to be continued by the latter order. In 1637 the Jesuit mission of St. Joseph was founded by Le Jeune at Sillery, near Ouebec, and soon became the most important colony of the christianized Montagnais and Algonkin. In 1646, at the request of the Abnaki, Father Gabriel Druillettes was sent to that tribe. In consequence of the later New England wars, large numbers of the Abnaki and other more southerly tribes took refuge in the Canadian missions.

In 1641 Fathers Charles Raymbault and Isaac Jogues, among the Ottawa bands on the headwaters of the river of that name, aecompanied a party to the far W, and discovered the great lake Superior, planting a cross and preaching in the camps about the present Sault Ste. Marie, Mich. In the next year a regular mission was established among the Nipissing, on the x, shore of the lake of the same name. Other missions followed, continuing until the dispersion of the Algonkin tribes by the Iroquois in 1650. Most of the fugitives fled westward, roving along the shores of lake Superior without missionary attention until visited by the Jesuit Allouez in 1667. Other names connected with this early Algonkin mission were those of Pijart, Garreau, and the pioneer explorer Réné Ménard. In 1657 the first Sulpicians arrived at Quebec from France, and soon afterward began work among the neighbouring tribes, but with principal attention to the Iroquois colonies on both shores of lake Ontario, at Quinte and Oswegatchie. To this period belongs the wonderful canoe voyage of discovery by the two Sulpicians, Galinée and Dollier de Casson, in 1669-70, from Montreal up through the Great lakes to Mackinaw, where they were welcomed by the Jesuits Dablon and Marquette, and then home, by way of French r., Nipissing, and the Ottawa. No less important was the discovery of an overland route from the St. Lawrence to Hudson bay in 1671-72 by the Sieur St. Simon, accompanied by the Jesuit Charles Albanel. Ascending the Saguenay from Tadoussae they crossed the divide, and after 10 months of toilsome travel finally reached the bay near the mouth of Rupertr., where Albanel, the first missionary to penetrate this remote region, spent some time preaching and baptizing among the wandering Maskegon along the shore. In 1720 a number of the christianized Iroquois, with fragments of the Algenkin bands, after years of shifting about, were gathered into a new mission settlement at Oka, or lake of Two Mountains (Lac des Deux Montagnest, also known under its broquois name of Canasadaga, on the x, bank of the Ottawa, above the island of Montreal. It still exists as one of the principal Indian settlements.

Among the earlier missionaries in this region who have made important contributions to Algonquian philology may be noted: Father Louis André, Jesuit, who spent more than 40 years with the Montagnais and the Algonkin, from 1669, leaving behind him a manuscript dictionary of the Algonkin, besides a great body of other material; Father Antonio Silvy, Jesuit, of the same period, author of a manuscript Montagnais dictionary: Father Pierre Laure, Jesuit, with the Montagnais, 1720-38, author of a manuscript Montagnais grammar and dictionary, and other works; Father Jean Mathevet, Sulpician, at Oka, 1746 to 1781, the author of an Abnaki dictionary; Father Vincent Guichart, ministering to Algonkin and Iroquois at Oka from 1754 until his death in 1793, master of both languages and author of a manuscript Algonkin grammar; the Abbé Thavenet, Sulpician, at Oka, from about 1793 to 1815, author of an Algonkin grammar and dictionary and other miscellany, still in manuscript; Father J. B. La Brosse, Jesuit, with the Montagnais and Malecite, 1754 to his death in 1782, author of a number of religious and teaching works in the Montagnais language. Among the most distinguished labourers within the last century in the Montagnais, Algonkkin, and Maskegon territories, stretching from the St. Lawrence to Hudson bay, may be named Fathers Durocher (1829-73), Carin (1845-57), Laverlochère (1845-51), Lebret (1861-69), Guéguen (1864-88+), and Prévost

(1873-88+), all of the Oblate order, and each the author of some important contribution to American philology. Rev. Charles Guay has given attention to the language among the Miemae of New Brunswick. In recent years the most prominent name is that of Father J. A. Cuoq. Sulpician, already noted, missionary at Oka for more than half a century, beginning in 1847, master of the Mohawk and Algonkin languages, and author of a dictionary of each, besides numerous other important linguistic works.

According to the Indian Affairs Dept. Report for 1911 the Catholic Indians of the five castern provinces numbered 19,652, including all those of Prince Edward Id., Nova Scotia, and New Brunswick, five-sixth of those of Quebec, and one-third of the Christian Indians of Ontario. Every settlement of importance had a church, school, or visiting priest, the standard for industry being fair, for temperance good, and for honesty and general morality exceptionally high.

The noted Huron missions hold a place by theniselves. The beginning was made by the Récollet, Joseph le Caron, who accompanied Champlain on his visit to the Iluron country in 1615. The tribe at that time occupied the shores of Georgian bay, Ontario, and with other incorporated bands may have numbered 10,000 souls or more (some estimates are much higher), in from 15 to 30 towns or villages, several of which were strongly palisaded. They were probably then of strength equal to that of their hereditary enemies and final destroyers, the Iroquois of New York. In more or less close alliance with the Hurons were the cognate Tionontati and Neutrals, farther to the s. and s. w., in the peninsula between lakes Erie and Huron. Le Caron spent the winter with the Hurons and Tionontati, established the mission of St. Gabriel, made a brief dictionary of the language, and returned to the French settlements in the spring. The work was continued for some years by other Récollets, Gabriel Sagard, author of a Huron dictionary and a history of the Récollet missions, and Nicolas Viel, who was drowned in the Sault-au-Récollet, Laval co., Que, in 1625; whether accidentally or maliciously is uncertain. In 1625 the Jesuits arrived in Canada to assist the Récollets, and the next year the heroic Jean de Brébœuf and another Jesuit, with Father Joseph Dallion, Récollet, reached St. Gabriel. The Neutrals also were now visited, but without successful result. Th

work was brought to a temporary close by the English occupancy of Canada in 1629.

In 1634, after the restoration of French control, the work was resumed, this time by the Jesuits alone, with Brébœuf as superior, assisted then or later by Fathers Daniel, Garnier, Jogues, and others of less note. The mission church of Immaculate Conception was built in 1637 at Ossossani, one of the principal towns; St. Joseph was established at Teananstavae, the capital, in the next year; the principal war chief of the tribe was baptized. and Christianity began to take root, in spite of the suspicions engendered by two wasting epidemic visitations, for which the missionaries were held responsible and solemnly condemned to death, until the current of opposition was turned by Brébecuf's courageous bearing. In 1639 there were 4 established missions with 13 priests working in the Huron country and visiting in the neighbouring tribes. St. Marv. on Wve r., had been made the general headquarters. A visitation of smallpox again spread terror through the tribe and for a time rendered the position of the missionaries unsafe. In consequence of these successive epidemics within a few years, several towns had been depopulated and the tribe so much weakened as to leave it an easy prey for the invading Iroquois, whose inroads now became more constant and serious than before.

In 1641 the Iroquois invaded the Huron country in force, killed many, and carried off many others to captivity. In 1648, after a temporary truce, they resumed the war of extermination, with perhaps 2,000 warriors well armed with guns obtained from the Dutch, while the Hurons had only bows. On July 4, Teananstayae, or St. Joseph, on the site of the present Barrie, was attacked and destroyed, the missionary, Father Anthony Daniel, killed with several hundred of his flock, and about 700 others were carried off as captives. The whole country was ravaged throughout the fall and winter, and one town after another destroyed or abandoned. On Mar 16, 1649, a thousand warriors attacked St. Ignatius town and massacred practically the whole population, after which they proceeded at once to the neighbouring town of St. Louis, where the burning and massacre were repeated, and two missionaries. Brébœuf and Father Gabriel Lalemant killed after hours of the most horrible tortures. An attack on St. Mary where Father Ragueneau was stationed, was repulsed, after which the Iroquois retired.

This was the death-blow to the Huron nation. Fifteen towns were abandoned and the people scattered in every direction. Two whole town populations submitted to the conquerors and removed in a body to the Seneca country. Others fled to the Tionontati, who were now in turn invaded by the Iroquois and compelled, by burning and massacre, with the killing of Fathers Garnier and Chabanel, to abandon their country and flee with the rest. Others took refuge on the islands of lake Huron. Some joined the Neutrals, who soon after met the same fate.

For the next 50 years the history of the confederated Huron and Tionontati remmants is a mere record of flight from pursuing enemies—the Iroquois in the E. and the Sioux in the W. A considerable body which sought the protection of the French, after several removals was finally settled by Father M. J. Chaumonot in 1693 at Jeune Lorette, near Quebec, where their descendants still reside see Hurons; Lorette:. To Chaumonot we owe a standard grammar and dictionary of the Huron language, only the first of which is yet published. In the meantine, in 1656-57, two-thirds of this band had bodily removed to the Iroquois country to escape destruction.

The other fugitives, composed largely or principally of Tiononotati, fled successively to Manitoulin ad, in lake Huron; Mackinaw; the Noquet ids, in Green bay, Wis.; westward to the Mississippi; back to Green bay, where they were visited by the Jesuit Menard in 1660; to Chegoimegon, near the present Bayfield, Wis., on the s shore of lake Superior. where the Jesuit Allouez ministered to them for several years; back, in 1670, to Mackinaw, whence another party joined the Iroquois and finally down to Detroit, Mich., when that post was founded in 1702. In 1751, a part of these, under Father de la Richard, settled at Sandusky, Ohio. From this period the Wyandot, as they now began to be called, took their place as the leading tribe of the Ohio region and the privileged lighters of the confederate council fire. Their last Jesuit missionary. Father Peter Potier, died in 1781, after which they were served by occasional visiting priests and later by the Presbyterians and the Methodists, until about the period of their removal to Kansas in 1842

2 GEURGE V., A. 1912

The work of the Episcopalians (Anglican Church) among the Iroquois of New York, begau about 1700 and continued in Canada after the removal of a large part of the confederacy from the United States. In 1763 Rev. Thomas Wood of Nova Scotia, having become acquainted with the Maillard and obtained the use of his Micmac manuscript, applied himself to the study of the language, dividing his ministrations thenceforth between the Indians and the whites until his death in 1778. He preached in the native tongue, in which he produced several religious translations. This seems to have been the only work recorded for this denomination in this part of the Dominion, and in the Rep, of the Indian Affairs Dept. for 1911 no Indians are enumerated under this heading in the provinces of Nova Scotia, New Brunswick, or Prince Edward Id. In Quebec province the same report gives this denomination 1,015 Indians, including 40 Abnaki at St. Francis and 49 Montagnais at Lake St. John, 344 at Rupert House, 200 at Waswanipi lake, 175 at lake Mistassini and 151 at Eastmain.

In Ontario province, besides the work already noted among the Iroquois, active and successful missionary effort has been carried on by the Episcopalians among the various Chippewa bands and others since about 1830. One of the principal stations is that at Garden River, below Sault Ste. Marie, begun in 1835 by Rev. Mr. McMurray, who was succeeded a few years later by Rev. F. A. O'Meara, afterward stationed on Mantoulin id., and later at Port Hope on lake Ontario. Besides building up a flourishing school, Mr. O'Meara found time to translate into the native language the Book of Common Prayer, considerable portions of both the Old and New Testament, and a volume of hymns, the last in co-operation with the Rev. Peter Jacobs. He died about 1870. Of the more recent period the most noted worker is Rev. E. F. Wilson, who began his labours under the auspices of the Church Mission Society in 1868. To his efforts the Indians owe the Shingwank and Wawanosh homes at Sault Ste. Marie, Ontario, where some 60 or 80 children are eared for, educated and taught the rudiments of trades and simple industries. A school journal, set up and printed by the Indian boys, has also been conducted at intervals, under various titles, for nearly 30 years. Mr. Wilson is the author of a number of Indian writings, of which the most important is probably a

'Manual of the Ojibway Language,' for the use of mission workers.

In 1835 a mission was established also on Thames r., among the Munsee, a remnant of those Delaware refugees from the United States who for so many years of the colonial period had been the object of Moravian care. One of the pioneer workers, Rev. Mr. Flood, translated the church liturgy into the language of the tribe.

Of 21,291 Christian Indians officially reported in 1911 in Ontario province, 7,652, or more than one-third, are credited to the Episcopal or Anglican church, including—Iroquois in various bands, 2,881; "Chippewas, Munsees and Oncidas of the Thames", 487; "Ojibbewas of lake Superior," 554; "Chippewas and Saulteaux of Treaty No. 3" (Manitoba border), 879; "Munsees of the Thames," (originally Moravian converts from the United States), 50; "Ojibbewas and Ottawas of Manitoulin and Cockburn ids.," 178; Chippewa and Potawatomi of Walpole id., 390; Garden River res., 194, and one or two smaller groups.

The work among the Eskimo of the Labrador coast-officially a part of Newfoundlandis conducted by the Moravians. In 1752 a reconnoitring missionary party landed near the present Hopedale, but was attacked by the natives, who killed Brother J. C. Ehrhardt and 5 sailors, whereupon the survivors returned home and the attempt for a long time was abandoned. One or two other exploring trips were made for the same purpose, and in 1769 permission to establish missions on the Labrador coast was formally asked by the Moravians and granted by the British government. In 1771 the first mission was begun at Nain, apparently by Brother Jens Haven. It is now the chief settlement on the Labrador coast. In 1776 Okkak was established by Brother Paul Layritz, followed by Hopedale in 1782, and Hebron in 1830. To these have more recently been added Zoar and Ramah. The efforts of the missionaries have been most successful, the wandering Eskimo having been gathered into permanent settlements, in each of which are a church, store, mission residence, and workshops, with dwelling houses on the model of the native ight. Besides receiving religious instruction, the natives are taught the simple mechanical arts, but to guard against their innate improvidence, the missionaries have found it necessary to introduce the communal system, by taking charge of

all food supplies to distribute at their own discretion. All the missions are still in flour-ishing operation, having now under their influence about 1,200 of the estimated 1,500 Eskimo along a coast of about 500 m. in length. The total number of mission workers is about 30 (see Hind, Labrador Peninsula).

To these Moravian workers we owe a voluminous body of Eskimo literature—grammars, dictionaries, scriptural translations, hymns, and miscellaneous publications. Among the prominent names are those of Bourquin, about 1880, anthor of a grammar and a Bible history; Burghardt, gospel translations, 1813; Erdmann, missionary from 1831 to 1872, a dictionary and other works; Freitag, a manuscript grammar, 1839; and Kohlmeister, St. John's Gospel, 1810. The majority of these Moravian publications were issued anonymously.

In 1820 the Wesleyan Methodists, through Rev. Alvin Torry, began work among the immigrant Iroquois of the Ontario reservations, which was carried on with notable success for a long term of years by Rev. William Case. In 1823 Mr. Case extended his labours to the Missisauga, a band of the Chippewa, N. of lake Ontario. The most important immediate result was the conversion of Peter Jones (q.v.) (Kahkewaquonaby), a half-breed, who was afterward ordained, and became the principal missionary among his people and the more remote Chippewa bands until his death in 1856. He is known as the author of a collection of hymns in his native language and also a small 'History of the Ojebway Indians.' Another noted missionary convert of this period was Shawundais, or John Sunday. Another native worker of a somewhat later period was Rev. Henry Steinhauer, Chippewa, afterward known as a missionary to the Cree. Still another pioneer labourer in the same region was Rev. James Evans, afterward also missionary to the Cree and inventor of a Cree syllabary. Contemporary with the transfer of Evans and Steinhauer to the Cree in 1840, Rev. George Barnley was sent to establish a mission at Moose Factory, James bay, which, however, was soon after abandoned. Beginning in 1851, Rev. G. M. McDougall established Methodist mission stations among the Chippewa along the N. shore of lake Superior, at Garden River and elsewhere, but afterward transferred his operations also to Cree territory. In 1861-62 Rev. Thomas Hurlburt, already a veteran worker, and considered the most competent Chippewa linguist in the Methodist mission, conducted a monthly journal, 'Petaubun,' in the language, at the Sarnia station.

According to the official Canadian Indian Report for 1911, the Methodist Indians of E. Canada numbered 4,513, in Ontario, and 536 in Quebec, a total of 5,039, none being reported for the other eastern provinces. Those in Ontario included half the "Chippewas of the Thames," nearly all of the "Mississaguas," and "Iroquois and Algonquins of Watha," 310 of "Moravians of the Thames," and one-sixth of the "Six Nations" on Grand r. Those in Quebec province are chiefly Iroquois of the Oka, St. Regis, and Caughnawaga settlements.

Of other denominations, the same official report enumerates 1,078 Baptists in Ontario, almost entirely among the Six Nations on Grand r., with 18 Congregationalists, 16 Presbyterians, and a total of 406 of all other denominations not previously noted. In the other eastern provinces—Quebec, New Brunswick, Nova Scotia, and Prince Edward Id.—there is no representation with the exception of 17 in Quebec accredited to "Other Christian Beliefs."

The work of Rev. Silas T. Rand among the Miemae of Nova Scotia stands in a class by itself. Educated in a Baptist seminary, he became a minister, but afterward left that denomination to become an independent worker. His attention having been drawn to the neglected condition of the Indians, he began the study of the Miemac language, and in 1849 succeeded in organizing a missionary society for their special instruction. Under its auspices until its dissolution in 1865, and from that time until his death in 1889, he gave his whole effort to the teaching of the Micmae and to the study of their language and traditions. He is the author of a Micmac dietionary and of a collection of tribal myths as well as of numerous minor works, religious and miscellaneous.

Canada, Central (Manitoba, Saskatchewan, Alberta).—In the Great Plains region stretching from Hudson bay southwestward to the Rocky mts., the former battle ground of Cree, Assimboin, and Blackfeet, the Catholics were again the pioneers, antedating all others by a full century. According to Bryce, "the first heralds of the cross" within this area were the French Jesuits accompanying Verendrye, who in the years

1731-1742 explored the whole territory from Mackinaw to the upper Missouri and the Saskatchewan, establishing trading posts and making alliances with the Indian tribes for the French government. Among these missionaries the principal were Fathers Nicolas Gonor, who had laboured among the Sioux as early as 1727; Charles Messager, and Jean Aulneau, killed by the same tribe in 1736. No attempt was made during this period to form permanent mission settlements.

Then follows a long hiatus until after the establishment of the Red River colony in the early part of the 19th century by Lord Selkirk, who in 1816 brought out from eastern Canada Fathers Sévère Dumoulin and Joseph Provencher, to minister both to the colonists and to the Indian and mixed-blood population of the Winnipeg country. In 1822 Father Provencher was made bishop, with jurisdiction over all of Ruperts Land and the Northwestern Territories, and carried on the work of systematic mission organization throughout the whole vast region until his death in 1853, when the noted Oblate missionary, Father Alexandre Taché, who had come out in 1845, succeeded to the dignity, in which he continued for many venus

The Catholic work in this central region has been carried on chiefly by the Oblates, assisted by the Grey nuns. The first permanent mission was St. Boniface, established opposite the site of the present Winnipeg by Provencher and Dumoulin in 1816. Paul mission on the Assiniboine later became the headquarters of the noted Father George Belcourt, who gave most of his attention to the Saulteux (Chippewa of Saskatchewan region; and who, from 1831 to 1849, covered in his work a territory stretching over a thousand miles from E. For his services in preventing a serious uprising in 1833 he was pensioned both by the Government and by the Hudson's Bay Co He is the author of a grammatic treatise and of a manuscript dictionary of the Saulteur (Chippewa) language, as well as of some minor Indian writings

In the Cree field the most distinguished names are those of Fathers Albert Lacombe (1848-90), Alexandre Taché (1845-90), Jean B. Thibault (ca. 1855-70), Valentin Végréville (1852-90), and Émile Petitot (1862-82), all of the Oblate Order, and cach, besides his religious work, the author of important contributions to philology. To Father Lacombe,

who founded two missions among the Cree of the upper North Saskatchewan and spent also much time with the Blackfeet, we owe, besides several religious and text-book translations, a manuscript Blackfoot dictionary and a monumental grammar and dictionary of the Cree language. Father Végréville laboured among Cree, Assiniboin, and the remote northern Chipewyan, founded five missions, and composed a manuscript grammar, dictionary, and monograph of the Cree Father Petitot's earlier work among the Cree has been overshadowed by his later great work among the remote Athapascans and Eskimo, which will be noted hereafter. Among the Blackfeet the most prominent name is that of Bishop Émile Legal, Oblate (1881-90), author of several linguistic and ethnologic studies of the tribe, all in manuscript.

Episcopalian work in the central region may properly be said to have begun with the arrival of Rev. John West, who was sent out by the Church Missionary Society of England in 1820 as Chaplain to the Hudson's Bay Co's establishment of Fort Garry (Winnipeg), on Red r. In the three years of his ministrations, besides giving attention to the white residents, he made missionary journeys among the Cree and others for a distance of 500 m. to the w. He was followed by Rev. David Jones in 1823, by Rev. Wm. Cochrane in 1825, Rev. A. Cowley in 1841, and Rev. R. James in 1846, by whom, together, the tribes farther to the N were visited and brought within mission influence. In 1840 a Cree mission at The Pas, on the lower Saskatchewan, was organized by Henry Budd, a native convert, and in 1846 other stations were established among the same tribe at Lac la Ronge and Lac Ile-a-la-Crosse, by James Settee and James Beardy respectively, also native converts. In 1838 a large bequest for Indian missions within Ruperts Land, as the territory was then known, had been made by Mr. James Leith, an officer of the Hudson's Bay Co., and generously increased soon after by the company itself. With the assistance and the active effort of four missionary societies of the church, the work grew so that in 1849 the territory was erected into a bishopric, and on the transfer of jurisdiction from the Hudson's Bay Co., to the Canadian government in 1869 there were 15 Episcopal missionaries labouring at the various stations in the regions stretching from Hudson bay to the upper Saskatchewan, the most important

being those at York Factory (Manitoba , Cumberland, and Carlton (Saskatchewan).

Among the most noted of those in the Cree country may be mentioned in chronological order. Rev. Archdeacon James Hunter and his wife (1844-55), joint or separate authors of a number of translations, including the Book of Common Prayer, hymns, gospel extracts, etc., and a valuable treatise on the Cree language: Bishop John Horden (1851-90), of Moose Factory, York Factory, and Ft. Churchill stations, self-taught printer and binder, master of the language, and author of a number of gospels, prayer, and hymn translations; Bishop William Bompas (1865-90), best known for his work among the more northern Athapascan tribes; Rev. W. W. Kirkby (1852-79), author of a Cree 'Manual of Prayer and Praise,' but also best known for his Athapascan work: Rev. John Mackay, author of several religious translations and of a manuscript grammar; and Rev. E. A. Watkins, author of a standard dictionary. Among the Blackfeet, Rev. J. W. Tims, who began his work in 1883, is a recognized authority on the language, of which he has published a grammar and dictionary and a gospel translation.

Methodist (Weslevan) effort in the Cree and adjacent territories began in 1840. In that year Rev. James Evans and his Indian assistant, Rev. Henry Steinhauer, both already noted in connection with previous work in Ontario, were selected for the western mission, and set out together for Norway House, a Hudson's Bay Co's post at the N. end of lake Winnipeg. Evans went on without stop to his destination, but Steinhauer halted at Rainy lake to act as interpreter to Rev. William Mason, who had just reached that spot, having been sent out under the same auspices, the Wesleyan Missionary Society of England, by arrangement with the Canadian body. The joint control continued until 1855, when the Canadian Methodists assumed full charge. Mr. Evans had been appointed superintendent of Methodist work for the whole region, and after establishing Rossville mission, near Norway House, as his central station, spent the next six years until his health failed, in traversing the long distances, founding several missions, mastering the Cree language, and devising for it a syllabary, which has ever since been in successful use for all literary purpose in the tribe. His first printing in the syllabary was done upon a press of his own making, with types

cast from the sheet-lead lining of tea boxes and cut into final shape with a jackknife. In this primitive fashion he printed many copies of the syllabary for distribution among the wandering bands, besides hymn collections and scripture translations. "By means of this syllabary a clever Indian can memorize in an hour or two all the characters, and in two or three days read the Bible or any other book in his own language" (MacLean In later years, the credit for this invention was unsuccessfully claimed by some for Rev. William Mason. Rossville for years continued to be the principal and most prosperous of all the Methodist missions in the central region.

Rev. William Mason remained at Rainy lake until that station was temporarily discontinued in 1844; he was then sent to Rossville (Norway House), where he was stationed until 1854, when the mission was abandoned by the Weslevans. He then attached himself to the Episcopal church, with which he had formerly been connected, and was ordained in the same year, labouring thereafter at York Factory on Hudson bay until his final return to England in 1870, with the exception of 4 years spent in that country supervising the publication of his great Bible translation in the Cree language, printed in 1861. This, with several other Scripture and hymn translations, excepting a Gospel of St. John, was issued under the auspices of the Episcopal Church Missionary Society. In his earlier linguistic (Methodist) work he was aided by Rev. Mr. Steinhauer and John Sinclair, a half-breed, but in all his later work, especially in the Bible translation, he had the constant assistance of his wife, the educated half-breed daughter of a Hudson's Bay Co. officer. Rev Mr. Steinhauer, after some years with Mr Mason, joined Mr. Evans at Norway House as teacher and interpreter. He afterwards filled stations at Oxford House Jackson bay , York Factory, Lac la Biche, Whitefish Lake, Victoria, and other remote points, for a term of more than 40 years, making a record as "one of the most devoted and successful of our native Indian missionaries" Young Among later Methodist workers with the Cree may be mentioned Rev. John McDougall, one of the founders of Victoria station, Alberta, in 1862, and Rev. Ervin Glass, about 1880, author of several primary instruction books and charts in the syllabary.

At the same time (1840) that Evans and Mason were sent to the Cree, Rev. Robert T Rundle was sent, by the same authority, to make acquaintance with the more remote Blackfeet and Assiniboin ("Stonies") of the upper Saskatehewan region. Visiting stations were selected where frequent services were conducted by Rundle, by Rev. Thomas Woolsey, who came out in 1855, and by others, but no regular mission was established until begun by Rev. George M. McDougall at Edmonton, Alberta, in 1871. In 1873 he founded another mission on Bow r., Alberta, among the Stonies (western Assiniboin), and continued to divide attention between the two tribes until his accidental death 2 years later. Another station was established later at Macleod, in the same territory. distinguished worker of of this denomination among the Blackfeet is Rev. John MacLean (1880-89), author of a manuscript grammar and a dictionary of the language, of several minor linguistic papers, The Indians: Their Manners and Customs' (1889), and 'Canadian Savage Folk' (1896).

Presbyterian mission work was inaugurated in 1865 by the Rev. James Nisbet, among the Cree, at Prince Albert mission on the Saskatchewan. No data are at hand as to the work of the denomination in this region, but it is credited in the official report with nearly a thousand Indian communicants, chiefly among the Sioux and the Assiniboin, many of the latter being immigrants from the United States.

According to the Report of Indian Affairs for 1911, the Indians of Manitoba, Saskatchewan, Alberta, and the Northwest Territories, classified under treaties 1, 2, 3, 4, 5, 6, 7, 8 and 10, designated as Chippewa, Cree, Saulteaux, Sioux, Assiniboin, Blackfeet, Bloods, Piegan, Sarsi, Stonies, and Chipewyan, are credited as follows: Catholie, 8,736; Anglican (Episcopal), 6,951; Methodist, 4,290; Presbyterian, 1,174; Baptist, 75; all other denominations, 149; pagan, 4,650.

British Columbia (including Vancouver id. and Methakatla).—The earliest missionary entrance into British Columbia was made by the Catholics in 1839. In 1838 the secular priests Demers and Blanchet (afterward archbishop) had arrived at Fort Vancouver, Washington, to minister to the employees of the Iludson's Bay Co. In the next year an Indian mission was organized at Cowlitz, with visiting stations along the shores of Puget sd., and Father Demers made a tour of the upper Columbia as far as the Okinagan in British

Columbia, preaching, baptizing, and giving instruction by means of a pictograph device of Father Blanchet's invention, known as the "Catholic ladder." Copies of this "ladder" were carried by visiting Indians to the more remote tribes and prepared the way for later effort. A second journey over the same route was made by Father Demers in the next year, and in 1841 he preached for the first time to a great gathering of the tribes on lower Fraser r. In the following year, 1842, by arrangement with the local Hudson's Bay Co. officers, he accompanied the annual supply caravan on * its return from Ft. Vancouver, on the Columbia, to the remote northern posts. On this trip, ascending the Columbia and passing over to the Fraser, he visited successively the Okinagan, Kamloops, Shuswap, and Takulli or Carriers, before arriving at their destination at Ft. St. James on Stuart lake. Return was made in the following spring, and on descending the Fraser he found that the Shuswap had already erected a chapel.

In the meantime De Smet and the Jesuits had arrived in the Columbia region, and between 1841 and 1844 had established a chain of missions throughout the territory, including three in British Columbia, among the Kutenai, Shuswap, and Okinagan. De Smet himself extended his visitations to the headwaters of the Athabaska, while in 1845-47 Father John Nobili, labouring among the upper tribes, penetrated to the Babines on the lake of that name. The most remote point visited was among the Carriers, at Stuart lake. In 1843 the first Hudson's Bay post had been established on Vaneouver id. at Camosun, now Victoria, and the beginning of missionary work among the Songish and the Cowichan was made by the secular priest, Father John Boldue, already well known among the Sound tribes, who had for this reason been brought over by the officers in charge to assist in winning the good will of their Indian neighbours.

Owing to difficulty of communication and pressing need in other fields, it was found necessary to abandon the British Columbia missions, except for an occasional visiting priest, until the work was regularly taken up by the Oblates about 1860. Before 1865 they had regular establishments at New Westminster, St. Marys, and Okinagan, besides others on Vancouver id., and in that year founded St. Joseph mission near Williams lake, on the upper Fraser, under Rev. J. M. Mc-

Guckin, first missionary to the Tsilkotin Within the next few years he extended his ministrations to the Sekani and Skeena. In 1873 the Stuart Lake mission was established by Fathers Lejacq and Blanchet, and in 1885 was placed in charge of Father A. G. Morice, Oblate, the distinguished ethnologist and author, who had already mastered the Tsilkotin language in three years' labour in the tribe. Aside from his missionary labour proper, which still continues, he is perhaps best known as the inventor of the Déné syllabary, by means of which nearly all the Canadian Indians of the great Athapasean stock are now able to read and write in their own language. His other works include a Tsilkotin dictionary, a Carrier grammar, numerous religious and miscellaneous translations, an Indian journal, scientific papers, 'Notes on the Western Dénés' (1893) and a 'History of the Northern Interior of British Columbia' (1904). Father J. M. Le Jeune, of the same order, stationed among the Thompson River and Shuswap Indians since 1880, is also noted as the inventor of a successful shorthand system, by means of which those and other cognate tribes are now able to read in their own languages. He is also the author of a number of religious and text books in the same languages and editor of a weekly Indian journal, the 'Kamloops Wawa,' all of which are printed on a copying press in his own stenographic characters. Another distinguished veteran of the same order is Bishop Paul Durien, since 1854 until his recent death, labouring successively among the tribes of Washington, Vancouver id. (Ft. Rupert, in Kwakiutl territory), and Fraser r.

Episcopal work began in 1857 with the remarkable and successful missionary enterprise undertaken by Mr. William Duncan among the Tsimshian at Metlakatla, first in British Columbia and later in Alaska. The Tsimshian at that time were among the fiercest and most degraded savages of the N.W. coast, slavery, human sacrifice, and cannibalism being features of their tribal system, to which they were rapidly adding all the vices introduced by the most depraved white men from the coasting vessels. Moved by reports of their miserable condition, Mr. Duncan voluntarily resigned a remunerative position in England to offer himself as a worker in their behalf under the auspiees of the London Church Missionary Society. He arrived at Port Simpson, N. coast

of British Columbia, in Oct. 1857, and after some months spent in learning the language and making acquaintance with the tribe, then numbering 2,300, opened his first school in June, 1858. By courage and devotion through danger and difficulty he built up a civilized Christian body, which in 1860 he colonized to the number of about 340 in a regular town established at Metlakatla, an abandoned village site 16 m. s. of Fort Simpson. By systematic improvement of every industrial opportunity for years the town had grown to a prosperous, self-supporting community of 1,000 persons, when, by reason of difficulties with the local bishop, upheld by the colonial government, Mr. Duncan and his Indians were compelled, in 1887, to abandon their town and improvements and seek asylum under United States protection in Alaska, where they formed a new settlement, known as New Metlakatla, on Annette id., 60 m. v. of their former home. The island, which is about 40 m. long by 3 m. wide, has been reserved by Congress for their use, and the work of improvement and education is now progressing as before the removal, the present population being about 500.

The first Episcopal bishop for British Columbia and Vancouver id. was appointed in 1859. In 1861 the Rev. John B. Good, sent out also by the London Society, arrived at Esquimalt, near Victoria, Vancouver id., to preach alike to whites and Indians. At a later period his work was transferred to the Indians of Thompson and lower Fraser rs, with headquarters at St. Paul mission, Lytton. He has translated a large part of the liturgy into the Thompson River (Ntlakyapamuk) language, besides being the author of a grammatic sketch and other papers. In 1865 Kincolith mission was established among the Niska branch of the Tsimshian, on Nass r., by Rev. R. A. Doolan, and some years later another one higher up on the same stream. Kitwingach station, on Skeena r., was established about the same time. In 1871 Rev. Charles M Tate took up his residence with the Nanaimo on Vancouver id., labouring afterward with the Tsimshian, Bellabella, and Traser River tribes. In 1876 Rev. W. H. Collison began work among the Haida at Masset, on the N. end of the Queen Charlotte ids., and in 1878 Rev. A. J. Hall arrived among the Kwakiutl at Fort Rupert, Vancouver id. Other stations in the meantime had been established throughout the s. portion of the province, chiefly under the auspices of the London Church Missionary Society

The first Methodist (Wesleyan) work for the Indians of British Columbia was begun in 1863 at Nanaimo, Vancouver id., by Rev. Thomas Crosby, who at once applied himself to the study of the language with such success that he was soon able to preach in it. In 1874 he transferred his labour to the Tsimshian at Port Simpson, on the border of Alaska, who had already been predisposed to Christianity by the work at Metlakatla and by visiting Indians from the S. Other stations were established on Nass r. (1877) and at Kitimat in the Bellabella tribe. Statistics show that the Methodist work has been particularly successful along the N.W. coast and in portions of Vancouver id.

There is no record of *Presbylerian* mission work, but some 415 Indians are officially credited to that denomination along the w. coast of Vancouver id.

According to the Report of Indian Affairs for 1911 the Christian Indians of British Columbia are classified as follows: Catholic, 11,609; Episcopal (Anglican), 4,245; Methodist, 3,529; Presbyterian, 418; all other, 226.

Canada, Northwest (n. Alberta,, n. Saskatchewan, Mackenzie, Yukon, Keewatin, Franklin).—The earliest missionaries of the great Canadian Northwest, of which Mackenzie r. is the central artery, were the Catholic priests of the Oblate order. The pioneer may have been a Father Grollier, mentioned as the "first martyr of apostleship" in the Mackenzie district and buried at Ft. Good Hope, almost under the Arctic circle. In 1846 Father Alexandre Taché, afterward the distinguished archbishop of Red River, arrived at Lac He-à-la-Crosse a Cree station, on the upper waters of Churchill r., in × Saskatchewan, and, a few months later, crossed over the divide to the Chipewyan tribe on the Athabaska Here he established St. Raphael mission, and, for the next 7 years, with the exception of a visit to Europe, divided his time between the two tribes. In IS47 or IS48 Father Henry Farand, afterward vicar of the Mackenzie district, arrived among the Chipewyan of Great Slave lake, with whom and their congeners he continued for 18 years. To him we owe a Bible abridgment in the Chipewyan language. In 1852 arrived Father Valentin Végréville, for more than 40 years missionary to Cree, Assiniboin, and Chipewyan, all of which languages he spoke fluently; founder of the Chipewyan mission of St. Peter on Caribon lake, Athabaska, besides several others farther s.; and author of a manuscript grammar and dictionary of the Cree language, another of the Chipewyan language, and other ethnologic and religious papers in manuscript. In 1867 Father Laurent Legoff arrived at Caribou Lake mission, where he was still stationed in 1892. He is best known as the author of a grammar of the Montagnais, or Chipewyan language, published in 1889.

By far the most noted of all the Oblate missionaries of the great Northwest is Father Émile Petitot, acknowledged by competent Canadian authority as "our greatest scientific writer on the Indians and Eskimos" (Mac-Lean). In 20 years of labour, beginning in 1862, he covered the whole territory from Winnipeg to the Arctic ocean, frequently making journeys of six weeks' length on snowshoes. He was the first missionary to visit Great Bear lake (1866), and the first missionary to the Eskimo of the N.W., having visited them in 1865 at the mouth of the Anderson, in 1868 at the mouth of the Mackenzie, and twice later at the mouth of Peel r. In 1870 he crossed over into Alaska, and in 1878, compelled by illness, he returned to the S., making the journey of some 1,200 m. to Athabaska lake on foot, and thence by canoe and portages to Winnipeg. Besides writing some papers relating to the Cree, he is the author of numerous ethnological and philosophical works, dealing with the Chipewyan, Slave, Hare, Dog-rib, Kutchin, and Eskimo tribes and territory, chief among which are his Dènè-Dindjié dictionary (1876) and his 'Traditions Indiennes' (1886).

Throughout the Mackenzie region the Catholics have now established regular missions or visiting stations at every principal gathering point, among the most important being a mission at Fort Providence, below Great Slave lake, and a school, orphanage, and hospital conducted since 1875 by the Sisters of Charity at Chipewyan on Athabaska lake.

Episcopal effort in the Canadian Northwest dates from 1858, in which year Archdeacon James Hunter, already mentioned in connection with the Cree mission, made a reconnoitring visit to Mackenzie r., as a result of which Rev. W. W. Kirkby, then on parish duty on Red r., was next year appointed to that field and at once took up his headquarters at the

remote post of Ft. Simpson, at the junction of Liard and Mackenzie rs., 62° 8, where, with the assistance of the Hudson's Bay Co's officers, he built a church and school. In 1862, after several years' study of the language, he descended the Mackenzie nearly to its mouth and crossed over the divide to the Yukon, just within the limits of Alaska, preaching to the Kutchin and making some study of the fanguage, after which he returned to Ft. Simpson. In 1869 he was appointed to the station at York Factory, on Hudson bay, where he remained until his retirement in 1878, after 26 years of efficient service in Manitoba and the Northwest He is the author of a number of religious translations in the Chipewyan and Slave languages.

The work begun on the Yukon by Kirkby was given over to Rev. (Archdeacon) Robert McDonald, who established his headquarters at St. Matthew mission on Peel r., Mackenzie district, "one mile within the Arctic circle." Here he devoted himself with remarkable industry and success to a study of the language of the Takudh Kutchin, into which he has translated, besides several minor works, the Book of Common Prayer (1885), a small collection of hymns (1889), and the complete Bible in 1898, all according to a syllabic system of his own device, by means of which the Indians were enabled to read in a few weeks. In 1865 Rev. Wm. C. Bompas, afterward bishop of Athabaska and, later, of Mackenzie River, arrived from England. In the next 25 years he laboured among the Chipewvan, Dog-ribs, Beavers, Slave, and Takudh tribes of the remote Northwest, and gave some attention also to the distant Eskimo. He is the author of a primer in each of these languages, as well as in Cree and Eskimo, together with a number of gospel and other religious translations Another notable name is that of Rev. Alfred Garrioch, who began work in the Beaver tribe on Peace r., Alberta, in 1876, after a year's preliminary study at Ft. Simpson. He is the founder of Unjiga mission at Fort Vermilion, and author of several devotional works and of a considerable vocabulary in the Beaver language. To a somewhat later period belong Rev. W. D. Reeve and Rev. Spendlove, in the Great Slave Lake region. Among the principal stations are Chipewyan on Athabaska lake, Ft. Simpson on the middle Mackenzie, and Fts. Maepherson and Lapierre in the neighbourhood of the Mackenzie's mouth has also been done among the Eskimo of Hudson bay, chiefly by Rev. Edmund Peck,

who has devised a syllabary for the language, in which he has published several devotional translations, beginning in 1878. The greater portion of the Episcopal work in the Canadian Northwest has been under the auspices of the Church Missionary Society of London.

In the four centuries of American history there is no more inspiring chapter of heroism. self-sacrifice and devotion to high ideals than that afforded by the Indian missions. Some of the missionaries were of noble blood and had renounced titles and estates to engage in the work: most of them were of finished scholarship and refined habit, and nearly all were of such exceptional ability as to have commanded attention in any community and to have possessed themselves of wealth and reputation, had they so chosen; yet they deliberately faced poverty and sufferings, exile, and oblivion, ingratitude, torture, and death itself in the hope that some portion of a darkened world might be made better through their effort. To the student who knows what infinite forms of cruelty, brutishness, and filthiness belonged to savagery, from Florida to Alaska, it is beyond question that, in spite of sectarian limitations and the shortcomings of individuals, the missionaries have fought a good fight. Where they have failed to accomplish large results the reason lies in the irrepressible selfishness of the white man or in the innate incompetence and unworthiness of the people for whom they laboured

Missisauga (Chippewa: misi, 'large,' sāg or sauk, 'outlet (of a river or bay)' = large'outlet,' referring to the mouth of Mississagi r .-Hewitt.) Although this Algonquian tribe is a division or subtribe of the Chippewa, having originally formed an integral part of the latter, it has long been generally treated as distinct. When first encountered by the French in 1634, the Missisauga lived about the mouth of the Mississagi r., along the x. shore of the North channel of lake Huron, and on the adjacent Manitoulin id. Although so closely allied to the Chippewa, they do not appear to have been disposed to follow that tribe in its progress westward, as there is no evidence that they were ever found in early times so far w. as Sault Ste. Marie, but appear to have clung to their old haunts about lake Hiron and Georgian bay. Early in the 18th century, influenced by a desire to trade with the whites, they began to drift toward the s.E. into the region formerly occupied by the Hurons, between lakes Huron and Eric. Although they had destroyed a village of the Iroquois near Ft. Frontenac about 1705, they tried in 1708 to gain a passage through the country of the latter, to trade their peltries with the English. At this time a part or band was settled on lake St. Clair. About 1720 the French established a station at the w. end of

lake Ontario for the purpose of stimulating trade with the Missisauga. Near the close of the first half of the century (1746-50), having joined the Iroquois in the war against the French, the Missisauga were compelled by the latter, who were aided by the Ottawa, to abandon their country, a portion at least settling near the Seneca E. of lake Eric. Others, however, appear to have remained in the vicinity of their early home, as a delegate from a Missisauga town "on the north side of lake Ontario" came to the conference at Mt. Johnson, N. Y., in June, 1755. As it is also stated that they "belong to the Chippewyse confederacy, which chiefly dwell about the lake Missilianac," it is probable that "north side of lake Ontario" refers to the shores of lake Huron. Being friendly with the Iroquois at this time, they were allowed to occupy a number of places in the country from which the Hurons had been driven. This is inferred in part from Chauvignerie's report of 1736, which places portions of the tribe at different points on Mississagi r., Maniskoulin (Manitoulin?) id., lake St. Clair, Kente, Toronto r., Matchitaen, and the w. end of lake Ontario. The land on which the Iroquois are now settled at Grand r., Ontario, was bought from For the purpose of sealing their alliance with the Iroquois they were admitted as the seventh tribe of the Iroquois league in 1746, at which date they were described as living in five villages near Detroit. therefore probable that those who went to live with the Seneca first came to the vicinity of Detroit and moved thence to w. New York. The alliance with the Iroquois lasted only until the outbreak of the French and Indian war a few years later.

According to Jones (Hist. Ojebways), as soon as a Missisauga died he was laid out on the ground, arrayed in his best clothes, and wrapped in skins or blankets. A grave about 3 ft, deep was dug and the corpse interred with the head toward the w. By his side were placed his hunting and war implements. The grave was then covered, and above it poles or sticks were placed lengthwise to the height of about 2 ft., over which birch-bark or mats were thrown to keep out the rain. Immediately after the decease of an Indian, the near relatives went into mourning by blackening their faces with charcoal and putting on the most ragged and filthy clothing they possessed. A year was the usual time of mourning for a husband, wife, father, or mother.

As the Missisauga are so frequently confounded with the Chippewa and other neighbouring tribes who are closely connected, it is difficult to make a separate estimate of their numbers. In 1736 they were reported to number 1,300, about 250 being on Manitoulin id. and Mississagi r., and the rest in the peninsula of Ontario; in 1778 they were estimated at 1,250, living chiefly on the N. side of lake Erie, and in 1884 the number was given as 744. The population was officially reported in 1911 as \$56, of whom 195 were at Mud Lake, 97 at Rice lake, 33 at Scugog, 263 at Alnwick, and 266 at New Credit, Ontario. The New Credit settlement forms a township by itself and the Indian inhabitants have often won prizes against white competitors at the agricultural fairs. The New Credit Indians (who left the Old Credit settlement in 1847) are the most advanced of the Missisauga and represent one of the most successful attempts of any American Indian group to assimilate the culture of the whites. The Alnwick res. dates from 1830, Mud Lake from 1829, Seugog from 1842. Beldom, Chibaouinani, and Grape Island were former settlements. See Credit Indians, Matchedash.

Mississagi. See Massassanga.

Mistassin (from mista-assini, 'a great stone,' referring to a lunge isolated rock in lake Mistassini, which the Indians regarded with veneration). An Algonquian tribe that lived on lake Mistassini, Quebec. They were divided by early writers into the Great and the Little Mistassin, the former living near the lake, the latter farther s, in the mountains. They first became known to the French about 1640, but were not visited by missionaries until some years later. They were attacked by the Iroquois in 1665, and in 1672 their country was formally taken possession of by the French with their consent. Although spoken of by Hind in 1863 as roving bands with Montagnais and Naskapi over the interior of Ungaya, it appears that in 1858 a portion of the tribe was on the lower St. Lawrence.

Very little has been recorded in regard to their habits or characteristics. It is recorded that when attacked by the Iroquois in 1665 they had a wooden fort, which they defended successfully and with great bravery. Their only myth mentioned is that in regard to the great rock in the lake, which they believe to be a manito.

Mixed-bloods. To gauge accurately the amount of Indian blood in the veins of the white population of the American continent and to determine to what extent the surviving aborigines have in them the blood of their conquerors and supplanters is impossible in the absence of scientific data. But there is reason to believe that intermixture has been much more common than is generally assumed. The Eskimo of Greenland and the Danish traders and colonists have intermarried from the first, so that in the territory immediately under European supervision hardly any pure natives remain. The marriages of (Danish fathers and Eskimo mothers) have been very fertile and the children are in many respects an improvement on the aboriginal stock, in the matter of personal beauty in particular. According to Packard (Beach, Ind. Miscel., 69, 1877) the last full-blood Eskimo on Belleisle str., Labrador, was in 1859 the wife of an Englishman at Salmon bay. The Labrador intermixture has been largely with fishermen from Newfoundland of English descent.

Some of the Algonquian tribes of Canada mingled considerably with the Europeans during the French period, both in the E. and toward the interior. In recent years certain French-Canadian writers have unsuccessfully sought to minimize this intermixture. In the Illinois-Missouri region these alliances were favoured by the missionaries from the beginning of the 18th century. As early as 1693 a member of the La Salle expedition married the daughter of the chief of the Kaskaskia. Few French families in that part of the country are free from Indian blood. The establishment of trading posts at Detroit, Mackinaw, Duluth, etc., aided the fusion of races. The spread of the activities of the Hudson's Bay Company gave rise in the Canadian Northwest to a population of mixed-bloods of considerable historic importance, the offspring of Indian mothers and Scotch, French, and English fathers. Manitoba, at the time of its admission into the dominion, had some 10,000 mixed-bloods, one of whom, John Norquay

afterward became premier of the Provincial government. Some of the employees of the fur companies who had taken Indian wives saw their descendants flourish in Montreal and other urban centres. The tribes that have furnished the most mixed-bloods are the Cree and Chippewa, and next the Sioux, of x. w Canada; the Chippewa, Ottawa, and related tribes of the Great lakes; and about Green bay. the Menominee. Toward the Mississippi and beyond it were a few Dakota and Blackfoot (Rep. Smithson Harvard mixed-bloods. Inst, 1879) estimated the total number in 1879 at 40,000. Of these about 22,000 were in United States territory and 18,000 in Canada. Of 15,000 persons of Canadian-French descent in Michigan few were probably free from Indian blood. Some of the French mixedbloods wandered as far as the Pacific, establishing settlements of their own kind beyond the Rocky mts. The first wife of the noted ethnologist Schooleraft was the daughter of an Irish gentleman by a Chippewa mother. another of whose daughters married an Episeopal clergyman, and a third a French-Canadian lumberer. Although, some of the English colonies endeavoured to promote the intermarriage of the two races, the only notable case in Virginia is that of Pocahontas and John Rolfe. The Athapascan and other tribes of the extreme N.W. have intermixed but little with the whites, though there are Russian mixed-bloods in Alaska. In British Columbia and the adjoining portions of the United States are to be found some mixed-bloods, the result of intermarriage of French traders and employees with native women. The peoples

of Iroquoian stock have a large admixture of white blood, French and English, both from captives taken during the wars of the 17th and 18th centuries and by the process of adoption, much favoured by them. Such intermixture contains more of the combination of white mother and Indian father than is generally the case. Some English-Iroquois intermixture is still in process in Ontario. The Iroquois of St. Regis, Caughnawaga, and other agencies can hardly boast an Indian of pure blood. According to the Almanach Iroquois for 1900, the blood of Eunice Williams, captured at Deerfield, Mass., in 1704, and adopted and married within the tribe, flows in the veins of 125 descendants at Caughnawaga; Silas Rice, captured at Marlboro, Mass., in 1703, has 1.350 descendants; Jacob Hill and John Stacey captured near Albany in 1755, have, respectively, 1,100 and 400 descendants. Similar cases are found among the New York Iroquois. Dr. Boas (Pop. Sci. Mo., xlv, 1894) has made an anthropometric study of the mixed-bloods, covering a large amount of data, especially concerning the Sioux and the eastern Chippewa. The total numbers investigated were 647 men and 408 women. As compared with the Indian, the mixed-blood, so far as investigations have shown, is taller, men exhibiting greater divergence than women.

Mohawk (cognate with the Narraganset Mohowainck, 'they eat (animate) things, hence 'man-eaters'). The most easterly tribe of the Iroquois confederation. They called themselves Kaniengehaga, 'people of the place of the flint.'

In the federal council and in other intertribal assemblies the Mohawk sit with the tribal phratry, which is formally called the "Three Elder Brothers" and of which the other members are the Seneca and the Onondaga. Like the Oneida, the Mohawk have only 3 clans, namely, the Bear, the Wolf, and the Turtle. The tribe is represented in the federal council by 9 chiefs of the rank of roianer (see Chiefs), being 3 from every clan. These chiefships were known by specific names, which were conferred with the office. These official titles are Tekarihoken, Haienhwatha, and Satekarihwate, of the first group; Orenrehkowa, Deionhehkon, and Sharenhowanen, of the second group; and Dehennakarine, Rastawenserontha, and Shoskoharowanen, of the third group. The first two groups or clans formed an intra-tribal phratry, while the last, or Bear clan group, was the other phratry. The people at all times assembled by phratries, and each phratry occupied a side of the council fire opposite that occupied by the other phratry. The second title in the foregoing list has been Anglicized into Hiawatha.

From the Jesuit Relation for 1660 it is learned that the Mohawk, during a period of 60 years, had been many times both at the top and the bottom of the ladder of success; that, being insolent and warlike, they had attacked the Abnaki and their congeners at the E., the Conesioga at the s., the Hurons at the w. and x., and the Algonquian tribes at the x.; that at the close of the 16th century the Algonkin had so reduced them that there appeared to be none left, but that the remainder increased so rapidly that in a few years they in turn had overthrown the Algonkin. This success did

not last long. The Conestoga waged war against them so vigorously for 10 years that for the second time the Mohawk were overthrown so completely that they appeared to be extinct. About this time (?1614) the Dutch arrived in their country, and, being attracted by their beaver skins, they furnished the Mohawk and their congeners with firearms, in order that the pelts might be obtained in greater abundance. The purpose of the Dutch was admirably served, but the possesssion of firearms by the Mohawk and their confederates rendered it easy for them to conquer their adversaries, whom they routed and filled with terror not alone by the deadly effect but even by the mere sound of these weapons, which hitherto had been unknown. Thenceforth the Mohawk and their confederates became formidable adversaries and were victorious almost everywhere, so that by 1660, the conquests of the Iroquois confederates, although they were not numerous, extended over nearly 500 leagues of territory. The Mohawk at that time numbered not more than 500 warriors and dwelt in 4 or 5 wretched villages.

The accounts of Mohawk migrations previous to the historical period are largely conjectural. Some writers do not clearly differentiate between the Mohawk and the Huron tribes at the N. and W. and from their own confederates as a whole. Besides fragmentary and untrustworthy traditions little that is definite is known regarding the migratory provements of the Mohawk.

In 1603, Champlain, while at Tadoussac, heard of the Mohawk and their country. On July 30, 1609, he encountered on the lake to which he gave his own name a party of nearly 200 frequois warriors, under 3 chiefs. In a skirmish in which he shot two of the chiefs dead and wounded the third, he defeated this party, which was most probably largely Mohawk. Dismayed by the firearms of the Frenchman, whom they now met for the first time, the Indians fled. The Iroquois of this party were arrow-proof armour and had both stone and iron hatchets, the latter having been obtained in trade. The fact that in Capt. Hendricksen's report to the States General. Aug. 18, 1616, he says that he had "bought from the inhabitants, the Minguaes [Conestoga], 3 persons, being people belonging to this company," who were "employed in the service of the Mohawks and Machicans," giving, he says, for them, in exchange, "kettles, beads, and merchandise," shows how extensively the inland trade was carried on between the Dutch and the Mohawk. The latter were at war with the Mohegan and other New England tribes with only intermittent periods of peace. In 1623 a Mohegan fort stood opposite Castle id. in the Hudson and was "built against their enemies, the Maquaes, a powerful people." In 1626 the Dutch commander of Ft. Orange (Albany), and 6 of his men, joined the Mohegan in an expedition to invade the Mohawk country. They were met a league from the fort by a party of Mohawk armed only with bows and arrows, and were defeated, the Dutch commander and 3 of his men being killed, and of whom one, probably the commander, was cooked and caten by the Mohawk. This intermittent warfare continued until the Mohegan were finally forced to withdraw from the upper waters of the Hudson. They did not however relinquish their territorial rights to their native adversaries, and so in 1630 they began to sell their lands to the Dutch. The deed to the Manor of Renssalaerwyck, which extended w. of the river two days' journey, and was mainly on the E. side of the river, was dated in the year named. In 1637 Kilian Van Renssalaer bought more land on the E. side. Subsequently the Mohegan became the friends and allies of the Mohawk, their former adversaries.

In 1641 Ahatsistari, a noted Huron chief, with only 50 companions, attacked and defeated 300 Iroquois, largely Mohawk, taking some prisoners. In the preceding summer he had attacked on lake Ontario a number of large canoes manned by Iroquois, probably chiefly Mohawk, and defeated them, after sinking several canoes and killing a number of their crews. In 1642, 11 Huron canoes were attacked on Ottawa r. by Mohawk and Oneida warriors about 100 m. above Montreal. In the same year the Mohawk captured Father Isaac Jogues, two French companions, and some Huron allies. They took the Frenchmen to their villages, where they caused them to undergo the most cruel tortures. Jogues, by the aid of the Dutch, escaped in the following year; but in 1646 he went to the Mohawk to attempt to convert them and to confirm the peace which had been made with them. On May 16, 1646, Father Jogues went to the Mohawk as an envoy and returned to Three Rivers in July in good health. In September he again started for the Mohawk country to establish a mission there; but, owing to the prevalence of an epidemic among the Mohawk

and to the failure of their crops, they accused Father Jogues of "having concealed certain charms in a small coffer, which he had left with his host as a pledge of his return." which caused them thus to be afflicted. So upon his arrival in their village for the third time, he and his companion, a young Frenchman, were seized, stripped, and threatened with death. Father Jogues had been adopted by the Wolf clan of the Mohawk, hence this clan, with that of the Turtle, which with the Wolf formed a phratry or brotherhood, tried to save the lives of the Frenchmen. But the Bear clan, which formed a phratry by itself, and being only cousins to the others, of one of which Father Jogues was a member, had determined on his death as a sorcerer. On Oct. 17, 1646, the unfortunates were told that they would be killed, but not burned, the next day. On the evening of the 18th Father Jogues was invited to a supper in a Bear lodge. Having accepted the invitation, he went there, and while entering the lodge a man concealed behind the door struck him down with an axe. He was beheaded, his head elevated on the palisade, and his body thrown into the river. The next morning Jogues' companion suffered a similar fate. Father Jogues left an account of a Mohawk sacrifice to the god Aireskoi (i. e., Aregwěns' gwá', 'the Master or God of War'). While speaking of the cruelties exercised by the Mohawk toward their prisoners, and specifically toward 3 women, he said: "One of them (a thing not hitherto done) was burned all over her body, and afterwards thrown into a huge pyre.' And that "at every burn which they caused, by applying lighted torches to her body, an old man, in a loud voice, exclaimed, 'Daimon, Aireskoi, we offer thee this victim, whom we burn for thee, that thou mayest be filled with her flesh and render us ever anew victorious over our enemies.' Her body was cut up, sent to the various villages, and devoured." Megapolensis (1644), a contemporary of Father Jogues, says that when the Mohawk were unfortunate in war they would kill, cut up, and roast a bear, and then make an offering of it to this war god with the accompanying prayer: "Oh, great and mighty Aireskuoni, we know that we have offended against thee, inasmuch as we have not killed and eaten our captive enemies—forgive us this. We promise that we will kill and eat all the captives we shall hereafter take as certainly as we have killed and now eat this bear." He adds: "Finally, they roast their prisoners dead before a slow

fire for some days and then eat them up. The common people eat the arms, buttocks ,and trunk, but the chiefs cat the head and the heart.'

The Jesuit Relation for 1646 says that, properly speaking, the French had at that time peace with only the Mohawk, who were their near neighbours and who gave them the most trouble, and that the Mohegan (Mahingans or Mahinganak), who had had firm alliances with the Algonkin allies of the French, were there already conquered by the Mohawk, with whom they formed a defensive and offensive alliance; that during this year some Sokoki (AssokSekik) murdered some Algonkin, whereupon the latter determined, under a misapprehension, to massacre some Mohawk, who were then among them and the French. But, fortunately, it was discovered from the testimony of two wounded persons, who had escaped, that the murderers spoke a language quite different from that of the Iroquois tongues, and suspicion was at once removed from the Mohawk, who then hunted freely in the immediate vicinity of the Algonkin, N. of the St. Lawrence, where these hitherto implacable enemies frequently met on the best of terms. At this time the Mohawk refused Sokoki ambassadors a new compact to wage war on the Algonkin.

The introduction of firearms by the Dutch among the Mohawk, who were among the first of their region to procure them, marked an important era in their history, for it enabled them and the cognate Iroquois tribes to subjugate the Delawares and Munsee, and thus to begin a career of conquest that carried their war parties to the Mississippi and to the shores of Hudson bay. The Mohawk villages were in the valley of Mohawk r., N. Y., from the vicinity of Schenectady nearly to Utica, and their territory extended N. to the St. Lawrence and s. to the watershed of Schoharie er, and the E. branch of the Susquehanna. On the E. their territories adjoined those of the Mahican, who held Hudson r. From their position on the E. frontier of the Iroquois confederation the Mohawk were among the most prominent of the Iroquoian tribes in the early Indian wars and in official negotiations with the colonies, so that their name was frequently used by the tribes of New England and by the whites as a synonym for the confederation. Owing to their position they also suffered much more than their confederates in some of the Indiara and French wars. Their 7 villages of 1644 were reduced to 5 in 1677. At the beginning of the Revolution the Mohawk took the side of the British, and, at its conclusion, the larger portion of them, under Brant and Johnson, removed to Canada, where they have since resided on lands granted to them by the British government. In 1777 the Oneida expelled the remainder of the tribe and burned their villages.

In 1650 the Mohawk had an estimated population of 5,000, which was probably more than their actual number; for 10 years later they were estimated at only 2,500. Thenceforward they underwent a rapid decline, caused by their wars with the Mahican, Conestoga, and other tribes, and with the French, and also by the removal of a large part of the tribe to Caughnawaga and other mission villages. The later estimates of their population have been: 1,500 in 1677 (an alleged decrease of 3,500 in 27 years), 400 in 1736 (an alleged decrease of 1,100 in 36 years), 500 in 1741, 800 in 1765, 500 in 1778, 1,500 in 1783, and about 1.200 in 1851. These estimates are evidently little better than vague guesses. In 1884 they were on three reservations in Ontario: 965 at the bay of Quinte near the E. end of lake Ontario, the settlement at Gibson, and the reserve of the Six Nations on Grand r. Besides these there are a few individuals scattered among the different Iroquois tribes in the United States. In 1911, the Tyendinaga res. on the bay of Quinte, contained 1,343; there were 130 (including "Algonquins") at Watha, the former Gibson band which was removed earlier from Oka; and the Six Nations included 1.867

The Mohawk participitated in the following treaties with the United States: Ft. Stanwix, N. Y., Oct. 22, 1784, being a treaty of peace between the United States and the Six Nations and defining their boundaries: supplemented by treaty of Ft. Harmar, O., Jan. 9, 1789. Konondaigna (Canandaigna), N. Y., Nov. 11, 1794, establishing peace relations with the Six Nations and agreeing to certain reservations and boundaries. Albany, N. Y., Mar. 29, 1797, by which the United States sanctioned the cession by the Mohawk to the state of New York of all their lands therein.

The names of the following Mohawk villages have been preserved: Canajoharie, Canastigaone, Canienga, Caughnawaga, Chuchtononeda, Kanagaro, Kowogoconnughariegughurie, Nowadaga, Onoalagona, Osquake, Saratoga, Schaumactada (Schenectady), Schoharie, and Teatontaloga.

Monsoni (Mongsoaeythinyuwok, 'moose people.'—Franklin). An Algonquian tribe in N. Ontario, often classed as a part of the Cree, to whom they are closely related, although they seem to be almost as closely

related to the northern Chippewa. The first notice of them is in the Jesuit Relation for 1671. In that of 1672 they are placed on the shore of James bay, about the mouth of Moose r., which, according to Richardson. received its name from them. They are referred to under the name Aumonssoniks in the Proces verbal of the Prise de possession (1671), but were not represented at the ceremony, though Charlevoix asserts the contrary. Although Dobbs (1744) speaks of them as the Moose River Indians, he locates a village. or band on the w. bank of Rainy r., near Rainy lake, and others on the N. shore of this lake. Some confusion has arisen in regard to the habitat and linguistic connection of the tribe from the fact that the geographic designation "Moosonee" is frequently used to include all that portion of x. Ontario and N. Manitoba stretching along Hudson bay from Moose r. northward to Nelson r., a region occupied chiefly by the Maskegon. The usual and most permanent home of the Monsoni, however, has been the region of According to Chauvignerie their totem was the moose. In the Indian Aff. Report for 1911, 320 are enumerated at Moose Factory and 34 at New Post on the Abitibi, 80 m. above its confluence with Moose r. See Mousonce. (J. M. C. T.)

Montagnais (French 'mountaineers,' from the mountainous character of their country). A group of closely related Algonquian tribes

in Quebec, extending from about St. Maurice r. almost to the Atlantic, and from the St. Lawrence to the watershed of Hudson bay. The tribes of the group speak several wellmarked dialects. They are the Astouregamigoukh, Attikiriniouetch, Bersiamite, Chisedec, Escoumains, Espamichkon, Kakouchaki, Mauthæpi, Miskouaha, Mouchaouaouastiirinoek, Naskapi, Nekoubaniste. Otaguottouemin, Oukesestigouek, Oumamiwek, Papinachois, Tadoussae, and Weperigweia. Their linguistic relation appears to be closer with the Cree of Athabaska lake, or Avabaskawininiwug, than with any other branch of the Algonquian family. Champlain met them at the mouth of the Saguenay in 1603, where they and other Indians were celebrating with bloody rites the capture of Iroquois prisoners. Six years later he united with them the Hurons and Algonkin in an expedition against the Iroquois. In the first Jesuit Relation, written by Biard (1611-16) they are spoken of as friends of the French. From that time their name has a place in Canadian history, though they exerted no decided influence on the settlement and growth of the colony. The first missionary work among them was begun in 1615, and missions were subsequently established on the upper Saguenay and at lake St. John. These were continued, though with occasional and long interruptions, until 1776. The Montagnais fought the Miemac, and often the Eskimo. but their chief and inveterate foes were the Iroquois, who drove them for a time from the banks of the St. Lawrence and from their strongholds about the upper Saguenay, compelling them to seek safety at more distant points. After peace was established between the French and the Iroquois they returned to their usual haunts. Lack of proper food, epidemics, and contact with civilization are reducing their numbers. Turner (11th Rep. B. A. E., 1894) says they roam over the areas s. of Hamilton inlet as far as the gulf of St. Lawrence. Their western limits are imperfectly known. They trade at all the stations along the accessible coast, many of them at Rigolet and Northwest River. Sagard, in 1632, described them as Indians of the lowest type in Canada. Though they have occasionally fought with bravery, they are comparatively timid. They have always been more or less nomadic, and, although accepting the teachings of the missionaries, seem incapable of resigning the freedom of the forest for life in villages, nor can they be induced to cultivate

the soil as a means of support. Mr. Chisholm describes them as honest, hospitable, and benevolent, but very superstitious. Those who were induced to settle on the lower St. Lawrence appear to be subject to sickness, which is thinning their numbers. All who have not been brought directly under religious influence are licentious. Conjuring was much practised by their medicine-men. Some of the early missionaries speak highly of their religious susceptibility. They bury their dead in the earth, digging a hole 3 ft. deep and occasionally lining it with wood. The corpse is usually laid on its side, though it is sometimes placed in a sitting position. Above the grave is built a little birch-bark hut and through a window the relatives thrust bits of tobacco, venison and other morsels. No reliable estimate can be given of their former numbers. but it is known that they have greatly decreased from sickness and starvation consequent on the destruction of game. In 1812 they were supposed to number about 1,500; in 1857 they were estimated at 1,100, and in 1884 they were officially reported at 1,395, living at Betsiamits (Bersimis), Escoumains, Godbout, Grand Romaine, Lake St. John, and Mingan, in Quebec. In 1911 they, together with the Naskapi, numbered, according to the Canadian official report, 2,302, distributed as follows: Bersimis, 550; Escoumains, 54; Natashkwan, 73; Grand Romaine, 259; Lake St. John, 583; Mingan, 198; St. Augustine, 183; Seven Islands and Moisie, 402.

Consult Chamberlain in Ann. Archæol. Rep. Ontario 1905, 122, 1906.

The bands and villages of the Montagnais are: Appeelatat, Ashuapmuchuan, Attikameg, Bonne Espérance, Chicoutimi, Eskimo Point, Godbout, Ile Percée (mission), Itamamiu (mission), Ilets de Jeremie (mission), Kapiminakouetiik, Mauthæpi, Mingan, Moisie, Mushkoniatawee, Muskwaro, Nabisipi, Natashkwan, Pashashibu, Piekouagami, Romaine, and St. Augustine.

Moravians. Mahican, Munsee, and Delawares who followed the teachings of the Moravian brethren and were by them gathered into villages apart from their tribes. The majority were Munsee. In 1740 the Moravian missionaries began their work at the Mahican village of Shekomeko in New York. Meeting with many obstacles there, they removed with their converts in 1746 to Pennsylvania, where they built the new mission village of Friedenshuetten on the Susquehanna. Here they were more successful and were largely recruited from the Munsee and Delawares. almost all of the former tribe not absorbed by the Delawares finally joining them. They made another settlement at Wyalusing, but on the advance of the white population removed to Beaver r. in w. Pennsylvania, where they built the village of Friedensstadt. They remained here about a year, and in 1773 removed to Muskingum r. in Ohio, in the neighbourhood of the others of their tribes, and

[&]quot;The name indicates a tribe living near pointe des Monts—originally, pointe des Monts Pelés—on north shore of gulf of St. Lawrence, long 678-15' W., and usually considered as the mouth of the St. Lawrence r

occupied the three villages of Guadenhuetten, Salem, and Schoenbrunn. In 1781, during the border troubles of the Revolution, the Hurons removed them to the region of the Sandusky and Scioto, in N. Ohio, either to prevent their giving information to the colonists or to protect them from the hostility of the frontiersmen. The next spring a party of about 140 were allowed to return to their abandoned villages to gather their corn, when they were treacherously attacked by a party of border ruffions and the greater part massacred in the most cold-blooded manner, after which their villages were burned. The remaining Moravians moved to Canada in 1791, under the lendership of Zeisberger, and built the village of Fairfield on the Thames in Orford to., Kent co., Ontario. In 1813, their village was burned by the American troops. In 1815, they returned and built New Fairfield-now Moravaniantown—on the opposite bank from the old town. The number in 1884 was 275, but had increased in 1911, according to the Canadian official report, to 335. There were until recently a few in Franklin co., Kan-See Missions. (J. M. C. T.)

Big Beavers.—Rupp. W. Pa., 47, 1846. "Christian Indians of Big Beavers," because of their residence about 1770 on (Big Beaver et in w. Pa.). Christian Indians.—Schoderaft, Ind. Mukchiath. A sept of the Toquart, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes Canada, 32, 1890.

Muncey, A Munsee village in Middlesex co., Ontario, on the Thames r.

Anti-hart.—J. N. B. Hewart, infin, 1887. Tuscarora name : Munceytown.—Common name

Mundua (Mondawa, 'one that keeps calling or sounding (through the night"; a word used for the whippoorwill by the Chippewa about Kenora, lake of the Woods.—W.J... A tribe, or supposed tribe, which the Chippewa claim to have exterminated at an early period, with the exception of a remnant incorporated into their tribe and whose descendants constitute the Wabezhaze or Marten gens. The statements in regard to them, if identified with the Mantonek of the Jesuit writers, are at variance, and may relate to two different groups. The Mantone of the Jesuit Relation of 1640 are placed apparently on the upper

peninsula of Michigan, not far w. of Sault Ste. Marie, a little N. of the Noquet. In the Relation of 1858 they appear to be placed farther w. and associated with the Sioux. In the Relation of 1671 apparently the same people appear to be situated under the name Nantoue, near Fox r. and in the vicinity of the Miami band, which once resided in this region with or near the Mascoutens. In the tradition given by Warren, the scene of the conflict between the Chippewa and this people is indefinite, but the period assigned appears to antedate the entrance of the people into Wisconsin, and thus Schooleraft interprets it. The tradition, notwithstanding Warren's assertion that it can be considered history, is so exaggerated and indefinite as to date and locality as to render doubtful the propriety of identifying the Mundua of the tradition with the Mantouek of the Jesuit writers. Moreover, Warren's tradition in regard to the Marten gens cannot be reconciled with the tradition regarding the Mundua and with what is stated by the Jesuit Relations in regard to the Mantouek. It has been suggested that Amikwa, Noquet, and Mundua or Mantouek, respectively Beaver, Bear, and Whippoorwill gentes, are all names for one and the same people. (J. M. C. T.)

Mantoue.—Jes. Rel. 1640, 34, 1858. Mantouecks.—Bacqueville de la Potherie, Hist. Am., 11, 81, 1753. Mantouek.—Jes. Rel. 1658, 21, 1858. Mantoueou-ec.--Map of 1671 (?) in Wis. Hist. Soc. Coll., 111, 131, 1856. Meendua.—Ramsay in U.S. Ind. Aff. Rep., 83, 1850. Mun-dua.—Warren (1852) in Minn. Hist. Soc. Coll., v, 50, 1885. Mundwa.—Schoolcraft, Ind. Tribes, v, 39, 1855. Nantoüe'.—Jes. Rel. 1671, 42, 1858.

Munsee (Min-asin-ink, 'at the place where stones are gathered together.'—Hewitt). One of the three principal divisions of the Delawares the others being the Unami and Unalachtigo, from whom their dialect differed so much that they have frequently been regarded as a distinet tribe. According to Morgan they have the same three gentes as the Delawares proper, viz, Wolf (Tookseat), Turtle (Pokekooungo), and Turkey (Pullaook). Brinton says these were totemic designations for the three geographic divisions of the Delawares and had no reference to gentes (see Delaware). However this may be, the Wolf has commonly been regarded as the totem of the Mnnsee, who have frequently been called the Wolf tribe of the Delawares.

The Munsee originally occupied the headwaters of Delaware r. in New York, New Jersey, and Pennsylvania, extending s. to

Lehigh r., and also held the w. bank of the Hudson from the Catskill mts, nearly to the New Jersey line. They had the Mahican and Wappinger on the N. and E., and the Delawares on the s. and s. E., and were regarded as the protecting barrier between the latter tribe and the Iroquois. Their council village was Minisink, probably in Sussex co., N.J. According to Ruttenber they were divided into the Minisink, Waoranee, Warranawonkong, Mamekoting, Wawarsink, and Catskill. The Minisink formed the principal division of the Munsee, and the two names have often been confounded. The bands along the Hudson were prominent in the early history of New York, but, as white settlements increased, most of them joined their relatives on the Delaware. In 1756 those remaining in New York were placed upon lands in Schoharie co. and were incorporated with the Mohawk. By a fraudulent treaty, known as the "Walking Purchase," the main body of the Munsee was forced to remove from the Delaware about the year 1740, and settled at Wyalusing on the Susquehanna on lands assigned them by the Iroquois. Soon after this they removed to Alleghany r., Pa., where some of them bad settled as early as 1724. The Moravian missionaries had already begun their work among them (see Missions; Moravians), and a considerable number under their teaching drew off from the tribe and became a separate organization. The others moved w. with the Delawares into Indiana, where most of them were incorporated with that tribe, while others joined the Chippewa, Shawnee, and other tribes, so that the Munsee practically ceased to exist as an organized body. Many removed to Canada and settled near their relatives, the Moravian Indians.

On account of the connection of the Munsee with other tribes, it is impossible to estimate their numbers at any period. In 1765 those on the Susquehanna were about 750. In 1843 those in the United States were chiefly with the Delawares in Kansas, and numbered about 200, while others were with the Shawnee and Stockbridges, besides those in Canada. 1885 the only Munsee officially recognized in the United States were living with a band of Chippewa in Franklin co., Kans., both together numbering only 72. The two bands were united in 1859, and others are incorporated with the Cherokee in Oklahoma, having joined them about 1868. These Munsee were more commonly known in recent years as

"Christians." In Canada the band of Munsee settled with the Chippewa on Thames r., in Caradoe tp., Middlesex co., Ontario, numbered 119 in 1886, while the Moravians, who are mainly Munsee, living near them in Orford township, Kent co., numbered 275 in 1884. According to the Indian Affairs Dept. Rep. for 1911, the Moravians of the Thames numbered 335 persons, and the "Munsees of the Thames" numbered 112. There are also a few with the Stockbridges at Green Bay agency, Wis.

The Munsee have been parties to the following treaties with the United States: Treaty of Fort Industry, O., July 4, 1805, with the Ottawa, Wyandot, and other tribes. Appendix to the Menominee treaty with the United States at Green Bay, Wis., Oct. 27, 1832, by the Stockbridges, Munsee, Brothertons, and others. Treaty of Stockbridge, Wis., Sept. 3, 1839, by Stockbridges and Munsee. Treaty of Stockbridge, Wis., Feb. 5, 1856, amending treaty of Sept. 3, 1839. Treaty at Sac and Fox agency, Kans. July 16, 1859, in connection with certain Chippewa. (J. M.)

Humenthi.-Gatschet, Shawnee MS, B A E. 1882 (Shawnee name; pl. Humenthigi, from menethi, 'island'). Mantuas.-Authority of 1840 quoted by Jones, Ojebway Inds, 121, 1861. Soc., 172, 1878 ('Wolf', one

of the three Delaware gentes; according to Brinton these divisions are not gentes). Wemintheew.— Aupaumut (1791) in Brinton, Lenape Leg., 20, 1885 Mahican name). Wolf tribe of the Delawares.— The Munsee have frequently been so called.

Mushkoniatawee. A Montagnais village on the N. shore of the gulf of St. Lawrence, Quebec.—Stearns, Labrador, 271, 1884.

Muskeg (Chippewa, mŭskig; Kickapoo, maskyāgi, 'grassy bog.'—W.J.). Low, wet land; a quagmire, marsh, swamp, the equivalent of savanne in Canadian French. A word much used in parts of Ontario, w. and N. w. Canada, and the adjoining regions of the United States; spelled also maskeg. In the N. W. muskeg is the usual form. (A. F. C.)

Muskwaro. A former Montagnais rendezvous and mission station on the N. shore of the gulf of St. Lawrence, opposite Anticosti id. The Indians deserted it in recent years for Romaine.

Mashquaro.—McLean, Hudson Bay, II, 53, 1849. Maskouaro.—Hind, Lab. Penni, II, 180, 1863. Masquarro.—Ibid, 26. Muskwaro.—Can. Geographic Bd, 92, 1911. Musquahanos.—Can Ind Aff. 1880, 313, 1881 (applied to the band there; misprint?). Musquarro.—Hind, Lab. Penin, II, 133, 1863.

Muskwoikakenut (Mus-kwoi-kú-kc-nut, 'He shoots bears with arrows'). A Cree band so called after its chief, living in 1856 in the vicinity of Ft. de Prairie, Saskatchewan.—Hayden, Ethnog. and Philol. Mo. Val., 237, 1862.

Muskwoikauepawit (Mus-kwoi-kāu-e-pā-wit, 'standing bear'). A Cree band, so called after its chief, living in 1856 about Ft. de Prairie, Saskatchewan.—Hayden, Ethnog. and Philol. Mo. Val., 237, 1862.

Musquash. A name for the muskrat (Fiber zibethicus), used in Canada and N. and w. portions of the United States. In early writings on Virginia the forms mussascus and musquassus (Capt. John Smith, 1616), muscassus (Hakluyt, 1609), and others occur. Cognate words in other Algonquian dialects are the Abnaki muskwessu, and the Chippewa miskwasi, signifying 'it is red,' which was therefore the original signification of the Virginian name whereof Smith's word is a corruption, and referred to the reddish colour of the animal.

(A. F. C.)

Musqueam. A Cowichan tribe occupying the N. porton of the Fraser delta, Brit. Col.; pop. 98 in 1911. Male is their village. Miskwiam. Tolmie and Dawson, Vocabs., Brit. Col., 119a, 1884. Misqueam. Can Ind Aff for 1880, 316, 1881. Musqueam. Ibid., 1901, pt. 11, 158. Musqueam. Ibid., 1877, 11. Musqueom.—Ibid., 1902, 72. Qme' çkoyim.—Boas in 64th Rep. Brit. A. S., 451, 1894. Qmuski'em.—Hill-Tout in Ethnol. Surv. Can., 54, 1902.

Mussindummo ('water snake')—Tanner, Narr., 314, 1830). Given as one of the totems among the Ottawa and Chippewa. It may be an Ottawa totem, as it is not mentioned by Morgan or Warren.

Mustoo. A name given by Dawson to a supposed town on Hippa id., Queen Charlotte ids., Brit. Col., but in reality the word is a corruption of Nastó, the Haida name for Hippa id., on which there were several towns See Atonus, Gatga-inans, Sulu-stins. (LRS.)

Muswasipi (cognate with Chippewa Moswasibi, 'moose river.'—W.J.). The name of one of the divisions of the Upeshipow, an Algonquian tribe of Ungava, living in 1770 on Moose r., N. Ontario.—Richardson, Aretic Exped., II, 38, 1851.

Mutsiks (Mŭt'-stks, 'braves'). A society of the Ikunuhkahtsi, or All Comrades, in the Piegan tribe; it consists of tried warriors.— Grinnell, Blackfoot Lodge Tales, 221, 1892.

Myeengun ($Mn'i'ng\bar{u}n$, 'wolf'). A gens of the Chippewa, q. v.

Mah-een-gun.— Warren (1852) in Minn Hist, Soc, Coll., v. 44, 1885 Ma'-ingan.—Gatschet, Ojibwa M8, B. A. E., 1882 Ma'ingan.—Wim Jones, infin, 1906 My-een'-gun.— Morgan, Anc. Soc., 166, 1877

Mythology. The mythology of the North American Indians embraces the vast and complex body of their opinions regarding the genesis, the functions, the history and the destiny not only of themselves but also of every subjective and of every objective phenomenon, principle, or thing of their past or present environment which in any marked manner had affected their welfare.

Among savage tribal men a myth is primarily and essentially an account of the genesis, the functions, the history, and the destiny of a humanized fictitious male or lemale personage or being who is a personification of some body, principle, or phenomenon of nature, or of a faculty or function of the mind, and who performs his or her functions by imputed inherent orenda, or magic power, and by whose being and activities the incheate reasoning of such men sought to explain the existence and the operations of the bodies and

the principles of nature. Such a being or personage might and did personify a rock, a tree, a river, a plant, the earth, the night, the storm, the summer, the winter, a star, a dream, a thought, an action, or a series of actions, or the ancient or prototype of an animal or a bird. Later, such a being, always humanized in form and mind, may, by his assumed absolute and mysterious control of the thing or phenomenon personified, become a hero or a god to men, through his relations with them-relations which are in fact the action and interaction of men with the things of their environments. A mythology is composed of a body of such myths and fragments thereof. But of course no myth that has come down to the present time is simple. Myths and parts of myths have necessarily been employed to define and explain other myths or other and new phenomena, and the way from the first to the last is long and often broken. Vestigial myths, myths whose meaning or symbolism has from any cause whatsoever become obscured or entirely lost, constitute a great part of folk-lore, and such myths are also called folk-tales.

A study of the lexic derivation of the terms "myth" and "mythology" will not lead to a satisfactory definition and interpretation of what is denoted by either term, for the genesis of the things so named was not understood when they received these appellations. In its broadest sense, mythos in Greek denoted whatever was uttered by the mouth of mana saying, a legend, a story of something as understood by the narrator, a word. But in Attic Greek it denoted also any prehistoric story of the Greeks, and these were chiefly stories of gods and heroes, which were, though this fact was unknown to the Greeks themselves, phenomena of nature. And when the term received this specific meaning it fell into discredit, because the origin and true character of myths not being understood, these prehistoric stories, by the advance in knowledge, came into disrepute among the Greeks themselves, and, after the rise of Christianity, they were condemned as the wicked fables of a false religion. Hence, in popular usage, and quite apart from the study of mythology, the term "myth" denotes what is in fact nonexistent-a nothing with a name, a story without a basis of fact-"a nonentity of which an entity is affirmed, a nothing which is said to be something." Besides mythos in Greek, logos, signifying 'word,' was employed origin-

ally with approximately the same meaning in ordinary speech at the time of Homer, who sometimes used them interchangeably. strictly speaking, there was a difference from the beginning which, by the need for precision in diction, finally led to a wide divergence in the signification of the two terms. Logos, derived from legein, 'to gather,' was seldom used by Homer to denote 'a saving, a speaking, or a signification,' but to denote usually 'a gathering,' or, strictly, 'a telling, casting up, or counting. In time, this term came to mean not only the inward constitution but the outward form of thought, and finally to denote exact thinking or reasonnot only the reason in man, but the reason in the universe—the Divine Logos, the Volition of God, the Son of God, God Himself. It is so employed in the opening lines of the first chapter of the Gospel of St. John. Such is a brief outline of the uses of the two terms which in their primal signification formed the term "mythology," from which but little can be gathered as to what constitutes a myth.

Up to a certain point, there is substantial agreement among students in the use of the term myth. But this means but little. To the question, What is the nature and origin of a myth? wholly different replies, perplexing in number, are given, and for this reason the study of mythology, of a definite body of myths, has not yet become a science. By careful study of adequate materials a clue to the meaning and significance of myths may be found in the apprehension—vague in the beginning, increasingly definite as the study progresses—that all these things, these tales, these gods, although so diverse, arise from one simple though common basis or motive.

Every body, element, or phenomenon of nature, whether subjective or objective, has its myth or story to account for its origin. history and manner of action. Portions of these myths, especially those concerning the most striking objects of an environment, are woven together by some master mind into a cycle of myths, and a myth of the beginnings, a genesis, or creation, story is thus developed. The horns and the cloven feet of the deer, the stripes of the chipmunk's back, the tail of the beaver, the flat nose of the otter, the rattles of the snake, the tides of rivers, the earthquake, the meteor, the aurora borealis; in short, every phenomenon that fixed the attention required and received an explanation which, being conventional, satisfied the common-sense of the community, and which, later, owing to its imputation of apparently impossible attributes to fictitious personages to account for the operations of nature, became, by the growing knowledge of man, a myth.

A myth is of interest from three view-points, namely, (1) as a literary product embodying a wondrous story of things and personages; (2) for the character of the matter it contains as expressive of human thought and the interpretation of human experience, and (3) for the purpose of comparison with the myths of alien or of cognate peoples and for the data it contains relating to the customs, arts, and archæology of the people among whom it exists.

With the available data, it is as yet impossible to define with satisfactory clearness all the objective realities of the personal agencies or men-beings of the American Indian myths. In Indian thought these personages are constantly associated in function, and sometimes they exercise derivative powers or are joined in mysterious kinship groups, always combining the symbolism of personified objective phenomena with imputed life, mind, and volition, and with the exercise of attributed orenda, or magic power, of diverse function and potency. Moreover, the size and the muscular power of the objective reality personified have little, if any, relation to the strength of the occuda exercised by the manbeing.

To explain in part the multiform phenomena of different and successive environments, the philosophic ancestors of the Indians of to-day subconsciously imputed mind and immortal life to every object and phenomenon in nature. and to nearly every faculty and affection of the human mind and body. Concomitantly with this endowment of lifeless things with life and mind was the additional endowment witht orenda, which differed in strength and function with the individual These dogmas underlie the mythology and religion of all the Indians. as they supplied to the latter's inchoate reasoning satisfactory explanations of the phenomena of nature—life and death, dreimis and disease, floral and faunal growth and reproduction, light and darkness, cold and heat, winter and summer, rain and snow, frost and ice, wind and storm. The term "animism" has been applied by some to this doctrine of the possession of immortal life and mind by lifeless and mindless things, but with an insufficient definition of the objective for which

it stands. The uses and definitions of this term are now so numerous and contradictory that the critical student cannot afford to employ it without an exact objective definition. Primarily, animism, or the imputation of life to lifeless things, was selected to express what was considered the sole essential characteristic basis of the complex institutions called mythology and religion. But if the ascription of life to lifeless things is animism, then it becomes of fundamental importance to know exactly what kind of life is thus ascribed. If there is one difference between things which should be earefully distinguished, it is that between the alleged ghosts of dead human beings and those other alleged spiritual beings which never have been real human beingsthe animal and the primal spirits. Does animism denote the ascription of only one or of all these three classes of spirits? Definite explanation is here lacking. So, as a key to the satisfactory interpretation of what constitutes mythology and religion, animism as heretofore defined has failed to meet the criticism of such scholars as Spencer, Max Müller, and Brinton, and so has fallen into that long category of equivocal words of which fetishism, shamanism, solarism, ancestor-worship, personification, and totemism are other members. Every one of these terms, as commonly employed, denotes some important phase or element in religion or mythology which, variously defined by different students, does not, however, form the characteristic basis of mythology and religion.

The great apostle of ancestor-worship, Lippert, makes animism a mere subdivision of the worship of ancestral spirits, or ghosts. But Gruppe, adding to the confusion of ideas, makes animism synonymous with fetishism, and describes a fetish as the tenement of a disembodied human spirit or ghost, and erroneously holds that fetishism is the result of a widely prevalent belief in the power of the human ghost to take possession of any object whatsoever, to leave its ordinary dwelling, the remains of the human body, to enter some other object, such as the sky, the sun, the moon, the earth, a star, or what not. Even the chief gods of Greece, Rome and India are by some regarded as fetishes developed through the exaltation of ancestral ghosts to this state. Their cult is regarded as a development of fetishism, which is an outgrowth of animism, which is, in turn, a development of ancestorworship. To add to this array of conflicting definitions, Max Müller declares that fetishism is really the "very last stage in the downward course of religion." Gruppe further holds that when a sky fetish or a star fetish becomes a totem, then the idea of "sons of heaven" or "children of the sun," is developed in the human mind, and so, according to this doctrine, every religion, aneient and modern, may be explained by animism, fetishism, and totemism. Moved by this array of conflicting definitions, Max Müller declares that, to secure clear thinking and sober reasoning, these three terms should be entirely disearded, or, if used, then let animism be defined as a belief in the worship of ancestral spirits, whence arises in the mind the simplest and most primitive ideas of immortality; let fetishism be defined as a worship of chance objects having miraculous powers; and, finally, let totemism be defined as the custom of choosing some emblem as the family or tribal mark to which worship is paid and which is regarded as the human or superhuman ancestor. Müller has failed to grasp the faets clearly, for no one of these excludes the others.

Stahl (1737), adopting and developing into modern scientific form the classical theory of the identity of life and soul, employed the term "animism" to designate this doctrine.

Tylor (1871), adopting the term "animism" from Stahl, defines it as "the belief in spiritual beings," and as "the deep-lying doetrine of spiritual beings, which embodies the very essence of spiritualistic as opposed to materialistic philosophy"; and, finally, he says, "animism is, in fact, the groundwork of the philosophy of religion, from that of savages up to that of civilized man." He further makes the belief in spiritual beings "the minimum definition of religion." Hence, with Tylor, animism is broadly synonymous with religion.

But, strict definition shows that a belief in spiritual beings, as such, did not, does not, and cannot form the sole material out of which primitive thought has developed its gods and deities. To this extent, therefore, animism does not furnish the key to an accurate and valid explanation of mythology and religion.

Brinton (1896) denies that there is any special religious activity taking the form of what Tylor ealls "animism," and declares that the belief that inanimate objects possess souls or spirits is common to all religions and many philosophies, and that it is not a trait characteristic of primitive faiths, but merely a sec-

ondary phenomenon of the religious sentiment. Further, he insists that "the acceptance of the doctrine of 'animism' as a sufficient explanation of early cults has led to the neglect, in English-speaking lands, of their profounder analysis."

So far as is definitely known, no support is found in the mythologies of North America for the doctrine of ancestor-worship. This doctrine seeks to show that savage men had evolved real gods from the shades of their own dead chiefs and great men. It is more than doubtful that such a thing has ever been done by man. Competent data and trained experience with the Indians of North America show that the dominant ideas of early savage thought precluded such a thing. One of the most fundamental and characteristic beliefs of savage thought is the utter helplessness of man unaided by the magic power of some favouring being against the bodies and elements of his environment. The deities, the masters and controllers—the gods of later times differed greatly in strength of body and in the potency of the magic power exercised by them, in knowledge and in astuteness of mind; but each in his own sphere and jurisdiction was generally supreme and incomprehensible. Human shades, or ghosts, did not or could not attain to these godlike gifts. To change, transform, create by metamorphosis, or to govern, some body or element in nature, is at once the prerogative and the function of a master—a controller—humanly speaking, a god.

The attribution of power to do things magically, that is, to perform a function in a mysterious and incomprehensible manner, was the fundamental postulate of savage mind to account for the ability of the gods, the fictitious personages of its mythology, to perform the acts which are in fact the operations of the forces of nature. To define one such man-being or personage, the explanation, to be satisfactory, must be more than the mere statement of the imputation of life, mind, and the human form and attributes to an objective thing. There must also be stated the fact of the concomitant possession along with these of orenda, or magic power, differing from individual to individual in efficacy, function. and scope of action.

While linguistics may greatly aid in comprehending myths, it is nevertheless not always safe for determining the substance of the thought, the concept; and the student must eschew the habit of giving only an etymology rather than a definition of the things having the names of the mythical persons, which may be the subject of investigation. Etymology may aid, but without corroborative testimony it may mislead.

Many are the causes which bring about the decline and disintegration of a myth or a cycle of myths of a definite people. The migration or violent disruption of the people, the attrition or the superposition of diverse alien cultures, or the change or reformation of the religion of the people based on a recasting of opinions and like causes, all tend to the decline and dismemberment and the final loss of a myth or a mythology.

All tribes of common blood and speech are bound together by a common mythology and by a religion founded on the teachings of that mythology. These doctrines deal with a vast body of all kinds of knowledge, arts, institutions, and customs. It is the creed of such a people that all their knowledge and wisdom, all their rites and ceremonies, and all that they possess and all that they are socially and politically, have come to them through direct revelation from their gods, through the beneficience of the rulers of the bodies and elements of their environment.

The social and political bonds of every known tribe are founded esentially on real or fictitious blood kinship, and the religious bonds that hold a people to its gods are founded on faith in the truth of the teachings of their myths. No stronger bonds than these are known to savage men. The disruption fo these, by whatever cause, results in the destruction of the people.

The constant struggle of man with his physical environment to secure welfare was a warfare against elements ever definitely and vividly personified and humanized by him, thus unconsciously making his surroundings quite unreal, though felt to be real; and his struggle with his environment was a ceaseless strife with animals and plants and trees in like manner ever mythically personified and humanized by him; and, finally, his tireless struggle with other men for supremacy and welfare was therefore typical, not only fundamentally and practically, but also mythically and ideally; and so this never-ceasing struggle was an abiding, all-pervading, all-transforming theme of his thoughts, and an ever-impending. ever-absorbing business of his life, suffered and impelled by his ceaseless yearning for welfare.

An environment would have been regarded by savage men very differently from what it would be by the cultured mind of to-day. To the former, the bodies and elements composing it were regarded as beings, indeed as manbeings, and the operations of nature were ascribed to the action of the diverse magic powers, or orendas, exercised by these beings rather than to the forces of nature; so that the action and interaction of the bodies and elemental principles of nature were regarded as the result of the working of numberless beings through their orendas. Among most known tribes in North America the earth is regarded as a humanized being in person and form, every particle of whose body is living substance and potent with the quickening power of life, which is bestowed on all who feed upon her. They that feed upon her are the plants and the trees, who are indeed beings living and having a being because they receive life substance from the earth, hence they are like the primal beings endowed with mind and volition, to whom prayer may be offered, since they rule and dispose in their several jurisdictions unless they are overcome by some more powerful orenda. Now, a prayer is psychologically the expression of the fact that the petitioner in need is unable to secure what is required for the welfare, or in distress to prevent what will result in the illfare, of himself or his kind. The substance of the prayer merely tells in what direction or in what respect this inability exists. In turn, the animals and men live on the products of the trees and plants, by which means they renew life and gain the quickening power of life, indirectly from the earth-mother, and thus by a metaphor they are said to have come up out of the earth. As the giver of life, the earth is regarded affectionately and is called Mother, but as the taker of life and the devourer of their dead bodies, she is regarded as wicked and a cannibal.

In the science of opinions, mythology is found to be a fruitful field in which to gather data regarding the origin and growth of human concepts relating to man and the world around him. A study of the birth and evolution of the concepts of the human mind indicates clearly that the beginnings of conventional forms and ideas and their variations along the lines of their development are almost never quite so simple, or rather quite so direct, as they may seem—are seldom, even in the beginning, the direct product of the

environmental resource and exigency acting together so immediately and so exclusively of mental agency as students are apt to assume. As a rule they are rather the product of these things-these factors and conditions of environment acting very indirectly and sometimes very subtly and complexly—through the condition of mind wrought by long-continued life and experience therein, or, again, acting through the state of mind borne over from one environment to another. It is the part of wisdom to be more cautious in deriving ideas and concepts, arts, or even technical forms of a people too instantly, too directly, from the environing natural objects or elements they may simulate or resemble. The motive, if not for the choice, at least for the persistency, of a given mode of a concept in relation to any objective factor is always a psychical reason, not a mere first-hand influence of environment or of accident in the popular sense of this term. This disposition of the "mere accident" or "chance" hypothesis of origins dispels many perplexities in the formation of exact judgment concerning comparative data. in the identifications of cognate forms and concepts among widely separated peoples; for instance, in the drawing of sound inferences particularly regarding their common or generic, specific or exceptional, origin and growth, as shown by the data in question.

As it is evident that independent processes and diverse factors combined cannot be alike in every particular in widely separated parts of the world, there is found a means for determining, through minute differences in similarity, rather than through general similarities alone, howsoever striking they may appear, whether such forms are related, whether or not they have a common genesis whence they have inherited aught in common. caution makes it incumbent on students to beware of the alluring fallacy lurking in the frequently repeated epigram that "human nature is everywhere the same." The nature of men differs widely from differences of origin, from differences of history, from differences of education, and from differences of environment. Hence, to produce the same human nature everywhere, these factors must everywhere be the same. The environments of no two peoples are ever precisely the same, and so the two differ in their character, in their activities, and in their beliefs.

To the primitive inchoate thought of the North American Indian all the bodies and ele-

ments of his subjective and objective environment were humanized beings—man-beings, or beings that were persons, that were man in form and attributes and endowed with immortal life (not souls in the modern acceptation of this term), with omniscience, and with potent magic power in their several jurisdictions. These beings were formed in the image of man, because man was the highest type of being known to himself and because of his subjective method of thought, which imputed to outside things, objective realities, his own form and attributes. He could conceive of nature in no other way. They sometimes, however, had the power of instant change or transmigration into any desired object through the exercise of peculiar magic power.

The world of the savage was indeed of small extent, being confined by his boundless ignorance to the countries bordering on his own, a little, if any, beyond his horizon. Beyond, this he knew nothing of the world, nothing of its extent or structure. This fact is important and easily verified, and this knowledge aids in fully appreciating the teachings of the philosophy of savage men. Around and through this limited region travelled the sun, the moon, the stars, the winds, the meteors, and the fire dragons of the night, and the fitful auroral elerubim of the north. All these were, to him, man-beings. All trees and plants—the sturdy oak, the tall pine, and the wild parsnip—were such beings rooted to the earth by the mighty spell of some potent wizard, and so, unlike the deer, they do not ordinarily travel from place to place. In like manner, hills and mountains and the waters of the earth may sometimes be thus spellbound by the potency of some enchantment. Earthquakes are sometimes caused by mountains which, held in pitiless thralldom by the orenda of some mighty sorcerer, struggle in agony to be freed. And even the least of these are reputed to be potent in the exercise of magic power. But rivers run and rills and brooks leap and bound over the land, yet even these in the ripeness of time, may be gripped to silence by the mighty magic power of the god of winter.

Among all peoples and in all times and in all planes of culture there were persons whose opinions were orthodox, and there were also persons whose opinions were heterodox, and were therefore a constant protest against the common opinions, the common-sense of the community; these were the agnostics of the ages, the prophets of change and reformation.

Every ethnical body of myths of the North American Indians forms a circumstantial narration of the origin of the world of the mythmakers and of all things and creatures therein. From these narratives it is learned that a world, earlier than the present, situated usually above the visible sky, existed from the beginning of time, in which dwelt the first or prototypal personages who, having the form and the attributes of man, are herein called man-beings. Each of these man-beings possessed a magic power peculiar to himself or herself, by which he or she, was later enabled to perform his or her functions after the metamorphosis of all things. The life and manner of living of the Indians to-day is patterned after that of these man-beings in their first They were the prototypes of the things which are now on this earth.

This elder world is introduced in a state of peace and harmony. In the ripeness of time, unrest and discord arose among these first beings, because the minds of all, except a very small number, becoming abnormal, were changed, and the former state of tranquillity was soon succeeded by a complete metamorphosis of all things and beings, or was followed by commotion, collision, and strife. The transformed things, prototypes, were banished from the sky-land to this world, whereupon it acquired its present appearance and became peopled by all that is upon it-man, animals, trees, and plants, who formerly were man-beings. In some cosmologies man is brought upon the scene later and in a peculiar manner. Each man-being became transformed into what his or her attributes required, what his primal and unchangeable nature demanded, and then he or she became in body what he had been, in a disguised body, before the transformation. But those man-beings whose minds did not change by becoming abnormal, remained there in the sky-land--separate, peculiar, and immortal. Indeed they are but shadowy figures passing into the shoreless sea of obliviou.

Among the tribes of North American Indians there is a striking similarity in their cycles of genesis myths, in that they treat of several regions or worlds. Sometimes around and above the mid-world, the habitat of the myth, are placed a group of worlds—one at the east, one at the south, one at the west,

one at the north, one above, and one below—which, with the midworld, number seven in all. Even each of the principal colours is assigned to its appropriate world. Hence, to the primitive mind, the cosmos (if the term be allowed here) was a universe of man-beings whose activities constituted the operations of nature. To it nothing was what it is to scientific thought. Indeed, it was a world wholly artificial and fanciful. It was the product of the fancy of savage and inchoate thinking, of the common sense of savage thought

So far as is definitely known, the various systems of mythology in North America differ much in detail one from another, superficially, giving them the aspect of fundamental difference of origin and growth; but a careful study of them discloses the fact that they accord with all great bodies of mythology in a principle which underlies all, namely, the principle of change, transmigration, or metamorphosis of things, through the exercise of orenda, or magic power, from one state, condition, or form, to another. By this means things have become what they now are. Strictly, then, creation of something from nothing has no place in them. In these mythologies, purporting to be philosophies, of course, no knowledge of the real changes which have affected the environing world is to be sought; but it is equally true that in them are embedded, like rare fossils, and precious gems, many most important facts regarding the history of the human mind.

For a definite people in a definite plane of culture, the myths and the concomitant beliefs resting on them, of their neighbours, are not usually true, since the personages and the events narrated in them have an aspect and an expression quite different from their own, although they may in the last analysis, express fundamentally identical things—may in fact spring from identical motives.

Among the Iroquois and the eastern Algonquian tribes, the Thunder people, human in form and mind and usually four in number, are most important and staunch friends of man. But in the Lake region, the N.W. coast to Alaska, and in the northern drainage of the Mississippi and Missouri valleys, this conception is replaced by that of the Thunderbird.

Among the Algonquian and the Iroquoian tribes the myths regarding the so-called firedragon are at once striking and important. Now, the fire-dragon is in fact the personification of the meteor Flying through the air among the stars, the larger meteors appear against some midnight sky like fiery reptiles sheathed in lambent flames. It is believed of them that they fly from one lake or deep river to another, in the bottom of which they are bound by enchantment to dwell, for should they be permitted to remain on the land they would set the world on fire. The Iroquois applied their name for the fire-dragon, 'lightthrower,' to the lion when first seen, thus indicating their conception of the fiereeness of the fire-dragon. The Ottawa and Chippewa missibizi, or missibizhu, literally 'great lynx.' is their name for this mythic being. horned screent does not belong here, but the misnamed tigers of the Peoria and other Algonquian tribes do. Among the Iroquois it was the deeds of the fire-dragon that hastened the occasion for the metamorphosis of the primal beings.

As early as 1868 Brinton called attention to the curious circumstance that in the mythology of those Eskimo who had had no contact with European travellers, there were no changes or transformations of the world affecting the aspect and character of the earth. In this statement he is followed by Boas (1904), who also claims that the animal myth proper did not belong originally to Eskimo mythology, although there are now in this mythology some animal myths and weird tales and accounts regarding monsters and vampire ghosts and the thaumaturgic deeds of shamans and wizards. This is in strong contrast with the content of the mythologies of the Indian tribes that have been studied.

In its general aspects the mythology of the North American Indians has been instructively and profitably discussed by several American anthropologists, who have greatly advanced the study and knowledge of the subject. Among these are Powell, Brinton, Boas, Curtin, Fletcher, Matthews, Cushing, Fewkes, and Divon.

Powell treated the subject from the philosophical and evolutional point of view, and sought to establish successive stages in the development of the mythological thought or concept, making them imputation, personification and deification; and the product he divided into four stages from the character of the dominant gods in each, namely, (1) hecastotheism, wherein everything has life, personality, volition, and design, and the wondrous attributes of man; (2) zötheism, wherein

life is not attributed indiscriminately to lifeless things, the attributes of man are imputed to the animals and no line of demarcation is drawn between man and beast, and all facts and phenomena of nature are explained in the mystic history of these zoömorphic gods; (3) physitheism, wherein a wide difference is reognized between man and the animals, the powers and phenomena of nature are personified, and the gods are anthropomorphie; and (4) psychotheism, wherein mental attributes and moral and social characteristics with which are associated the powers of nature are personified and deified, and there arise gods of war, of love, of revelry, plenty and fortune. This last stage, by processes of mental integration, passes into monotheism on the one hand and into pantheism on the other. It is found that these four stages are not thus successive, but that they may and do overlap, and that it is best perhaps to call them phases rather than stages of growth, in that they may exist side by side.

Brinton learnedly calls attention to the distinctively native American character of the large body of myths and tales rehearsed among the American aborigines. His studies include also much etymological analysis of mythical and legendary names, which is unfortunately largely inaccurate, analysis being apparently made to accord with a preconceived idea of what it should disclose. This vitiates a large part of his otherwise excellent identifications of the objective realities of the agents found in the mythology. He also treats in his instructive style the various cults of the demiurge, or the culture-hero or hero-god; but it must be borne in mind that here the so-called hero-god is not solely or even chiefly such in character. In discussing the hero-myths of the N. w. Pacific Coast tribes, Boas points out the fact that the culture-hero of that area was not always prompted by altruistic motives in "giving the world its present shape and man his arts." The hero is credited with failures as well as with successes, and in character is an "egotist pure and simple." On the other hand, Boas finds in the life and character of the Algonquian Nanabozho (q. v.) altruistic motives dominant. This tendency to displace the egotistic motives of the primitive transformer with pre-eminently altruistic ones is strongly marked in the character of the Iroquoian Tharonhiawagon a parallel if not cognate conception with that of the Algonquian Nanabozho. As showing a

transitional stage on the way to altruism, Boas states that the transformer among the Kwakiutl brings about the changes for the benefit of a friend and not for himself. While there are some Algonquian myths in which Nanabozho appears as a trickster and teller of falsehoods, among the Iroquois the trickster and buffoon has been developed alongside that of the demi-urge, and is sometimes reputed to be the brother of death. The mink, the wolverine, the bluejay, the raven, and the coyote are represented as tricksters in the myths of many of the tribes of the Pacific slope and N. W. coast. (L.N.B.H.)

Naaik (N'a'iEk, or N'ë'iEk, 'the bear-berry'). A village of the Nicola band of Ntlakyapamuk near Nicola r., 39 m. above Spence Bridge, Brit. Col.; pop. 141 in 1901, the last time the name appears.

Na-ai-ik,—Dawson in Trans Roy Soc Can , sec it, 44, 1891. N'a'irk,—Teit in Mem. Am. Mus. Nat. Hist , ii, 174, 1900. N'ē'irk—Ibid. Ni-ack,—Can , Ind. Aff. 1884, 189, 1885.

Naalgus-hadai (Na^ka'lgAsxā'da-i, 'dark-house people'). A subdivision of the Yadus, a family of the Eagle clan of the Haida.—Swanton, Cont. Haida, 276, 1905.

Naas-Glee. Given as a Chimmesyan village at the headwaters of Skeena r., N. Brit. Col.—Downie in Jour. Roy. Geog. Soc., XXXI, 253, 1861.

Nabisippi. See Napisibi.

Nachvak. An Eskimo missionary station of the Moravians in Labrador, 110 miles south of cape Chidley.—Duckworth in Proc. Cambridge Philos. Soc., x, 288, 1900.

Naden-hadai $(N\tilde{v}'dAn x\tilde{a}'da-i,$ 'Naden river people'). A subdivision of the Koetas, a family of the Raven clan of the Haida. Unlike the rest of the family this subdivision remained on Queen Charlotte ids. and settled on Naden r.—Swanton, Cont. Haida, 272, 1905.

Nadowa. A name, expressing utter detestation, applied by various Algonquian tribes to a number of their neighbouring and most inveterate enemies. Its use was not limited to the tribes of a single linguistic stock, the historical references showing that it was applied in some instances, in a modified form, to Eskimo, Siouan, and Iroquoian peoples. For synonyms see Eskimo, Iroquois and Notloway.

The etymology of the term is in doubt. The analysis proposed by Gerard (Am. An-

throp., vi, 319, 326, 1904), namely, the goes to seek flesh to eat,' while grammatically permissible, is historically improbable, being too general. In N. United States the original application of the word appears to have been to various small, dark-coloured, poisonous rattlesnakes, inhabiting the lake and prairie regions, such as the Crotalophorus tergeminus (Sistrurus catenatus), and possibly to C. kirtlandi, the black massasauga. Cuoq gives as the meaning of the term natowe, a "kind of large serpent formerly quite common in the neighbourhood of Michillimakina, i. e., Mackinac, the flesh of which the Indians ate; the Algonkin and all nations of the Algonquian tongue give this name to the Iroquois and to tribes of the Iroquoian stock." The Menominee (Hoffman) apply the term to the massasauga rattlesnake, and the Chippewa, (Tanner) to a "thick, short rattlesnake." Tanner's list of Ottawa tribal names are found Nautowaig, Naudoways, 'rattlesnakes,' and Matchenawtoways, 'bad Naudoways,' and in a footnote to the word Anego, 'ant,' it is stated that these same Naudoway Indians relate a fable of an old man and an old woman to the effect that these two watched an ant-hill until the ants therein became transformed into white men, and the eggs which these ants were carrying in their mouths were transformed into bales of merchandise. But in none of these references are the people so named thereby defined in such manner that without other information they may be recognized by other nomenelature.

The word "Sioux" is itself an abbreviation of the diminutive of this term, namely, Nadowe-is-iw, literally 'he is a small massasauga rattlesnake,' the sense-giving part of the word being dropped, but signifying 'enemy,' 'enemies.' This diminutive form, with the qualifying epithet Mascoutens, was a name of the Iowa and the Teton. In Virginia the term, which became Anglicized into "Nottoway," was applied to an Iroquoian tribe resident there. In this locality it is probable that the name was applied originally to the rattle-snake common to this eastern region.

(J. N. B. H.)

Naenshya (Naê'nsx'a, 'dirty teeth'). The name of two Kwakintl gentes, one belonging to the Koskimo, the other to the Nakomgilisala.—Boas in Nat. Mus. Rep. 1895, 329, 1897.

Nageuktormiut ('horn people'). A tribe of Eskimo who summer at the mouth of Cop-

permine r. and winter on Richardson r. Mackenzie dist., N.W.T.

Deer-Horn Esquimaux. Franklin, Journ. to Polar Sea, 11, 178, 1821 Na-gê-uk-tor-mêut.—Richardson, Aret. Exped., 1, 362, 1851. Naggluktop-mêut.—Petitot in Bib. Ling. et Ethnog. Am., 11, xi, 1876. Nagge-ook-tor-mee-oot.—Richardson in Franklin, Second Exped., 174, 1828. Nappa-arktok-towock.—Franklin, Journ. to Polar Sea, 11, 178, 1824

Nagus (Nā'g.18, 'town inhabited'). A town of the Hagi-lanas family of the Haida on an inlet on the s. w. coast of Moresby id., Queen Charlotte ids., Brit. Col.—Swanton, Cont. Haida, 277, 1905.

Nahane ('people of the west.' $-\Lambda$. F. C.). An Athapascan division occupying the region of British Columbia and Yukon between the Coast range and the Rocky mts., from the x, border of the Sekani, about 57° x., to that of the Kutchin tribes, about 65° N. It comprises the Tahltan and Takutine tribes forming the Tahltan division, the Titshotina and Etagottine tribes forming the Kaska division, and the Esbataottine and Abbatotine (considered by Petitot to be the same tribe), Sazeutina, Kraylongottine, Ettchaottine. Etagottine, Klokegottine, and perhaps Lakuyip and Tsetsaut. They correspond with Petitot's Montagnard group, except that he included also the Sekani. The language of the Nahane however constitutes a dialect by itself, entirely distinct from Sekani, Carrier, or Kutchin. The western divisions have been powerfully influenced by their Tlingit neighbours of Wrangell, and have adopted their clan organization with maternal descent, the potlatch customs of the coast tribes, and many words and expressions of their language. The two principal social divisions or phratries are called Raven and Wolf, and the fact that Sazeutina and Titshotina seem to signify 'Bear people' and 'Grouse people' respectively, leads Morice to suspect that these groups are really phratries or clans. The eastern Nahane have a loose paternal organization like the Sekani and other Athapascan tribes farther E. According to Morice the Nahane have suffered very heavily as a result of white contact. He estimates the entire population at about 1,000. Consult Morice in Trans. Can. Inst., vii, 517-534, 1904. See Tahltan. (J. R. S.)

Dènè des Montagnes-Rocheuses.—Petitot, Dict. Dènè Dindjié, xx, 1876. Kunànà.—McKay in 10th Rep. N. W. Tribes Can., 38, 1895 (Tlingit name). Montagnais.—Petitot, Autour du lac des Esclaves. 362, 1891. Naa'-anee.—Petitot quoted by Dall in Cont. N. V. Ethnol., 1, 32, 1877. Na-ai'.—Dawson in

Nahawas-hadai (Na xawa's xā'da-i, 'watery-house people'). A subdivision of the Salendas, a family of the Eagle elan of the Haida. They used to give away so much grease at their feasts that the floor of their house was said to be "muddy" with it. hence the name.—Swanton, Cont. Ilaida, 276, 1905.

Naikun (Nā-ikūn, 'house-point'). A semilegendary Haida town that stood near the famous sand-spit at Graham id., B.C., which bears its name. Anciently it was occupied by several families, including the Huados, Kunalanas, and Stlenga-lanas, but owing to internal troubles they separated, abandoning the town. Later on the Naikunstustai settled there, and still later the Kuna-lanas returned. John Wark, in 1836-41, assigned to Naikun 5 houses and 122 inhabitants. This must have been the Kuna-lanas town. It has been long abandoned. (J. R. S.)

Naēku'n.—Boas in 12th Rep. N. W. Tribes Can., 23, 1898. Nai-koon.—Dawson, Q. Charlotte Ids., 34a, 1880. Nā-ikún.—Swanton, Cont. Haida, 280, 1905. Nē coon.—Schooleraft, Ind. Tribes, v, 489, 1855. Nē-kón hādē.—Krause, Tlinkit Indianer, 304, 1885.

Naikun-kegawai (Nā-iku'n qē'qawa-i, 'those born at Naikun'). An important family of the Raven clan of the Haida. It seems to have been a sort of aristocratic branch of the Huados, receiving its name from the old town at Naikun, or Rose spit, Queen Charlotte ids.,

whence the family originally came. They are still fairly numerous. After abandoning Naikun they lived a long time at cape Ball with the Huados, and moved with them to the town of Skidegate. (J. R. S.)

Ellzu cathlans-coon-hidery.—Deans, Tales from the Hidery, 15, 1899 (='noble Galdins-knn people'). Naë kun k'eranā'l.—Boas in 5th Rep. N. W. Tribes Can., 26, 1886; 12th Rep., 25, 1898. Nā-ikn'n qē'gaw-i.—Swanton, Cont. Haida, 270, 1905. Nēkwun Kītwē.: Harrison in Proc. Roy. Soc Can., sec. 11, 125, 1895.

Nain. A Moravian Eskimo mission on the E, coast of Labrador, lat. 56° 40′, begun in 1771 (Hind, Lab. Penin., II, 199, 1863; Thompson, Moravian Missions, 228, 1886). See *Missions*.

Nakalas-hadai (Na q!ā'lus xā'da-i, 'clay-house people'). A subdivision of the Koetas, a family of the Raven clan of the Haida, living principally in Alaska.—Swanton, Cont. Haida, 272, 1905.

Nakalnas-hadai (Na-k''āl nas xā'da-t. 'empty-house people'). Given by Boas (Fifth Rep. N. W. Tribes Can., 27, 1889) as a subdivision of the Yaku-lanas, a family of the Raven elan of the Haida; but in reality it is only a house-name belonging to that family.

Na k"al nas :had'ā'l.—Boas, op cit.

Nakeduts-hadai (Na q!ē'dAts xā'da-i, 'people of the house that went away discouraged'). A subdivision of the Yaku-lanas, a great family of the Raven clan of the Haida: probably the name was taken from that of a house.—Swanton, Cont. Haida, 272, 1905

Nakkawinininiwak ('men of divers races'). A mixed tribe of Cree and Chippewa on Saskatchewan r.

Nakkawinininiwak.—Belcourt (ca. 1850) in Minn. Hist. Soc. Coll , 1, 227, 1872. Nakoukouhirinus.— Bacqueville de la Potheric, Hist. Am , 1, 170, 1753.

Naknahula (*Naxuā'xula*, ? 'rising above other tribes'). A gens of the Kocksotenok, a Kwakiutl tribe.—Boas in Rep. Nat. Mus. 1895, 330, 1897.

Nakoaktok (Nā'q'oaqtōq, or Nā'k!wax'-da²x", 'ten-gens tribe'). A Kwakiutl tribe on Seymour inlet, Brit. Col., with the Gyeksem, Kwakokutl, Sisintlae, Tsitsimelekala, and Walas gentes, according to Boas. According to Dawson the winter town of these people in 1885 was in Blunden harbour, to which they had moved from an older town, Kikwistok. Their summer village was named Mapakum,

and they had a fishing station called Awuts. Pop. 104 in 1901, 90 in 1911.

Nahcoktaws.-Brit Col. map, 1872. Nah-keoockto .- Boas in Bull. Am. Geog. Soc., 226, 1887. Nahkeuch-to.-Sproat in Can. Ind. Aff., 148, 1879. Nahknock-to.--Can. Ind. Nakomgilisala (Naqo'mg'ilisala, 'always staying in their country'). A Kwakiu(I tribe which formerly lived at cape Scott, at the x, end of Vancouver id., but has since moved to Hope id., farther s. This and the Tlatlasikoala together receive the name of Nawiti from the whites. The two tribes numbered 73 in 1897 The Nakomgilisala gentes are Gycksem and Naenshya. Pop. of Nuwitti band, 57 in 1911. Nak'o'mgvillsila.-Boas in 6th Rep. N. W. Tribes Can, 53, 1890. Naqo'mg'ilisala.—Boas in Rep. Nat. Mus. 1895, 329, 1897. Naqomqllis.—Boas in Bull. Am. Geog. Soc., 226, 1887. Ne-kum'-ke-lis-la.-Blenkinsop quoted by Dawson in Trans. Roy. Soc. Can., sec. II, 65, 1887. Nokumktesilla.--Brit. Col. map. 1872.

Nakons-hadai (Na qons xā'da-i, 'great-house people'). A subdivision of the Yadus, a family of the Eagle clan of the Haida, named from one of their houses. The Yadus were a part of the Stustas (q. v.).—Swanton, Cont. Haida, 276, 1905.

Nakotchokutchin. A Kutchin tribe dwelling on the lower Mackenzie r., n. of the Kawchodinneh, in lat. 68° n., lon. 133° w. Their hunting grounds are E. of the Mackenzie as far as Anderson r., and their chief game is the earibou. In former days they waged intermittent warfare against the Eskimo of Mackenzie r., with whom, however, they have always traded. Their men numbered 50 in 1866.

Bastard.—Dawson in Rep. Geol. Surv. Can. for 1888, 2008, 1889. Gens de la Grande Riviere.—Ross, MS notes on Tinne, B. A. E. Loucheux.—Franklin, Journ Polar Sea, 261, 1824. Mackenzie's R. Louchioux.—Ross, MS. notes on Tinne, B. A. E. Nakotcho-Kuttchin.—Petitot in Bull Soc. de Géog. Paris, chart, 1875. Nakotch-6-ondjig-Kouttchin.—Petitot, Autour du lae des Esclaves, 361, 1891 (='people of the river with

high banks'). Nakotchoó-ondjíg-Kuttchin.—Petitot, Diet Déné-Dindjié, xx, 1876. Na-kutch-oo-unjeek.—Gibbs, M8 notes from Ross (='Inff-caste Indians'). Nä'-kūtch-ū'-ŭn-jūk kū'tchin.—Ross, M8 notes on Tinne, 474, B. A. E.

Nakraztli ('it flowed with arrows of the enemy'). A village of the Nikozliautin at the outlet of Stuart lake, Brit. Col. Pop. 178 in 1902, 170 in 1911.

Na-ka-ztli.—Morice in Trans. Can. Inst., 188, 1890. Na'kraztli.—Ibid. Na'kraztti.—Morice in Trans. Roy Soc. Can., x, 109, 1892.

Nakuntlun. The original village of the Tsilkotin, on Nakuntlun lake at the head of Salmon r., Brit. Col., and once the most populous, but now almost deserted.

Nakoontloon.—Tolmie and Dawson, Vocabs. Brit. Col., 1228, 1884. Nakunt'lûn.—Merice in Trans. Roy Soc Can., x, 109, 1892. Tsoolootum.—Gamsby in Can. Pac. Ry. Rep., 179, 1877.

Nalekuitk (Nā'lekuitx). A clan of the Wikeno, a Kwakiutl tribe.—Boas in Rep. Nat. Mus. 1895, 328, 1897.

Nalkitgoniash. A Miemae village or band in 1760, perhaps in Nova Scotia.—Frye (1760) in Mass. Hist. Soc. Coll., 1st s., x, 115, 1809.

Nama (Nůmä, 'sturgeon'). A gens of the Chippewa. See Nameuilini.

Nā-mā.—Morgan, Anc. Soc., 166, 1877.
 Namā.—
 Wm. Jones, inf'n, 1906.
 Namē.—Gatschet, Ojibwa
 MS., B. A. E., 1882.
 Numa.—Warren (1852) in Minn.
 Hist. Soc. Coll., v. 45, 1885.

Namabin (Nămābīn, 'sucker'). A gens of the Chippewa.

Nah-ma-bin.—Tanner, Natr., 315, 1830 (trans. 'carp'). Näm-a'-bin.—Morgan, Anc. Soc., 166, 1877 (trans. 'carp'). Namäbin.—Wm. Jones, inf'n, 1906 (sig. 'sucker'). Numa-bin. Warren (1852) in Minn Hist. Soc. Coll., v, 15, 1885 ('sucker').

Namaycush. One of the names of the lake trout (Salmo namoycush), Mackinaw trout, or great lake trout, called togue in Maine; from namekus, which in the Cree dialect of Algonquian signifies 'trout', the Chippewa word being namegos, Namekus is a diminutive of namew, 'fish'. The word originated in N. w. Canada.

(A. F. C.)

Names and Naming. Among the Indians personal names were given and changed at the critical epochs of life, such as birth, puberty, the first war expedition, some notable feat, elevation to chieftainship, and, finally, retirement from active life was marked by the adoption of the name of one's son. In general, names may be divided into two classes: (1)

True names, corresponding to our personal names, and (2) names which answer rather to our titles and honorary appellations. The former define or indicate the social group into which a man is born, whatever honour they entail being due to the accomplishments of ancestors, while the latter mark what the individual has done himself.

There are characteristic tribal differences in names, and where a clan system existed each clan had its own set of names, distinct from those of all other clans, and, in the majority of cases, referring to the totem animal, plant, or object. At the same time there were tribes in which names apparently had nothing to do with totems, and some such names were apt to occur in clans having totemic names. Most Siouan clans and bands had names that were applied in a definite order to the boys and girls born into them. A Mohave child born out of wedlock received some ancient name, not commonly employed in the tribe. Among the interior Salish, where there were no clans, names were usually inherited in both the male and female lines for several generations, though new names were continually introduced that were taken from dreams or noteworthy events. Loskiel records that a Delaware child was often named in accordance with some dream that had come to its father. According to Ross, a father among some of the northern Athapascan tribes lost his name as soon as a male child was born and was thenceforth called after the name of his son; a Thlingehadinne changed his name after the birth of each suceessive child, while an unmarried man was known as the child of his favourite dog. Among the Maidu, infants might be named with reference to some incident occurring at the time of birth, but many received no names other than such general appellations as 'child,' 'baby,' or 'boy,' until they were old enough to exhibit some characteristic which suggested something appropriate. The father and mother addressed a boy all his life by his boyhood name. A girl, however, received different successive names at puberty, child-birth, and in old age. The Kiowa, being without clans, received names suggested by some passing incident or to commemorate a warlike exploit of some aneestor. Sometimes, however, they were hereditary, and in any case they were bestowed by the grandparents to the exclusion of the parents. Young men as they grew up usually assumed dream names, in obedience to visions.

The naming of a rich man's child among the coast Salish was accompanied by a great feast and distribution of property, and an invited chief publiely announced the name given. Names even originally belonging to the higher class were bestowed upon young people among the Haida and Tlingit when their relatives had potlatches, and it thus resulted that names individually acquired became in time hereditary and were added to the list of common names owned by the clan.

The second name, or title, was sometimes, as has been said, bestowed on account of some brave or meritorious action. Thus a Pawnee "was permitted to take a new name only after the performance of an act indicative of great ability or strength of character," and it was done during a public ceremonial. Among the Siouan tribes a similar custom seems to have prevailed, but among the Maidu of California entrance into the secret society took its place as a reason for the bestowal of new titles. On the N. W. coast a man adopted one of the potlatch, or sacred, names of his predecessor when he gave the mortuary feast and erected the grave post. At every subsequent potlatch he was at liberty to adopt an additional title, either one used by his predecessor or a new one commemorative of an encounter with a supernatural being or of some success in war or feastgiving. Along with his place in a secret society a Kwakiutl obtained the right to certain sacred names which had been received by the first holder of his position from the spirit patron of the society and were used only during the season of the ceremonial, like the titles employed in the fraternal and other societies of civilized life. The second name among this people also marks individual excellence rather than the attainment of a hereditary position, for the person did not succeed to the office, but had to pass through a long period of training and labour to be accepted. After a man died his name was held in abeyance for a longer or shorter period, and if it were taken from the name of some familiar object, the name of that object often had to be altered, but the tabu period was not longer than would allow the person's successor to collect his property and give the death feast, and a simple phonetic change often satisfied all scruples. Changes of this kind seem to have been carried to greater extremes by some tribes, notably the Kiowa, where, on the death of any member of a family all the others take new names, while all the terms suggesting the

name of the dead person are dropped from the language for a period of years. Among the coast Salish a single name was often used by successive chiefs for four or five generations. Among the Iroquois and cognate tribes, according to Hewitt, the official name of a chieftaincy is also the official name of the officer who may for the time being become installed in it, and the name of this chieftainey is never changed, no matter how many persons may successively become incumbents of it. Unlike the Indians of most tribes, a Pueblo, although bearing several names, usually retained one name throughout life. In many tribes a curious custom prohibited a man from directly addressing his wife, his mother-in-law, and sometimes his father-in-law, and vice versa.

Names of men and women were usually, though not always, different. When not taken from the totem animal, they were often grandiloquent terms referring to the greatness and wealth of the bearer, or they might commemorate some special triumph of the family, while, as among the Navaho, nicknames referring to a personal characteristic were often used. The first name frequently refers to something which especially impressed the child's mother at the time of its birth. Often names were ironical and had to be interpreted in a manner directly opposite to the apparent sense. A failure to understand this, along with faulty interpretation, has brought about strange, sometimes ludicrous, misconceptions. Thus the name of a Dakota chief, translated 'Youngman-afraid-of-his-horses,' really 'Young man whose very horses are feared.' Where the clan system did not flourish, as among the Salish, the name often indicated the object in nature in which a person's guardian spirit was supposed to dwell. Names for houses and canoes went by families and clans like personal names and property in general.

Names could often be loaned, pawned, or even given or thrown away outright; on the other hand, they might be adopted out of revenge without the consent of the owner. The possession of a name was everywhere jealously guarded, and it was considered discourteous or even insulting to address one directly by it. This retieence, on the part of some Indians at least, appears to have been due to the fact that every man, and every thing as well, was supposed to have a real name which so perfectly expressed his inmost nature as to be practically identical with him. This

name might long remain unknown to all, even to its owner, but at some critical period in life it was confidentially revealed to him. It was largely on account of this sacred character that an Indian commonly refused to give his proper designation, or, when pressed for an answer, asked someone else to speak it. Among the Maidu it was not customary, in addressing a person, to use the name descriptive of his personal characteristics.

In modern times the problem of satisfactorily naming Indians for purposes of permanent record has been very puzzling owing to their custom of changing names and to the ignorance on the part of persons in authority of native customs and methods of reckoning descent. According to Mooney, Setimkia, 'Bear bearing down (an antagonist), the honourable war name of a noted Kiowa chief, is mistranslated 'Stumbling Bear.' Tenepiabi, 'Bird coming into sight', has been popularly known as 'Hummingbird' since he was a prisoner in Florida in 1875, probably a mistake for 'Coming bird.' Hajo, a Creek war title signifying 'recklessly brave,' is popularly rendered 'erazy,' as in the case of Chito Hajo, leader of the Creek opposition to allotment, whose name is popularly and officially rendered 'Crazy Snake.' Even when translated correctly an Indian name often conveys an impression to a white man quite the reverse of the Indian connotation. Thus 'Stinking Saddle Blanket' (Takaibodal) might be considered an opprobious epithet, whereas it is an honorary designation, meaning that the bearer of it, a Kiowa, was on the warpath so continuously that he did not have time to take off his saddle blanket. 'Unableto-buy,' the name of a Haida chief, instead of indicating his poverty, commemorates an occasion when a rival chief did not have enough property to purchase a copper plate he offered for sale.

In recent years the United States Office of Indian Affairs has made an effort to systematize the names of some of the Indians for the purpose of facilitating land allotments, etc. By circular issued Dec. 1, 1902, the office set forth the following principles governing the recording of Indian names on agency rolls, etc.: (1) The father's name should be the family surname; (2) the Indian name, unless too long and clumsy, should be preferred to a translation; (3) a clumsy name may be arbitrarily shortened (by one familiar with the language) without losing its identity; (4) if the use of a translation

seems necessary, or if a translation has come into such general and accepted use that it ought to be retained, that name should be written as one word.

Tribes, III, 556, 1853 (misprint). NameSilinis.—Chauvignerie (1736) in X. P. Doc. Col. Hist., IX, 1054, 1855. Namewillinis.—Doc. of 1736 in Wis Hist Soc. Coll., XVII, 246, 1906. Sturgeon Indians.—Dobbs, Hudson Bay, 13, 1744.

Nanabozho. The demi-trige of the cosmological traditions of the Algonquian tribes, known among the various peoples by several unrelated names, based on some marked characteristic or dominant function of this personage. Among these names are Jammm, Kloskap (Gloskap). Manabozho, Messou, Michabo, Minabozho, Misabos, Napiw, Nenabozho, Wieska, Wisakedjak, and their dialectic variants. The etymologies proposed for these several names are most probably incorrect, wholly or in material parts.

Nanabozho is apparently the impersonation of life, the active quickening power of life—of life manifested and embodied in the myriad forms of sentient and physical nature. He is therefore reputed to possess not only the power to live, but also the correlative power of renewing his own life and of quickening and therefore of creating life in others. He impersonates life in an unlimited series of diverse personalities which represent various phases and conditions of life, and the histories of the life and acts of these separate individualities form an entire cycle of traditions and myths which,

when compared one with another, are sometimes apparently contradictory and incongruous, relating, as these stories do, to the unrelated objects and subjects in nature. The conception named Nanabozho exercises the diverse functions of many persons, and he likewise suffers their pains and needs. He is this life struggling with the many forms of want, misfortune, and death that come to the bodies and beings of nature.

The true character of the concept embodied in the personality called Nanabozho has been misconceived. Horatio Hale, for example, calls the Chippewa Nanabozho a fantastic deity, declaring him to have no relation to the Iroquois Te'horon'hiawa'k'hon', whereas he is in everything but minor details identical with the Iroquoian conception embodied in the latter personality. Few, if any, of the characteristic acts and functions of the one may not safely and correctly be predicated of the other, and it is a remarkable parallel if the one is not a concept borrowed by the people of one linguistic family from the thought of the other. If independent creations, they agree in so many points that it is more than probable that the one suggested the other. Even the play of popular interpretation and etymological analysis have made like errors in the events connected with the life history of each. In the Iroquois legend the brother of Tethoron-'hiawa'k'hoe is reputed to have been embodied in chert or flint, a statement based on a misconception arising from the common origin of some terms denotive of ice on the one hand and of chert on the other. A like error gave rise to the Chippewa name for chert or flint (?miskwam), which signifies 'ice-stone,' and the connection between mulsum, 'wolf,' and mă halic, 'a flint or chert,' also a name of Chakekenapok, the brother of Nanabozho. The confusion is that the ruler of winter, the ruler clothed in frost, ice, and snow, is identified with chert or flint, in Iroquois too, because of the identity of origin between the terms for crystal or sparkling ice and the smooth glistening surface of chert or flint.

In Potawatomi and cognate tradition Nanabozho is the eldest of male quadruplets, the beloved Chipiapoos being the second, Wabosho the third, and Chakekenapok the fourth. They were begotten by a great primal being, who had come to earth, and were born of a reputed daughter of the children of men. Nanabozho was the professed and active friend of the human race. The mild and gentle but unfortunate Chipiapoos became the warder of the dead, the ruler of the country of the manes, after this transformation. Wabosso ('Maker of White'), seeing the sunlight, went to the northland, where, assuming the form of a white hare, he is regarded as possessing most potent manito or orenda. Lastly, Chakekenapok, named from chert, flint, or firestone (?fire), was the impersonation originally of winter, and in coming into the world ruthlessly caused the death of his mother.

Having attained the age of manhood, Nanabozho, still feeling deep resentment for the death of his mother, resolved to avenge it by the destruction of his brother Chakekenapok. The two brothers soon grappled with each other. Chakakenepok finally turned and fled, but Nanabozho pursued him over the world, finally overtaking and striking him with a deerhorn or a chert, fracturing or chipping pieces from various parts of his body, and destroying him by tearing out his entrails. The fragments from Chakekenapok's body became huge rocks, and the masses of flint or chert found in various parts of the world show where the conflicts between the two brothers took place, while his entrails became vines. Before the Indians knew the art of fire-making Nanabozho taught them the art of making hatchets, lances, and arrowpoints.

Nanabozho and Chipiapoos dwelt together in a land far removed from the haunts of mankind. They were noted for excellence of body and beneficence of mind, and for the supreme character of the magic power they possessed. These qualities and attributes excited the bitter antagonism of the evil manitos of the air, earth, and waters, who plotted to destroy these two brothers. Nanabozho, who was immune to the effects of adverse orenda and from whose knowledge nothing was barred, knew their snares and devices and hence cluded and avoided them. He, however, warned Chipiapoos, his less-gifted brother, not to leave their lodge or to separate from him even for a moment. But, disregarding this admonition, one day Chipiapoos ventured out of the lodge and went on the ice of a great lake, probably lake Michigan. This temerity was the opportunity sought by the manitos, who broke the ice, causing Chipiapoos to sink to the bottom of the lake, where his body was hidden by the manitos. Upon returning to the lodge, Nanabozho, missing Chipiapoos and surmising his fate, became inconsolable. Everywhere over the face of the earth he sought for him in vain. Then he became enraged and waged relentless war against all manitos, wreaking vengeance by precipitating a multitude of them into the abyss of the world. He next declared a truce in order to mourn for his brother, disfiguring his person and covering his head to indicate grief, bitterly weeping, and uttering from time to time the name of the lost and unhappy Chipiapoos. It is said Nanabozho secluded himself for six years in his lodge of mourning, During this truce the evil manitos, knowing the unlimited powers of Nanabozho and recollecting the destruction of the vast numbers of manitos by their metamorphosis to gratify his anger, consulted together to devise means for pacifying Nanabozho's wrath; but through fear of their great adversary their plans came to naught. At last four of the manitos, hoary with age and ripe in experience and wisdom, and who had not been parties to the death of Chipiapoos, undertook a mission of pacification. Having built a lodge of condolence near that of Nanabozho, they prepared a feast of welcome, filling with tobacco a pipe the stem of which was a calumet, and then silently and ceremoniously moved toward their antagonist. The four ambassadors severally carried a bag made from the entire skin of an otter, a lynx, a beaver, or of some other animal, which contained magically potent medicines and powerful fetishes. Arriving at the lodge of Nanabozho, they chanted to him with ceremonial formality their good intentions and kind greetings, and asked him to be pleased to accompany them to their lodge. Moved by these greetings, Nanabozho uncovered his head, and, arising, washed himself and then accompanied them. On his entering the lodge the manitos offered him a cup of purification medicine preparatory to his initiation into the Midé, or Grand Medicine Society. Nanabozho partook of the draught, and at once found himself completely freed from feelings of resentment and melancholy. Then the prescribed ritual was performed by the manitos. The proper dances and the chants of the Midé were chanted, and the four manitos, humanized primal beings, gently applied to Nanabozho their pindikosan, or magically potent medicinebags, which, after ceremonially blowing their orenda or magic power into him, they cast on the ground. At every fall of the medicinebags Nanabozho became aware that the melancholy, sadness, hatred, and anger that oppressed him gradually left, and that beneficent affection and feelings of joy arose in his heart.

On the completion of his initiation he joined in the dances and in the chanting; then they all are and smoked together, and Nanabozho expressed thanks to his hosts for initiating him into the mysteries of the grand medicine.

To further show their good will, the manitos, by the exercise of their magic powers, brought back the missing Chipiapoos, but, owing to his metamorphosis, he was forbidden to enter the lodge. Having received a lighted torch through a chink in the walls of the lodge, he was required to go to rule the country of the manes, where, with the lighted torch he carried, he should kindle a fire that should never be extinguished, for the pleasure of his uncles and aunts-namely all men and women-who would repair thither. Subsequently, Nanabozho again descended upon the earth, and at once initiated all his family in the mysteries of the grand medicine. He provided each of them with a medicine-bag, well supplied with potent medicines, charms, and fetishes. He also strictly enjoined upon them the need of perpetuating the accompanying ceremonies among their descendants, explaining to them that these practices faithfully observed would cure their diseases, obtain for them abundance in fishing and hunting, and gain for them complete victory over their enemies.

Some hold to the doctrine that Nanabozho created the animals for the food and raiment of man; that he caused those plants and roots to grow whose virtues cure disease and enable the hunter to kill wild animals in order to drive away famine. These plants he confided to the watchful care of his grandmother, the greatgrandmother of the human race, Mesakkummikokwi, and lest man should invoke her in vain she was strictly forbidden ever to leave her lodge. So, when collecting plants, roots, and herbs for their natural and magic virtues. an Algonquian Indian faithfully leaves on the ground hard by the place whence he has taken the root or plant a small offering to Mesakkummikokwi.

It is said that Nanabozho in his many journeys over the earth destroyed many ferocious monsters of land and water whose continued existence would have placed in jeopardy the fate of mankind. It is believed by the faithful that Nanabozho, resting from his toils, dwells on a great island of ice floating on a large sea in the northland, where the seraphin of auroral light keep nightly vigil. It is also believed that should he set foot on the land the world would at once take fire and every

living being would share with it a common destruction. As a perversion of an earlier tradition, it is said that Nanabozho has placed four beneficent humanized beings, one at each of the four cardinal points or world quarters. to aid in promoting the welfare of the human race—the one at the E. supplies light and starts the sun on his daily journey over the sky; the one at the s. supplies warmth, heat, and the refreshing dews that cause the growth of the soothing tobacco plant, and of corn, beans, squashes, and all the herbs and shrubs that bear fruit; the one at the w. supplies cooling and life-giving showers; lastly, the one at the N. supplies snow and ice, enabling the tracking and successful pursuit of wild animals. and who causes them to hibernate, to seek places of concealment from the cold of winter. Under the care of the man-being of the s. Nanabozho placed lesser humanized beings dominantly bird-like in form, whose voices are the thunder and the flashing of whose eyes is the lightning, and to whom offerings of tobacco are made when their voices are loud and menacing.

Like the Iroquois and Huron sages, the Algonquian philosophers taught that the disembodied souls of the dead, on their journey to the great meadow in which is situated the village of their deceased ancestors, must cross a swift stream precariously bridged by a tree trunk, which was in continual motion. Over this the manes of the justified pass in safety, while the shades of the vicious, overcome by the magic power of adverse fate, fail at this ordeal, and, falling into the abyss below, are lost.

Another and equally credited tradition is to the effect that a manito or primal man-being formed a world which he peopled with manbeings having the form but not the benevolent attributes of man, and that these primal manbeings, doing nothing but evil, finally eaused the destruction of the world and themselves by a flood: that having thus satisfied his displeasure the primal man-being brought the world again out of the waters and formed anew a fine looking young man, but, being alone, the latter seemed disconsolate and weary of life. Then, pitying him, the primal man-being brought him as he slept a sister for a companion. Awaking, the young man was rejoiced to see his sister, and the two dwelt together for many years in mutual amusement and agreeable discourse. Finally the young man dreamed for the first time, and he related

his dream to his sister, saying that it had been revealed to him that five young man-beings would that night visit their lodge, and that she was forbidden to speak to or in any manner recognize any of the first four who would seek admission to the lodge, but that she should welcome the fifth when he would seek admission. This advice she followed. After their metamorphosis these four primal young manbeings became respectively Sama or Tobacco, who, receiving no answer from the sister, died of chagrin; Wapekone or Squash; Eshketamok or Melon, and Koices or Bean, who shared the fate of the first. But Mandamin or Corn, the fifth, was answered and welcomed by the sister, and he entered the lodge and became her husband. Then Mandamin buried his four comrades, and soon from their graves sprang up respectively tobacco, squashes, melons, and beans in such quantity as to supply them for the year, and tobacco enough to enable them to make offerings to the primal man-beings and to smoke in council. From this union sprang the Indian race.

In one version of the prevailing Algonquian cosmogonic story it is said that, before the formation of the earth, there was only water; that, on the surface of this vast expanse of water, floated a large raft on which were the animals of the various kinds which are on the earth and of which the Great Hare was the chief. They sought a fit and firm place on which to disembark; but as there were in sight only swans and other waterfowl, they began to lose hope, and, having no other, they requested the beaver to dive for the purpose of bringing up some earth from the bottom of the water, assuring him in the name of all the animals present that, should be return with only a single particle, it would produce an earth sufficiently spacious to contain and nourish all. But the beaver sought an excuse for refusal, saving that he had already dived around the raft and had failed to reach the bottom. He was pressed so strongly to make anew so worthy an attempt, however, that he took the hazard and dived. He remained without returning for so long a time that the supplicants believed him drowned. Finally they saw him appear nearly dead and motionless. Then all the animals, seeing that he was in no condition to remount the raft, at once interested themselves to take him into it. After examining carefully his paws and tail, they found nothing. But the little hope left them of being able to save their lives compelled them to

address themselves to the otter to ask that he make an attempt to find earth at the bottom of the waters. It was told him that his own safety, as well as theirs, depended on the result of his effort. So the otter yielded to their urging and dived. He remained in the depths of the waters a longer time than did the beaver. but, like him, he came to the surface without success. The impossibility of finding a place to dwell where they could subsist left them nothing more to hope, when the muskrat offered to attempt to find the bottom, and he llattered himself that he would bring back Although the heaver and the otter, much stronger than he, had not been able to accomplish the task, they encouraged him, promising even that, if he succeeded in his attempt, he should be the ruler of the whole world. The muskrat then east himself into the waters and bravely dived into the After remaining therein nearly depths. an entire day and night he appeared motionless at the side of the raft, belly uppermost and paws closed. The other animals carefully took him out of the water, opened one of his paws, then a second, then a third, and finally the fourth, where there was a small grain of sand between his claws. The Great Hare, who was encouraged to form a vast and spacious earth, took this grain of sand and let it fall on the raft, which became larger. He took a part and scattered it, which caused the mass to increase more and more. When it was of the size of a mountain he willed it to turn, and as it turned the mass still increased in size. As soon as it appeared quite large he gave orders to the fox to examine his work with power to enlarge it. He obeyed. The fox, having learned that the earth was of such size that he could easily take his prey, returned to the Great Hare to inform him that the earth was large enough to contain and nourish all the animals. After this report the Great Hare went over his work, and, on going around it, found it imperfect. He has since not been disposed to trust any one of all the other animals, and ever keeps on enlarging the earth by ceaselessly going around it. The rumblings heard in the caverns of mountains confirm the Indians in the belief that the Great Hare continues the work of enlarging the earth. He is honoured by them, and they regard him as the god who has formed the

Such is what the Algonquians teach regarding the formation of the earth, which they be-

lieve is borne on a raft. Concerning the sea and the firmament, they assert that they have existed for all time. After the formation of the earth all the other animals withdrew into the places most fitted to them, where they could feed and find their prey. The first of these having died, the Great Hare caused men to be born from their cadavers, even from those of the fish which were found along the banks of rivers which he had made in forming the earth, and gave each a different language or dialect. Because some ascribed their origin to the bear, others to the elk, and thus to all the different animals, they believed that they had their being from these creatures.

(J. N. B. H.)

Nanaimo (contraction of Snanaimux). A Salish tribe, speaking the Cowichan dialect, living about Nanaimo harbour, on the E. coast of Vancouver id. and on Nanaimo lake, Brit. Col. Pop. 158 in 1911. Their gentes are Annenes, Koltsiowotl, Ksalokul, Tewetken, and Yesheken.

Nanaimos.—Mayne, Brit. Col., 165, 1861. Nanaimūk.—Gibbs, quoted by Dall in Cont. N. A. Ethnol., 1, 241, 1877. Nanainio.—Douglas in Jour. Roy. Geog. Soc., 246, 1854. Snanaimooh.—Tolmie and Dawson, Vocabs. Brit. Col., 1208, 1884. Snanaimuq.—Boas in 5th Rep. N. W. Tribes Can., 32, 1889. Snanaimuchs.—Grant in Jour. Roy. Geog. Soc., 293, 1857.

Napisipi. A former Montagnais station on the N. shore of the gulf of St. Lawrence, long. 50°, Quebec.

Nabisippi.—Stearns, Labrador, 269, 1884 Napissipl.—Hind, Lab. Penin., 11, 180, 1863.

Nasagas-haidagai (Na sagā's xā'idAga-i, 'people of the rotten house'). A subdivision of the Gitins of the Haida of Skidegate, belonging to the Eagle clan. They were unable to restore their house for such a long time that it began to fall to pieces, hence the name. They once occupied a separate town. (J. R. S.) Na s'ā'gas qā'edra.—Boas in 12th Rep. N. W. Tribes Can., 24, 25, 1898. Na sagā's xā'-idaga-i.—Swanton, Cont. Haida, 273, 1905. Na s'ā'yas qā'etqa.—Boas in 5th Rep. N. W. Tribes, Can., 26, 1898. Nisigas Hāadē.—Harrison in Proc. Roy. Soc. Can., 125, 1895.

Naskapi (a term of reproach applied by the Montagnais). The most north-easterly of the Algonquian tribes, occupying the elevated interior of Quebec and Ungava penin., N. of the gulf of St. Lawrence and extending from the vicinity of lake Mista-sini to Ungava bay on the N. They call themselves Nanénot. true, real men.' Many of them have intermarried with their congeners the Montagnais,

and when they visit the coast the two tribes frequent the same stations. When in the neighbourhood of Ungava bay they are known as Ungava Indians. They are shorter and of lighter build than the Montagnais, and have delicately formed and clear-cut features, small hands and feet, and large, rather soft eyes.

According to their traditions the Naskapi were driven into their present country in early times by the Iroquois. They assert that, originally, they lived in a region to the w., x. of a great river (supposed to be the St. Lawrence) and toward the E. lay an enormous body of water (believed to be Hudson bay). When they reached the Ungava region their only neighbours were Eskimo, who occupied the coast strip and with whom they became involved in war, which continued until after the arrival of the whites. The two peoples are now on terms of intimacy. The Naskapi do not have the endurance of their Eskimo neighbours against fatigue and hunger, although equally able to withstand the rigours of their harsh climate. The children are obedient: disrespect toward their elders is unknown, and in their dealings one with another there is no quarrelling. The Naskapi are generally healthy; their prevailing diseases are of the lungs and bowels- the former resulting from exposure to the extremes of wet and cold and their insanitary houses; the latter due to their gluttony after long fasting from searcity of food. Those who go to the coast to reside, as many have in recent years, appear to be more subject to diseases than those in the interior. Medical treatment consists of shamanistic incantations and the use of powders and liniments, both native and those procured from traders. Marriage is effected without ceremony and is conditioned on the consent of the parents of the young woman and the ability of the prospective husband to support a wife; after the marriage the bond may be severed by either party on slight provoaction. Polygamy is common, the number of wives a man may have being limited only by his means of supporting them. The sexual relations of the Naskapi are very loose; but their immorality is confined to their own people. The division of labour is similar to that among most tribes; the women perform all domestic work, including the transportation of game, fetching the fuel, erecting the tipis, hanling the sleds when travelling, etc.; the men are the providers. Girls reach puberty

at 14 or 15 years, and are taken as wives at even an earlier age. Mothers usually do not bear more than 4 children; twins are rare.

The Naskapi suspend the bodies of their dead from branches of trees if the ground be much frozen, and endeavour to return when the weather is warm to bury them. Interment, however, has been practised only since the advent of missionaries. A man of distinction is often buried at once, after a fire has been built in a tipi to thaw the earth. They have no horror for the dead, having been known, it is said, to rob Eskimo corpses of their clothing and accompanying implements.

Like other Indians, the Naskapi believe that every object, animate or inanimate, is possessed of a form of spirit which, in order that it may perform its services for the welface of the people, must be propitiated with acceptable offerings. The medicine-men are supposed to be in direct contact with all forms of spirits, and are consulted when it is desired to overcome their baneful influence by means of the shaman's art.

The subsistence of the Naskapi is gained by the chase, which is engaged in chiefly during the winter. In the spring, men, women and children repair to the trading posts. chiefly Ft. Chimo, where they trade furs, ptarmigan feathers, etc., for the articles and products of civilization. The reindeer forms the chief source of their food and clothing, although fish, ptarmigan, ducks, geese, hares, rabbits, porcupines, beaver, and, in stress of hunger, an occasional lynx, are also eaten; the eggs of wild fowl are consumed in enormous quantities and in all stages of incubation. Reindeer are speared from canoes while crossing a stream, or snared or shot from ambush while passing through a narrow defile, or, in winter, are driven into a snowbank and speared. In these slaughterings an incredible number of carcases and skins are left to decay. Wolverenes, wolves, and foxes are never eaten. The flesh of game animals is dried, pounded, made into pemmican, and stored in baskets and bags for future use.

The apparel of the Naskapi is quite distinct for the two sexes; the clothing varies also with the season, as the extremes of climate are very great. That of the men consists of tanned reindeer coat, breeches, leggings, moceasins, gloves or mittens, and cap or head-dress. Seams are sewed with sinew, and all the garments except the leggings, which are mostly hidden by the long coat,

are ornamented with extravagant painted designs. Moreasins are rarely ornamented, except with beads or with strips of coloured cloth. Beaded head-bands are used for bearing burdens, especially for carrying canoes when making portages. In winter the men wear the coat with the fur side inward and with a hood attached. In summer the women wear calico dresses, thin shawls obtained through trade, and moceasins; in winter their apparel consists of a reindeer skin robe, a sleeveless gown reaching a little below the knees, often highly ornamented with painted designs, beadwork and fringe; and blanket shawl, shoulder cape, leggings, moceasins, and cap.

The dwellings, for both winter and summer, are tents or tipis of reindeer skins sewed together, and measuring 10 to 18 ft. at the base and 10 to 14 ft. high. The floor is carpeted with young spruce branches, except around the central fire-place; the smoke escapes through an opening in the top of the tipi where the supporting poles are brought together. The place of honour is the side opposite the fire. Poles extend across the tipi for the suspension of pots and kettles, and hunting apparatus, clothing, etc. are hung in convenient places. The outer edge of the interior is slightly raised above the centre of the floor, affording a slope for the occupants when sleeping with their feet toward the fire. Sweatlodges of small poles covered with tent skins are in common use, and are heated, as usual, by means of hot stones on which water is poured. The domestic utensils of the Naskapi consist of thin vessels of spruce or birch, of various sizes, for holding liquids and for use as drinking cups; berry dishes or baskets of birehbark, sewed like the wooden vessels with split roots; baskets of birchbark with buckskin top and drawstring; bags made of the skins of reindeer legs sewed together; and spoons or ladles of wood nicely carved. They are inordinately fond of smoking, chewing, and snuffing tobacco-the latter, however, is practised only among the aged, especially the women. When camped at the trading posts the Indians boil together tobacco and molasses, to which water is added; this compound is drunk until stupefaction ensues. Pipes are made usually of sandstone or slate, with stem of spruce, often ornamented with beadwork, and are valued according to the colour of the stone. Transportation and travelling are conducted by means of canoes made of slats or ribs covered with birchbark, sleds or tobog-

gans (lá-bas-kán), and snowshoes of four styles framed with wood and netted. Bows and arrows are now almost discarded for guns; but blunt-pointed arrows are still used for killing small game, and by boys. The reindeer spears, already referred to, consist of a shaft 6 ft. long with a steel head made from a flat file. Reindeer snares are made of reindeer parchment cut into thin, narrow thongs and plaited, or of tanned skin. Beaver are sometimes trapped in a sort of net. Knives, awls, ice scoops and picks, hair combs and comb cases, porcupine tails for cleaning the combs, and fishing tackle are among the necessary implements of every Naskapi household.

The chief amusements of the men are games of draughts or checkers, of which they are exceedingly fond, and cup-and-ball. Feasts, accompanied by dance and ceremony, may be given by a man who has been unusually successful in hunting. Drums and drum-like rattles are used for musical accompaniments in their ceremonies; other rattles, as well as bows and arrows, which are shot at effigy targets, are used by the boys, while elaborately costumed dolls are made for the girls. Like other tribes, the Naskapi have an abundance of folk-tales, the chief subject of which are the animals common to their environment. In these tales the wolverene seems to play a prominent part. (See Turner in 11th Rep. B.A.E., 267 ct. seq., 1894.)

On account of their wandering habits, the nature of their country, and their mixture with the Montagnais, it is impossible to give an exact statement of their numbers. In 1858 they were estimated at about 2,500. In 1884 the Naskapi of the lower St. Lawrence were officially reported to number 2,860, and the Indians of Ungava peninsula were returned as 5,016. In 1906, there were 2,183 Montagnais and Naskapi officially noted as such, and 2,741 unnamed Indians in the interior, 1,253 of whom were in the unorganized territories of Chicoutimi and Saguenay. In 1911, the Montagnais and Naskapi of Lake St. John agency numbered 863; of Bersim's agency, 606; of Mingan agency, 1,115, and of Ungava district, 1,246; total, 3,828. See Montagnais, Nitcheauon.

Natashkwan. A Montagnais rendezvous, visited also by the Naskapi, at the mouth of Natashkwan r., on the N. shore of the gulf of St. Lawrence, Quebec. It contained 73 people in 1911.

Natashkwan. — Geog Board, Rep., 93, 1911 Natashquan. — Hind, Lab. Penin., 11, 112p., 1863 Nataskovan. — Ibid., 180.

Nation, The. The term Les Nations was used by Canadian French writers of the 17th and 18th centuries (and occasionally in English writings) to designate the heathen tribes, who were distinguished into Les Grandes Nations and Les Petites Nations. The rivière de Petite Nation in Ottawa co., Quebec, preserves this designation. Specifically Le Petit Nation was the Weskarini, q.v. (H. W. H. A. F. C.)

Natkelptetenk (N'atqêlptE'tEnk, 'yellowpine little slope'). A village of the Lytton band of Ntlakyapamuk, on the w. side of Fraser r., about a mile above Lytton, Brit. Col.—Teit in Mem. Am. Mus. Nat. Hist., H, 172, 1900.

Natleh ('it [the salmon] comes again'). A Natliatin village at the discharge of Fraser lake into Nechako r., Brit. Col.; pop. 53 in 1902, 67 in 1911.

Frazer's Łake Village.—Can. Ind. Aff., pt. 2, 78, 1906. Natle.—Morice in Trans. Roy. Soc. Can. 1892, sec. 2, 109, 1893. Natleh.—Morice, Notes on W. Dénés, 25, 1893.

Nathatin. A Takulli sept inhabiting the villages Natleh and Stella, one at each end of Fraser lake, Brit. Col. Pop. 135 in 1892; 122 in 1906. In 1911, the Stella band had a population of 90.

Chinloes.—Taylor in Cal Farmer, July 19, 1862. Nantley Tine.—Hamilton in Jonr Anthrop Inst Gt Br., vii, 206, 1878. Natilantin.—McDonald, Brit. Columbia, 126, 1862. Nawkaw (? 'Wood'). A Winnebago chief, known also as Carrymaunee (Walking Turtle') because he was a member of the Walking Turtle family, the ruling family of the tribe. He was born in 1735, and died at the advanced age of 98 years in 1833. His residence was at Big Green lake, between Green bay and Ft. Winnebago (Portage), Wis., and 30 m. from the latter. The earliest recorded notice of Nawkaw relates to his presence, as principal

chief of his tribe, at the battle of the Thames, Canada, Oct. 5, 1813, and that he was beside Tecumseh when the latter fell (Wis. Hist. Coll., xiv, 86, 1898). If the statement in regard to his age be correct, Nawkaw was at that time 78 years of age. That he was active in behalf of his tribe in peaceful measures for the remaining years of his life is evident from the fact that he was one of the chief agents of the Winnebago in making settlements and treaties on their behalf. His name, in various forms (Carimine, Karry-Man-ee, Nan-kaw, Nau-kawkary-maunie, Karamanu, and Onunaka), is attached to the treaties of St. Louis, Mo., June 3, 1816; Prairie du Chien, Wis., Aug. 19, 1825; Butte des Morts, Wis., Aug. 11, 1827; Green Bay, Wis., Aug. 25, 1828; and Prairie du Chien, Aug. 1, 1829. But his most important acts in behalf of peace were his efforts in keeping his people from taking part in the Black Hawk war in 1832. "The policy of Nawkaw," say McKenney and Hall (Ind. Tribes, 1, 316, 1858), "was decidedly pacific, and his conduct was consistent with his judgment and professions. To keep his followers from temptation, as well as to place them under the eye of an agent of our government, he encamped with them near the agency, under the charge of Mr. Kinzie." It was chiefly through his exertions that Red Bird and his accomplices in the Gagnier murder were surrendered, and through his influence that elemency was obtained for them, for which purpose he visited Washington in 1829; but the pardon for Red Bird came after he died in prison at Prairie du Chien. Nawkaw was a large man, 6 ft. tall and well built. Mrs. Kinzie (Wan-Bun, 89, 1856) says he was a stalwart Indian, with a broad, pleasant countenance, the great peculiarity of which was an immense under lip, hanging nearly to his chin; this is seen to some extent in his portrait. He is described as a sagacious man, of firm, upright character and pacific disposition, who filled his station with dignity and commanded respect by his fidelity. One of his daughters, Flight-of-Geese, married Choukeka, or Spoon Dekaury (Wis. Hist. Coll., xIII, 455, 1895). A descendant of Nawkaw was living at Stevens Point, Wis., in 1887. (c. T.)

Nayuuns-haidagai (Na yū'.1ns xā'idAga-i, 'people of the great house'). A subdivision of the Gitins of the Haida of Skidegate, Brit. Col., so named from a large house that the family owned at Higahet, an old town near

Skidegate. The town chief of Skidegate belonged to this division.

(J. R. S.)

Na yū'ans qā'edra.—Boas ur 12th Rep. N. W. Tribes Can., 24, 25, 1898. Nā yū'ans qā'etqa.—Boas in 5th Rep., ibid., 26, 1889. Na yū'vns xā'-id va-i.— Swanton, Cont. Haida, 273, 1905.

Nchekchekokenk (Nteĉ qte Eqqôkênk, or Nteĉ qte cqkôkinuk, 'the red little side hill or slope'). A village of the Lytton band of the Ntlakyapamuk on the w. side of Fraser r., 15 m. above Lytton, Brit. Col.—Teit in Mem. Am. Mus. Nat. Hist., 11, 172, 1900.

Nchekus ('red rising ground or eminence'). A village of the Nicola band of the Ntlakyapannuk, about a mile back in the mountains from Quilchena, B. C.

Ntcé'kus.—Teit in Mem Am Mus Nat Hist, n. 174, 1900 Stcé'kus.—Ibid. S'tcukōsh.—Hill-Tout in Rep Ethnol. Surv. Cam. 4, 1899

Nebaunaubay (Nibanabä, 'sleeping person'). A mythic character whose home is said to be on the floor of the sea; the term is also applied to an under-water bear. Hence the "Merman" gens of the Chippewa (Warren, Ojibways, 44, 1885). (w. J.)

Nechimuasath (Nelcimü'asath). A sept of the Seshart, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes Can., 32, 1890.

Nedlung. A Talirpingmiut autumn village of the Okomiut Eskimo tribe near the s. e. extremity of Nettilling I., Baffin island.—Boas in 6th Rep. B. A. E., map, 1888.

Neeskotting. The gaffing of fish in shallow water at night with the aid of a lantern. A long pole with a hook at the end is used (Starr, Amer. Ind., 51, 1899). The -ing is the English suffix, and neeskot is probably the equivalent in the Massachuset dialect of Algonquian of the Micmac nigog, 'harpoon' (Ferland, Foy. Canad., 111, 1865), which appears as nigogue in Canadian French. (A. F. C.)

Neeslous. Given as a division of Tsimshian on Laredo canal, N. w. coast of British Columbia. The Haida speak of Níslás as a Tsimshian chief living in this district.

Neccelowes,—Gibbs after Anderson in Hist Mag., 74, 1862. Neccelows.—Cones and Kingsley, Stand Nat. Hist, pt 6, 136, 1885 Necs-lous.—Kane, Wand in N. A., app., 1859.

Negabarnat, Noël. A converted Montagnais chief, who lived at Sillery, Quebec; born about the beginning of the 17th century. He was baptized, with his wife Marie and his son

Charles, in 4639. Although generally peaceful after embracing Christianity, he frequently engaged in war with the Iroquois, always enemies of the Montagnais. In 1652, he was a member of a delegation sent by his tribe to solicit aid from Gov. Dudley, of New England, against the Iroquois. He also appeared in behalf of his people and acted on the part of the French during the convention at Three Rivers, Quebee, in 1645, where a treaty of peace was made with the Iroquois and other tribes. He was selected by Père Druillettes to accompany him on his visit to the Abnaki in 1651, at which time he was alluded to by the French as "Captain Sillery." It was through his efforts that peace was made by the French with one of the tribes on the coast s. of Quebec, neighbours of the Abnaki, seemingly the Malecite or Norridgewock. On his death, Mar. 19, 1666, his war chief. Negaskouat; became his successor. Negabamat was a firm friend of the French, and, after his conversion, was their chief counsellor in regard to their movements on the lower St. Lawrence.

Negro and Indian. The first negro slaves were introduced into the New World (1501-03) ostensibly to labour in the place of the Indians, who showed themselves ill-suited to enforced tasks and, moreover, were being exterminated in the Spanish colonies. Indian-negro intermixture has proceeded on a larger scale in South America, but not a little has also taken place in various parts of the northern continent. Wood (New England's Prospect, 77, 1634) tells how some Indians of Massachusetts in 1633, coming across a negro in the top of a tree, were frightened, surmising that "he was Abamacho, or the devil." theless, intermixture of Indians and negroes has occurred in New England. About the middle of the 18th century the Indians of Marthas Vineyard began to intermarry with negroes, the result being that "the mixed race increased in numbers and improved in temperance and industry." A like intermixture with similar results is reported about the same time from portions of cape Cod. Among the Mashpec in 1802, very few pure Indians were left, there being a number of mulattoes (Mass, Hist, Soc. Coll., 1, 206; 1v, 206, ibid.; 2d s., 111, 4; ef. Prince in Am. Anthrop., tx, no. 3, 1907. Robert Rantoul in 1833 (Hist. Coll. Essex Inst., XXIV, S1: states that "the Indians are said to be improved by the mixture." In 1890, W. H. Clark (Johns Hopk, Univ. Circ.,

x, no. 84, 28) says of the Gay Head Indians: "Although one observes much that betokens the Indian type, the admixture of negro and white blood has materially changed them." The deportation of the Pequot to the Bermudas after the defeat of 1638 may have led to admixture there. The Pequot of Groton, Conn., who in 1832 numbered but 40, were reported as considerably mixed with white and negro blood, and the condition of the few represetatives of the Paugusset of Milford in 1849 was about the same (De Forest, Hist, Ind. Conn., 356, 1853). Of the Indians in Ledyard we read (ibid., 445): "None of the pure Pequot cace are left, all being mixed with Indians of other tribes or with whites and negroec." Long Island presents another point of Indiannegro admixture. Of the Shinnecock on the s. shore, Gatschet in 1889 (Am. Antiq., XI, 390, 1889 observes: "There are 150 individuals now going under this name, but they are nearly all mixed with negro blood, dating from the times of slavery in the Northern states." Still later M. R. Harrington (Jour, Am. Folklore, xvi, 37, 1903) notes the occurrence in many individuals of both Indian and negro somatic characters. These Shinnecock evidently have not been so completely Africanized as some authorities believe. The remnant of the Montauk in East Hampton are reported by W. W. Tooker (Ind. Place-names, iv, 1889) to be mixed with negroes, though still recognizable by their aboriginal features. The region of Chesapeake bay furnishes evidences of Indian-negro intermixture. The fact, pointed out by Brinton (Am. Antiq., 1x, 352, 1887), that the list of the numerals 1-10 given as Nanticoke in a manuscript of Pyrlæus, the missionary to the Mohawk, dating from 1780, is really Mandingo or a closely related African language, indicates contact or intermixture. Of the Pamunkey and Mattapony of Virginia, Col. Aylett (Rep. Ind., U. S. Census 1890, 602) states that there has been a considerable mixture of white and negro blood, principally the former. Traces of Indian blood are noticeable, according to G. A. Townsend (Scribner's Mag., no. 72, 518, 1871), in many of the freeborn negroes of the E. shore of Maryland. According to Mooney (Am. Anthrop., III, 132, 1890), "there is not now a native full-blood Indian speaking his own language from Delaware bay to Pamlico sound," those who claim to be Indians having much negro blood. We find not only Indian-negro intermixture, but also the practice of negro slavery among the

Indians of the s. Atlantic and Gulf states. The Melungeons of Hancock co., Tenn., but formerly resident in North Carolina, are said to be "a mixture of white, Indian, and negro" (Am. Anthrop., II, 347, 1889). The so-called Croatan (q. v.) of North Carolina and Redbones of South Carolina seem to be of the same mixture. The holding of negro slaves by the tribes of the Carolinas led to considerable intermarriage. There has been much negro admixture among the Seminole from an early period, although the remant still living in Florida is of comparatively pure Indian blood. Of the other Indians of Muskhogean stock the Creeks seem to have most miscegenation. fully one-third of the tribe having perceptible negro admixture. In the time of De Soto a "queen" of the Yuchi ran away with one of his negro slaves. Estevanico, the famous companion of Cabeza de Vaca, the explorer, in 1528-36, was a negro, and the importance of negro companions of Spanish explorers has been discussed by Wright (Am. Anthrop., IV, 217-28, 1902). Of Algonquian peoples the Shawnee, and the Chippewa of Minnesota, etc., furnish some cases of Indian-negro intermarriage—the fathers negro, the mothers Indian. The Canadian Tuscarora of the Iroquoian stock are said to have some little negro blood among them, and Grinnell reports a few persons of evident negro blood among the Piegan and Kainah. Some of the Indian tribes of the plains and the far W. have taken a dislike to the negro, and he often figures to disadvantage in their myths and legends. Marcy, in 1853, reports this of the Comanche, and in 1891 the present writer found it true to a certain extent of the Kutenai of s. E. British Columbia. Nevertheless, a few cases of intermarriage are reported from this region. The Caddo, former residents of Louisiana and E. Texas, appear to have much negro blood, and, on the other hand, it is probable that many of the negroes of the whole Iower Atlantic and Gulf region have much of Indian blood. Lewis and Clark reported that some of the N. W. Indians, for mysterious reasons, got their negro servant to consort with the Indian women, so much were they taken with him. According to Swanton the richest man among the Skidegate Haida is a negro. In the Indian-negro half-breed, as a rule, the negro type of features seems to predominate. The relation of the folklore of the negroes in America to that of the American aborigines has been the subject of not a little discussion. In regard to the "Uncle Remus"

stories, Crane (Pop. Sci., Mo. xviii, 324-33). 1881) and Gerber (Jour. Am. Folk-lore, vi. 245-57, 1893) assume the African origin of practically all these myths, and hold that such borrowing as has taken place has been from the negroes by the Indians. Powell (Harris, Uncle Remus, introd., 1895) and Mooney (19th Rep. B. A. E., 232-34, 1900) entertain the opinion that a considerable portion of the myths in question are indigenous with the Indians of s. E. United States. The latter points out that "in all the southern colonies Indian slaves were bought and sold and kept in servitude and worked in the fields side by side with negroes up to the time of the Revolution." The conservatism of the Indian and his dislike or contempt for the negro must have prevented his borrowing much, while the imitativeness of the latter and his love for comie stories led him, Mooney thinks, to absorb a good deal from the Indian. He also holds that the idea that such stories are necessarily of negro origin is due largely to the common but mistaken notion that the Indian has no sense of humour.

In addition to the writings cited, consult it special study by Chamberlain in Science, XVII., 85–90, 1891.

(A. F. C.)

Nehaltmoken. A body of Salish under the Fraser superintendency, British Columbia.—Can. Ind. Aff., 79, 1878.

Nehowmean (Nx'ōmī'n, meaning doubtful). A village of the Lytton band of Ntlakyapamuk, on the w. side of Fraser r., 1½ m. above-Lytton, Brit, Col.

Nehowmean.—Can Ind Aff, 79, 1878 N'homi'n, Hill-Tout in Rep. Ethnol. Surv. Can., 4, 1899. Nhumeen.—Can Ind. Aff, 1892, 312, 1893. Nohomeen.—Brit. Col. Map, Ind. Aff, Victoria, 1872. Nx'ōmi'n. Teit in Mem. Am. Mus. Nat. Hist., ii, 172, 1900.

Neiuningaitua. A settlement of the Aivilirmiut Eskimo on an island N. of the entrance to Lyons inlet, at the s. end of Melville penin., Franklin.

Neyūning-Eit-dūā.—Parry, Second Voy , 162, 1824 Winter Island.—Ibid

Nekah (NVka, `goose'). Λ ' gens of the Chippewa.

Ne-kah.—Warren, Hist Ojibways, 15, 1885 — Ni'kat. Wm: Jones, mf'n, 1906

Nekoubaniste. A tribe, probably Montagnais, formerly living 8, w. of lake 8t. John, Quebec.*

^{*}Probably on Nikabau r. and I

Neconbavistes. Lattre, map. 1784 (misprint). Nekoubanistes.—Bellin, map. 1755; Alcedo, Dic. Geog., mr. 28, 290; av. 210, 1788. Neloubanistes.—Esneuts and Rapilly, map. 1777. unsprint

Nekun-stustai (Nēku'u stastā'-i, 'the Stustas of Naikun'). A subdivision of the Stustas, a family of the Eagle clan of the Haida (q. v.). As their name implies, they lived near the great's and point called Naikun, or Rose spit.

J. R. S.

Načku n stastaai'.— Boas in 12th Rep. N. W. Tribes Can., 23, 1898 — Něku'n stastá'-i.—Swanton, Cont Haida, 276, 1905.

Nellagottine ('people at the end of the world'). A division of the Kawehodinne, occupying the country on Simpson I, and along Anderson r., x. w. of Great Bear lake, Mackenzie, next to the Eskimo. Anderson and others (Hind, Labrador Penin., n. 260, 1863) called them half Kawehodinne and half Kutchin. Macfarlane (ibid., 259) said they erect lodges of turf on poles. Ross said, in 1859, that the Kawehodinne residing in the country around Ft. Good Hope extended beyond the Arctic circle on Mackenzie r., coming into contact with the Kutchin, with whom, by intermarriage, they have formed the tribe Bastard Loucheux.

Bătard Loucheux.—Hind, Labrador Penin., 11, 260, 1803. Bătards-Loucheux.—Petitot, Diet Dené-Dundijié, xx, 1876. Loucheux-Batards.—Ross, MS, B, A, E., 1859. Nnê-la-gortinê.—Petitot in Bul. Soc. Géoc. Paris, chart, 1875. Nnê-lla-Gottinê.—Petitot, Antour du lac des Esclaves, 362, 1891. Tpa-pa-Gottinê.—Ibid. (='ocean people') Vieux de la Mer.—Ibid.

Nenabozho. See Nanabozho.

Nenelkyenok (Nē'nêlk'''ēnôx, 'people from the headwaters of the river'). A gens of the Nimkish, a Kwakintl tribe.—Boas in Rep. Nat. Mus. 1895, 331, 1897.

Nenelpae (Nī'nilpaē, 'those on the upper end of the river'). A gens of the Kocksotenok, a Kwakiutl tribe.—Boas in Rep. Nat. Mus. 1895, 330, 1897.

Neokautah (Four Legs). The Menominee name of a Winnebago chief whose village, commonly known as Four Legs Village, was situated at the point where Fox r. leaves lake Winnebago, on the site of the present Neenah, Winnebago co., Wis. According to Draper (Wis. Hist. Soc. Coll., x, 114, 1888), while living here Neokautah for a time claimed tribute from Americans who passed his village. With Dekaury and other Winnebago chiefs he fought

with the British in the war of 1812-14, reaching the seat of hostilities in time to join Tecumseh in the fighting at 1't. Meigs, Ohio, and, later, engaged in the attack on Ft. Sandusky (Grignon's Recollections in Wis, Hist. Soc. Coll., III. 269, 1857. Neokantah was one of the representatives of his people at the peace conference at Mackinaw, Mich., June 3, 1815, and was a signer of the treaty of Prairie du Chien, Wis., Ang. 19, 1825, under the French name "Les quatres jambes," as leading representative of his tribe. His Winnebago name is given as Hootshoapkau, but it seems to have been seldom used. (c. T.)

Neron. The "captain general" of the Iroquois, taken near Montreal in 1663, and so called by the French because of his great cruelty. In memory of his brother he had burned 80 captives, besides killing 60 men with his own hand (Jes. Rel., 1656, 1663). He was an Onondaga named Aharihon, suggesting his French name. (W. M. B.)

Neshasath (Ne'c'asath). A sept of the Seshart, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes Can., 32, 1890.

Nesietsha. A Naskotin village at the confluence of Blackwater and Fraser rs., Brit. Col.

Black-Water.—Morice, Notes on W. Dénés, 24, 1893. Nasietcah.—Morice in Trans. Roy. Soc. Can., 109, 1892.

Nesikeep Plittle deep hollow or cut', according to Teit: 'destroyed', referring to the incidents of a story, according to Hill-Tout). A village belonging to the Upper Fraser band of Ntlakyapamuk, on the w. side of Fraser r., 38 m. above Lytton, Brit. Col. Pop. 12 in 1901, the last time the name was officially reported. Dawson gives this as a Lillooet town.

N'cēk'p't.—Hill-Tout in Rep. Ethnol. Surv. Can., 4, 1899. Nesikeep.—Can. Ind. Aff., pt. 11, 166, 1901. Nes-ī-kip.—Dawson in Trans. Roy. Soc. Can., sec. 11, 44, 1891. Nesykep.—Can. Ind. Aff. 1892, 312, 1893. Nisucap.—Ibid., 78, 1878. Nse'qip.—Teit in Mem. Am. Mus. Nat. Hist., 11, 172, 1900.

Neskollek. A Nataotin village on Babine lake, Brit. Col.

N°s'qôll°k.—Morice in Trans. Roy. Soc. Can., x, 109, 1892.

Netchilik. A spring settlement of the Netchilirmiut Eskimo, on the w. side of Boothia penin., Franklin.

Netchillik.-Boas in 6th Rep. B. A. E., map, 1888

Netchilirmiut ('people of the place possessing seal'). A large tribe of the Central Eskimo, occupying Boothia penin., Franklin. and the adjoining mainland, in lat. 70°. They have become mixed with the Ugjulirmiut. Their villages are Angmalortuk, Netchilik, North Herndon, and Sagavok. In recent years a large portion of the tribe has moved to Hudson bay and lives in the region between cape Fullerton and Repulse bay.

Boothians.—Ross, Second Voy, app., x, 1835. Nachillee.—Schwatka quoted in Science, 543, 1884. Natsilik.—Rink, Eskimo Tribes, 1, 33, 1887. Nechjilli.

Erdk., 1883. Neitschillir-Eskimos.—Ibid. Neithelik.—Hall, Second Arct. Exped., 256, 1879. Netchillik.—Schwatka in Century Mag., xxii, 76, 1881. Netchillirmiut.—Boas in Trans. Anthrop. Soc. Wash., 10, 101, 1885. Netdili'wi.—Stein in Petermanns Mitt., 198, 1902. Nëtschilluk Innuit.—Schwatka in Science, 1v, 543, 1884. Net-tee-lek.—M'Clintock, Voy. of Fox, 163, 1881.

Nets, Netting, and Network. In every part of Canada and the United States the Indians and the Eskimo used some kind of nets, netting, or network. These were made from animal tissues and vegetal fibres-wool and hair, hide, sinew, and intestines; roots, stems, bast, bark, and leaves. Animal skins were cut into long delicate strips, while sinew and vegetal fibres were separated into filaments and these twisted, twined, or braided and made into open-work meshes by a series of technical processes ranging from the simplest weaving or coiling without foundation, to regular knotting. The woman's hands were the most useful implements in net making; but the seine needle, or shuttle, exhibits a variety of forms from the mere stick for winding, as on a bobbin, to the elaborately ornamented needles of the Eskimo. The meshing also shows a variety of processes, through more and more intricate loopings, as in the Maidu netted caps, to the world-wide netting knot (Dixon).

Netting was used for the capture of animals, for the lacings of snowshoes and lacrosse sticks, for carrying-frames and wallets, for netted caps, for the foundation of featherwork—in short, for whatever had meshes. Nets for the capture of animals differed with the creatures caught, as bird net, fish net, seal net, crab net; with the form, as rectangular net, circular net, conical net, bag net, or purse

net; with the function, as inclosing net, drag net, easting net, dip net, gill net, arresting net, drift net, and hand net.

Beginning at the far N. with the Eskimo, the question of tribal distribution may be considered. Not all the Eskimo used nets for fishing. Boas never saw any among the Central Eskimo, but mentions them as existing in Labrador and westward of Hudson bay; while Murdoch's account of netting at point Barrow, Alaska, is full. Netting needles of antler and walrus ivory, and mesh sticks of bone or antler were employed, both of peculiar patterns. The materials are sinew twine (generally braided), rawhide thong, and whalebone. The knot is the usual becket hitch. Small seal are caught in large meshed nets of rawhide, 18 meshes long and 12 deep, with length of mesh 14 in. These nets are set under the ice in winter and in shoal water in summer. Seals are entired into the nets by whistling, by scratching on the ice, or with rattles. Whitefish are taken in gill nets set under the ice in rivers. A specimen in the U.S. National Museum, made of fine strips of whalebone, is 79 meshes long by 21 deep, with meshes $3\frac{1}{4}$ in, deep. Murdoch, who figures a conical dip net, or fish trap, made of twisted sinew, also gives the spread of various kinds of fish nets, and surmises that the American Eskimo learned the use of the net from the Siberians.

An interesting use of netting has been brought to light by Holmes in his studies of ancient American pottery. In many places have been found vessels and sherds that show net impressions on the surface. In some parts of the Atlantic slope vessels of clay were moulded in network, taking the impressions of the texture. In the description of ancient garments especially those in which feathers hore a conspicuous part, precisely the same methods of netting are described. This furnishes to archæologists an excellent check-off in their studies, since in later times all other forms of textile work, excepting the figure weaving, were abandoned.

Consult Boas (I) in 6th Rep. B. A. E., 1888, (2) in Bull. Am. Mus. Nat. Hist., xv, 1901; Dixon in Bull. Am. Mus. Nat. Hist., xvn, pt. 3, 1905; Goddard in Univ. Cal. Pub., Am. Archæol. and Ethnol., 1, 1903; Holmes (1) in 3d Rep. B. A. E., 1884, (2) in Am. Anthrop., 1x, no. I, 1907; Murdoch in 9th Rep. B. A. E., 1892; Teit in Mem. Am. Mus. Nat. Hist.,

11, 1900; Turner in 11th Rep. B. A. E., 1891; Willoughby in Am. Anthrop., vii, no. 1, 1905.

O. T. M.)

Nettotalis. Given as an Indian village between Yale and Hope, on the w. bank of Fraser r., Brit. Col. (Brit. Col. map, Ind. Aff., Victoria, 1872). This would be in the country of the Cowichan.

Neutrals. An important confederation of Iroquoian tribes living in the 17th century x. of lake Ericin Ontario, having four villages E. of Niagara r. on territory extending to the Genesee watershed; the western bounds of these tribes were indefinitely w. of Detroit r. and lake St. Clair. They were called Neutrals by the French because they were neutral in the known wars between the Iroquois and the Hurons. The Hurons called them Attiwandaronk, denoting 'they are those whose lauguage is awry,' and this name was also applied by the Neutrals in turn to the Hurons. The Iroquois called them Atirhagenrat (Atirhaguenrek) and Rhagenratka. The Aondironon, the Wenrehronon, and the Ongniaahraronon are names of some of the constituent tribes of the Neutrals. Champlain, reporting what he saw in 1616, wrote that the "Nation Neutre" had 4,000 warriors and inhabited a country that extended 80 or 100 leagues E. and W., situated westward from the lake of the Seneca; they aided the Ottawa (Cheueux releuez) against the Mascoutens or "Small Prairie people," and raised a great quantity of good tobacco, the surplus of which was traded for skins, furs, and porcupine quills and quillwork with the northern Algonquian peoples. This writer said that the Indians cleared the land "with great pains, though they had no proper instruments to do this. They trimmed all the limbs from the trees, which they burned at the foot of the trees to cause them to die. they thoroughly prepared the ground between the trees and planted their grain from step to step, putting in each hill about 10 grains, and so continued planting until they had enough for 3 or 4 years' provisions, lest a bad year, sterile and fruitless, befall them."

The Rev. Father Joseph de la Roche Daillon, a Récollet, spent the winter of 1626 among this people for the purpose of teaching them Christianity. The first village, Kandoucho, or Ail Saints, welcomed him. He then went through four other villages, meeting with a friendly reception, and finally reached the

sixth, where he had been told to establish himself. He had the villagers call a council of the tribe for the purpose of declaring to them his mission. He was adopted by the tribe, being given to Tsohahissen (Souharissen?), the presiding chief. Daillon says of the Neutrals: "They are inviolable observers of what they have once concluded and decreed." "father and host," Tsohahissen, had ever travelled among all neighbouring tribes, for he was chief not only of his own village, but even of those of the whole tribe, composed of about 28 villages, villas, and towns, constructed like those of the Hurons, besides many hamlets of 7 or 8 lodges for fishing, hunting, or for the cultivation of the soil. Daillon said that there was then no known instance of a chief so absolute: that Tsohahissen had acquired his position and power by his courage and from having been at war many times against 17 tribes, and had brought back heads (scalps?) and prisoners from all. Their arms were only the war club and the bow and arrow, but they were skilful in their use. Daillon also remarked that he had not found in all the countries visited by him among the Indians a bunchback, one-eved. or deformed person.

But the Hurons, having learned that Father Daillon contemplated conducting the Neutrals to the trading place in the harbour of cape Victory in lake St. Peter of St. Lawrence r., approximately 50 m. below Montreal, spread false reports about him, declaring to the Neutrals that he was a great magician, capable of filling the air of the country with pestilence, and that he had then already taken off many Hurons by poison, thus seeking to compass his death by fomenting suspicions against him. The bearing of the accusation may be judged when it is known that sorcerers were regarded as public enemies and outlaws and were remorselessly slain on the slightest pretext.

The father declared that there were an incredible number of deer in the country, which they did not take one by one; but by making a triangular "drive," composed of two convergent hedges leading to a narrow opening, with a third hedge placed athwart the opening but admitting of egress at each end of the last one, they drove the game into this pen and slaughtered them with ease. They practised toward all animals the policy that, whether required or not, they must kill all they might find, lest those which were not taken would tell the other beasts that they themselves had been pursued, and that these latter in time of

need would not permit themselves to be taken. There were also many elk, beaver, wild-cats, black squirrels, bustards, turkeys, cranes, bitterns, and other birds and animals, most of which were there all winter; the rivers and lakes were abundantly supplied with fish, and the land produced good maize, much more than the people required; there were also squashes, beans, and other vegetables in scason. They made oil from the seeds of the sunflower, which the girls reduced to meal and then placed in boiling water which caused the oil to float; it was then skimmed with wooden spoons. The mush was afterward made into cakes and formed a very palatable food.

Daillon said that the life of the Neutrals was "not less indecent" than that of the Hurons, and that their customs and manners were very much the same. Like those of the Hurons, the lodges of the Neutrals were formed like arbours or bowers, covered with the bark of trees, 25 to 30 fathoms long and 6 to 8 in breadth, and had a passage running through the middle, 10 or 12 feet wide, from one end to the other. Along the sides was a kind of shelf, 4 ft. from the ground, whereon the occupants lay in summer to avoid the fleas. In winter they lay on mats on the ground near the fire. Such a lodge contained about 12 fires and 24 firesides. Like the Hurons they removed their villages every 5, 10, 15, or 20 years, from 1 to 3 or more leagues, when the land became exhausted by cultivation; for, as they did not make use of manure to any great degree, they had to clear more new and fertile land elsewhere. Their garments were made from the skins of various wild beasts obtained by the chase or through trade with the Algonkin, Nipissing, and other hunting tribes, for maize, meal, wampum, and fishing tackle.

The Seneca attacked and destroyed a town of the Aondironon in 1647. This seemingly unprovoked invasion was undertaken to avenge the capture among the Aondironon by the Hurons and the subsequent death of a Seneca warrior who had been among the Tionontati for the purpose of committing murder. This seeming rupture of the traditional neutrality existing between the Iroquois and the Neutrals caused the latter to prepare for war, and for a time both sides were on the alert and stood defiant. Finally the Neutrals decided to attempt to recover their captives by some peaceable means, and to await a more favourable opportunity to avenge themselves for this loss. But the sudden and complete destruc-

tion of the political integrity of the Hurons by their several defeats in 1648–49 by the Iroquois. caused the Neutrals now to fear the rising power of the Iroquois tribes, and they vainly sought to gain their good will by committing an act of hostility against their unfortunate Huron neighbours. When the Iroquois had sacked the most strongly palisaded towns of the Hurons, the Huron fugitives sought asylum in all directions, and many of them, placing their trust in the long-standing neutrality existing between the Iroquois and the Neutrals. which neither had yet sought to rupture, fled to the Neutral towns for refuge; but, instead of affording them protection, the Neutrals seized them as prisoners, and also that portion of the Hurons still remaining in their own country and led them into captivity (Jes. Rel 1659-60).

Immediately after the political destruction of the Hurons by the Iroquois the latter again attacked the Neutrals. The entire conquest of the Neutrals in 1650–51 was the result of this war, and some remnants of the Neutral tribes were incorporated chiefly with the Seneca villages in New York.

The Neutrals were visited in 1640-41 by Fathers Brebouf and Chaumonot. The tribe was then engaged in vigourous war against the western tribes, especially the Mascoutens. These two missionaries visited 18 villages or towns, stopping in 10 of them and expounding their own religious faith whenever they could assemble an audience. In these 10 settlements they estimated about 500 fires and 3,000 persons. On their return journey the fathers remained at Teotongniaton, situated midway between the chief town, Ounontisaston, and the town nearest the Huron country, Kandoucho, where they were compelled to remain on account of snow. While there, their hostess was at great pains to shield them from the abuse to which they were constantly subjected; she also aided them to learn the language and to harmonize it with that of these Neutrals. The Awenrehronon, who had formerly lived eastward of the Erie or Panther tribe, took refuge in Khioetoa, or St. Michel, a few years before this visit of the two fathers, and they were disposed to listen to the teachings of the missionaries.

As a sign of mourning for their friends and kin the Neutrals customarily blackened not only their own but also the faces of the dead. They tattooed the corpse and adorned it with feathers and other trinkets; if the person died in war, a chief delivered an address over the body, around which were assembled the friends and kin of the dead, who were urged by the orator to hasten to avenge the death. Neutrals lightratively resurrected the dead, especially great chieftains and persons noted for valour and wisdom, by the substitution of some person whom they thought was like the deceased in person, age, and character. The selection was made in council, by the clan of the deceased person; then all the people except the one chosen arose, and the master of ceremonies, gently lowering his hand to the earth, feigned to raise the illustrious dead from the tomb and to give life to him in the person of the chosen one, on whom he then imposed the name and dignity of the dead chieftain, and the newly-made chieftain then arose amid the ceremonial acclaim of the people.

In 1643 the Neutrals sent an expedition of 2,000 warriors against the "Nation du feu," some of whom they attacked in a palisaded village defended by 900 men, who bravely withstood the first assaults; but, after a siege of 10 days, the Neutrals carried the palisade and killed on the spot many of its defenders and took about 800 captives. After burning 70 of the best warriors of the Nation du feu, they put out the eyes and girdled the mouths of the old men, whom they afterward abandoned to starve (Jes. Rel. 1643-44). The same authority also says that the Nation du feu alone was more populous than all the Neutral nation, all the Hurons, and all the Iroquois, showing that the term had not yet become restricted to those now called Mascoutens, or "Small Prairie people," but included all the socalled Illinois tribes as well.

From the Journal des PP, Jesuites for 1652-53 it is learned that the portions of the Tobacco Nation and of the Neutral Nation then remaining independent bodies of people were assembling with all neighbouring Algonquian tribes at A'otonatendie (Akotonatendike?) situated 3 days' journey southward from Skia'e (Sault Sainte Marie); that the Tobacco Nation wintered in 1653 at Tea'onto'rai, and the Neutrals, numbering 800, at Shen'chio'e (i. e., Fox place) in the direction of Te'o'chanontian, probably Detroit; that these two tribes would rendezvous in the autumn of 1653 at A'otonatendie, where they had assembled more than 2,000 warriors. This is perhaps the last historical mention of the Neutrals as an independent body. It is these Neutrals, apparenty, whom Perrot (Mémoire, chap. xiv, 1864) calls "Huron de la nation neutre" and "Hurons neutres."

In 1640 the Hurons offered a present of 9 hatchets (costly articles at that time) to the chieftains of the Neutral council, in the hope of inducing it to order the assassination of Fathers Brebourf and Chaumonot, but after deliberating on the proposal all night the council refused to accept the gift.

As has been seen, Daillon said the Neutrals occupied 28 villages in 1626. In 1640, Brebœuf ascribed to them 40 villages with a minimum population of 12,000 persons, including 4,000 warriors. Only a few of the names of these have been preserved, among them being Kandoucho or Tous les Saints, Khioetoa or Saint Michel, Ongniaahra ("Quaroronon," probably on the site of Youngstown, N. Y.,; a form of Niagara), Quinontisaston, and Teotongniaton or Saint Guillaume.

Newcastle Townsite. The local name for a body of Salish of Cowichan agency, Brit. Col. Pop. 26 in 1896, the last time the name occurs.

Newcastle Toronsite.—Can. Ind. Aff. Rep. 1891, 250, 1892 (misprint). Newcastle Townsite.—Ibid., 433, 1896.

Newchemass. An unidentified tribe mentioned by Jewitt (Narr., 77, repr. 1849) as

living far to the N. of, and inland from, Nootka sd., B.C., early in the 19th century. Their language differed from that of the Nootka, but was understood by the latter. Their complexion was said to be darker, their stature shorter, and their hair coarser than those features of other nations. The locality assigned to them corresponds with that of the Nimkish.

Nuchimases.-Galiano, Relacion, 94, 1802.

New Credit. A Missisauga settlement in Tuscarora township of the Six Nations res. on Grand r., Ontario. These Missisauga formerly lived on Credit r., but removed to their present situation about the year 1850 by invitation of the Six Nations. They numbered 218 in 1884, 264 in 1911.

Newhuhwaittinekin. A Shuswap village 4 m. above Cache ct., Bonaparte r., Brit. Col.; pop. 160 in 1906; 147 in 1911.

Bonaparte Indians.—Can. Ind. Aff. 1885, 91, 1886 so called by whites). Ne-whuh-wait'-tin-e-kin.—Dawson in Trans. Roy. Soc. Can., sec. 11, 44, 1891. Tluhta-us.—Can. Ind. Aff. 1885, 198, 1886.

Nhaiiken (N'hai'iken). A Ntlakyapamuk village, near Spence Bridge, Thompson r., Brit. Col.—Hill-Tout in Rep. Ethnol. Surv. Can. 4, 1899

Niagara. Being of Iroquoian origin, one of the earliest forms of this place-name is that in the Jesuit Relation for 1641, in which it is written Onguiaahra, evidently a misprint for Ongniaahra, and it is there made the name of a Neutral town and of the river which to-day bears this designation, although Ongmarahronon of the Jesuit Relation for the year 1640 appears to be a misprint for Ongniarahronon, signifying 'people of Ongniarah.' The Iroquois and their congeners applied it to the place whereon the village of Youngstown, Niagara co., N. Y., now stands. On the Tabula Novæ Franciæ, in Historiæ Canadensis sev Novæ-Franciæ (bk. 10, Paris, 1664, but made in 1660 by Franciscus Creuxius, S. J.), the falls of Niagara are called "Ongiara catarractes." Much ingenuity has been exercised in attempts to analyse this name. The most probable derivation, however, is from the Iroquoian sentence-word, which in Onondaga and Seneca becomes O'hnia'ga', and in Tuscarora U'hnia'kā'r, signifying 'bisected bottom land.' Its first use was perhaps by the Neutral or Huron tribes.

(J. N. B. H.)

See Ongniaahra.

Niakonaujang. An Akudnirmiut Eskimo settlement on Padli fiord, Baffin island.

Niagonaujang.-Boas in 6th Rep. B. A. E., 441, 1888

Niantilik ('with the gulls'). An Okomiut Eskimo village of the Kinguamiut subtribe, on Cumberland sd., Baffin id.

Naintilic.—Howgate, Cruise of Florence, 50, 1877. Niantilic.—Kumlien in Bull. Nat. Mus. no. 15, 15, 1879.

Nibowisibiwininiwak ('Death river people'). A subdivision of the Chippewa living in Manitoba, N. of lake Winnipeg. Cf. Onepowesepewenewak.

Lake Winnipeg band.—Smithson, Misc. Coll., iv, art 6, 35, 1878. Nibowi-sibi-wininiwak.—Gatschet, Ojibwa M8., B. A. E., 1882.

Nichikun. See Nitchequon.

Niciat. The local name for a body of Upper Lillooet around Seton lake, interior of British Columbia. Pop. 44 in 1911.

Necait.—Can. Ind. Aff. Rep., pt 1, 277, 1902 Niciat. —Ibid., pt. 11, 272.

Nicola Band. One of four subdivisions of the Upper Ntlakyapamuk in the interior of British Columbia.

Cawa'xamux,—Teit in Mem. Am. Mus. Nat. Hist, n., 170, 1900 ('people of the creek,' i. e., Nicola r.). Nicola band,—Ibid. Tcawa'xamux,—Ibid. Tcūā'qamuq,—Hill-Tout in Rep. Ethnol. Surv. Can., 5, 1899.

Nicola Valley Indians. The official designation of a large number of local groups in British Columbia, principally Cowichan, Lillooet, and Ntlakyapamuk Indians, numbering 549 in 1911.

Nicomen. A Cowichan tribe on Nicomen slough and at the mouth of Wilson cr., lower Fraser r., Brit. Col. Their villages are Skweahm and Lahaui, but the name has become attached to the latter town of the tribe, which in 1911 had 13 inhabitants. The aggregate population of Nicomen and Skweahm was 41 in 1911.

Lek.'ā'mel.—Boas in Rep. 64th Meeting Brit. A. A. S., 454, 1894. Nacomen.—Can. Ind. Aff., 78, 1878. Nec.'ā'men.—Boas, op. cit. Nicoamen.—Can. Ind. Aff., 309, 1879. Nicoamin.—Ibid., 76, 1878. Nicomen.—Ibid., pt. 1, 276, 1894.

Nightasis. A Haida town of this name is given in John Wark's list, 1836-41, with 15 houses and 280 inhabitants. It seems impossible to identify the name with that of any known town. On other grounds Kung, in Naden harbour, would appear to be the town intended.

Nigh tan. —Wark (1836-41) in Schooleraft, Ind. Tribes, v. 489, 1855. Nigh-tasis.—Dawson, Queen Charlotte Ids., 173n, 1880.

Nigottine ('moss people'). A part of the Kawchogottine division of the Kawchodinne living along the outlet of Great Bear lake, Mackenzie, N.W.T.

NI-gottinė.—Petitot in Bull. Soc. de Géog. Paris, chart, 1875. Nnéa-gottine.—Petitot, MS. vocab., B. A. E., 1865. Nni-Gottinė.—Petitot, Autour du lac des Esclaves, 363, 1891. Nni-ottinė.—Petitot, Diet. Dènè-Dindiié, xx, 1876.

Nikaomin (Neqa'umin, or Nqan'min, so named because the water comes from a lake called Nqauma'tko, 'wolf lake or water'; from sqaum, 'wolf'). A Ntlakyapamuk town on the s. side of Thompson r., 10 m. above Lytton, Brit. Col. 1t is called Thompson by the whites. Pop. 49 in 1911.

Neqa'umîn.—Teit in Mem. Am. Mus. Nat. Hist., 11, 171, 1900. NI-ca-o-min.—Can. Ind. Aff. 1885, 196, 1886. Nicomen.—Ibid., 309, 1879. Nicomin.—Ibid. map, 1891. Nikaomin.—Ibid., pt. 11, 166, 1901. N'kau'men.—Hill-Tout in Rep. Ethnol. Surv. Can., 4, 1899. Nqau'min.—Teit, op. cit. Thompson.—Ibid (modern name).

Nikikouek (from the Chippewa or a cognate dialectic term nikig 'otter,' with anim. pl. suffix -ouck = 'otter people.' Perrot says the form with initial m, Mikikouet, is from their own language; such is the case in the cognate Menominee mikig). A little known Algonquian tribe that formerly dwelt E. of the Missisauga, among the rock caverns on the N. shore of lake Huron. They are described as lacking in courage, and having much to do with the tribes northward. Twice a year, like the Missisauga, they deserted their village to hunt and fish along the lake for sturgeon and other fish, and there obtained bark for constructing canoes and lodges. On the approach of winter they frequented the lake shores to kill beaver and elk, whence they returned in the spring to plant and tend their corn. In 1653, jointly with the Saulteurs and the Missisauga, they so completely defeated an Iroquois war-party of 120 men that but few escaped.

(J, N, B, H.)

Gens de la Loutre.—Perrot (ca. 1724), Mémoire, 83, 1864. Mikikoues.—Ibid., 219. Mikikouet.—Ibid., 83. Nation de la Loutre.—Bacqueville de la Potherie, Hist. Amér. Sépt., 11, 48, 1753. Nikikoues.—Perrot, Mémoire, index, 1864.

Nikozliautin ('people of the river covered with the enemy's arrows'). A Takulli clan or division on the s. half of Stuart lake and on Pinchi r., Brit. Col. They inhabit two villages, Nakraztli and Pintee. The name comes from a legend of a tribe of dwarfs who once attacked their village in such numbers that the surface of Stuart r. was covered with floating arrows (Morice in Trans. Can. Inst., 188, 1891). The Nikozliautin are devout Catholics, sober, law-abiding, and hospitable. Their main resources are hunting, trapping, and fishing. Pop. 234 in 1906.

Na-kas-le-tīn.—Dawson in Rep. Geol. Surv. Can., 30n, 1881. Nakazèteo-ten.—De Smet, Miss. de l'Oregon, 63, 1844. Na-ka-ztli-tenne.—Morice, letter, 1890. Nakoozétenne.—Can. Ind. Aff., 215, 1902. Nimpkish.—Mayne, Brit. Col., 179, 1862. Num-kēs.—Hall quoted by Dawson in Trans. Roy. Soc. Can., sec. 11, 72, 1887.

Ninstints. A Haida town which formerly stood on Anthony id., at the s. end of Queen Charlotte ids., Brit. Col. The native name was Sga'nguai ('Red-cod island'), Ninstints being the white man's corruption of the town-chief's name, Nungstins (Nañ stins, 'he who

is two'). All the people from this end of Moresby id. gathered there in comparatively recent times. The remnant have since abandoned the place and settled at Skidegate. It is impossible to identify absolutely the name of this town with that of any given in John Wark's list of 1836-41, but it is probably referred to as "Quee-ah," a town to which he assigned 20 houses and a population of 308. At the present day there are probably not a dozen Ninstints people left. The family to which the chief of this town belonged was the Sakikegawai. See Swanton, Cont. Haida, 105, 277, 1905. (J. R. S.)

Nensti'ns.—Boas, 12th Rep. N. W. Tribes Can., 25, 1898. Ninstance.—Dawson, Queen Charlotte Ids., 169, 1880. Ninstence.—Poole, Queen Charlotte Ids., 195, 1872. Ninstints.—Dawson, op. cit.—Sg'a'nguai.—Boas, op. cit.

Nipisiguit. A former Miemac village on the site of Bathurst, at the mouth of Nipisiguit r., New Brunswick. The French mission of Sainte Magdalen was there in 1645.

Nepegigoüit.—Jes. Rel. 1645, 35, 1858. Nipigignit.—Vetronile, Abnakis, 59, 1866. Nipisiguit.—Membré, quoted by Shea, Miss. Val., 86, 1852.

Nipissing ('at the little water or lake,' referring to lake Nipissing; Nipisirinien, littlewater people'). A tribe of the Algonkin. When they first became known to the French, in 1613, they were residing in the vicinity of lake Nipissing, Ontario, which has been their home during most of the time to the present. Having been attacked, about 1650, by the Iroquois, and many of them slain, they fled for safety to lake Nipigon (Mackenzie, Voy., xli, note, 1802), where Allouez visited them in 1667, but they were again on lake Nipissing in 1671. A part of the tribe afterward went to Three Rivers, and some resided with the Catholic Iroquois at Oka, where they still have a village. Some of these assisted the French in 1756. It is their dialect which is represented in Cuoq's Lexique de la Langue Algonquine. They were a comparatively unwarlike people, firm friends of the French, readily accepting the Christian teachings of the missionaries. Although having a fixed home, they were semi-nomadic, going s. in autumn to the vicinity of the Hurons to fish and prepare food for the winter, which they passed among them. They cultivated the soil to a slight extent only, traded with the Cree in the x., and were much given to jugglery and shamanistic practices, on which account the Hurons and the whites called them

Sorcerers. Their chiefs were elective, and their totems, according to Chauvignerie (N. Y. Doc. Col. Hist., x. 1053, 1855), were the heron, beaver, birchbark, squirrel, and blood. No reliable statistics in regard to their numbers have been recorded. The Indians now on a reservation on lake Nipissing are officially classed as Chippewa; they numbered 162 in 1884, and 285 in 1911. A Nipissing division was called Miskouaha.

Tuskwawgomeeg.-Tanner, Narr, 316, 1830 (Ottawa name).

Nirdlirn. A summer settlement of the Kingnaitmiut subtribe of the Okomiut Eskimo on the x. coast near the head of Cumberland sd., Baffin island.---Boas in 6th Rep. B. A. E., map, 1888.

Niscak ('bustard'). A tribe or division mentioned with other Algonquian tribes of the region between lake Superior and Hudson bay in the Prise de Possession (1671) in Perrot, Mém., 293, 1864. They were perhaps a gens of the Ottawa.

Nisibourounik. One of the four divisions of the Cree.—Jes. Rel. 1658, 22, 1858.

Niska. The dialectic name for one of the three Chimmesyan divisions, the other two being the Kitksan and the Tsimshian. In tradition, art, and manner of living these three divisions are closely allied, with such geographic differences as would naturally occur. In language less than one-third of the vocabulary is common to all, a like proportion varies in accent, while the remainder is different and more local in character. Dia-

lectic differences are much less marked between the two interior river divisions than between either of them and the Tsimshian of the coast.

The territory of the Niska includes Observatory inlet, Nass bay, and the drainage basin of Nass r. and its tributaries, but those northern sources that interlock with the Iskut and the Stikine rs. are claimed also by the Tahltan, and over this contention have occurred many wars that have always kept these people apart. The Niska villages have always been on the main river and show evidence of considerable size. The houses, in a single row, follow the contour of the shore; they are built of hewn timbers in the form of a parallelogram, with a central open fireplace of gravel, and a smoke-hole in the roof. Carved heraldic columns stand in front, in which the crest of the deceased is shown at the base and that of the successor at the top, and in one old village grave-houses of logs surmounted by animal and bird forms in wood and stone, representing the totemic emblems of the dead, rest on the river bank in the midst of the columns

With the establishment of missions the older villages have generally been deserted and the people are being concentrated at three points, under the supervision of missionaries of the Church of England, and small modern dwellings are taking the place of the old communal house. Modern ideas prevail, and the condition of the people is a credit to both their teachers and themselves. The villages, past and present, together with the more important village sites, are: Kincolith, Kitaix, Lakkulzap or Greenville, Gwinwork, Lakungida or Ankeegar, Kisthemuwelgit or Willshilhtumwillwillgit, Qunahhair, Kitwinshilk, Sheaksh, Aiyansh, Kitlakdamix, and Kitwinlkole. Other town names have been given, as follows, but these, wholly or in part, may duplicate some of the above: Kitahon, Kitangata, Kitlakaous, and Andeguale.

The Niska were divided geographically into the Kitkahteen ('people of the lower valley'), including those below the canon, and the Kitanweliks ('people of the upper river'), comprising those above this point.

Tradition tells that long ago when the principal village was across the river to the southward, some little boys were amusing themselves by catching salmon, cutting slits in their backs in which they inserted flat stones, and then letting them go, playing they were

whales. This so incensed the guardian spirit that, rising from the mountain to the southward enveloped in a wide spreading black cloud that changed day into night, with eyes of flame and voice of thunder, he rolled down the mountain side as a river of fire and swept the village away. The people fled across the river and took refuge on the hills until quiet was restored, when they divided, some settling at Kitlakdamix and there retaining the old name of Kitauwiliks, while the others, founding Kitwinshilk on the rocks overlooking the rapids, were ever afterward known by the name of their village as 'The people among the lizards.'

The social organization is founded upon matriarchy, and is dependent upon the existence of four exogamous parties, distinguished by their crests, who intermarry and who supplement one another on all occasions of ceremony. These parties are subdivided into families who are represented by minor crests but who still retain the party emblem. These four parties are: (1) Laghkepo, represented by the wolf and having as its subdivisions the Brown-bear, Crow, Crane, and Red-wing flicker; (2) Laghkeak, represented by the Eagle and having as its subdivisions the Beaver, Owl, Dog-fish, and Squirrel; (3) Kanhadda. represented by the Raven and having as its subdivisions the Frog, Sea-lion, Sculpin, and Star-fish: (4) Kishpootwada, represented by the Killer-whale and having as its subdivisions the Osprey and the Bear-under-water. (Boas gives the following subdivisions: Gyitkadok, Lakseel, Laktiaktl, Gyitgyigyenik, Gyitwulnakyel, Gyiskabenak, Lakloukst, Gyitsaek, Laktsemelik, and Gyisgahast. He assigns the first two to the Raven phratry, the next three to the Wolf phratry, the four following to the Eagle phratry, and the last to the Bear phratry.)

The Niska look to the river for their food supply, which consists principally of salmon and culachon. Indeed it is owing to the enormous number of the latter fish that run in to spawn in the early spring that the name Nass, meaning 'the stomach, or food depot,' has been given to the river.

In 1902 the population of the Niska towns was 842; in 1906, 814; in 1911, 738.

Nkamip. An Okinagan division under the Okanagan agency, Brit. Col. Pop. 70 in 1901; 62 in 1911.

Fn-ke-mip.—Can. Ind. Aff. 1883, pt. 1, 191, 1884.
N-Kamip.—Ibid., pt. 11, 166, 1901. Osooyoos.—Ibid.,
79, 1878. Osoyoos.—Ibid., 1882, 259, 1883.

Nkattsim (Nkattsi'm, 'log bridge across stream,'—Hill-Tout). A Ntlakyapamuk village on the E. side of Fraser r., about 38 m. above Yale, Brit. Col., near Keefer station, but on the opposite side of the river. Pop. 87 in 1901, the last time the name appears.

Ne-kat-sap,—Can. Ind. Aff. 1883, pt. 1, 189, 1884, Nkatsam.—Ibid, pt. 11, 166, 1901. Nkattsi'm.— Teit in Mem. Am. Mus. Nat. Hist, 11, 169, 1900, N'ka'tzam.—Hill-Tout in Rep. Ethnol. Surv. Can., 5, 1899.

Nkoeitko (Ngôc'itko, 'little lake or pond'— Teit; 'yellow water'—Hill-Tout). A village of the Spence Bridge band of Ntlakyapamnk on the s. side of Thompson r., 30 m. above Lytton, Brit. Col.

N'koakoaë'tkō.—Hill-Tout in Rep. Ethnol. Surv. Can., 4, 1899. Nqôe'itko.—Teit in Mem. Am. Mus. Nat. Hist., 11, 173, 1900.

Nkoiam (N'kō'īam', 'eddy'). A Ntlakyapamuk village on Fraser r., below Ciseo, Brit, Col.—Hill-Tout in Rep. Ethnol. Surv. Can., 5, 1899.

Nkoikin (Nqoī'kin, 'black pine ridge'). A village of the Lytton band of Ntlakyapamuk on the E. side of Fraser r., 8 m. above Lytton, Brit. Col.; so-called because young firs grew thickly there. Pop. 15 in 1897, when last the name appears.

Nkuaikin.—Can. Ind. 4ff. 1892, 312, 1893. N'ōkolō'-ken.—Hill-Tout in Rep. Ethnol. Surv. Can., 4, 1899. Nqakin.—Can. Ind. Aff. 1898, 418, 1899 (in combination with "Stryne-Nqakin", Stryne being another town). Nqoi'kin.—Teit in Mem. Am. Mus. Nat. Hist., 11, 172, 1900. Nquakin.—Can. Ind. Aff., 230, 1886.

Nkukapenach (N'k'u'kapenate, 'eanoes transformed to stone'). A Squawmish village community on the right bank of Skwamish r., Brit. Col.—Hill-Tout in Rep. Brit. A. A.S., 474, 1900.

Nkuoosai (*Nkuŏ'osai*). A Squawmish gens living on Howe sd., coast of British Columbia.—Boas, MS., B.A.E., 1887.

Nkuoukten (Nkuō'ukten). A Squawmish gens living on Howe sd., coast of British Columbia.—Boas, MS., B. A. E., 1887.

Nkya (Nqáia, from nqa'iEx, 'to swim'). A village of the Lytton band of Ntlakyapamuk on the w. side of Fraser r., Brit. Col., 2 m. below Lytton. Pop. 71 in 1901, the last time the name appears.

Macaiyah.—Brit. Col. map, Ind. Aff., Victoria, 1872. Macayah.—Can. Ind. Aff., 79, 1878. Nikai'-a.—Dawson in Trans. Roy. Soc. Can., sec. 11, 44, 1891. N'kai'a.—Hill-Tout in Rep. Ethnol. Surv. Can., 4, 1899. Nkaih.—Can. Ind. Aff., 363, 1897 (confused with Nkaih, q. v.). Nkya.—Ibid., pt. 11, 161, 1901. Nqa'la.—Teit in Mem. Am. Mus. Nat. Hist., 11, 171, 1900. Nyakai.—Can. Ind. Aff. 1898, 418, 1899.

Nohuntsitk (Nö'xunts'itx). A Kwakiutl tribe living at the lower end of Wikeno lake, coast of British Columbia.—Boas in Rep. Nat. Mus. 1895, 328, 1897.

Noieltsi (Noië'ltsi, 'burnt body'). A Ntlakyapamuk village on the w. side of Fraser r., about 23 m. above Yale, Brit. Col.—Teit in Mem. Am. Mus. Nat. Hist., 11, 169, 1900.

Noka (No'ke, 'bear foot'). A gens of the Chippewa.

Noka.—Warren (1852) in Minn. Hist. Soc. Coll., v. 44, 1885. No-kaig.—Ibid., 87 (plural). Nök'e,—Wm. Jones, inf'n, 1906.

Nokem (No'qEm, from s'nō'k, 'valley'). A village of the Spence Bridge band of Ntlak-yapamuk at a place called by the whites Drynoch, on the s. side of Thompson r., 16 m. above Lytton, Brit. Col.—Teit in Mem. Am. Mus. Nat. Hist., 11, 172, 1900.

Nomas $(N\bar{v}'mas)$. The ancestor of a Tlauitsis gens, after whom the gens itself was sometimes ealled.—Boas in Petermanns Mitt., pt. 5, 130, 1887.

Nomasenkilis (Nōmasénxilis). The ancestor of a Tlatlasikoala gens, after whom the gens itself was sometimes called.—Boas in Petermanns Mitt., pt. 5, 131, 1887.

Nomoqois. The ancestor of a Nakomgilisala gens, after whom the gens itself was sometimes called.—Boas in Petermanns Mitt., pt. 5, 131, 1887.

Noohtamuh (Nooh-ta-muh). An unidentified village that anciently stood on the w. end of Harbledown id., Brit. Col., in Kwakiutl territory.—Dawson in Can. Geol. Surv., map, 1887.

Noöt $(N\bar{o}'\delta t, \text{ or } NEr\hat{o}'t, \text{ allied to } r\hat{o}'it, \text{ 'sleep'})$. A village of the Lytton band of Ntlakyapanuk on the w. side of Fraser r., 12 m. above Lytton, Brit. Col.

Neró't.—Teit in Mem. Am. Mas. Nat. Hist., 11, 172, 1900. Nő'ôt.—Ibid. Tent.—Can. Ind. Aff. 1894, 277, 1895 (misprint). Yent.—Ibid., 1898, 418, 1899. Yeō't.—Hill-Tout in Rep. Ethnol. Surv. Can., 4, 1899. Yeut.—Can. Ind. Aff., pt. 11, 166, 1901. Yont.—Ibid., 1886, 230, 1887. Ze-ut.—Ibid., 1885, 196, 1885.

Noothlakimish. An unidentifiable Bellaeoola division on North Bentinck arm, Brit. Col.; mentioned by Tolmie and Dawson, Vocabs. Brit. Col., 122n, 1884.

Nootka. A name originally applied to the Mooachaht (q. v.) of Nootka sd., w. coast of Vancouver id., and to their principal town,

Yuquot (q. v.), but subsequently extended to all the tribes speaking a similar language, These extend from cape Cook on the N. to bevond port San Juan, and include the Makah of cape Flattery, Wash. Sometimes the term has been so used as to exclude the last-named tribe. The Nootka form one branch of the great Wakashan family and their relationship to the second or Kwakiutl branch is apparent only on close examination. In 1906 there were 435 Makah and 2.159 Vancouver Id. Nootka:* total, 2,594. They are decreasing slowly but steadily, the reduction in population of the Nootka of Vancouver id. alone having exceeded 250 between 1901 and 1906. The Nootka tribes are: Ahousaht, Chaicclesaht, Clayoquot, Cooptee, Ehatisaht, Ekoolthaht, Hachauth (extinct), Hesquiat, Kelsemaht, Klahosaht (probably extinct), Kwoneatshatka (?), Kyuquot, Makah, Manosaht, Mooachaht, Muchalat, Nitinat, Nuchatlitz, Oiaht, Opitchesaht, Pacheenaht, Seshart, Toquart, Uchucklesit, and Ucluelet. (J. R. S.)

Aht.—Sproat, Savage Life, 312, 1868. Nootka.—Hale in U. S. Expl. Exped., vi, 220, 539, 1846. Nootka-Columbian.—Scouler in Jour, Roy. Geog. Soc., xi, 221, 1841. Noutka.—Duflot de Mofras, Expl., n, 344, 1844. Nuqueño.—Galiano, Relación, 30, 1802. Nutka.—Ibid. O'menē.—Boas in 5th Rep. N. W. Tribes Can., 9, 1889. (Comox name). Ouakichs.—Duflot de Mofras, op. cit., 335, 345. Southern.—Scouler, op. cit., 224. Tc'ecā'atq. Boas, op. cit., 9 (Skokomish name). Wakash.—Gallatin in Trans. Am. Antiq Soc., ii, 15, 306, 1836.

Nopeming (for No piminglashīnēnīwāg 'people of the bush.'—W. J.). A northern branch of the Chippewa, living in Ontario, N. E. of lake Superior and w. of lake Nipissing, and sometimes ranging E. as far as Ottawa r. From their frequently resorting to Sault Ste. Marie they have often been confounded with the band at that place, and they have been likewise confused with the Têtes de Boule, q. V.

Men of the woods.—Maclean, Hudson Bay, 1, 74, 1849 (so called by other tribes). Muskegoag.—Tanner, Narr, 315, 1830 (applied by the Ottawa to them as well as to the Maskegon). Noapeeming'.—Schoolcraft, Miss. Val., 299, 1825. Nopemen d'Achirini.—Lahontan, New Voy., 1, 231, 1703. Nopemetus Anineeg.—Tanner, Narr., 315, 1830 (Ottawa name). Nopemings.—Schoolcraft, Ind. Tribes, v. 145, 1855. Nopemin of Achirini.—Richardson, Arct Expel. II, 39, 1851. Nopemit Azliinneneeg.—Tanner, Narr., 315, 1830 (Ottawa name). Nopiming daje inini.—Cuoq, Lex. Algonquine, 129, 1866 (men of the interior of the lands'): Nipissing name). Nöpimingtashineniwag.—Win. Jones, inf'in, 1906. correct name).

^{*} In 1911, there were 1,984.

Nubenaigooching.—Can Ind. Aff., 16, 1875 Opemens d'Acheliny.—Du Lhut (1684) in Margry, Déc, M. 51, 1886 O'pimittish Ininiwac.—Henry, Trav., (0, 1809 Wood Indians.—Ibid.

Noquiquahko. A former Salish band of Fraser superintendency, apparently on or near upper Fraser r., Brit. Col.

No-qui-quabko. Can. Ind. Aff., 78, 1878

Norridgewock (from Nanrantswak, 'people of the still water between rapids'). A tribe of the Abnaki confederacy, the typical tribe of the group. Their closest relationship was with the Penobscot, Arosaguntacook, and Wewenoc. Their territory embraced the Kennebec valley nearly to the river's mouth, Norridgewock, their principal village, being on the left bank just below the rapids, near the present Norridgewock, Me. The French established a mission at their village in 1688. In 1695 the Jesuit Father Rasles took up his residence there and succeeded in attaching the tribes so warmly to the French cause that they soon came to be regarded as dangerous enemies of the English colonists. In 1724 an expedition was sent against the Norridgewock, which resulted in the destruction of their village, the dispersion of the tribe, and the death of Rasles. They fled in different parties to the Penobscot and Passamaquoddy, and to St. Francis in Canada. A number afterward returned and settled in their old home, but, owing to the continued unfriendly disposition of the whites, who again attacked their village in 1749, returned at the breaking out of the French and Indian war in 1754 to St. Francis. A few families that remained behind for some years finally found their way also to Canada. See Abnaki, Mis-

Northern Assiniboin. A division of the Assiniboin as recognized about the middle of the 19th century and earlier. Perhaps the same as the Tschantoga (q. v.), or Gens des Bois of Maximilian, and the Wood Stoneys or Stonies of northern Alberta of the present day, although Denig (1854) says they were so called because they came from the N. in 1839. In Denig's time they numbered 60 lodges under Le Robe de Vent.

Assiniboels of the North.—Jefferys, Am. Atlas, map 8, 1776. Assiniboins of the North.—Jefferys, French Dom. Am., pt. 1, map, 1761. Gens du Nord.—Hayden, Ethnog. and Philol. Mo. Val., 387, 1862. Northern People.—Denig quoted by Dorsey in 15th Rep. B. A. E., 223, 1897. Tokum'-pl.—Hayden, op cit. Wah-ze-ah we-chas-ta.—Denig, op cit. Wah'-zi-ah.—Hayden, op cit.

North Herndon. A Netchilirmiut Eskimo village at Felix harbour, Boothia penin., Franklin—Ross, Second Voy., 249, 1835.

Notre Dame de Foye. A former mission village near Quebec, settled by some Hurons from Huronia, who removed to Lorette in

Nottoway. See Nadowa.

Noutchaoff. An unidentified Bellacoola town on a river of the same name in British Columbia.

Nout-chaoff.—Mayne, Brit. Col., 147, 1862.

Npapuk (N'pāpuk'). A Squawmish village community on the E. side of Howe sd., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Npiktim ('white hollow'). A village of the Ntlakyapamuk, so ealled, according to Hill-Tout, because it was the place where the Indians obtained the white clay they burnt and used for cleaning wool, etc. Pop. 19 in 1897, the last time the name officially appears.

Mpaktam.—Can. Ind. Aff. 1886, 230, 1887. N'pek'tem.—Hill-Tout in Rep. Ethnol. Surv. Can., 5, 1899 Npikti'm.—Teit in Mem. Am. Mus. Nat. Hist., 11, 169, 1900. S'înpûkti'm.—Ibid

 $21A - 23\frac{1}{2}$

Npokwis (N'pōk'wis). A Squawmish village community on the right bank of Skawnish r., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Npuichin (Npuitei'n, 'low ridge shore'). A village of the Lytton band of Ntlakyapamuk on the w. side of Fraser r., 8 m. above Lytton, Brit. Col.—Teit in Mem. Am. Mus. Nat. Hist., 11, 172, 1900.

Nsisket (Nsi'sqEt, 'the little split or divide', perhaps because near a deep or rocky gulch). A village of the Nicola band of Ntlakyapamuk near Nicola r., a few miles from the w. end of Nicola lake, Brit. Col.—Pop. 21 in 1901, the last time the name is given.

Hun-ka-sis-ket.—Can. Ind. Aff. 1883, pt. 1, 191, 1884. N'cickt.—Hill-Tout in Rep Ethnol. Surv. Can., 4, 1899. Neyiskat.—Can. Ind. Aff. 1894, 277, 1895. Nsi'sqet.—Teit in Mem. Am. Mus. Nat. Hist., 11, 174, 1900. Nyiskat.—Can. Ind. Aff., 361, 1895. Nziskat.—Did., 1886, pt. 1, 232, 1887. Nzyshat.—Ibid., pt. 11, 166, 1901.

Nskakaulten (Nsqa'qaulten, 'little lookingfor-game place'). A village of the Ntlakyapamuk on the s. side of Thompson r., 23 m. above Lytton, and $^{1}_{2}$ m. below Spence Bridge, Brit. Col.

Nsqa'qaniten.—Teit in Mem. Am. Mus. Nat. Hist, n. 172, 1900. Spence Bridge [Indians].—Can. Ind. Aff., 79, 1878.

Ntekem (Ntė'qEm, 'to make muddy', or 'muddy creek'). A village of the Spence Bridge band of Ntlakyapamuk on the N. side of Thompson r., about I m. from stream and 39 m. above Lytton, Brit. Col. Pop. 18 in 1911. N'tāi'kum.—Hill-Tout in Rep. Ethnol. Surv. Can., 4, 1899 Ntė'qEm.—Teit in Men. Am. Mus. Nat. Hist., n., 173, 1900. Oregon Jacks.—Name given by whites.

Nthaich (N'cai'te). A Squawmish village on the right bank of Skwamish r., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Ntlaktlakitin (NLaqLa'kîtîn, 'the crossing place,' 'place for crossing the river'). A village of the Lytton band of Ntlakyapamuk at Kanaka bar, Frasev r., about 11 m. below Lytton, Brit. Col., with 52 inhabitants in 1911. Some Indians class it with the Lower Ntlakyapamuk.

Hlakklaktan.—Can. Ind. Aff. 1892, 312, 1893. Hluhlu-natan.—Ibid., pt. n. 164, 1901. Hlukhlukatan. —Ibid., 230, 1886. Hluk-kluk-a-tan.—Ibid., 1885, pt. 1, 196, 1886. Kanaka Bar.—Ibid., 1897, 363, 1898. Ntaqua;kitin.—Teit in Mem. Am. Mus. Nat. Hist., n., 171, 1900.

Ntlakyapamuk. One of the four great Salish tribes inhabiting the interior of British

2 GEORGE V., A. 1912

Columbia and popularly called Thompson Indians, from the river on which a large part of them live. Internally they are divided into the Lower Thompsons, living from a short distance below Spuzzum on Fraser r., nearly to the village of Cisco, and the Upper Thompsons, whose towns extend from the latter point nearly to Lillooet on the Fraser, to within a short distance of Ashcroft on the Thompson, and over all of Nicola valley. The Upper Thompsons are subdivided by Teit into 4 minor bands, the Lytton band, the Nicola band, the Spence Bridge band, and the Upper Fraser band. In addition the following subdivisions are mentioned: Ainslie Creek, Boothroyd, Canoe Lake Indians, Cook Ferry. Rhaap, Skowtous, and Snakaim. Total population 1,826 in 1902, 1,727 in 1911. The following list of villages was obtained principally from Teit:

Villages of the Lower Thompsons: Chetawe, Kalulaadlek, Kapaehichin, Kapaslok, Kimus, Kleaukt, Koiaum, Nkakim, Nkattsim, Nkoiam, Noicltsi, Npiktim, Ntsuwiek, Sintaktl, Skohwak, Skuzis, Skwauyik, Spaim, Spuzzum, Stahchani, Suk, Taqwayaum, Tikwalus, Tliktlaketin, Tzauamuk.

Villages of the Lytton band: Anektettim, Cisco, Kittsawat, Natkelptetenk, Nehekchekokenk, Nehowmean, Nikaomin, Nkoikin, Nkya, Noöt, Npuichin, Ntlaktlakitin, Staiya, Stryne, Tlkamcheen, Tuhezep.

Villages of the Upper Fraser band: Ahulka, Nesikeep, Nkaktko, Ntlippaem, Skekaitin, Tiaks.

Villages of the Spence Bridge band: Atehitchiken, Klukluuk, Nkamchin, Nkoeitko, Nokem, Nskakaulten, Ntekem, Nukaatko, Pekaist, Pemainus, Semehau, Snapa, Spatsum, Stlaz, Tlotlowuk, Zakhauzsiken.

Villages of the Nicola band: Hanehewedl, Huthutkawedl, Koiskana, Kwilchana, Naaik, Nehekus, Nsisket, Ntstlatko, Petutek, Shahanik, Tsulus, Zoht.

To these the following names must be added, although one or two of them may possibly be synonyms: Cheuek, Kokoiap, Nhaiiken, Nkahlimiluh, Nkaih, Nzatzahatko, Paska, Schaeken, Shkuet, Shkuokem, Shuimp, Skappa, Snakaim, Spapium, Timetl, Tsuzel.

For detailed information consult Teit in Mem. Am. Mus. Nat. Hist., 11, pt. 1v, 1900, and Hill-Tout in Rep. Ethnol. Surv. Can., Brit. A. A. S., 1889.

(J. R. S.)

Inst., 1v, 25, 1893. Nu-tca-'tenne.—Hbid.

Ntstlatko (NtsLa'tko, 'cold water'). A village of the Nicola band of the Ntlakyapamuk

near Nicola r., a few miles from the w. end of Nicola lake, Brit. Col.

Coldwater.—Teit in Mem. Am. Mus. Nat. Hist., 11, 174, 1900 (white man's name). Ntsa^Ta'tko.—Ibid. Ntsta'tko.—Ibid.

Ntsuwiek (Ntsuwi'ēk). A village of the Ntlakyapamuk on the w. side of Fraser r., 27 m. above Yale, Brit. Col.—Teit in Mem. Am. Mus. Nat. Hist., 11, 169, 1900.

Nuchatl. The principal village of the Nuchatlitz on Esperanza inlet, w. coast of Vancouver id.—Can. Ind. Aff., 264, 1902.

Nuchatlitz ('mountain house.'—Sproat) A Nootka tribe occupying the village of Nuchatl and others on Nuchatlitz and Esperanza inlets, w. coast of Vancouver id. Pop. 74 in 1902, 62, in 1904; 52 in 1906; 41 in 1911.

Neu-chad-lits.—Jewitt, Narr, 36, repr. 1849. Neu-chalits.—Armstrong, Oregon, 136, 1857. Neuchallet.—Mayne, Brit. Col., 251, 1862. Noochahlaht.—Sproat, Savage Life, 308, 1868. Nooch-aht-aht.—Can. Ind. Aff. 1894, 357, 1895. Nooch-ahtl-aht.—Ibid., 1896, 430, 1897. Nooch-alh-laht.—Ibid., 1883, 1884. Noocharti-aht.—Ibid., 1884, 276, 1895. Noochatl-aht.—Ibid., 52, 1875. Nutcā'dath.—Boas in 6th Rep. N. W. Tribes Can., 31, 1890.

Nudlung. A summer settlement of the Akudnirmiut Eskimo on Howe bay, Baffin island.

Noodlook.—McDonald, Discov. of Hogarth's Sd., 86, 1841. Nudlung.—Boas in 6th Rep. B. A. E., 441, 1888.

Nugumiut ('inhabitants of the cape'). An Eskimo tribe occupying the peninsula between Frobisher bay and Cumberland sd., Baffin island. Sealing on the floes with the harpoon killing walrus at the floe edge, and hunting deer in the summer are their occupations. Their permanant villages are Nugumiut, Operdniving, Tornait, Tuarpukdjuak, and Ukadlik. Other settlements are Akbirsiarbing, Ekaluin, Kassigiakdjuak, Kekertukjuag, Kodlimarn, and Nuvuktualung. Pop. about 80 in 1883.

New Gummi Łurk.—British Admiralty chart. Nugumeute.—Kumlien in Bull. Nat. Mus. no. 15, 15, 1879. Nugumiut.—Boas in 6th Rep. B. A. E., 422, 1888.

Nugumiut. A winter village of Nugumiut Eskimo at the entrance to Frobisher bay, Baffin island.—Boas in 6th Rep.B.A.E., map, 1888.

Nuhalk (Nuxa'lk.!). A Bellacoola division embracing the following 8 villages, at the mouth of Bellacoola r., Brit. Col.: Atlklaktl,

Komkutis, Osmakniketlp, Peisela, Sakta, Selkuta, Stskeitl, and Tkeiktskune, They include the Keltakkaua, Potlas, Siatlhelaak, Spukpukolemk, and Tokoais gentes.

Nuchalkm \(\chi'\).—Boas in Petermanns Mitt., pt. 5, 130, 1887 (-m\(\chi'\) = 'people'). Nuqa'lkn.—Boas in 7th Rep. N. W. Tribes Can., 3, 1891. Nuqa'lkmn.—Ibid. (-mH = 'people of'). Nuxa'lk'!.—Boas in Mem. Am. Mus. Nat. Hist., n, 49, 1898.

Nuiku (Nu'iku). A Bellacoola village at the head of South Bentinck arm, Brit. Col. It is one of the Talio towns.

Nū'ik'.—Boas in 7th Rep. N. W. Tribes Can., 3, 1891. Nū'iku.—Boas in Mem. Am. Mus. Nat. Hist., 11, 49, 1898.

Nukaakmats (Nuqā'axmats). A Bellacoola town on Bellacoola r., above Asenanc, Brit. Col

Nuk'à'aqmats.—Boas in 7th Rep. N. W. Tribes Can., 3, 1891. Nuqà'axmats.—Boas in Mem. Am. Mus. Nat. Hist., 11, 49, 1898.

Nukaatko (Nukaā'tko, Nukaā'tqo, or NEkaā'tko, 'one little water'). A village of the Spenec Bridge band of Ntlakyapamuk, on the N. side of Thompson r., 43 m. above Lytton, Brit. Col.—Teit in Mem. Am. Mus. Nat. Hist., n, 173, 1900.

Nukits (Nūk'ī'ts). A Bellacoola village on Bellacoola r., above Snutele, Brit. Col.

Nü'kmits.—Boas in 7th Rep. N. W. Tribes Can., 3, 1891. Nük'i'ts.—Boas in Mem. Am. Mus. Nat. Hist., 11, 49, 1900.

Nukitsomk ($Nu\chi its\bar{o}'m\chi$). A Wikeno village on Rivers inlet, Brit. Col.—Boas in Petermanns Mitt., pt. 5, 130, 1887.

Nuklako. A Hankutchin village of 82 inhabitants on Yukon r., near the mouth of Klondike r., s. E. of the boundary line between Alaska and British Columbia.

Fort Rellance.—Petroff in 10th Census, Alaska, map, 1884. Nu-kla-ko.—Schwatka, Rep. on Alaska, 86, 1885. Takon Indians.—Ibid., 84. Tchi-car-gut-ko-tan.—Ibid., 86 (Ingalik name).

Nulaautin. A sept of the Takulli living in the village of Nulkreh, on Noolki lake, Brit. Col.; pop. 56, in 1879.

Nalo-tin.—Brit. Col. map, 1872. Nool-kê-o-tîn.— Dawson in Rep. Can. Geol. Surv. 1879-80, 30B, 1881. Nulaantins.—Domenech, Deserts N. Am., n, 62, 1860. Nulaâutin.—Hafe, Etbnog. and Philol, 202, 1846. Stony Creek band.—Can. Ind. Aff., 214, 1902.

Nulkreh. The Nulaautin village on Noolki lake, s. of Nechako r., Brit. Col.—Morice in Trans. Roy. Soc. Can., x, 109, 1893.

Nun $(N\bar{u}n)$. The name of an ancestor of one of the Koskimo gentes, sometimes applied

to the gens itself.—Boas in Petermanns Mitt., pt. 5, 131, 1887.

Nunemasekalis (Nū'nEmEasqâlis, 'old from the beginning'). A gens of the Tlauitsis, a Kwakiutl tribe.

Nunemasek'à'lis.—Boas in 6th Rep. N. W. Tribes Can., 54, 1890. Nū'nemaseqâlis.—Boas in Rep. Nat. Mus. 1895, 330, 1897.

Nurata. A settlement of the Sikosuil-armiut, E. of King cape, Baffin island.—Boas in 6th Rep. B.A.E., 421, 1888.

Nusatsem (Nusā'tsEm). A Bellacoola settlement at the junction of Nusatsem and Bellacoola rs., Brit. Col.—Boas in Mem. Am. Mus. Nat. Hist., 11, 49, 1898.

Nuskek (Nusxē'q'). A Bellacoola town on North Bentinek arm, Brit. Col.—Boas in Mem. Am. Mus. Nat. Hist., n, 48, 1898.

Nusk 1st (Nūsq!E'lst). A Bellacoola village on Bellacoola r. above Tskoakkane, Brit, Col. The people of this place were subdivided into 3 gentes, 2 of which were called Tlakaumoot and Kookotlane.

Nü'sk'' Elst.—Boas in 7th Rep. N. W. Tribes Can., 3, 1891. Nusk'' E'Istemh.—Ibid. (-Emh='people'). Nüsq! E'Ist.—Boas in Mem. Am. Mus. Nat. Hist., 11, 49, 1898.

Nutlleik (Nullö'ix). A Bellacoola village on Bellacoola r., above Nuskelst, Brit. Col. Nullö'ix.—Boas in Mem. Am. Mus. Nat. Hist., п. 49, 1898. Nütllö'iq.—Boas in 7th Rep. N. W. Tribes

Nuvujalung. An autumn settlement of Talirpingmiut Okomiut Eskimo, on the s. w. shore of Cumberland sd., Baffin island.—Boas in 6th Rep. B. A. E., map, 1888.

Can, 3, 1891.

Nuvujen ('the capes'). An Okomiut Eskimo winter village of the Talirpingmiut on the w. shore of Cumberland sd.; pop. 26 in 1883

Newboyant.—Kumlien in Bull. Nat. Mus., no. 15, 15, 1879 Nuvujen.—Boas in 6th Rep. B. A. E., 426, 1885.

Nuvuktualung. A summer village of the Nugumiut Eskimo on Frobisher bay, s. E. Ballin island.—Boas in 6th Rep. B. A. E., map, 1888.

Nuvung. An Aivilirmiut Eskimo winter village on Melville penin., N. E. of the entrance to Lyons inlet, Franklin.

Noowook.—Lyons, Priv. Jnur., 345, 1824. Nuvuk.— Boas in Bull. Am. Mus. Nat. Hist., xv, 6, 1901. Nuvukdjuaq.—Boas in 6th Rep. B. A. E., map, 1888. Nuvung.—Ibid, 449. Nzatzahatko (N'zatzahatkō, 'elear water'). A village of the Ntlakyapamuk on Fraser r., Brit. Col., just below Cisco.—Hill-Tout in Rep. Ethnol. Surv. Can., 5, 1899.

Obidgewong. A Chippewa, and Ottawa settlement on the w. shore of lake Wolsey, Manitoulin id. lake Huron, Ontario, containing 17 inhabitants in 1884, but reduced to 7 in 1911. Their reserve consists of 800 acres. They cultivate the soil, are good bushmen, and in winter cut ties and posts and peel bark; also load vessels in summer.

Obidgewong.—Canadian official form, Wäbl'tigwäyäng.—Wm. Jones, inf'n, 1905 (correct name).

Occow, Okow. The yellow pike perch (Lucioperca americana) of the northern great lakes, mentioned by Riehardson in Franklin's Narrative (1823) and again in the Fauna Bor. Amer., II, 1836. The name has since been adopted in ichthyological works. It is from Cree okaw, cognate with Chippewa oka. (q. v.) (w. R. G.)

Odiserundy. A prominent warrior in the Revolution, often called John the Mohawk, and in chief command of a war party in 1777. The name is now written Descronto, 'the lightning has struck.' In the New York State Library at Albany is a letter from John Descrontyon, dated Bay of Quinte, Nov., 1796. where he headed a band of Mohawk. He was present at a treaty with the United States after the Revolution. Descronto, Ont., bears his name. (w. m. b.)

Oealitk (O'čalitx). A sept of the Bellabella, a Kwakiutl tribe inhabiting the s. shore of Milbanke sd., Brit. Col.

O'ēalita.—Boas in 6th Rep. N. W. Tribes Can., 52, 1890. O'ealitx.—Boas in Rep. Nat. Mus. 1895, 328, 1897. Onie-le-toch.—Kane, Wand. in N. A., app., 1859. Owia-lei-toh.—Tolmie and Dawson, Vocabs. Brit. Col., 1179, 1884. Oyelloightuk.—Brit. Col. map, Ind. Aff., Victoria, 1872.

Oetlitk (Oē' Litx). A sept of the Bellabella, which, according to Tolmie and Dawson, oecupied the middle section of Milbanke sd.,. British Columbia.

Oē'Litx.—Boas in Rep. Nat. Mns. 1895, 328, 1897. Oē'tlitq.—Boas in 6th Rep. N. W. Tribes Can, 52. 1890. Okatlituk.—Brit. Col map, Ind Aff., Victoris. 1872. Owit-lel-toh.—Tolmie and Dawson, Vocahs-Brit. Col, 1178, 1884. Weetle-toch.—Kane, Wand in N. A, app, 1859. Weitle toch.—Schoolcraft, Ind Tribes, v. 487, 1855.

Ohamil. A Cowichan tribe on the s. side of lower Fraser r., Brit. Col., just below Hope; pop. 53 in 1911.

Ohamiel.—Cap. Ind. Aff., 78, 1878. Ohamil.—Ibid., pt. 11, 160, 1901. O'Hamil.—Ibid., 309, 1879. Ohamille.—Ibid., 1889, pt. 1, 268, 1890. Omail.—Brit. Col. map, Ind. Aff., Victoria, 1872 (given as the name of a town).

Oherokouaehronon ('people of the grass eountry.'—Hewitt. An unidentified tribe mentioned with many others in a list of peoples dwelling above Sault St. Louis (Lachine raps.) St. Lawrence r. in 1640 (Jes. Rel. 1640, 35, 1858). The list is imperfect, containing duplicate names given as separate tribes.

Ohrante. A Mohawk warrior in 1776, called Oteroughyanento when he and Joseph Brant met Lord Germain in London, Mar. 14 of the year named. He seems to be the Aruntes whose name appears on one of the Montreal medals, several of which have been connected with Indians of that period. (W. M. B.)

Oiaht. A Nootka tribe on Barkley sd., w. coast of Vancouver id., Brit. Col. Ahadzooas is their principal village. Pop. 159 in 1902, 145 in 1906; 131 in 1911.

Hô'aiath.—Boas in 6th Rep. N. W. Tribes Cau, 3I. 1890. Ohey-aht.—Can. Ind. Aff. 1880, 315, 188I. Ohiat.—Mayne, Brt. Col., 251, 186I. Ohyaht.—Sproat, Savage Life, 308, 186s. Ohyats.—Mayne, opcit., 270. Oiaht.—Can. Ind. Aff. 1883, 188, 1884 Oiatuch.—Grant in Jour. Roy. Geog. Soc., 293, 1857. Oyty-aht.—Brit. Col. Map, Ind. Aff. Victoria, 1872.

Ojeejok (*Uchīchak*, 'erane'). A gens of the Chippewa.

Ad-je-jawk.—Tanoer, Narr, 315, 1830. Attochingochronon.—Jes. Rel. 1640, 35, 1858 (Huron name). Aud-je-jauk.—Ramsey in U. S. Ind. Aff. Rep., 91, 1850. O-jee-jok'.—Morgan, Anc. Soc., 166, 1877. Uj-e-jauk.—Warren in Minn. Hist. Soc. Coll., v, 44, 1885. Utcitcāk.—Wm. Jones, inf'n, 1906 (proper form; te=ch).

Oka. A modern village of Iroquois, Nipissing, and Algonkin, on lake of Two Mountains, Ottawa r., near Montreal. Cuoq says oka is the Algonkin name for goldfish or pickerel (see Occow). The Iroquois name, Kunesatake, signifies 'on the hillside,' from oucsata 'slope or mountain side,' kc 'at or on.'

The village was settled in 1720 by Catholic Iroquois, who were previously at the Sault au Récollet, and who numbered about 900 at the time of removal. Soon after they were joined by some Nipissing and Algonkin, who removed from a mission on isle aux Tourtres, the latter place being then abandoned. The two bodies occupy different portions of the village separated by the church, the Iroquois using the corrupted Mohawk language, while the others speak Algonquian. The total number

of both was 375 in 1884, and 501 (434 Iroquois, 67 Algonkin) in 1911. In 1881 a part of them removed to Watha (Gibson), Ontario, where they are now established, numbering 130, making the total number at both settlements about 630. For an account of these Indians see Life of Rev. Amand Parent, Toronto, 1886, in which the religious troubles are related from a Protestant point of view.

(J. M. J. N. B. H.)

Canaghsadagaes.—Johnson (1767) in N. Y. Doc. Col. Hist., vii, 958, 1856. Canasadagas.-Johnson 1763), ibid., 582 Canasadauga.—Eastburn (1758) quoted by Drake, Trag. Wild., 283, 1841. Okak. A Moravian Eskimo mission on an island in Okak bay, coast of Labrador, established in 1776. The first Christian Eskimo eonvert in Labrador was baptized here in the same year. In 1851 the natives of the vicinity suffered severely from famine. It is still a flourishing station and the seat of an orphan asylum.

Okak.—Thompson, Moravian Miss, 229, 1890. Okkak.—Hind, Labrador Penin., n, 199, 1863. O'Knk.— McLean, Hudson Bay, n, 157, 1849.

Okanagan Lake. The local name for a body of Okinagan on the w. shore of Okanagan lake in s. w. British Columbia; pop. 37 in 1901, the last time the name appears.

Helowna.—Can. Ind. Aff., pt. 11, 166, 1901. Kelowna.—Name of town.

Oke. The principal village of the Ehatisaht (q. v.), on Esperanza inlet, w. coast of Vaneouver id., Brit. Col.—Can. Ind. Aff., 264, 1902.

Okinagan (etymology doubtful). A name originally applied to the confluence of Similkameen and Okanagan rs., but extended first to include a small band and afterward to a large and important division of the Salishan family. They formerly inhabited the w. side of Okanagan r., Wash., from old Ft. Okanagan to the Canadian border, and, in British Columbia, the shores of Okanagan lake and the surrounding country. Later they displaced an Athapascan tribe from the valley of the Similkameen. In 1906 there were 527 Okinagan on Colville res., Wash., and \$24* under the Kamloops-Okanagan agency, British Columbia; total, 1,351. Gibbs in 1855 gave the following list of Okinagan bands on Okanagan r.: Tkwuratum, Konckonep, Kluckhaitkwu, Kinakanes, and Milakitekwa. The Kinakanes appear to be the Okinagan proper. He also classed the Sanpoil with them, but says "these are also claimed by the Spokans," and in fact they are still oftener placed by themselves. To Gibbs' list should be added the Intietook band of Ross. The following villages or bands are enumerated in the Canadian Reports of Indian Affairs: Ashnola, Chuchuwayha, Keremeos, Nkamaplix, Nkamip, Okanagan Lake, Penticton, Shennosquankin, and Spahamin. Teit gives four others: Kedlamik, Komkonatko, Ntlkius, and Zutsemin. Dawson adds Whatlminek.

Känk"utlä'atlam.-Boas in 5th Rep. N. W. Tribes Can., 10, 1889 ('flatheads': Kutenai name). Kinakanes.-Gibbs in Pac. R. R. Rep., 1, 412, 1855. Kökenū'k'kē.-Chamberlain in 8th Rep. N. W. Can., sec. 11, 7, 1891 (own name), Soo-wan'-a-mooh. - Dawson, ibid., 5 (Shuswap name). Su-a-na-muh.—Mackay quoted by Dawson, ibid Tcitqua'ut .- Boas in 5th Rep. N. W. Tribes Can, 10, 1889 (Ntlakyapamuk name). U-ka-nakane.-Markay quoted by Dawson, op. cit., 6.

Okomiut ('people of the lee side'). An Eskimo tribe dwelling on Cumberland sd., Baffin island. They embrace the Talirpingmiut, Kinguamiut, Kingnaitmiut, and Saumingmiut. When whalers first visited them, about 1850, the population amounted to 1,500, but it was reduced to 245 in 1883. Their villages and settlements are: Anarnitung, Aukardneling, Ekaluakdjuin, Ekaluin, Ekalukdjuak, Idjorituaktuin, Igpirto, Imigen, Kangertloa-

^{*}In 1911, there were 795 Indians under the Okanagan agency.

ping, Kangertlung, Kangertlukdjuaq, Karmang, Karsukan, Karusuit, Katernuna, Kekertaujang, Kekerten, Kimissing, Kingaseareang, Kingua, Kitingujang, Kordlubing, Koukdjuaq, Naujateling, Nedlung, Niantilik, Nirdlirn, Niutang, Nuvujalung, Nuvujen, Pujetung, Sakiakdjung, Saunutung, Tikerakdjung, Tuakdjuak, Tupirbikdjuin, Ugjuktung, Ukiadliving, Umanaktuak, and Utikimiting.

Oqomiut.—Boas in 6th Rep. B. A. E., 424, 1888. Oχomiur.—Boas in Petermanns Mitt., no. 80, 69, 1885.

Okpaak. A Malecite village on middle St. John r., N. B., in 1769.

Ocpack.—La Tour, map, 1784. Okpaak.—Wood (1769) quoted by Hawkins, Miss., 361, 1845. Ougpauk.—Jefferys, Fr. Doms., pt. 1, map, 119, 1761.

Omamiwininiwak ('people of lower part of the river'). The Nipissing name for the Algonkin, properly so called, survivors of whom still live at Bécancour and at Three Rivers, Quebec.—Cuoq, Lexique Algonquine, 193, 1886.

Omanitsenok (Omanits'čnôx, 'the people of Ómanis,' a place on Klaskino inlet, Brit. Col.). A gens of the Klaskino, a Kwakiutl tribe.—Boas in Rep. Nat. Mus. 1895, 329, 1897.

Omatl (Omatl). The name of an ancestor of a Tlatlasikoala gens, sometimes applied to the gens itself.—Boas in Petermanns Mitt., pt. 5, 131, 1887.

Omegeeze (Migĭzĭ 'bald eagle'). A gens of the Chippewa.

Me-giz-ze.—Tanner, Narr., 314, 1830. Me-gizzee.—Warren in Minn. Hist. Soc. Coll., v, 44, 1885. Mi's gisl.—Gatschet, Ojibwa M8, B. A. F., 1882. Migizi.—Wm. Jones, inf'n, 1907 (correct form). O-me-gee-ze'.—Morgan, Anc. Soc., 166, 1877.

Ommunise (Omŭnĭse, 'he gathers fire-wood.'—W. J.). A Chippewa or Ottawa band formerly living on Carp r., Mich.; also a place between lake of the Woods and Winnipeg, so called because of the searcity of wood.

Carp River band.—Smith in U. S. Ind. Aff. Rep., 53, 1851. Omanisē.—Wm. Jones, inf'n, 1905 (correct form). Ommunise.—Smith, op. cit.

Onasakenrat ('White Feather') Joseph. A Mohawk chief, noted for his translations of religious works into his native language. He was born on his father's farm, near Oka, Quebec, Sept. 4, 1845; at 14 years of age he was sent to Montreal College to be educated for the priesthood, remaining there about 4 years. He was afterward converted to Protestantism and became an evangelical preacher.

On June 15, 1877, the Catholic church of Oka was burned, and Chief Joseph was tried for the offence, but was not convicted. He died suddenly, Feb. 8, 1881, at Caughnawaga. Among his translations into the Mohawk dialect are the Gospels (1880) and a volume of hymns. At the time of his death he was engaged in translating the remainder of the Bible, having reached in the work the Epistles to the Hebrews.

Ondatra. A name for the muskrat (Fiber zibethicus), derived from one of the Huron dialects of the Iroquoian language early current in the Hochelaga region of Canada. A more common name is musquash, of Algonquian origin.

(A. F. C.)

Ondoutaouaka. An Algonquian tribe or division, probably a part of the Montagnais, living in 1644 about 100 leagues above "Saguené," (Saguenay), Quebec.

Ondoutaoüaheronnon.—Jes. Rel. 1644, 99, 1858. Ondoutaouaka.—Ibid., 1641, 10, 1858.

Oneida (Anglieized compressed form of the common Iroquois term tiioněñ'iote', 'there it it-rock has-set-up (continuative),' i. e. a rock that something set up and is still standing, referring to a large syenite boulder near the site of one of their ancient villages). A tribe of the Iroquois confederation, formerly occupying the country s. of Oneida lake, Oneida co., N. Y., and latterly including the upper waters of the Susquehanna. According to authentic tradition, the Oneida were the second tribe to accept the proposition of Dekanawida and Hiawatha to form a defensive and offensive league of all the tribes of men for the promotion of mutual welfare and security. In the federal council and in other federal assemblies they have the right to representation by 9 federal chieftains of the highest rank. Like the Mohawk, the Oneida have only 3 clans, the Turtle, the Wolf, and the Bear, each clan being represented by 3 of the 9 federal representatives of this tribe (see Clan and Gens). In so far as eldership as a member of a clan phratry can give precedence in roll-call and the right to discuss first in order all matters coming before its side of the council fire, the Oneida are the dominant tribe within the tribal phratry called the Four (originally Two) Brothers and "Offspring," to which they belong. In tribal assemblies the Turtle and the Wolf constitute a clan phratry, and the Bear another. Oneida have usually been a conservative people in their dealing with their allies and with other peoples. In 1635 they, with the Onondaga, Cayuga, and Mohawk, songht to become parties to the peace concluded in the preceding year between the Seneca and the Hurons. At this period they were called sedentary and very populous, but only from Indian reports.

The Jesuit Relation for 1646 (p. 3, 1858) says that, with the exception of the Mohawk, there was no treaty, properly speaking, then in existence between the Iroquois tribes inclusive of the Oneida and the French. From the same Relation it is learned that "Onnieoute" (Oneniote), the principal Oneida village of that time, having lost the greater portion of its men in a war with the "upper Algonquin," was compelled to request the Mohawk to lend aid in repeopling the village by granting thereto a colony of men, and that it was for this reason that the Mohawk ceremonially and publicly eall the Oneida their daughter or son. This story is probably due to a miseonception of the fictitious political kinships and relationships established between the several tribes at the time of the institution and organization of the League (see Confederation). The Cayuga and the Tuscarora are likewise called "Offspring," but not for the reason above given. The Jesuit Relation for 1648 (p. 46) first definitely describes the Oneida. From the Relation for 1641 (p. 74) it is gathered that the Jesuit fathers had learned that the Oneida had a peculiar form of government in which the rulership alternated between the two sexes. This statement is likewise apparently due to a misconception of the fact that among Iroquois tribes the titles to the chiefships belonged to the women of certain clans in the tribe and not to the men, although men were chosen by the women to exercise the rights and privileges and to perform the duties pertaining to these chiefships, and that there were, and indeed still are, a number of women filling federal chiefships bearing the name of the highest class. These women chieftains have approximately the same rights, privileges, and immunities as the men chiefs, but exercise them fully only in emergencies; they, too, maintain the institutions of society and government among the women.

The Jesuit Relation for 1667 (LII, 145, 1899) declares that the Oneida were at that time the least tractable of the Iroquois tribes. It was at this period that Father Bruyas was stationed at the mission of St. François-Xavier among the Oneida. It is also learned from this source that the Mohegan and the Conestoga menaced

the Oneida, While on this mission Father Bruyas suffered for food for a part of the year and was compelled to sustain life on a diet of dried frogs. By the end of the year 1669 he had baptized 30 persons. In 1660 the Oneida with the Mohawk were the least populous of the Iroquois tribes. The Jesuit Relation for 1669-70 speaks of the Oneida being present at a "feast of the dead" held at the Mohawk village of Caughnawaga, showing that in a modified form at least the decennial eeremony of the so-called "Dead Feast" was practised among the Iroquois when first known. On Jan. 30, 1671, the Oneida began the torture of a captive Conestoga woman, and the torture was prolonged through 2 days and 2 nights because he in whose stead she had been given was burned at Conestoga for that length of time. It is held by some that the town defended by four lines of palisades closely fastened together and attacked by Champlain in 1615 with his Huron and Algonquian allies, was an Oneida village, although other authorities place it elsewhere, in Onondaga territory. In fact, the wars of the Oneida were those of the League, although like the other tribes they seem to have put forth most energy against the tribes who in some manner had given them the greatest offence. The Catawba and the Muskhogean tribes, as well as the Susquehanna river Indians, the Conestoga, gave most occupation to the Oncida warriors.

After the conquest of the tribes on the Susquehanna and its tributaries and those on the Potomac, chiefly by the warriors of the Oneida, the Cayuga, and the Seneca, and those tribes which had submitted to Iroquois rule, a question arose as to the propriety of the Mohawk, who had not given any aid in subduing these peoples, sharing in the income arising from land sales there. Hence for a time the Mohawk received no emolument from this source, until the Iroquois tribes became divided and the Mohawk sold the lands in the Wyoming Valley region of Pennsylvania to the Susquehanna Land Co. of Connecticut. This, then, in 1728, moved the great federal council of the league at Onondaga to send Shikellamy, an Oneida chief, as a superintendent, to the forks of the Susquehanna for the purpose of watching over the affairs and the interests of the Six Nations of Iroquois in Pennsylvania. At first Shikellamy exercised a general supervision over the Shawnee and the Delawares, who thereafter were required to consult him in all matters arising between them and the pro-

prietary government. So well did he perform his duty that in 1745, Shikellamy was made full superintendent over all the dependent tribes on the Susquehanna, with his residence at Shamokin. He showed great astuteness in the management of the affairs intrusted to his care, seeking at all times to promote the interests of his people. Such was the influence which the Oneida exercised on the Susquehanna.

In 1687 the Oneida were included in the warrant of the King of Great Britain to Gov. Dongan of New York, authorizing him to protect the Five Nations as subjects of Great Britain. In 1696 Count Frontenae burned the Oneida eastle, destroyed all their corn, and made prisoners of 30 men, women and children.

In 1645–46 the Oneida were at war with the Nipissing, and one band of 17 warriors from "Ononiiote" defeated an Algonkin party under Teswehat, the one-eyed chief of this people, killing the chief's son and taking 2 women prisoners. This Iroquois party was afterward defeated by 30 Hurons and the 2 women were recaptured.

In the Jesuit Relation for 1666-68 Father Bruyas writes that the Oneida were reputed the most cruel of all the Iroquois tribes; that they had always made war on the Algonkin and the Hurons, and that two-thirds of the population of their villages was composed of the people of these two tribes who had become Iroquois in temper and inclination. This missionary adds that the nature of the Oneida was then altogether barbarous, being cruel, sly, cunning, and prone to bloodshed and carnage.

In 1655 a party of 60 Oneida warriors was sent against the Amikwa, or Beaver Indians. This war was still in progress in 1661, for in that year, 2 bands, one of 24 and the other of 30 warriors, were encountered on their way to fight the Amikwa.

Chauchetière (letter in Jesuit Relations. Thwaites ed., LXII, 185, 1900) says that "war is blazing in the country of the Outaouaks," that the Iroquois, especially the Oneida, continued their hatred of the Outagami (Foxes) and the Illinois, and so have slain and captured many Illinois. In 1681 they killed or captured about 1,000 of these unfortunate people.

In 1711, about half of the Tuscarora tribe, then dwelling in North Carolina, seems to have conspired with several alien neighbouring tribes and bands to destroy the Carolina settlers. The colonists, however, recollecting the ancient feud between the Southern and the Northern Indians, allied themselves with the Catawba and some Muskhogean tribes. The Tuscarora, sustaining several severe defeats, were finally driven from their homes and hunting grounds. This act of the Southern Indians made the hatred of the Iroquois against the Catawba more bitter and merciles.

The Oneida were at times friendly to the French and to the Jesuit missionaries, while the other Iroquois were their determined enemies. A great part of the Oneida and the Tuscarora, through the influence of Rev. Samuel Kirkland, remained neutral in the Revolutionary war, while the majority of the confederation of the Iroquois were divided and did not act as a unit in this matter. Early in that struggle the hostile Iroquois tribes attacked the Oneida and burned one of their villages, forcing them to take refuge near the Americans in the vicinity of Scheneetady, where they remained until the close of the war. Shortly after the main body of the tribe returned to their former homes. At a later period a considerable number emigrated to Canada and settled on Grand r. and Thames r., Ontario. Another small band, ealled Oriskas, formed a new settlement at Ganowarohare, a few miles from the main body in Oneida co., N. Y. At different earlier periods the Oneida adopted and gave lands to the Tuscarora, the Stockbridges, and the Brothertons. The Tuscarora afterward removed to land granted by the Seneca in w. New York. In 1846, having sold most of their lands in New York, the greater part of the Oneida, together with their last two adopted tribes, removed to a tract on Green bay, Wis., where they now reside. Among those living in New York at the time of removal were two parties known respectively as the First Christian, and the Second Christian or Orchard party.

The Oneida entered into treaties with the United States at Ft. Stanwix, N. Y., Oct. 22, 1784; Ft. Harmar, O., Jan. 9, 1789; Canandaigua, N. Y., Nov. 11, 1794; Oneida, N. Y., Dec. 2, 1794; Buffalo Creek, N. Y., Jan. 15, 1838; and Washington, D. C., Feb. 3, 1838. They also held no fewer than 30 treaties with the State of New York between the years 1788 and 1842.

The estimates of Oneida population at different periods are no more satisfactory than those relating to the other Iroquois tribes. The earliest account (1660) gives them 500. They are placed at 1,000 in 1677 and 1721. In 1770 they were estimated at 410, in 1776 at 628, and in 1795 at 660, and were said to have been decreasing for a long time. They number at present (1906) about 3,580, of whom 286 are still in New York, 2,151 under the Oneida School Superintendency in Wisconsin, 783* on Thames r., Ontario, besides those settled among the other Iroquois on Grand r., Ontario, † There are no means of learning the number of Oneida who joined the several colonies of Catholic Iroquois.

The Oneida towns, so far as known, were: Awegen, Brothertown, Cahunghage, Canowdowsa, Cowassalon, Chittenango, Ganadoga, Hostayuntwa, Oneida, Opolopong, Oriska, Ossewingo, Ostogeron, Schoherage, Sevege, Solocka, Stockbridge, Tegasoke, Teseroken, Teiosweken, and Tkanetota. Oneidas of the Thames. A body of Oneida, numbering 777 in 1911, residing on a reservation of 5,271 acres on Thames r., in Delaware tp., Middlesex co., near Strathroy, Ontario. Their principal occupation is day labour, and a few of them are good farmers. They are industrious and law-abiding, and while some of them are progressing well, on the whole their progress is slow.

Onentisati. A Huron village in Tiny tp., Simcoe co., Ontario, first mentioned in 1635. (w. m. b.)

Onentisati.—Jes. Rel. 1635, 39, 1858. Onnentissati.—Ibid.

Oneronon. An unidentified tribe living s. of St. Lawrence r. in 1640.—Jes. Rel. 1640, 35, 1858.

Ongniaahra ('bisected bottomland'). A village of the Neutrals, situated in 1626-50 on Niagara r., one day's journey from the Seneca. This is the French spelling of the ancient Huron pronunciation of the name, which, written by English writers from Iroquois utterance, has become "Niagara" (q.v.).

(J. N. B. H.)

Ongmarahronon.—Jes. Rel. 1640, 35, 1858 (m misprint for ni; name of the people). Onguiaahra.—Jes. Rel. 1641, 75, 1858 (u misprint for ni). Ouaroronon.—Deb. la Roche Dallion in Sagard, Hist du Canada, 111, 804, 1866 (u misprint for n, and second o for a).

Onismah. A settlement in port San Juan, s. w. coast of Vancouver id., Brit. Col., probably inhabited by the Pacheenaht.—Brit. and U. S. Survey Map, 1882.

Ononchataronon (Huron name). An Algonkin tribe or band that occupied the district near Montreal,, between St. Law-

rence and Ottawa rs., and wintered near the Hurons. In 1642 they were but a remnant. They elaimed to have been the original occupants of Montreal id. and of a large territory on both sides of the St. Lawrence. They said they had been conquered and dispersed by the Hurons, who were then their enemies, and that the survivors of the war had taken refuge with the Abnaki or the Iroquois or had joined the Hurons. Hochelaga, the village found on the island by Cartier in 1535, was occupied by an Iroquoian tribe, but, according to Gatschet, the remains of a second village about 2 m. from its site have been discovered. This would clear the confusion as to the stock of the former occupants of the island. Shea suggests that the names Huron and Iroquois have been transposed, which is likely. Charlevoix says that there was a tradition that the Ononchataronon were at one time at war with the Algonkin, and that they were drawn into an ambuscade and entirely destroyed. He adds that at the time of his visit (1721) they had ceased to exist. This tradition, however, seems doubtful. According to the Jesuit Relations, at the general peace of 1646 the French induced the Ononchataronon to settle again on the island, but they soon scattered on account of the Iroquois. It seems they were met with as early as 1609 by Champlain, as Iroquet, one of their chiefs, was with him at this time. The missionaries described them as arrogant, given to superstition and debauchery, and very cruel. (J. M.)

Nation d'Iroquet.—Jes. Rel. 1633, 29, 1858. Onnon-charonnons.—Jefferys, Fr. Dom. Am., pt. 1, 9, 1761. Onnontcharonnons.—Charlevoix, Jour. Voy., 1, 174, 1761. Onontchataranons.—Jes. Tribes, III, 81, 1854. Ounountchatarounongak.—Jes. Rel. 1658, 1858. Ountchatarounounga.—Jes. Rel. 1640, 34, 1858. Yroquet.—Champlain (1615), Œuvres, IV, 56, 1858.

Onondaga (Onoñtà''ge', 'on, or on top of, the hill or mountain'). An important tribe of the Iroquois confederation, formerly living on the mountain, lake, and creek bearing their name, in the present Onondaga co., N.Y., and extending northward to lake Ontario and southward perhaps to the waters of the Susquehanna. In the Iroquois councils they are known as Hodiseñnageta, 'they (are) the name bearers.' Their principal village, also the capital of the confederation, was called Onondaga, later Onondaga Castle; it was situated from before

1654 to 1681 on Indian hill, in the present town of Pompey, and in 1677 contained 140 cabins. It was removed to Butternut er., where the fort was burned in 1696. In 1720 it was again removed to Onondaga cr., and their present reserve is in that valley, a few miles s. of the lake (Beauchamp, inf'n, 1907).

The Onondaga of Six Nations res., Canada, have 9 clans, namely: Wolf, Tortoise (Turtle?), Bear, Deer, Eel, Beaver, Ball, Plover (Snipe?), and Pigeon-hawk. The Wolf, Bear, Ployer, Ball, and Pigeon-hawk clans have each only one federal chiefship; the Beaver, Tortoise, and Ecl clans have each two federal chiefships, while the Deer clan has three. The reason for this marked difference in the quotas of chiefships for the several clans is not definitely known, but it may be due to the adoption of groups of persons who already possessed chiefship titles. In federal ceremonial and social assemblies the Onondaga by right of membership therein take their places with the tribal phratry of the "Three Brothers," of which the Mohawk and the Sencea are the other two members; but in federal councilsthose in which sit the federal representatives of all the five (latterly six) Iroquois tribes—the Onondaga tribe itself constitutes a tribal phratry, while the Mohawk and the Seneca together form a second, and the Oneida and the Cavuga originally, and, latterly, the Tusearora, a third tribal phratry. The federal council is organized on the basis of these three tribal phratries. The functions of the Onondaga phratry are in many respects similar to those of a judge holding court with a jury. The question before the council is discussed respectively by the Mohawk and Seneca tribes on the one side, and then by the Oneida, the Cavuga, and, latterly, the Tuscarora tribes on the other, within their own phratries. When these two phratries have independently reached the same or a differing opinion, it is then submitted to the Onondaga phratry for confirmation or rejection. The confirmation of a common opinion or of one of two differing opinions makes that the decree of the council. In refusing to confirm an opinion the Onondaga must show that it is in conflict with established custom or with public policy; when two differing opinions are rejected the Onondaga may suggest to the two phratries a course by which they may be able to reach a common opinion; but the Onondaga may confirm one of two differing opinions submitted to it. Each chieftain has the right to discuss and argue the

question before the council either for or agains tits adoption by the council, in a speech or speeches addressed to the entire body of councillors and to the public.

Champlain related that in 1622 the Montagnais, the Etchemin, and the Hurons had been engaged for a long time in seeking to bring about peace between themselves and the Iroquois, but that up to that time there was always some serious obstacle to the consummation of an agreement on account of the fixed distrust which each side had of the faith of the other. Many times did they ask Champlain himself to aid them in making a firm and durable peace. They informed him that they understood by making a treaty that the interview of the ambassadors must be amicable, the one side accepting the words and faith of the other not to harm or prevent them from hunting throughout the country, and they on their side agreeing to act in like manner toward their enemies, in this ease the Iroquois, and that they had no other agreements or compacts precedent to the making of a firm peace. They importuned Champlain many times to give them his advice in this matter, which they promised faithfully to follow. They assured him that they were then exhausted and weary of the wars which they had waged against each other for more than fifty years, and that, on account of their burning desire for revenge for the murder of their kin and friends, their ancestors had never before thought of peace. In this last statement is probably found approximately the epoch of that historic feud mentioned in the Jesuit Relation for 1660 (chap. II) and by Nieholas Perrot, which made the Iroquois tribes, on the one hand, and the Algonkin on the Ottawa and St. Lawrence rs., on the other, inveterate enemies, although this may have been but a renewal and widening of a still earlier quarrel. In 1535 Cartier learned from the Iroquoian tribes on the St. Lawrence that they were continually tormented by enemies dwelling to the southward, called Toudamani (probably identical with Tsonnontouan, or Seneca, a name then meaning 'Upper Iroquois'), who continually waged war on them.

In Sept. 1655 the Onondaga sent a delegation of 18 persons to Quebec to confer with Governor de Lauzon and with the Algonkin and Hurons. The Onondaga spokesman used 24 wampum belts in his address; the first 8 were presents to the Hurons and the Algonkin, whose leading chiefs were there; each present had its own particular name. The Onondaga

professed to speak for the "four upper Iroquois nations," namely, the Seneca, Cayuga, Oneida, and Onondaga, thus leaving only the Mohawk, the "lower Iroquois," from this peace conference, but the Onondaga speaker promised to persuade the Mohawk to change their minds and to make peace. The Onondaga asked for priests to dwell among them and for French soldiers to aid them in their war against the Erie.

In May 1657, 10 years after the dispersion of the Hurons from their motherland, the Onondaga sought by the giving of numerous presents and by covert threats of war to persuade the Hurons who had fled to the vicinity of Quebec to remove to their country and to form with them a single people. The Mohawk and the Seneca also were engaged in this business. Finally, the Hurons were forced to submit to the persistent demands of the Iroquois tribes.

In 1686 the Onondaga were at war against the Cherermons (Shawnee?). They were divided into two bands, one of 50 and another of 250, 50 of the latter being from other tribes. But in 1688 the Onondaga were much under French influence and were regarded as the chief among the Iroquois tribes.

In 1682, at Albany, the Onondaga, with the Mohawk, the Oneida, the Cayuga, and the Seneca, entered into a treaty of peace with the commissioners from the colony of Maryland, who contracted not only for the white settlers, but also for the Piscataway Indians.

With the exception of a part of the Seneca, the Onondaga were the last of the five tribes originally forming the League of the Iroquois to accept fully the principles of the universal peace proposed by Dekanawida and Hiawatha.

Early in 1647 a band of Onondaga on approaching the Huron country was defeated by a troop of Huron warriors, the Onondaga chief being killed and a number taken prisoners. Among the latter was Annenraes, a man of eharaeter and authority among the Onondaga. In the following spring he learned that some of the Hurons who had been bitterly disappointed because his life had been spared intended to kill him. To some of his Huron friends he related what he had heard, and that he intended to escape to his own country. His resolution, with the reason for making it, having been reported to the leading Huron chiefs of the council, they concluded to aid him in his purpose, trusting that he would render them some valuable service in return. Giving him

some presents and provisions, they sent him off secretly at night. Crossing lake Ontario, he unexpectedly encountered 300 Onondaga making canoes to cross the lake for the purpose of avenging his death (believing he had been killed by the Hurons), and awaiting the arrival of 800 Seneca and Cayuga reinforcements. His countrymen regarded Annenraes as one risen from the dead. He so conducted himself that he persuaded the 300 Onondaga to give up all thought of war for that of peace, whereupon the band, without waiting for the expected reinforcements, returned to Onondaga, where a tribal council was held, in which it was resolved to send an embassy with presents to the Hurons for the purpose of commencing negotiations for peace. The chief of this embassy was by birth a Huron named Soionés. so naturalized in the country of his adoption that it was said of him that "no Iroquois had done more massacres in these countries, nor blows more wicked than he." He was accompanied by three other Hurons, who had not long been captives at Onondaga. The embassy arrived at St. Ignace July 9, 1647, finding the Hurons divided as to the expediency of acquiescing in the Onondaga proposals, the Bear tribe of the Hurons justly fearing the duplicity of the enemy even though bearing presents. But the Rock tribe and many villages desired the conclusion of peace in the hope that a number of their kin, then captive at Onondaga, would be returned to them. After many councils and conferences it was found expedient to send an embassy to Onondaga in order the better to fathom this matter. For presents the Hurons took valuable furs, while the Iroquois Onondaga used belts of wampum. The Huron embassy was well received at Onondaga, where a month was spent in holding councils. Finally the Onondaga resolved to send back a second embassy. headed by Skanawati (Scandaouati), a federal chieftain, 60 years of age, who was to be accompanied by two other Onondaga and by 15 Huron captives. One of the Huron embassy remained as a hostage. This embassy was 30 days on the way, although it was in fact only 10 days' journey. Jean Baptiste, the returning Huron delegate, brought back 7 wampum belts of the largest kind, each composed of 3,000 or 4,000 beads. By these belts the Onondaga sought to confirm the peace, assuring the Hurons that they could hope for the deliverance of at least 100 more of their captive kin. The Onondaga desired this peace not only

because the life of Annenraes had been spared but also because they were jealous lest the Mohawk, who had become insolent from their victories and were overbearing even to their allies, might become too much so should the Hurons fail to unite all their forces against them, and further because of fear of the power of the Conestoga. In this Onondaga project of peace the Cayuga and Oneida showed favourable interest, but the Seneca would not listen to it, and the Mohawk were still more averse to it as they were jealous of what had been done by the Onondaga. Hence these last two tribes sent forces to assail the village of St. Ignace at the end of the winter of 1647-48. The following incidents show the character of some of the chief men and statesmen of the Onondaga:

Early in Jan. 1648 the Hurons decided to send another embassy to Onondaga. They sent 6 men, accompanied by one of the 3 Onondaga ambassadors then in their country, the other two, including Skanawati, the head of the Onondaga embassy, remaining as hostages. But, unfortunately, the new Huron embassy was captured and killed by a force of 100 Mohawk and Seneca who had come to the borders of the Huron country. The Onondaga accompanying this embassy was spared, and two Hurons escaped. Early in April, when the distressing news reached the ears of Skanawati, the proud Onondaga ambassador remaining with the Hurons as a hostage, he suddenly disappeared. The Hurons believed that he had stolen away, but, a few days after his disappearance, his corpse was found in the forest lying on a bed of fir branches, where he had taken his own life by cutting his throat. His companion, who was notified in order to exonerate the Hurons, said that the cause of his despair was the shame he felt at the contempt shown for the sacredness of his person by the Seneea and the Mohawk in going to the Huron country and massacring the Huron people while his life was in pledge for the keeping of the faith of his people. Of such men was the great federal council of the Iroquois composed.

The Onondaga had good reason for fearing the Conestoga, for the Jesuit Relation for 1647-48 states that in a single village of the latter people there were at that time 1,300 men capable of bearing arms, indicating for this village alone a population of more than 4,500.

At this time the Conestoga chiefs, through two messengers, informed the Hurons that if

they felt too weak to defend themselves they should send the Conestoga word by an embassy. The Hurons eagerly seized this opportunity by sending on this mission 4 Christian Indians and 4 "infidels," headed by one Charles Ondaaiondiont. They arrived at Conestoga early in June 1647. The Huron deputies informed their Conestoga friends that they had come from a land of souls, where war and the fear of their enemies had spread desolation everywhere, where the fields were covered with blood and the lodges were filled with corpses, and they themselves had only life enough left to enable them to come to ask their friends to save their country, which was drawing rapidly toward its end. This spirited but laconic address moved the Conestoga to send an embassy into the Iroquois country to urge on the Iroquois the advantage of making a lasting peace with their Huron adversaries. Jean Baptiste, a Huron ambassador mentioned before, being at Onondaga at the end of summer, learned that this embassy of the Conestoga had reached the Iroquois country, as he even saw some of the Conestoga presents. It was the purpose of the Conestoga to bring about firm peace with the Hurons and the Onondaga, the Oneida and the Cayuga, and, if possible, the Seneca, and to renew the war against the Mohawk, should they then refuse to become parties to it. The Conestoga did not fear the Mohawk. The Jesuit Relation for 1660 states that about the year 1600 the Mohawk had been greatly humbled by the Algonkin, and that, after they had regained somewhat their former standing, the Conestoga, in a war lasting 10 years, had nearly exterminated the Mohawk, who since, however, had partially recovered from the defeat.

Many of the Onondaga joined the Catholic Iroquois colonies on the St. Lawrence, and, in 1751, about half the tribe was said to be living in Canada. On the breaking out of the American Revolution in 1775 nearly all the Onondaga, together with the majority of the other Iroquois tribes, joined the British, and, at the close of the war, the British government granted them a tract on Grand r., Ontario, where 367 of them still reside. The rest are still in New York, the greater number being on the Onondaga res., and the others with the Seneca and Tuscarora on their several reservations.

The Onondaga made or joined in treaties with the state of New York at Ft. Schuyler (formerly Ft. Stanwix), Sept. 12, 1788; Onon-

daga, Nov. 18, 1793; Cayuga Ferry, July 28, 1795; Albany, Feb. 25, 1817, Feb. 11, 1822, and Feb. 28, 1829. They also joined in treaties between the Six Nations and the United States at Ft. Stanwix, N. Y., Oct. 22, 1784; Ft. Harmar, O., Jan. 9, 1789; Canandaigua, N.Y., Nov. 11, 1794, and Buffalo Creek, N.Y., Jan. 15, 1838.

In 1660 the Jesuits estimated the Onondaga at about 1,500 souls, while Greenhalgh in 1677 placed them at 1,750, probably their greatest strength. Later authorities give the numbers as 1,250 (1721), 1,000 (1736), 1,300 (1765), and 1,150 (1778), but these figures do not include those on the St. Lawrence. In 1851 Morgan estimated their total number at about 900, including 400 on Grand r. In 1906 those in New York numbered 553, the rest of the tribe being with the Six Nations on the Six Nations res. near Brantford, Ont. In 1911, there were 367 Onondagas on this reserve.

The Onondaga towns, so far as known, were Ahaouete, Deseroken (traditional), Gadoquat, Gannentaha (mission and fort), Kaneenda), Gistwiahna, Onondaga, Onondaghara, Onondahgegahgeh, Onontatacet, Otiahanague, Teionnontatases, Tgasunto, Touenho (Goienho), Tueadasso, and some transient hunting and fishing hamlets.

Onowaragon. An Onondaga who succeeded a chief of the same name. The latter was a French partisan and was condoled in 1728. The former attended a council with Gov. Beauharnois in 1742, being the Onondaga speaker. Weiser, who lodged in his house in 1743, calls him Annawaraogon. He may have been the Kayenwarygoa who attended the Boston Council of 1744, but this is doubtful.

(W. M. B.)

Ontarahronon ('lake people.'—Hewitt). An unidentified sedentary tribe probably living s. of St. Lawrence r. in 1640.—Jes. Rel. 1640, 35, 1858.

Ontwaganha. An Iroquois term, having here the phonetics of the Onondaga dialect, and freely rendered 'one utters unintelligible speech,' hence approximately synonymous with 'alien,' 'foreigner.' Its literal meaning is 'one rolls (or gulps) his words or speech.' This epithet was originally applied in ridicule of the speech of the Algonquian tribes, which to Iroquois ears was uncouth, particularly to the northern and western tribes of this stock, the Chippewa, Ottawa, Miami or Twightwigh, Missisauga, Shawnee, the "Far Indians" including the Amikwa (or Neghkariage (of two eastles), the Ronowadainie, Onnighsiesanairone, Sikajienatroene or "Eagle People," Tionontati (only by temporary association with the foregoing), Chickasaw (?), Mascoutens(?), Ronatewisichroone, and Awighsachroene. Thus the term was consistently applied to tribes dwelling in widely separated localities. Sometimes, but rarely, it may have been confounded in use with Tsaganha (q. v.), or Agotsaganha, which had a similar origin but was applied to a different group of Algonquian tribes.

Ookwolik. A tribe of Eskimo about Sherman inlet opposite King William id., Keewatin.—Gilder, Schwatka's Search, 199, 1881.

Oomiak. The large skin boat or "woman's boat" of the Eskimo; spelled also *umiak*; from the name of this vessel in the eastern Eskimo dialects.

(A. F. C.)

Operdniving ('spring place'). A Nugumiut Eskimo spring village in Countess of Warwick sd., near Frobisher bay. Baffin island.

Oopungnewing.—Hall quoted by Nourse, Am. Explor., 191, 1884. Operdniving.—Boas in 6th Rep. B. A. E., 422, 1888. Oppernowick.—Ross, Voy., 164, 1819.

Opichiken. A Salish band or village under the Fraser superintendency, Brit. Col.—Can. Ind. Aff., 79, 1878.

Opitchesaht. A Nootka tribe on Albern eanal, Somass r., and neighbouring lakes_i Vancouver id., Brit. Col. Anciently this tri b

is said to have spoken Nanaimo (q. v.). The septs, according to Boas, are Mohotlath, Tlikutath, and Tsomosath. Their principal village is Ahahswinnis. Pop. 62 in 1902, 48 in 1911.

Hopetcisa'th.—Boas, 6th Rep. N. W. Tribes Can., 31, 1890. Opechisaht.—Sproat, Savage Life, 308, 1868. Opecluset.—Mayne, Brit. Col., 251, 1862. Ope-eisaht.—Brit. Col. map, Ind. Aff., Victoria, 1872. Opetches-aht.—Can. Ind. Aff., 308, 1879. Opitches-aht.—Ibid., 187, 1884. Upatsesatuch.—Grant in Jour Roy. Geog. Soc., 293, 1857.

Opitsat. The permanent village of the Clayoquot (q. v.), on the s. w. shore of Meares id., w. coast of Vancouver id., Brit. Col.; pop. 245 in 1902, 209 in 1911.

Opetsitar.—Gray and Ingraham (1791) quoted in H.
 R. Doc. 43, 26th Cong., 1st sess., 3, 1840.
 Opisat.—Can. Ind. Aff., 263, 1902.
 Opisitar.—Kendrick deed (1791), ibid., 10.

Ordeals. An ordeal is strictly a form of trial to determine guilt or innocence, but the term has come to be applied in a secondary sense to any severe trial or test of courage, endurance, and fortitude. In accordance with these two usages of the term, ordeals among the North American tribes may be divided into (1) those used to establish guilt and to settle differences, and (2) those undergone for the sake of some material or supernatural advantage.

The ordeals corresponding closest to the tests to which the name was originally applied were those undertaken to determine witches or wizards. If it was believed that a man had died in consequence of being bewitehed, the Tsimshian would take his heart out and put a red-hot stone against it, wishing at the same time that the enemy might die. If the heart burst, they thought that their wish would be fulfilled; if not, their suspicions were believed to be unfounded. A Haida shaman repeated the names of all persons in the village in the presence of a live mouse and determined the guilty party by watching its motions. A Tlingit suspected of witchcraft was tied up for 8 or 10 days to extort a confession from him, and he was liberated at the end of that period if he were still alive. But as confession secured immediate liberty and involved no unpleasant consequences exeept an obligation to remove the spell, few were probably found innocent. This, however, can hardly be considered as a real ordeal, since the guilt of the victim was practically assumed, and the test was in the nature of a torment to extract confession.

Intimately connected with ordeals of this class were contests between individuals and bodies of individuals, for it was supposed that victory was determined more by supernatural than by natural power. A case is recorded among the Comanche where two men whose enmity had become so great as to defy all attempts at reconciliation were allowed to fight a duel. Their left arms having been tied together, a knife was placed in the right hand of each, and they fought until both fell. A similar duel is recorded in one of the Teton myths, and it is probable that the custom was almost universal. Resembling these were the contests in vogue among Eskimo tribes. When two bodies of Eskimo met who were strangers to each other, each party selected a champion, and the two struck each other on the side of the head or the bared shoulders until one gave in. Anciently Netchilirmiut and Aivilirmiut champions contested by pressing the points of their knives against each other's cheeks. Such contests were also forced on persons wandering among strange people and are said to have been matters of life and death. Chinook myths speak of similar tests of endurance between supernatural beings, and perhaps they were shared by men. Differences between towns on the N. Pacific coast were often settled by appointing a day for fighting, when the people of both sides arrayed themselves in their hide and wooden armour and engaged in a pitched battle, the issue being determined by the fall of one or two prominent men. Contests between strangers or representatives of different towns or social groups were also settled by playing a game. At a feast on the N. Pacific coast one who had used eareless or slighting words toward the people of his host was forced to devour a tray full of bad-tasting food, or perhaps to swallow a quantity of Two persons often contested to see which could empty a tray the more expeditiously.

Ordeals of the second class would cover the hardships placed upon a growing boy to make him strong, the fasts and regulations to which a girl was subjected at puberty, and those which a youth underwent in order to obtain supernatural helpers (see *Child life*), as well as the solitary fasts of persons who desired to become shamans, or of shamans who desired greater supernatural power. Finally, it is especially applicable to the fasts and tortures undergone in preparation for ceremonies or by way of initiation into a secret society.

2 GEORGE V., A. 1912

The first of these may best be considered under Education and Puberty customs, but, although some of the ceremonies for the purpose of initiating a youth into the mysteries of the tribe took place about the time of puberty, their connection therewith is not always evident, and they may well be treated here. Thus Pueblo children, when old enough to have the religious mysteries imparted to them, went through a ceremonial flogging, and it is related of the Alibamu and other Indian tribes of the Gulf States, that at a certain time they cause their children to pass in array and whipped them till they drew blood. The huskanaw or huskany, was an ordeal Indians undertaken among Virginia the purpose of preparing youths for the higher duties of manhood. It consisted in solitary confinement and the use of emetics. "whereby remembrance of the past was supposed to be obliterated and the mind left free for the reception of new impressions." Among those tribes in which individuals acquired supernatural helpers a youth was compelled to go out alone into the forest or upon the mountains for a long period, fast there, and sometimes take certain medicines to enable him to see his guardian spirit. Similar were the ordeals gone through by chiefs among the Haida, Thingit, Tsimshian, and other N. Paeific Coast tribes when they desired to increase their wealth, or success in war, or to obtain long life, as also by shamans who wished increased powers. At such times they chewed certain herbs supposed to aid them in seeing the spirits. The use of the "black drink" by Muskhogean tribes was with similar intent, as also were the emetics just referred to in use among the Virginian peoples.

While undergoing initiation into a secret society on the N. Pacific coast a youth fasted and for a certain period disappeared into the woods, where he was supposed to commune with the spirit of the society in complete Anyone discovering a Kwakiutl solitude. youth at this time could slay him and obtain the secret society privileges in his stead. On the plains the principal participants in the Sun dance (q.v.) had skewers run through the fleshy parts of their backs, to which thongs were attached, fastened at the other end to the Sun-dance pole. Sometimes a person was drawn up so high as barely to touch the ground and afterward would throw his weight against the skewers until they tore their way out. Another participant would have the thongs

fastened to a skull, which he pulled around the entire camping circle, and no matter what obstacles impeded his progress he was not allowed to touch either thongs or skull with his hands. During the ceremony of Dakhpike, or Nakhpike, among the Hidatsa, devotees ran arrows through their muscles in different parts of their bodies; and on one accasion a warrior is known to have tied a thirsty horse to his body by means of thongs passed through holes in his flesh, after which he led him to water, restrained him from drinking without touching his hands to the thongs, and brought him back in triumph. The special ordeal of a Chevenne society was to walk with bare feet on hot coals. A person initiated into the Chippewa and Menominee society of the Midewiwin was "shot" with a medicine bag and immediately fell on his face. By making him fall on his face a secret society spirit or the guardian spirit of a N. W. Coast shaman also made itself felt. When introduced into the Omaha society, called Washashka, one was shot in the Adam's apple by something said to be taken from the head of an otter. As part of the ecremony of initiation among the Hopi a man had to take a feathered prayerstick to a distant spring, running all the way, and return within a certain time; and chosen men of the Zuñi were obliged to walk to a lake 45 m. distant, clothed only in the breechcloth and so exposed to the rays of the burning sun, in order to deposit plume-sticks and pray for rain. Among the same people one of the ordeals to which an initiate into the Priesthood of the Bow was subjected was to sit naked for hours on a large ant-hill, his flesh exposed to the torment of myriads of ants. At the time of the winter solstice the Hopi priests sat naked in a circle and suffered gourds of ice-cold water to be dashed over them. Ordeals of this kind enter so intimately into ceremonies of initiation that it is often difficult to distinguish them.

Certain regulations were also gone through before war expeditions, hunting excursions, or the preparation of medicines. Medicines were generally compounded by individuals after fasts, abstinence from women, and isolation in the woods or mountains. Before going to a hunt the leader of a party fasted for a certain length of time and counted off so many days until one arrived which he considered his lucky day. On the N. W. coast the warriors bathed in the sea in winter time, after which they whipped each other with branches

and until the first encounter took place they fasted and abstained from water as much as possible. Elsewhere warriors were in the habit of resorting to the sweat-lodge. Among the tribes of the E. and some others, prisoners were forced to run between two lines of people armed with clubs, tomahawks, and other weapons, and he who reached the chief's house or a certain mark in safety was preserved. Inasmuch as the object behind most tortures was to break down the victim's selfcommand and extort from him some indication of weakness, while the aim of the victim was to show an unmoved countenance, flinging back seorn and defiance at his tormentors until the very last, burning at the stake and its accompanying horrors partook somewhat of the nature of an ordeal.

Orehaoue. A Cayuga chief who opposed the Jesuits and caused Father Carheil's withdrawal. He aided the English of Albany in preventing Penn's purchase of Susquehanna lands, and visited De la Barre in 1684. In 1687 Denonville seized him and sent him to France. He was then called Goiguenha [Cayuga]-Oreouahe, and often Taweeratt; also Wahawa by the Onondaga. In 1688 the Cayuga wished for "Taweeratt, the chief warrior of Cayouge, who is lamented amongst them every day." Returning in 1689, Orehaoue became attached to Count Frontenae and fought for the French. He died in 1698 and was buried with high honours as "a worthy Frenchman and good Christian." (w. m. B.)

Oronhyatekha ('It [is a] burning sky'). A noted Mohawk mixed-blood, born on the Six Nations res., near Brantford, Ontario, in 1841: died at Augusta, Ga., Mar. 4, 1907. In his childhood he attended a mission industrial school near his home, and later, entered the Wesleyan Academy at Wilbraham, Mass., and Kenyon College at Gambier, Ohio, where he remained two years, fitting himself for Toronto University, which he afterward entered. To cover expenses during his college vacation, he hired some white men, whom he dressed in Indian garb and exhibited with himself in a "Wild West" show. While a student at Toronto, in 1860, the chiefs of the Six Nations deputized Oronhyatekha to deliver an address to the Prince of Wales (King Edward VII) on the occasion of his visit to America. The Prince invited him to continue his studies at Oxford, which he entered under the tutelage of Sir Henry Adland, Regius professor of medicine.

Returning to America a graduated physician, he practised for a time in Toronto. He married a grand-daughter of Joseph Brant (Thayendanegea), the celebrated Mohawk, by whom he had a son and a daughter. Oronhyatekha was an enthusiast in secret society work. He was a prominent member of the Good Templars and of the Masonic fraternity, and in 1902, at Chicago, was elected president of the National Fraternal Congress. He was founder of the Independent Order of Foresters and held the office of Grand Ranger from 1881 until the time of his death. He delivered an address at the Indian centennial at Tyendinaga, Ontario, Sept. 4, 1884. One who knew him personally described Oronhyatekha as "a man of extraordinary parts. He impressed all with his remarkable refinement. The stranger would take him for a high-class Englishman. were it not for those racial marks which betraved bis Indian origin. He was an expert parliamentarian, of dignified and suave yet forceful address. He was a keen debater, poignant and witty when occasion demanded. could tell a good story, and had a faculty of withdrawing from any situation without leaving behind him rancour or injured feelings" (New Indian, Stewart, Nev., Mar. 1907). Oronhyatekha was the author of an article on the Mohawk language, printed in the Proceedings of the Canadian Institute (n. s., x, 182-194, 1865; xv, 1-12, 1878).

Oskenotoh (Os-ken'-o-toh). The Deer clan of the Hurons.—Morgan, Anc. Soc., 153, 1877.

Oskquisaquamai. A fish-eating people mentioned in connection with Assiniboin. Cree, and Maskegon, in the middle of the 18th century; probably a band of Cree.

Oskquisaquamai.—Bacqueville de la Potberie, Hist. Am., 1, 176, 1753. Osquisakamais.—Dobbs, Hudson Bay, 25, 1744.

Osmakmiketlp (Osmaxmik'é'lp). A Bellacoola village on the N. side of Bellacoola r., at its mouth, in British Columbia; it was one of the eight Nuhalk towns.—Boas in Mem. Am. Mus. Nat. Hist., 11, 49, 1898.

Ossossane (a mound'). A former important Huron village, belonging to the Bear clan, situated between lake Simcoe and Georgian bay, Ontario. It was known under various names at different periods. In 1639 the mission of La Conception was removed there from Ihonatiria. (J. N. B. H.)

Immaculate Conception.—Shea, Cath. Miss., 177, 1855. La Conception.—Jes. Rel. 1640, 63, 1858.

2 GEORGE V., A. 1912

La Rochelle.—Jes Rel 1636, 123, 1858. Ossonane.—
Jes. Rel. 1639, 88, 1858 (changed in errata to Ossossane).
Ossosandu.—Jes. Rel. 1637, 70, 1858. Ossosané.—
Ibid., 131. Ossossandue.—Ibid., 70. Ossossané.—
Jes Rel 1636, 123, 1858. Ossossarie.—Jes. Rel. 1640,
63, 1858 (misprint). Quevindoyan.—Mémoire of
1637 in Margry, Déc., 1, 4, 1875 (sig. 'at the base of the
mountain '— Hewitt). Quieuindohain.——Sagard
(1686), Can., 11, 122, 1866. Quieuindohain.—Ibid.,
1, 200, 1866. Sainct Gabriel.—Ibid., note. Tequenonquiaye.—Champlain (1615), Œuvres, 1v, 28, 1870.
Tequeunoikiaye.—Sagard (1636), Can., 1, 200, 1866.
Tequeunoikiaye.—Sagard misquoted in Champlain,
Œuvres, 1v, 28, note, 1870.

Otaguottouemin. An Algonquian tribe mentioned by Champlain (Œuvres, 1v, 20, 1870), who heard of them during his passage up the Ottawa r. in 1615. They dwelt in a sparsely inhabited desert and fived by hunting and by fishing in rivers, ponds and lakes. The Jesuit Relation of 1640 describes them as dwelling x. of the Kichesipirini. They seldom descended to trade with the French.

Kotakoutouemi.—Jes. Rel. 1640, 34, 1858. Otokotouemi.—Jes. Rel., in, index, 1858. 8ta8kot8em-i8ek.—Jes. Rel. 1650, 34, 1858.

O tee toochinas.—Swan (1791) in Schooleraft, Ind. Tribes, v, 262, 1855.

Otkialnaas-hadai (**ot k!iál náas xā 'da-i, 'Eagle's-legs-house people'). A subdivision of the Yadus, a branch of the Stustas, one of the greatest of the Haida families. It belonged to the Eagle clan.—Swanton, Cont. Haida, 276, 1905.

Otnaas-hadai (^eot náas xā'da-i, 'Eagle-house people). A subdivision of the Yadus, a Haida family on the Eagle side, which was in turn a branch of the Stustas.—Swanton, Cont. Haida, 276, 1905.

Otontagan. An Ottawa band living before 1680 on Manitoulin id., lake Huron, Ontario, whence they were driven out by the Iroquois. Otontagans.—Lahontan, New Voy, 1, 93, 1703. Outaouas of Talon.—Ibid

Ottawa (from ădāwe, 'to trade,' 'to buy and sell,' a term common to the Cree, Algonkin, Nipissing, Montagnais, Ottawa, and Chippewa, and applied to the Ottawa because in early traditional times and also during the historic period they were noted among their neighbours as intertribal traders and barterers, dealing chiefly in corn-meal, sunflower oil, furs and skins, rugs or mats, tobacco, and medicinal roots and herbs).

On French r., near its mouth, on Georgian bay, Champlain in 1615 met 300 men of a tribe which, he said, "we call les cheueux releuez." Of these he said that their arms consisted

only of the bow and arrow, a buckler of boiled leather, and the club; that they were no breech-clout, and that their bodies were much tatooed in many fashions and designs; that their faces were painted in diverse colours. their noses pierced, and their ears bordered with trinkets. The chief of this band gave Champlain to understand that they had come to that place to dry huckleberries to be used in winter when nothing else was available. In the following year Champlain left the Huron villages and visited the "Cheueux Reluez" (Ottawa), living westward from the Hurons, and he said that they were very joyous at "seeing us again." This last expression seemingly shows that those whom he had met on French r. in the preceding year lived where he now visited them. He said that the Cheueux Reluez waged war against the Mascoutens (here erroneously called by the Huron name Asistagueronon), dwelling 10 days' journey from them; he found this tribe populous; the majority of the men were great warriors, hunters, and fishermen, and were governed by many chiefs who ruled each in his own country or district; they planted corn and other things; they went into many regions 400 or 500 leagues away to trade; they made a kind of mat which served them for Turkish rugs; the women had their bodies covered, while those of the men were uncovered, saving a robe of fur like a mantle, which was worn in winter but usually disearded in summer; the women lived very well with their husbands; at the catamenial period the women retired into small lodges, where they had no company of men and where food and drink were brought to them. This people asked Champlain to aid them against their enemies on the shore of the fresh-water sea, distant 200 leagues from them.

In the Jesuit Relation for 1667, Father Le Mercier, reporting Father Allouez, treated the Ottawa, Kiskakon, and Ottawa Sinago as a single tribe, because they had the same language and together formed a common town. He adds that the Ottawa (Outaoüaes) claimed that the great river (Ottawa?) belonged to them and that no other nation might navigate it without their consent. It was, for this reason, he continues, that, although very different in nationality, all those who went to the French to trade, bore the name Ottawa, under whose auspices the journey was undertaken. He adds that the ancient habitat of the Ottawa had been a quarter of lake Huron,

whence the fear of the Iroquois drove them, and whither were borne all their longings, as it were, to their native country. Of the Ottawa the Father says: "They were little disposed toward the faith, for they were too much given to idolatry, superstitions, fables, polygamy, looseness of the marriage tie, and to all manner of license, which caused them to drop all native deceney."

According to tradition (see *Chippewa*) the Ottawa, Chippewa, and Potawatomi tribes of the Algonquian family were formerly one people who came from some point N. of the Great lakes and separated at Mackinaw, Mich. The Ottawa were placed by the earliest writers and also by tradition, on Manitoulin id. and along the N. and s. shores of Georgian bay.

Father Dablon, superior of the missions of the Upper Algonkin in 1670, said: "We call these people Upper Algonkin to distinguish them from the lower Algonkin who are lower down, in the vicinity of Tadoussac and Quebec. People commonly give them the name Ottawa, because, of more than 30 different tribes which are found in these countries, the first that descended to the French settlements were the Ottawa, whose name remained afterward attached to all the others." The Father adds that the Saulteurs, or PahoüitingSach Irini, whose native country was at Sault Sainte Marie, numbering 500 souls, had adopted three other tribes, making to them a cession of the rights of their own native country, and also that the people who were called Noquet ranged, for the purpose of hunting, along the s. side of lake Superior, whence they originally eame; and the Chippewa (Outeibous) and the Marameg from the N. side of the same lake, which they regarded as their native land. The Ottawa were at Chagaouamigong or La Pointe de Sainte Esprit in 1670 (Jes. Rel. 1670, 83, 1858).

Father Le Mereier (Jes. Rel. 1654), speaking of a flotilla of canoes from the "upper nations," says that they were "partly Ondataouaouat, of the Algonquine language, whom we call 'les Cheueux Releuez." And in the Relation for 1665 the same Father says of the Ottawa that they were better merchants than warriors.

In a letter of 1723, Father Sébastien Rasles says that he learned while among the Ottawa that they attributed to themselves an origin as senseless as it was ridiculous. They informed him that they were derived from three families, each composed of 500 persons. The

first was that of Michabon (see Nanabozho), or the Great Hare, representing him to be a gigantic man who laid nets in 18 fathoms of water which reached only to his armpits and who was born in the island of Michilimackinae, and formed the earth and invented fish-nets after carefully watching a spider weaving its web for taking flies; among other things he decreed that his descendants should burn their dead and scatter their ashes in the air, for if they failed to do this, the snow would cover the ground continuously and the lakes would remain frozen. The second family was that of the Namepich, or Carp, which, having spawned its eggs on the shore of a river and the sun casting its rays on them, a woman was thus formed from whom they claimed descent. The third family was that of the Bear's paw, but no explanation was given of the manner in which its genesis took place. But when a bear was killed a feast of its own flesh was given in its honour and an address was made to it in these terms: "Have thou no thoughts against us because we have killed thee; thou hast sense and courage; thou seest that our children are suffering from hunger; they love thee, and so wish to cause thee to enter their bodies; and is it not a glorious thing to be eaten by the children of captains?" The first two families bury their dead (Lettres Edif., IV, 106, 1819.).

It has been stated by Charlevoix and others that when they first became known to the French they lived on Ottawa r. This, however, is an error, due to the twofold use of the name, the one generic and the other specific, as is evident from the statements by Champlain and the Jesuit Relations (see Shea in Charlevoix, New France, 11, 270, 48661; this early home was N. and W. of the Huron territory. No doubt Ottawa r., which they frequently visited and were among the first western tribes to navigate in trading expeditions to the French settlements, was named from the Ottawa generically so called, not from the specific people named Ottawa. There is unquestioned documentary evidence that as early as 1635 a portion of the Ottawa lived on Manitoulin id. Father Vimont, in the Jesuit Relation for 1640, 34, 1858, says that "south of the Amikwa [Beaver Nation] there is an island [Manitoulin] in that fresh water sea [lake Huron], about 30 leagues in length inhabited by the Outaouan [Ottawa], who are a people come from the nation of the Standing Hair [Cheueux Releuez]." This information

he received from Nicolet, who visited the Ottawa there in 1635. On the Du Creux map of 1660, on a large island approximating the location of Manitoulin id., the "natio surrectorum capillorum," i.e. the Cheveux Releves, or Ottawa, is placed. They were allies and firm friends of the French and the Hurons. and conducted an active trade between the western tribes and the French. After the destruction of the Hurons, in 1648-49, the Iroquois turned their arms against the Ottawa, who fled with a remnant of the Hurons to the islands at the entrance of Green bay, where the Potawatomi, who had preceded the Offawa and settled on these islands, received the fugitives with open arms and granted them a home. However, their residence here was but temporary, as they moved westward a few years afterward, a part going to Keweenaw bay, where they were found in 1660 by Father Menard, while another part fled with a band of Hurons to the Mississippi, and settled on an island near the entrance of lake Pepin. Driven away by the Sioux, whom they had unwisely attacked, they moved N. to Black r., Wis., at the head of which the Hurons built a fort, while the Ottawa pushed eastward and settled on the shore of Chaquamegon bay. They were soon followed by the missionaries, who established among them the mission of St. Esprit. Harassed by the Sioux, and a promise of protection by the French having been obtained, they returned in 1670-71 to Manitoulin id., in lake Huron. According to the records, Father Allouez, in 1668-69, succeeded in converting the Kiskakon band at Chaquamegon, but the Sinago and Keinouche remained deaf to his appeals. On their return to Manitoulin the French fathers established among them the mission of St. Simon. There is a tradition that Lac Court-Oreilles was formerly called Ottawa lake because a band of the Ottawa dwelt on its shores, until they were forced to move by the attacks of the Sioux (Brunson in Wis. Hist. Coll., IV). Their stay on Manitoulin id. was brief; by 1680 most of them had joined the Hurons at Mackinaw, about the station established by Marquette in 1671.

The two tribes lived together until about 1700, when the Hurons removed to the vicinity of Detroit, while a portion of the Ottawa about this time seems to have obtained a foothold on the w. shore of lake Huron between Saginaw bay and Detroit, where the Potawatomi were probably in close union with

them. Four divisions of the tribe were represented by a deputy at the treaty signed at The band which had Montreal in 1700. moved to the s. E. portion of the lower Miehigan peninsula returned to Mackinaw about 1706. Soon afterward the chief seat of a portion of the tribe was fixed at Waganakisi (L'Arbre Croche), near the lower end of lake Michigan. From this point they spread in every direction, the majority settling along the E. shore of the lake, as far s. as St. Joseph r., while a few found their way into s. Wisconsin and N. E. Illinois. In the N. they shared Manitoulin id. and the N. shore of lake Huron with the Chippewa, and in the s. E. their villages alternated with those of their old allies the Hurons, now ealled Wyandot, along the shore of lake Eric from Detroit to the vicinity of Beaver er, in Pennsylvania. They took an active part in all the Indian wars of that region up to the close of the War of 1812. The celebrated chief Pontiac was a member of this tribe. and Pontiac's war of 1763, waged chiefly around Detroit, is a prominent event in their history. A small portion of the tribe which refused to submit to the authority of the United States removed to Canada, and together with some Chippewa and Potawatomi, is now settled on Walpole id. in lake St. Clair. The other Ottawa in Canadian territory are on Manitoulin and Cockburn ids. and the adjacent shore of lake Huron.

All the Ottawa lands along the w. shore of lake Michigan were eeded by various treaties, ending with the Chieago treaty of Sept. 26, 1833, wherein they agreed to remove to lands granted them on Missouri r. in the N. E. corner of Kansas. Other bands, known as the Ottawa of Blanchard fork of Great Auglaize r., and of Roche de Bœuf on Maumee r., resided in Ohio, but these removed w. of the Mississippi about 1832 and are now living in Oklahoma. The great body, however, remained in the lower peninsula of Michigan, where they are still found scattered in a number of small villages and settlements.

In his Histoire du Canada (1, 190, 1836), Fr. Sagard mentions a people whom he calls "la nation du bois." He met two canoe loads of these Indians in a village of the Nipissing, describing them as belonging to a very distant inland tribe, dwelling he thought toward the "sea of the south," which was probably lake Ontario. He says that they were dependents of the Ottawa (Cheueux Releuez) and formed with them, as it were, a single tribe.

The men were entirely naked, at which the Hurons, he says, were apparently greatly shocked, although searcely less indecent themselves. Their faces were gaily painted in many colours in grease, some with one side in green and the other in red; others seemed to have the face covered with a natural lace, perfectly well-made, and others in still different styles. He says the Hurons had not the pretty work nor the invention of the many small toys and trinkets which this "Gens de Bois" had. This tribe has not vet been definitely identified, but it may have been one of the three tribes mentioned by Sagard in his Dictionnaire de la Langve Hyronne, under the rubric "nations," as dependants of the Ottawa (Andatahoüat), namely, the Chisérhonon, Squierhonon, and Hoindarhonon.

Charlevoix says the Ottawa were one of the rudest nations of Canada, cruel and barbarous to an unusual degree and sometimes guilty of cannibalism. Bacqueville de la Potherie (Hist. Am. Sept., 1753) says they were formerly very rude, but, by intercourse with the Hurons, they have become more intelligent, imitating their valour, making themselves formidable to all the tribes with whom they were at enmity and respected by those with whom they were in alliance. It was said of them in 1859: "This people is still advancing in agricultural pursuits; they may be said to have entirely abandoned the chase; all of them live in good, comfortable, log cabins; have fields inclosed with rail fences, and own domestic animals." The Ottawa were expert eanoe-men; as a means of defence they sometimes built forts, probably similar to those of the Hurons.

In the latter part of the 17th century the tribe consisted of 4, possibly 5, divisions. It is repeatedly stated that there were 4 bands, and no greater number is ever mentioned, yet 5 names are given, as follows: Kishkakon, Sinago, Keinouche, Nassauaketon, and Sable. La Mothe Cadillac says there were 4 bands: Kiskakon, Sinago, Sable, and Nassauaketon (Verwyst, Miss. Labors, 210, 1886). Outaoutiboy, chief of the Ottawa, speaking at the conference with Gov. de Callières, Sept. 3, 1700, said: "I speak in the name of the four Outaouais nations, to wit: The Outaouaes of the Sable, the Outaouaes Sinago, the Kiskakons and the people of the Fork" (Nassawaketon). In addition to these chief divisions there were minor local bands, as Blanchard Fork, Kajienatroene, Maskasinik, Negaouichiriniouek,

Niscak, Ommunise, Otontagan, Talon, and Thunder Bay. Chauvignerie in 1736 distinguished the Ottawa of Grand River, lake Nipissing, Michilimackinac, Detroit, and Saginaw. According to Morgan the names of the Ottawa gentes are unknown, but Chauvignerie in 1736 mentioned the bear, otter, grey squirrel, and black squirrel as the totems of different bands of the tribe. According to Charlevoix the Ottawa signed with a hare the provisional treaty concluded at Montreal in 1700. At the great conference on the Maumee in 1793 they signed with the otter totem. In Tanner's Narrative is given a list of 18 totems among the Ottawa and Chippewa, but there is nothing to indicate which are Ottawa and which Chippewa.

The Ottawa entered into numerous treaties with the United States, as follows: Ft. Mc-Intosh, Jan. 21, 1785; Ft. Harmar, Ohio, Jan. 9, 1789; Greenville, Ohio, Aug. 3, 1795; Ft. Industry, July 4, 1805; Detroit, Mich., Nov. 17, 1807; Brownstown, Mich., Nov. 25, 1808.; Greenville, Ohio, July 22, 1814; Spring Wells, Mich., Sept. 8, 1815; St. Louis, Mo., Aug. 24, 1816; on the Miami, Ohio, Sept. 29, 1817; St. Mary's, Ohio, Sept. 17, 1818; L'Arbre Croche and Michilimackinac, Mich., July 6, 1820; Chicago, Ill., Aug. 29, 1821; Prairie du Chien, Wis., Aug. 19, 1825; Green Bay, Wis., Aug. 25, 1828, Prairie du Chien, Wis., July 29, 1829; Miami Bay, Ohio, Aug. 30, 1831; Maumee, Ohio, Feb. 18, 1833; Chicago, Ill., Sept. 26, 1833; Washington, D.C., Mar. 28, 1836; Council Bluffs, Iowa, June 5 and 17, 1846; Detroit, Mich., July 31, 1855, and Washington, D.C., June 24, 1862.

The population of the different Ottawa groups is not known with certainty. In 1906 the Chippewa and Ottawa on Manitoulin and Coekburn ids., Canada, were 1,497, of whom about half were Ottawa; there were 197 Ottawa under the Seneca School, Okla., and in Michigan 5,587 scattered Chippewa and Ottawa in 1900, of whom about two-thirds are Ottawa. The total is therefore about 4,700.

The following are or were Ottawa villages: Acgakoteheising, Anamiewatigong, Apontigoumy, Machonee, Manistee, Menawzhetaunaung, Meshkemau, Michilimackinac, Middle Village, Obidgewong (mixed), Oquanoxa, Roche de Bœuf, Saint Simon (mission), Shabawywyagun, Tushquegan, Waganakisi, Walpole Island, Waugau, Wolf Rapids.

Otzenne ('intermediate people'). A Sekani tribe living between the Saschutkenne and the Tselone on the w. side of the Rocky mts., Brit. Col.

Otzen-ne.-Morice in Trans. Can. Inst , 29, 1893.

Ouasouarini (probably for Awasisiwini-niwug, people of the Bullhead clan.—W. J.).

A Chippewa tribe living in 1640 on Georgian bay, Ontario, N. of the Hurons (Jes. Rel. 1640, 34, 1858). They are probably identical with the Ouassi, found in the vicinity of Nipigon r. in 1736; also with the Ouasaouanik, spoken of in 1658 as a well-known tribe living near the Sault Ste. Marie. The Ouassi were found by J. Long in 1791, mixed with other Chippewa, on the N. shore of lake Superior, almost exactly in the locality assigned them by Dobbs in 1744. Chauvignerie estimated their number in 1736 at about 300 souls, and stated that the catfish (bullhead) was their totem, which was also the totem of the Awausee (q. v.), one of the Chippewa bands at Sault Ste. Marie.

Ouenrio. A Huron village, situated, according to the Jesuit Relation for 1635, about 1 league from Ossossané. Father Jones (Jes. Rel., xxxiv, 255, 1898; places it in Tiny tp., about 3 m. N. E. of Lafontaine, Ontario. Its people had previously been a part of those of Toanche and Ihonatiria. In 1635 three feasts were held here to satisfy a dream, the description of the accompanying ceremonies giving a fair idea of such performances (Jes. Rel., x, 201, 1897). In 1637 an epidemic caused great distress to the inhabitants of Ouenrio, carrying off many and creating a desire to have the Jesuit missionaries dwell among them. In his Relation for 1635 Le Jeune says their cabins were better than the hovels of the Montagnais and were constructed like bowers, or garden urbours, of which, instead of branches and grass, some were covered with eedar bark, others with broad strips of ash, elm, fir, or spruce bark; and although those of cedar were regarded as best, they were very inflammable, wherefore so many similar villages had been burned. (J. N. B. H.

Oueschekgagamiouilimy (possibly for Ushashā'tagamiwininiwūg, 'people of the ridge'). The Caribou gens of the Chippewa of Rainy r... Minn. St. Pierre in 1753 (Margry, Déc., vi, 649, 1886) spoke of them as near Rainy lake, Ontario. (w. j.)

Ouikaliny (misprint of Onikaliny). A tribe N. of lake Superior in 1697, who sometimes traded with the French, but generally with the English on Hudson bay. They may have been the Maskegon.

Geus de l'Outarde.—La Chesnaye (1697) in Margry, Déc., vi. 7, 1886. Oulkaliny.—Hid., 7.

Ouinebigonbelini (probably for Winž-bigowinžnžwūg, 'people of the unpleasant water.'—W. J.). A tribe or band, doubtless of the Maskegon, living on Hudson bay at the mouth of Nelson r. in the middle of the 18th century.

Ouenebegonhelinis.—Dobbs, Hndson Bay, 24, 1744. Ouinebigonhelini.—Ibid., 23.

Oukesestigonek (Cree: ukisistigwek, 'swiftwater people.'—Gerard). A Montagnais tribe or band, known to the French as early as 1643. They lived about the headwaters of Manikuagan r., x. of the Papinachois, with whom they appear to have been in close relation. They are spoken of as a quiet and peaceable people, willingly receiving instructions from the missionaries. (J. M.)

Ochessigiriniooek.—Keane in Stanford, Compend, 526, 1878. Ochessigiriniouek.—Albanel (ca. 1670) quoted by Hind, Lab. Penin., 11, 22, 1863. Ochestgooetch.—Keane in Stanford, Compend., 526, 1878. Ochestgouetch.—Hind, Lab. Penin., 11, 20, 1863. Ochestigouecks.—Crepy, Map, ca. 1755. Ouchessigiriniouek.—Jes. Rel. 1670, 13, 1858. Ouchestigoueck.—Jes. Rel. 1664, 13, 1858. Ouchestigouetch.—Jes. Rel. 1664, 13, 1858. Ouchestigouets.—Bellin, Map, 1755. Oukesestigouek.—Jes. Rel. 1643, 38, 1858.

Oukiskimanitouk (probably for Okiskimanisiwog, 'whetstone-bird people', i. e. 'kingfisher people'). A clan of the Chippewa of lake Superior. Chauvignerie in 1736 noted the Oskemanettigons, an Algonquian tribe of 40 warriors on Winnipeg r., having the fisher as (kingfisher?) its totem. This may be identical. Oskemanettigons.—Chauvignerie (1736) in N. Y. Doc. Col. Hist, 1x, 1054, 1855. Oskemanitigous.—Chauvignerie (1736) quoted by Schooleraft, Ind. Tribes, 11, 556, 1853. Oukiskimanitouk.—Jes. Rel. 1658, 1858. Ushkimani'tigōg.—Wm. Jones, inf'n, 1996.

Oukotoemi. A Montagnais band, part of whom gathered at Three Rivers, Quebec, in 1641 (Jes. Rel. 1641, 29, 1858). Doubtless a part of the Attikamegue.

Oumamiwek (Montagnais: umāmiwek, 'down-stream people.'—Gerard). A tribe or band of Montagnais, closely related to, if not identical with, the Bersiamite. It is possible that the two were members of one tribe, each having its distinct organization. Shea (Charlevoix, New France, 11, 243, 1866), following

the Jesuit Relations, says the Bersiamite were next to Tadoussac and the Oumamiwek inland in the N. E. The Relation of 1670 places them below the Papinachois on the St. Lawrence. It is, however, certain that the Papinachois were chiefly inland, probably about the headwaters of Bersimis r. From a conversation with an Oumamiwek chief recorded by Father Henri Nouvel (Jes. Rel. 1664) it is learned that his people and other tribes of the lower St. Lawrence were in the habit at that early day of visiting the Hudson Bay region. The people of this tribe were readily brought under the influence of the missionaries.

Oumamiois.—Jes. Rel. 1670, 13, 1858. 8mami8ek.— Jes. Rel. 1650, 41, 1858. 8mami8ekhi.—Jes. Rel. 1641, 57, 1858. Oumamiwek.—Bailloquet (1661) in Hind, Lab. Penin., 11, 20, 1863. Oumaniouets.— Homann Heirs map, 1756 docated about head of Saguenay r, and possibly a distinct tribe). Oumanois.—Hind, Lab. Penin., 11, 21, 1863 (perhaps quoting a writer of 1664). Ouramanichek.—Jes. Rel. 1644, 53, 1858 (identical?).

Oumatachi. An Algonquian band living between Mistassini and Abitibi lakes, Quebec, in the 18th century.

Oumatachi.—Jefferys, French Dom., pt. 1, map, 1761. Oumatachiiriouetz.—La Tonr, Map, 1779 (should be Onmatachiiriouetz).

Ounontisaston ('at the foot of the mountain.'—Hewitt). An important Huron village visited by De la Roche Dallion in 1626 (Shea, Cath. Miss., 170, 1855) and mentioned by Sagard (Can., 111, 805, 1866) in 1636. Its situation is uncertain, but it was probably not far from Niagara r., and the name may refer to its situation at the foot of the Niagara escarpment. (w. m. b.)

Outaouakamigouk (probably for *Utäwākā-mīguk*, 'people of the open country or land.'—Gerard). A tribe or band on the N. E. coast of lake Huron in 1648; probably a part of the Ottawa.

Ouraouakmikoug.—Jes. Rel. 1658, 22, 1858. Outaouakamigouk.—Jes. Rel. 1648, 62, 1858.

Outchichagami (Montagnais: Utehīkā-gāmi, 'people near the water.'—Gerard). The name of a small tribe living N. of Albany r., in Patricia dist., Ont. They speak a Chippewa dialect fairly well understood by the Chippewa of the N. shore of lake Superior. (w. J.)

Otcitcă kõnsag.—Wm. Jones, inf'n, 1906. Outchichagami.—Jefferys, French Dom. Am, 1, map, 1761. Outchichagamiouetz.—La Tonr, Map, 1779.

Outchougai. A band that lived in 1640 on the E. side of Georgian bay, Ontario, and

Probably s. of French r. They were connected with the Amikwa. In 1736 they were living at Oka, Quebec, and were described by Chauvignerie as a clan of the Nipissing, with the heron as their totem.

Achagué.—Chauvignerie (1736) in N. Y. Doc. Col. Hist., rx, 1053, 1855. Achaque.—Chauvignerie (1736) quoted by Schoolcraft, Ind. Tribes, 111, 554, 1853. Archouguets.—Jes. Rel. 1643, 61, 1858. Atchougek.—Jes. Rel. 1658, 22, 1858. Atchoughe.—Jes. Rel. 1648, 62, 1858. Atchouguets.—Jes. Rel., 111, index, 1858. Outchougal.—Jes. Rel. 1649, 34, 1858. Outchougal.—Jes. Rel., 111, index, 1858.

Outimagami (Nipissing: 'deep-water people'). An unidentified Algonquian tribe or band formerly living N. of lake Nipissing, toward Hudson bay (Jes. Rel. 1640, 34, 1858). The name appears to be identical with that of lake Timagami and they probably resided on it.

(A. F. C.)

Outurbi uturibi, 'turibi [Coregonus artedii, a congener of the white-fish] people.'—Gerard). A former Algonquian tribe or band in Ontario, living N. of lake Nipissing and wandering to the region of Hudson bay.

Otaulubis.—Bacqueville de la Potherie, Hist. Am., II, 49, 1753. Outouloubys.—Du Lhut (1684) in Margry, Déc., vi, 51, 1886. Outurbi.—Jes. Rel. 1640, 34, 1858,

Owiyekumi (Ow'-ī-yē-kumī). The principal town of the Quatsino on Forward inlet, Quatsino sd., x. w. coast of Vancouver id.—Dawson in Trans. Roy. Soc. Can. for 1887, sec. II, 65, 1888.

Pachenaht. A Nootka tribe on San Juan harbour, Vancouver id. Their village is Pachena, at the mouth of San Juan r. Pop. 71 in 1897, 56 in 1911.

Pacheena.—Can. Ind. Aff., pt. 11, 158, 1901. Pacheenaht.—Sproat, Savage Life, 308, 1868. Pacheenett.—Mayne, Brit. Col., 251, 1862. Pachenah.—Whymper, Alaska, 79, 1869. Pachenaht.—Can. Ind. Aff. pt. 11, 16, 1911. Patcheena.—Grant in Jour. Roy. Geog. Soc., 293, 1857. Patcinā'ath.—Boas in 6th Rep. N. W. Tribes Can., 31, 1890.

Padli. A Padlimiut Eskimo settlement at the head of the fiord of the same name where the Akudnirmiut and Padlimiut gather in summer to eatch salmon.—Boas in 6th Rep. B. A. E., map, 1888.

Padlimiut. A tribe of Central Eskimo occupying the E. coast of Baffin island from Exeter bay to cape Hooper and numbering 43 in 1883. Their villages are Ekaloaping, Idjuniving, Itijarelling, Karmakdjuin, Kekertakdjuin, Kingnelling, Padli, and Siorartijung.—Boas in 6th Rep. B. A. E., 441, 1888.

Painting. The tribes N. of Mexico, as well as those of every part of the continent except, perhaps, the higher arctic regions, delighted in the use of colour. It was very generally employed for embellishing the person and in applying decorative and symbolic designs to habitations, sculptures, masks, shields, articles of bark, skin, pottery, etc., in executing pictographs upon natural surfaces of many kinds, as on cliffs and the walls of caverns, and in preparing the symbolic embellishments of altars and sacred chambers. Colour was applied to the person for decorative purposes as an essential feature of the toilet: for impressing beholders with admiration or fear; for purposes of obscurity and deception; in applying tribal, personal, or other denotive devices; in the application of symbolic designs, especially on eeremonial occasions; and as a means of protection from insects and the sun (see Adornment). The native love of colour and skill in its use were manifested especially in decorative work. This is illustrated by the wonderful masks and totem poles of the N. W. Coast tribes (Boas), and in the artistic polychrome pottery of the Pueblos (Fewkes). Little advance had been made in representative or pictorial art, yet some of the productions are noteworthy, as illustrated in the Hopi katcina work (Fewkes) and in the Kiowa ceremonial paintings on skins described by Mooney, although some of the latter show unmistakeable evidence of the influence of the whites.

The pigments were derived from many sources, but were mainly of mineral origin (see Dyes and Pigments), especially the oxides of iron and carbonate of eopper. aborigines were skilled in preparing the mineral colours, which were usually ground in small mortars or rubbed down on a flat stone, and in extracting stains and dyes from vegetal substances. The colours were applied with a dry point or surface, as with a piece of chalk, charcoal, or clay; or, when mixed with water or oil, with the fingers or hand, or a stick, brush, or pad, and also sprayed on with the mouth, as in Pueblo mask painting. Brushes were rude, consisting often of fibrous substances, such as bits of wood, bark, yucca, or reeds, chewed, beaten, or rubbed at one end until sufficiently pliable to deliver the colour; and great skill was shown by many of the tribes in the use of these crude tools. Hair was not in general use, although excellent brushes are now made by the more advanced tribes. The brushes used by the tribes of the

N. W. coast were often provided with beautifully carved handles. Very interesting painting implements are seen in some sections. Paddle-shaped or spatulate bits of wood are used, applied edgewise for thin lines and flatwise for covering spaces; and striping tools having two or three points and neatly carved of bone and ivory are in use by the Eskimo (Turner). The Plains tribes employed a flat piece of spongy bone from the knee joint of a buffalo or an ox; it has a sharp edge of rounded outline which serves for drawing lines, while the flat side serves for spreading the colour over large areas. These tools, being porous, have the advantage of holding a quantity of liquid colour. Shells were frequently used for paint cups, while for this purpose the Pueblos made miniature jars and bowls of pottery, sometimes in clusters. Colours in the form of powder, sand, clay, and meal were used, and are still used, by several tribes in preparing dry-paintings for ceremonial purposes which are executed on the floors of ceremonial chambers or altars (Matthews, Stevenson, Fewkes).

Consult Boas (1) in 6th Rep. B. A. E., 1888, (2) in Mem. Am. Mus. Nat. Hist., II, Anthrop. I, 1898; Dorsey in 11th Rep. B. A. E., 1894; Fewkes in 17th, 21st, and 22d Reps. B. A. E.; Hoffman in 7th Rep. B. A. E., 1891; Holmes in Smithson. Rep. 1903, 1904; Mooney in 17th Rep. B. A. E., 1898; Niblaek in Nat. Mus. Rep. 1888, 1890; Stevenson (1) in 5th Rep. B. A. E., 1887, (2) in 11th Rep. B. A. E., 1894; Turnér in 11th Rep. B. A. E., 1894.

(W. H. H.)

Pani Blanc. A former band of the Cree living N. E. of lake Winnipeg.

Panis Blanc.-Dobbs, Hudson Bay, map, 36, 1744.

Panquechin. A band of Sanetch in the s. E. portion of Vancouver id.; pop. 64 in 1911.

Panquechin.—Can Ind. Aff Rep., 66, 1902. Paukwechin.—Ibid., 308, 1879.

Papiak (Pāpīāk'). A Squawmish village community on Burrard inlet, Brit. Col.—Hill-Tout in Rep. B. A. A. S., 474, 1900.

Papinachois (Opápinagwa, 'they cause you to laugh.'—Hewitt). A Montagnais tribe or division living in the 17th century about the headwaters of the Manikuagan and Outarde rs., N. of the Bersiamite. They visited Tadoussae and received religious instruction from the missionaries, and by 1664 the latter had penetrated their country, finding

them tractable and inoffensive. Charlevoix believed that this and other tribes of the same section had become extinct in his day. As late as 1721 they joined in a letter to the governor of Massachusetts. Chauvignerie mentions a people of the same name living N. of lake Superior in 1736, numbering 20 warriors and having the hare as their totem, but these were a distinct people. (1. M.)

Oupapinachiouek.-Jes. Rel. 1643, 38, 1858. Spapinachi8ekhi.--Jes. Rel. 1641, 5, 1858. Oupapinachi8kü.-Ducreux in N. Y. Doc. Col. Hist., x, 170, note, 1858. Papenachols.-McKenney and Hall, Ind. Tribes, 111, 81, 1854. Papinachaux.-Chauvignerie (1736) quoted by Schoolcraft, Ind. Tribes, 111, 556, 1853. Papinaches.—Doc. of 1748 in N. Y. Doc. Col. Hist, x, 170, 1858 Papinachiois.—Jes. Rel. 1666, 1858 Papinachi8ekhi.—Jes. Rel. 1642, 39, 1858. Papinachols.—Bailloquet (1661) quoted by Hind, Lab. Penin , 11, 20, 1863. Papinakioises.—Jes. Rel. 1666, 3, 1858. Papinakols.—Chauvignerie (1736) in N. Y. Doc. Col. Hist , ix, 1054, 1855. Papinanchois. -Bacqueville de la Potherie, 1, 207, 1753. Papipanachois.-Lahontan, New Voy., 1, 207, 1703. Papiragad'ek.—Jes.* Rel. 1640, 12, 1858. Papivaches.— Barcia, Ensayo, 184, 1723. Paponeches.—Ibid, 183. Popinoshees.-Schoolcraft, Upper Miss, 93, 1834.

Pashashibu (Montagnais: Pâshashibu, 'swollen river.'—Gerard). A Montagnais village near the mouth of the Pashashibu r., N. shore of the gulf of St. Lawrence.—Stearns, Labrador, 271, 1884.

Paska. A Ntlakyapamuk village on or near Thompson r., Brit. Col.; pop. 17 in 1897, the last time the name appears.

Pasha.—Can. Ind Aff., 363, 1897. Paska.—Ibid., 230, 1886.

Paskwawininiwug ('prairie people'). The Plains Cree, one of the two great subdivisions of the Cree, subdivided into Sipiwininiwug and Mamikininiwug.

Ammisk-watcheé'-thinyoowuc.—Franklin, Journ. to Polar Sea, 1, 168, 1824. Beaver Hill Crees.—Ibid. Cree of the Prairie.—Morgan, Consang. and Affin.; 286, 1871. Grandes pagnes.—Petitot, in Jour. Roy. Geog. Soc., 649, 1883. Mus-ko-tá-we-ne-wuk.—Morgan, Consang. and Affin., 2-6, 1871. Paskwawi-yiniwok.—Lacombe, Dict. de la Langue des Cris, x, 1871. People of the Prairie.—Morgan, Consang. and Affin., 286, 1871. Plain Crees.—Robinson, Great Fur Land, 186, 1879. Prairie-Crees.—Petitot in Jour. Roy. Geog. Soc., 649, 1883. Prairie Indians.—Hind, Red River Exped, 151, 1860.

Pasquayah. An Assiniboin village situated where Carrot r. enters the Saskatchewan, in N. Manitoba, Canada. The elder Henry says that at the time of his visit, in 1775, it consisted of 30 tipis. The younger Henry (Coues, New Light, II, 470, 1897) found it in 1808, previous to the smallpox epidemic

a place of general rendezvous for different tribes.

Pasquayah.—Henry, Trav., 256, 1809. Poscolac.—Coues, New Light, 11, 469, note, 1897 Poskoyac.—Jefferys, Fr. Dom. Am., pt. 1, map, 1744.

Passamaquoddy (Peskěděmakâdi, 'plenty of pollock.'-Gatschet). A small tribe belonging to the Abnaki confederacy, but speaking nearly the same dialect as the Malecite. They formerly occupied all the region about Passamaquoddy bay and on St. Croix r. and Schoodic lake, on the boundary between Maine and New Brunswick. Their principal village was Gunasquamekook, on the site of St. Andrews, N. B. They were restricted by the pressure of the white settlements, and in 1866 were settled chiefly at Sebaik, near Perry. on the s. side of the bay, and on Lewis They had other villages at Calais, on Schoodie lake in Washington eo., Me., and on St. Croix r. in New Brunswick. They were estimated at about 150 in 1726, 130 in 1804, 379 in 1825, and from 400 to 500 in 1859. The Passamaquoddy and Penobscot tribes send to the Maine legislature a representative who is permitted to speak only on matters connected with the affairs of the Indian reservations (Prince in Proc. Am. Philos. Soc., xxxvi, 481, 1897). See Abnaki.

(J. M.)

Machias Tribe.-Wintbrop (1633) in Mass. Hist. Soc. Coll., 4th s., m, 292, 1856. Machies tribe.-Gyles (1726) in Me. Hist. Soc. Coll , tit, 357, 1853 (applied to a part of the Passamaquoddy living on Machias r.) Pasamaquoda.—Pownall (1759), ibid., v, 368, 1857 Passamacadie.-Willis (ca. 1830), ibid., 1, 27, 1865. Passamaquoda.—Pownall (1759), ibid., v, 371, 1857. Passamaquodda.-Penhallow (1726) in N. H. Hist. Soc. Coll., 1, 33, 1824. Passamaquoddy.—Penhallow (1726) in N. H. Hist. Soc. Coll., 1, 92, 1824. Passa-maquodie.—Williamson in Me. Hist. Soc. Coll., VII. 203, 1876. Passamequado.-Dudley (1704) quoted by Drake, Ind. Wars, 220, 1825. Pas-sam-ma-quoddies.-U. S. Ind. Aff. Rep., app., 2, 1824. Passammaquoddies.-Macauley, N.Y., xtt, 162, 1829. Passemaquoddy.-Church (1716) quoted by Drake, Ind Wars, 200, 1825. Passimaquodies.—Trumbull, Conn., 11, 64, 1818. Pennoukady.-Vaudreuil (1721) in N. Y. Doc. Col. Hist., rx, 904, 1855. Peskadam8kkan.-Aubery (1720), in N. Y. Doc. Col. Hist., 1x, 895, 1855. Peskadamukotik.-Gatschet, Penobscot MS., B. A. E., 1887 (Penobscot name). Peskadaneeoukkanti,-McKenney and Hall, Ind. Tribes, 111, 79, 1854. Peskamaquonty.-Vetromile, Abnakis, 54, 1866. Pesmaquady.-Gyles (1726) in Me. Hist. Soc. Coll., 111, 357, 1853. Pesmocady.-Cadillac (1692), ibid, vi, 279, 1859. Pesmokanti.-Abnaki letter (1721) in Mass. Hist. Soc. Coll., 2d s., vm, 262, 1819. Pěs-ta-moka'tiûk.-Chamberlain, Malesit MS, B. A. E., 1882 (Malecite name). Pestumagatiek,-Prince in Proc. Am. Philos. Soc., xxxvi, 479, 1897 (own name). Quaddles.-James quoted by Tanner, Narr, 327, 1830. Quaddy Indians.—U. S. Ind. Aff. Rep., 144, 1827. Quoddies.—Drake, Bk. Inds, x, 1848. Quoddy Indians.—U. S. Ind. Aff. Rep., 99, 1828. St. Croix Indians.—Hoyt, Antiq. Res., 220, 1824. Scootuks.—Keane in Stanford, Compend., 534, 1878. Unchagogs.—Drake, Bk. Inds., xii, 1848. Unchechauge.—Andros (1675) in N. Y. Doc. Col. Hist., xiv, 709, 1883. Uncheckauke.—Doc. of 1677, ibid., 733. Unque chauge.—Andros (1675), ibid., 695. Unshagogs.—Keane in Stanford Compend, 541, 1878. Vncheckaug.—Doc. of 1667 in N. Y. Doc. Col. Hist., xiv, 602, 1883. Vnquechauke.—Doc. of 1668, ibid., 605.

Patameragouche. Given by Alcedo (Dic. Geog., 1V, 117, 1788) as an Indian [Micmae] village on the E. coast of Nova Scotia, near Canso str. Not identified.

Patshenin. A tribe or band formerly living with the Saponi and Tutelo under Iroquois protection on Grand r., Ontario. They probably came from the S. with those tribes, and Hale thinks they may have been the Occanecchi.

Botshenins.—Hale in Proc. Am. Philos. Soc., Mar. 2, 1883. Patshenins.—Ibid.

Pawating. (Bawi'ting, a cognate form of Bawi'tigunk, 'at the rapids.'-W. J.) An ancient Chippewa village at Sault Ste Marie, on the s. bank of St. Mary r., Chippewa co., Mich. According to Dr. Wm. Jones the old village site is the most sacred spot known to the old-time Chippewa. A Chippewa who has been to the rapids has made a holy pilgrimage, because there his ancestors were created, there the manitos blessed the people, and from there was the dispersion round about lake Superior. The people, from the situation of their village were called Saulteurs by the early French writers, and, as the French became acquainted with more remote bands of Chippewa, the term came to designate the whole tribe. The Jesuit mission of Sainte Marie-du-Sanlt was established at Pawating in 1669. (J. M.)

Bahwetego-weninnewug.-Tanner, Narr, 63, 1830. Bahwetig.—Ibid, 64 Baouichtigouin.—Jes. Rel. 1640, 34, 1858. Bawateeg.—Schoolcraft in Minn. Hist. Soc. Coll., v. 398, 1885. Bawating.-Ibid. Bawitigowininiwag.—Kelton, Ft. Mackinac, 145, 1884. Bāwi tigunk,-Wm. Jones, inf'n, 1906. Bāwit'ing .- Ibid. Bawiting .- Baraga, Eng.-Otch. Dict. 206, 1878. Bow-e-ting,-Warren (1852) in Minn. Hist. Soc. Coll, v. 38, 1885. Bungee.-McLean, Twenty-five Years' Service, 1, 195, 1842. Cascade people.—Richardson, Arct. Exped, n, 37, 1851. D'Achiliny .- Neill in Minn. Hist. Soc. Coll., v. 413, 1885 Fall Indians.-Tanner, Narr., 63, 1830. Gens du Sault.-Jes. Rel. 1640, 34, 1858. Habitans du Sault.—Jes. Rel. 1642, 97, 1858 Opendachiliny.-La Chesnaye (1697) in Margry, Déc., vi. 6, 1886. Pagouitik.—Jes. Rel. 1658, 22, 1858. Pahouitingdachirini.—N. Y. Doc. Col. Hist , 1x, 161, note, 1855. 2 GEORGE V., A. 1912

Pah-witing-dach-Irini.-Shea, Cath. Miss., 362, 1852. Pahwittingdach-irini,-Shea, Discov. Miss. Val., xlvii, 1852. Panoirigouelouhak.-Charlevoix (1744), Jour. 1, 285, 1761 (misprint). Paouitagoung. -Jes. Rel. 1648, 62, 1858. Paoüitigoüeieuhak.-Jes. Rel. 1642, 97, 1858. Paouitikoungraentaouak. -Gallinee (1669) in Margry, Déc., 1, 163, 1875. Patroniting Dach-irini.-Heriot, Trav., 206, 1807. Pauofrigotieieuhak.-Charlevoix (1744), New Fr., 11, 137, 1866. Pauoitigoueieuhak.-Jes. Rel. 1642, 97, 1858. Pauotigoueieuhak,-Warren (1852) in Minn. Hist. Soc. Coll., v, 397, 1885. Pawateeg.-Schoolcraft in Minn. Hist. Soc. Coll., v, 398, 1885. Pawating .-Ibid. Paweteko Wenenewak.-Long, Exped. St. Peter's R., 11, 154, 1824. Pawichtigouek.—Trumbull (1870) in Minn. Hist. Soc. Coll., v, 398, 1885. Pawistucienemuks.—Domenech, Deserts, 1, 443, 1860 (misprint). Pawitagou-ek.-Trumbull (1870) in Minn. Hist. Soc. Coll., v. 398, 1885. Sainte Marie de Sault. -Shea, Cath. Miss., 361, 1855 (the mission). Sault Sainte Marie.-Henry, Trav., 60, 1809. Saut Indians.-Kelton, Ft. Mackinac, 145, 1884.

Peashtebai. A Montagnais village on Piashti bay, N. shore of gulf of St. Lawrence, Que.—Stearns, Labrador, 271, 1884.

Peisela (Pē'isɛla). A Bellacoola town at the entrance to the valley opening on the N. side of the mouth of Bellacoola r., Brit. Col. It was one of the Nuhalk villages (Boas in Mem. Am. Mus. Nat. Hist., 11, 48, 1898).

Peisiekan (Pe-i-si-c-kan, 'striped'). A band of Cree occupying 40 or 50 tipis and roving and hunting near Tinder mts.,* in 1856.—Hayden, Ethnog. and Philol. Mo. Val., 237, 1862.

Pekaist (PE'qaist, 'white stone'). A village of the Spence Bridge band of the Ntlakyapamuk, on the s. side of Thompson r., 32 m. above Lytton, Brit. Col.; pop. 5 in 1897 (the last time the name appears), including Pemainus.

Pakeist.—Can. Ind. Aff., 230, 1886. Pe'qaist.—Teit in Mem. Am. Mus. Nat. Hist., n, 173, 1900. 'P'kâi'st.—Hill-Tout in Rep. Ethnol. Surv. Can., 4, 1899. Pukaist'.—Dawson in Trans. Roy. Soc. Can. 1891, sec. n, 44, 1892.

Pekan. A name of the fisher (Mustela pennanti). The word is used by Charlevoix (Nouv. France, 111, 134, 1744) and came into English through Canadian French, where it occurs also as pécan. It seems to be of Algonquian origin, though not western, for the animal is called in Chippewa otchig, in Cree otchek. It is referred by some to an Abnaki pékané, mentioned by Rasles, which Trumbull (Natick Dict., Bull. 25, B.A.E., 260, 1903) thinks means this animal. (A. F. C.)

Pelheli (Pe'lqeli). Said by the Kwantlen to have been a division of their people who settled on the Pacific opposite Alert Bay, Brit. Col. Probably, as Hill-Tout suggests (Ethnol. Surv. Can., 55, 1902), they were identical with the Bellacoola.

Pelkatchek ('wherewith one catches fat'). A village of the Ntshaantin on Cheslatta lake, N. Brit. Col.

Pel'catzék.—Morice in Trans. Roy. Soc. Can., 109, 1892. Pe-i'ka-tcék.—Morice, Notes on W. Dénés, 25, 1893.

Pemainus (PEmai'nus: according to Teit, 'the flat underneath or near the brow or steep,' because a low flat extends along the river here for some distance; according to Hill-Tout, 'grassy hills'). A village of the Spence Bridge band of Ntlakayapamuk, on the s. side of Thompson r., 28 m. above Lytton, Brit. Col. Pop. 5 in 1897, including Pekaist.

Pemai'nus.—Teit in Mem. Am. Mus. Nat. Hist., II, 173, 1900. Pīmai'nūs.—Hill-Tont in Rep. Ethnol. Surv. Can., 4, 1899. Piminos.—Can. Ind. Aff., 196, 1885

Pemberton Meadows. The local name for a body of Lower Lillooet living N. of Lillooet lake, Brit. Col.; pop. 259 in 1911.

Pembina. A Canadian name for the acid fruit of Viburnum opulus, the high-bush cranberry, a plant growing in low ground, along streams, from New Brunswick far westward, and s. to Pennsylvania. The word is a corruption of Cree nipiminân, 'watered-berry,' i.e., the fruit of a plant growing in, or laved by, water; not 'water-berry,' as has been stated, since that would be nipimin; and, besides, the fruit is not watery. The name of the fruit is derived from the habitat of the plant that bears it. (W. R. G.)

A food preparation (also Pemmican. spelled pemican) used in the wilds of the northern parts of North America, and made by cutting the meat of the reindeer into thin slices, drying the latter in the sun or over the smoke of a slow fire, pounding them fine between stones, and incorporating the material with one-third part of melted fat. To this mixture, dried fruit, such as choke or June berries, is sometimes added. The whole is then compressed into skin bags, in which, if kept dry, it may be preserved for four or five years. Sweet pemmican is a superior kind of permission in which the fat used is obtained from marrow by boiling broken bones in water. Fish pemmican is a pemmican made

Probably Touchwood hills, N. w. of Qu'Appelle, Sask.

by the Indians of the remote regions of the N. W. by pounding dried fish and mixing the product with sturgeon oil. The Eskimo of Alaska make a pemmican by mixing chewed deer meat with deer suct and scal-oil. "This food," observes Licut. Ray, "is not agreeable to the taste, probably owing to the fact that the masticators are inveterate tobacco-chewers.". The word is from Cree pimikan, 'manufactured grease, from pimikeu, he (or she) makes (or manufactures) grease, that is, by boiling crude fat, pimü, in water and skimming off the supernatant oil. The verb is now used by the Cree in the sense of the makes pemmican.' The word is cognate with Abnaki pěmikân. IW. R. G.

Penelakut. A Cowichan tribe on Kuper and Galiano ids., off the s. E. portion of Vancouver id. The Lilmalche and Tsussie are perhaps parts of the same. Pop. of the Penelakut proper, 181 in 1902, 138 in 1911.

Pa-nel-a-kut.—Can Ind Aff., 308, 1879. Penálahuts.—Ibid., lix. 1877. Pěnálteqat.—Boas, MS., B. A. E., 1887. Penalikutson.—Mayne, Brit Col., 165, 1861. Penduhuts.—Brit. Col., map. Ind. Aff., Victoria, 1872. Penelakut.—Can. Ind. Aff., 164, 1901.

Penticton. An Okinagan village at the outlet of Okanagan lake, Brit. Col.; pop. 160 in 1911. See Can. Ind. Aff., pt. H. 14, 1911.

Pepatlenok ($P^*\bar{e}'paL\bar{e}n\delta x$, 'the flyers' . A gens of the Tenaktak (q. v.).—Boas in Rep. Nat. Mus. 1895, 331, 1897.

Pepawitlenok (Pē'pawi Lēnôx, 'the flyers'). A gens of the Klaskino, a Kwakiutl tribe.—Boas in Rep. Nat. Mus. 1895, 329, 1897.

Pepegewizzains (Chippewa: pipikiwisens, 'pigeon-hawk.'—Gerard). A gens or society of the Chippewa and also of the Ottawa.—Tanner, Narr., 314, 1830.

Periodicals. The first periodical printed in any of the North American Indian languages was the Cherokee Phornix, a weekly newspaper in English and Cherokee, edited by Elias Boudinot a native Indian, and published in Georgia at New Echota, the capital of the Cherokee Nation, from Feb. 21, 1828, to Oct. 1835.

The earliest periodical for the Chippewa Indians was entitled *Pelaubun*, *Peep of Day*, published monthly at Sarnia, Ont., by the Rev. Thomas Hurlburt, beginning in Jan., 1861. It was in English and Chippewa, and was continued through 1862 or later. The

Pipe of Peace, a Chippewa newspaper, edited by the Rev. E. F. Wilson in English and Chippewa, was published monthly at the Shingwauk Home, in Sault Ste. Marie from Oct. 1878, till Sept. 1879. A fortnightly paper called The Indian was published at Hagersville, Ont., from Dec. 30, 1885, till Dec. 29, 1886, the editor being the chief Kahkewaquonaby (Dr. Peter E. Jones). Although it was printed mainly in English, some Chippewa articles were included. There were, moreover, two periodicals in English edited by the Rev. E. F. Wilson, one entitled Our Forest Children, published monthly at the Shingwauk Home from Feb. 1887, to Sept. 1890, and the other entitled The Canadian Indian, published monthly at Owen Sound. Ont., from Oct. 1890, to Sept. 1891. Beginning with Mar. 1896, the publication of "a monthly journal [chiefly in Chippewa language] devoted to the interests of the Franciscan missions among the Ottawa and Chippewa Indians," under the title Anishinahi Enamiad, was commenced at Harbor Springs, Mich., by Father Zephyrin Engelhardt, and is still conducted by the Franciscan fathers at that place.

Four periodicals printed by the Indian missions near the Pacific coast are worthy of mention. One of these, The Youth's Companion of which the Rev. J. B. Boulet was editor, a juvenile monthly magazine, published for the benefit of the Puget Sound Catholic mission. was set in type, printed, and in part was written by the pupils of the industrial boarding schools on the Tulalip res. in Snohomish co., Wash., from May, 1881, to May, 1886. Another, the Kamloops Wawa, is a little magazine in the Chinook jargon, written in stenographic characters reproduced by a mimeograph, published irregularly by Father J. M. R. Le Jeune at Kamloops, British Columbia, from May, 1891, to Dec. 1904. Another is The Paper that Narrates, a monthly printed for two years at Stuart Lake, Brit. Col., in the Déné syllabic characters invented by Father A. G. Morice, the first number of which appeared in Oct. 1891. The fourth is Hagaya, printed in Nass and English at Aiyansh Mission, Nass r., Brit. Col., from June, 1893, until at least as late as Feb. 1895.

Petutek (Petu'tEk, or Pti'tEk, 'little spring [of water]'). A village of the Nicola band of the Ntlakyapanuk, 41 m. above Spence Bridge, Brit. Col.—Teit in Mem. Am. Mus. Nat. Hist., 11, 174, 1900.

Piashti. See Peashtchar.

Picquemyam. An Algonquian tribe living on lower St. Lawrence r., Canada, in 1534.— Cartier (1536), Bref Récit, 40, 1866.

Pic River. A Chippewa settlement at the mouth of Pic r., on the N. shore of lake Superior, Ontario, occupied in 1884 by 245 and, in 1911, by 220 Indians.

Pictou. A Micmac village or band at the northern end of Nova Scotia in 1760.—Frye (1760) in Mass. Hist. Soc. Coll., 1st s., x, 116, 1809.

Piegan (Pikuni, referring to people having badly dressed robes). One of the 3 tribes of the Siksika (q. v.) or Blackfoot confederacy. Its divisions, as given by Grinnell are: Ahahpitape, Ahkaiyikokakiniks, Kiyis, Sikutsipumaiks, Sikopoksimaiks, Tsiniksistsoyiks, Kutaiimiks, Ipoksimaiks, Sikokitsimiks, Nitawyiks, Apikaiyiks, Miahwahpitsiks, Nitakoskitsipupiks, Nitikskiks, Inuksisks, Miawkinaiyiks, Esksinaitupiks, Inuksikahkopwaiks, Kahmitaiks, Kutaisotsiman, Nitotsiksisstaniks, Motwainaiks, Mokumiks, and Motahtosiks. Hayden (Ethnog. and Philol. Mo. Val., 264, 1862) gives also Susksoyiks.

In 1858 the Piegan in the United States were estimated to number 3,700. Hayden 3 years later estimated the population at 2,520. In 1906 there were 2,072 under the Blackfeet agency in Montana, and 493* nnder the Piegan agency in Alberta.

Muddy River Indians .- Franklin, Journ. to Polar Sea, 97, 1824. Paegan.-Umfreville (1790) in Me. Hist. Soc. Coll., vi., 270, 1859. Pa-e-guns.-Prichard, Phys. Hist. Mankind, 414, 1847. Pagans.-U. S., Ind. Aff. Rep., 593, 1837. Paygans.—Kane, Wanderings in N. A., 366, 1859. Peagan.-Henry, MS. vocab., Bell copy B. A. E., 1812. Peagin .- Robinson, Great Fur Land, 195, 1879. Peaginou.-Ibid., 188. Piekouagami (a form seemingly cognate with the Cree Piyakwagami and with Pakwagami, the Algonkin name of the Montagnais, the elements of which are påkkwa 'shallow (water),' 'flat,' and -gami 'lake,' 'expanse of water,' the two elements together signifying 'flat lake.' The so-called vocalic change transformis påkkwa into piyakkwa, which with -gami forms Piyakkwagami, or, as sometimes written, Piakwagami, originally the name given to lake St. John, Canada, by the Kakouchaki, or Porcupine tribe. From the Jesuit Relation for 1672 (44, 1858) it is learned that the country around lake St. John was beautiful, and the soil was good and land abounded in otter, elk, beaver, and especially in porcupines. For this reason the people who dwelt on the shores of this lake received the name Kâkouchac (Kâkkasewok, 'porcupines,' not from kâkwa, 'porcupine,' but rather from a term which is the source of both, namely, kâkk, 'rude, rough, or harsh to the touch'; whence, Kâkkasewok, 'they have skin harsh to the tonch').

According to the Jesuit Relation for 1641 (57, 1858), the Kakouchaki, or Porcupine people, were one of a number of inland tribes which, having heard the gospel in their own countries, were expected to remove to the residence of St. Joseph at Sillery, although the fear of the Iroquois, the common enemy of all these tribes, was a great obstacle to the contemplated removal and consolidation of small tribes. The Porcupines were reputed good, docile, and quite easily won to the Christian faith.

From the Jesuit Relation for 1672 (44, 1858), it appears that at that early time (1641-72) lake St. John was a trading centre for all the tribes dwelling between Hudson bay and St. Lawrence r.; that more than 20 tribes had been seen at this place; that the Porcupines were greatly reduced in numbers by their recent wars with the Iroquois and by smallpox; but that since the general peace of 1666 the population had increased by small additions from other tribes arriving there from various places.

The Jesuit Relation for 1647 (65, 1858), in describing the lake, says: "It is surrounded by a flat country ending in high mountains distant from 3, 4, or 5 leagues from its banks; it is fed by about 15 rivers, which serve as

^{*} There were 448 in 1911.

highways to the small tribes which are inland to come to fish therein and to maintain the trade and friendship which exist among them. We rowed for some time on this lake, and finally we arrived at the place whefe the Indians of the 'nation of the Porcupine' were.' This would indicate that the dwelling-place of the Kakouchaki, or Porcupine people, was some distance from the outlet of the lake.

(J. N. B. H.)

Pieskaret. The Algonkin name, often written Piskater, of a noted Algonkin (Adirondack) chief, who lived on the x. bank of the river St. Lawrence, below Montreal, in the first half of the 17th century. According to Schooleraft (W. Scenes and Remin., 87, 1853) the dialectic form in his own tribe was Bisconaee ('Little Blaze'). Although he became noted by reason of his daring, comparatively few incidents of his life have been recorded. Charlevoix (New France, II, 181, 1866) says he was "one of the bravest men ever seen in Canada, and almost incredible stories are told of his prowess." His most noted exploit occmred during an excursion into the Iroquois eountry with but four followers, well armed with guns, when they encountered on Richelieu r., in five boats, a band of 50 Iroquois, most of whom they killed or captured. On another occasion Pieskaret ventured alone within the Iroquois domain, and coming to one of their villages, by secreting himself during the day, succeeded in killing and scalping the members of a household each night for three successive nights. He was ultimately brought under the influence of Catholic missionaries and in 1641 was baptized under the name Simon, after which he was commonly known among the whites as Simon Pieskaret. After his acceptance of Christianity so much confidence was placed in his prudence and ability that he was commissioned to maintain peace between the French and the Indians, as well as between the Hurons and Algonkin; he was authorized to punish delinquents, "and especially those who committed any fault against religion. It is wonderful how he discharged his office." (Jes. Rel. 1647, XXXI, 287, 1898.) He was present and made a speech at the conference between the French governor and the Iroquois and other tribes at Three Rivers, Quebec, in 1645. Two years later, while a large body of Iroquois were going on a pretended visit to the governor, some of their scouts met Pieskaret near Nicolet r., and treacherously killed him while off his guard. (C. T.)

Pikiulak. A winter and spring settlement of the Aivifirmiut Eskimo on Depot id., N. E. of Chesterfield inlet, Hudson bay.

Pikiulaq.—Boas in 6th Rep. B. A. E., map, 1888.

Pilalt. A Cowichan tribe on lower Chilliwak r. and part of Fraser r., Brit. Col. According to Hill-Tout they numbered 25 in 1902. Their villages were Chutil, Kwalewia, Skelantuk, Skwala, and Sehachuhil. Boas adds Cheam, but if he is right that town must contain several tribes.

Paffalts.—Mayne, Brit. Col., 295, 1862. Pafā'tlq.—Boas in Rep. 64th Meeting B. A. A. S., 454, 1894. Pilatt.—Tolmie and Dawson, Vocabs. Brit. Col., 120s, 1884. Pila'tlq.—Hill-Tout in Ethnol. Surv. Can., 48, 1902.

Niblack refers to houses raised on high logs or stilts. He states that, "according to Vancouver, amongst the Kwakiutl of Johnstone strait, there were dwellings 'raised and supported near 30 ft. from the ground by perpendicular spars of very large size' with 'access formed by a long tree in an inclined position from the platform to the ground, with notches cut in it by way of steps about a foot and a half asunder.' "According to Boas the Bellacoola also erected pile dwellings. See Architecture, Habitations.

Consult Niblack in Rep. Nat. Mus. 1888, 1890, Vancouver, Vov., 1801.

(W. H. H.)

2 GEORGE V., A. 1912

Pilingmiut. A tribe of Eskimo in w. Ballin island, on the x. E. coast of Fox basin. Their village is Piling, whence their name.

Peelig. Parry, Sec. Voy., 355, 449, 1824 (the village). Piling.—Boas in 6th Rep. B. A. E., 444, 1888 (the vilage). Pilingmiut.—Ibid. (the tribe)

Pilteuk (Pil-tē'-nk, 'white earth'). A Shuswap village at Clinton, on a w. affluent of Bonaparte r., a n. tributary of Thompson r., interior of British Columbia; pop. 50 in 1906. Clinton.—Can Ind Aff., pt. 11, 162, 1901 (white man's name). Pil-tē'-uk.—Dawson in Trans. Roy Soc. Can., see. 11, 44, 1891

Pingitkalik. A winter settlement of Iglulirmint Eskimo in N. Melville penin., Franklin—Lyons, Priv. Jour., 403, 1824.

Pintce ('confluence of Pin river'). A village of the Nikozliautin on Stuart lake, Brit. Col., at the mouth of Pintce r.; pop. 38 in 1911.

Pinchy.- Harmon, Jour., 205, 1820. Pintce. Morice in Trans. Roy. Soc. Can., x, 109, 1892

Piskakauakis (Apistikākūkis, magpie, lit. 'small rayen.'—Hewitt). A Cree band living in the vicinity of Tinder mtn.,* in 1856. They occupied 30 earth lodges and log cabins, and cultivated small patches of corn and potatoes; during the winter they hunted buffalo and traded the hides to the Hudson's Bay Co.—Hayden, Ethnog. and Philol. Mo. Val., 237, 1862.

Piskaret. See Pieskaret.

Piskitang. An unidentified Algonquian tribe or band formerly living near the Nipissing in Canada.

Piskatang—Jes. Rel., Thwaites ed., xi.v., 105, 1899. Piskitang—Jes. Rel. 1653, 32, 1858

Pissuh (cognate with Chippewa pijiu, 'lynx.'—W. J.). A gens of the Abnaki.

Pezo.—J. D. Prince, inf'n, 1905 (modern St. Francis Abnaki form) — Pijf'n.—Wm. Jones, inf'n, 1906 (Chippewa form) — Pis-suh'.—Morgan, Anc. Soc., 174, 1877

Pitchibourenik. A tribe or supposed tribe formerly residing near the E. side of James bay, Quebec; probably a band of the Cree.

Pitchiboucount.—La Tour Map, 1784. Pitchiboucount.—La Tour Map, 1779. Pitchib8renik.—Jes. Rel. 1660, 11, 1858. Pitchiboutounibuek.—Jes. Rel. for 1672, 54, 1858.

Pitiktaujang. A summer village of the Aivilirmiut Eskimo on Repulse bay, N. extremity of Hudson bay.—Boas in 6th Rep. B. A. E., 446, 1888.

Pohomoosh. A Micmae village or band in 1760, probably in Nova Scotia.—Frye (1760) in Mass. Hist. Soc. Coll., 1st s., x, 116, 1809.

Poiam. A Squawmish village community on the right bank of Skwamish r., w. Brit. Col.

Pōia'm.—Hill-Tout in Rep. B. A. A. S., 474, 1900, P'ōyam.—Boas, MS , B. A. E , 1887

Pokaiosum (Pō'kaiō'snm, 'slide'). A Squawmish village on the left bank of Skwamish r., Brit. Col.—Hill-Tout in Rep. B. A. A. S., 174, 1900.

Ponokix (Po-no-kix', 'elk'). Given by Morgan (Anc. Soc., 171, 1877) as a division of the Kainah tribe of the Siksika. Cf. Siksino-kaks, 'Black Elks'.

Pontiac. An Ottawa chief, born about 1720, probably on Maumee r., Ohio, about the mouth of the Auglaize. Though his paternity is not positively established, it is most likely that his father was an Ottawa chief and his mother a Chippewa woman, J. Wimer (Events in Ind. Hist., 155, 1842) says that as early as 1746 he commanded the Indiansmostly Ottawa—who defended Detroit against the attack of the northern tribes. It is supposed he led the Ottawa and Chippewa warriors at Braddock's defeat. He first appears prominently in history at his meeting with Maj. Robert Rogers, in 1760, at the place where Cleveland, Ohio, now stands. This officer had been despatched to take possession of Detroit on behalf of the British. Pontiae objected to the further invasion of the territory. but, learning that the French had been defeated in Canada, consented to the surrender of Detroit to the British, and was the means of preventing an attack on the latter by a body of Indians at the mouth of the strait. That which gives him most prominence in history and forms the chief episode of his life is the plan he devised for a general uprising of the Indians and the destruction of the forts and settlements of the British. He was for a time disposed to be on terms of friendship with the British and consented to acknowledge King George, but only as an "uncle," not as a superior. Failing to receive the recognition he considered his due as a great sovereign, and being deceived by the rumour that the French were preparing for the reconquest of their American possessions, he resolved to put his scheme into operation. Having brought to his aid most of the tribes x. w. of the Ohio, his

^{*}Probably, Touchwood latts, Sask

Plan was to make a sudden attack on all the British posts on the lakes at once —at St. Joseph, Ouiatenon, Michilimackinac, and Detroit—as well as on the Miami and Sandusky. and also attack the forts at Niagara, Presqu'isle, Le Bœuf, Venango, and Pitt (Du Quesne). The taking of Detroit was to be his special task. The end of May 1763 was the appointed time when each tribe was to attack the nearest fort and, after killing the garrison, to fall on the adjacent settlements. It was not long before the posts at Sandusky, St. Joseph, Miami (Ft. Wayne), Ouiatenon, Michilimackinac, Preson'isle, Le Bœuf, and Venango were taken and the garrison in most cases massacred; but the main points, Detroit and Ft. Pitt, were successfully defended and the Indians forced to raise the siege. This was a severe blow to Pontiac, but his hopes were finally erushed by the receipt of a letter from M. Nevon, commander of Ft. Chartres, advising him to desist from further warfare, as peace had been concluded between France and Great Britain. However, unwilling to abandon entirely his hope of driving back the British, he made an attempt to incite the tribes along the Mississippi to join in another effort. Being unsuccessful in this attempt, he finally made peace at Detroit, Aug. 17, 1765. In 1769 he attended a drinking carousal at Cahokia, III, where he was murdered by a Kaskaskia Indian. Pontiac, if not fully the equal of Teeumseh, stands closely second to him in strength of mind and breadth of comprehension.

Consult Parkman, Conspiracy of Pontiae; Randall, Pontiae's Conspiracy, in Ohio Archaeol, and Hist. Quar., Oct. 1903; Hough, Diary of the Siege of Detroit in the War with Pontiac, 1860.

Popkum. A Cowichan tribe in a town of the same name on Popkum res., lower Fraser r., Brit. Col.; pop. 11 in 1911.

Pā'pk'um, —Boas in Rep. Brit. A. A. 8, 454, 1894
 Popcum. —Can. Ind. Aff., pt. 11, 160, 1901. Popkum. —Ibid., 309, 1879.

Population. The question of the number of the native population of America, and particularly of the United States and British America, at the coming of the white man, has been the subject of much speculation. Extremists on the one hand have imagined a population of millions, while on the other hand the untenable claim has been made, and persistently repeated, that there has been no decrease, but that on the contrary, in spite of removals,

wars, epidemics, and dissipation, and the patent fact that the aboriginal population of whole regions has completely disappeared, the Indian has thriven under misfortune and is more numerous to-day than at any former period. The first error is due in part to the tendency to magnify the glory of a vanished past, and in part to the mistaken idea that the numerous ancient remains scattered over the country were built or occupied at practically the same period. The contrary error—that the Indian has increased—is due to several causes. chief of which is the mistake of starting the calculation at too recent a period, usually at the establishment of treaty relations. The fact is that, between the discovery of America and the beginning of the federal government, the aboriginal population had been subjected to nearly three conturies of destructive influences, which had already wiped out many tribes entirely and reduced many others to mere remnants. Another factor of apparent increase is found in the mixed-blood element. which is officially counted as Indian, although frequently representing only $\frac{1}{17}$, $\frac{1}{32}$ or even $\frac{1}{64}$ of Indian blood, while in the late Indian Ter. (Oklahoma) it is well known that the tribal rolls contain thousands of names repudiated by the former tribal courts. The Indian of the discovery period was a full-blood; the Indian of to-day is very often a mongrel, with not enough of aboriginal blood to be distinguishable in the features, yet, excepting in a few tribes, no official distinction is made.

The chief causes of decrease, in order of importance, may be classed as small-pox and other epidemics; tuberculosis; sexual diseases; whisky and attendant dissipation: removals, starvation and subjection to unaccustomed conditions; low vitality due to mental depression under misfortune; wars. In the category of destroyers all but wars and tuberculosis may be considered to have come from the white man, and the increasing destructiveness of tuberculosis itself is due largely to conditions consequent upon his advent. Smallpox has repeatedly swept over wide areas, sometimes destroying perhaps one-half the native population within its path. One historic smallpox epidemic originating on the upper Missouri in 1781-82 swept northward to Great Slave lake, eastward to lake Superior, and westward to the Pacific. Another, in 1801-02, ravaged from the Rio Grande to Dakota, and another, in 1837-38, reduced the strength of the northern Plains tribes by nearly one-half. A fever

2 GEORGE V., A. 1912

visitation about the year 1830 was officially estimated to have killed 70,000 Indians in California, while at about the same time a malarial fever epidemic in Oregon and on the Columbia—said to have been due to the ploughing up of the ground at the trading postsravaged the tribes of the region and practically exterminated those of Chinookan stock. The destruction by disease and dissipation has been greatest along the Pacific coast, where also the original population was most numerous. In California the enormous decrease from about a quarter of a million to less than 20,000 is due chiefly to the cruelties and wholesale massacres perpetrated by the miners and early settlers. The almost complete extermination of the Aleut is attributable to the same causes during the early Russian period. Confinement in mission establishments has also been fatal to the Indian, in spite of increased comfort in living conditions. Wars in most cases have not greatly diminished the number of Indians. The tribes were in chronic warfare among themselves, so that the balance was nearly even until, as in the notable case of the Iroquois, the acquisition of firearms gave one body an immense superiority over its neighbours. Among the wars most destructive to the Indians may be noted those in Virginia and southern New England, the raids upon the Florida missions by the Carolina settlers and their savage allies, the wars of the Natchez and Foxes with the French, the Creek war, and the war waged by the Iroquois for a period of thirty years upon all the surrounding tribes.

A careful study of population conditions for the whole territory N. of Mexico, taking each geographic section separately, indicates a total population, at the time of the coming of the white man, of nearly 1,150,000 Indians, which is believed to be within 10 per cent of the actual number. Of this total \$46,000 were within the limits of the United States proper, 220,000 in British America, 72,000 in Alaska, and 10,000 in Greenland. The original total is now reduced to about 403,000 a decrease of about 65 per cent. The report of the Dept. of Indian Affairs for 1911 states that the total native population of Canada is 108,261—including 4,600 Eskimos.

Port Essington. A modern town, occupied by Tsimshian and whites, at the mouth of Skeena r., Brit. Col. It is important as a port and as a centre of the canning industry. Pop. in 1911, with Kitsumgallum, 160.

Port Simpson. A modern town, formerly called Fort Simpson, on the N. w. coast of British Columbia between Methakatla and the mouth of Nass r., built up around a Hudson's Bay Co.'s stockade. In 1911 it contained 717 Tsimshian Indians.

Potawatomi (J. B. Bottineau, speaking Chippewa and Cree fluently, gives Potawatamiñk or Potawaganiñk, i.e. People of the place of the fire,' as the primary form of the name. This derivation is strongly confirmed by the Huron name Asistaguerouou (Champlain, 1616), for Otsistă'ge'ronnon,' likewise signifying 'People of the place of fire,' which was applied by them to their enemies who dwelt in 1616 on the w. shores of lake Huron. The Jesuit Relation for 1671 (42, 1858) has the following passage: "Four nations make their abode here, namely, those who bear the name Puans (i.e., the Winnebago), who have always lived here as in their own country. and who have been reduced to nothing from being a very flourishing and populous people, having been exterminated by the Illinois, their enemies; the Potawatomi, the Sauk, and the Nation of the Fork (la Fourche) also live here, but as strangers (or foreigners), driven by the fear of Iroquois [The Neuters and Ottawal from their own lands which are between the lake of the Hurons and that of the Illinois." The Jesuit Relations employ the expression "Nation of Fire," until in the one for 1670 (p. 94) occurs the first use of "Makskouteng," who are represented as living then on Fox r. in what is now Wisconsin. Hence it seems clear that the term "nation of fire" was originally applied to the Potawatomi and their close neighbours, the Sauk and the "Nation of the Fork," dwelling on the w. shore of lake Huron. And since a part at least of the Potawatomi tribe bears the name Maskotens, officially known as the "Prairie Band," and the tribe as a whole was a part of those who were called "People of the Fire," a natural confusion arose as to the application of these two names, and so the term "Fire Nation" at last became permanently affixed to a people whose proper name was "People of the Small Prairie," latterly known as the Mascoutens.-Hewitt). An Algonquian tribe, first encountered on the islands of Green bay, Wis., and at its head. According to the traditions of all three tribes, the Potawatomi, Chippewa, and Ottawa were originally one people, and seem to have reached the region about the upper end of

lake Huron together. Here they separated, but the three have sometimes formed a loose confederacy, or have acted in concert, and in 1846 those removed beyond the Mississippi, asserting their former connection, asked to be again united. Warren conjectured that it had been less than three centuries since the Chippewa became disconnected as a distinct tribe from the Ottawa and Potawatomi. In the Jesuit Relation for 1640 the Potawatomi are spoken of as living in the vicinity of the Winnebago, Verwyst Missionary Labours, 211, 1886) says that in 1641 they were at Sault Ste. Marie, fleeing before the Sioux. The Jesuit Relation of 1642, speaking of the meeting of Raymbault and Jogues with the tribes at Sault Ste. Marie, says that "a certain nation farther away, which they called Pouteatami, had abandoned its country and taken refuge with the inhabitants of the Sault in order to escape from some other hostile nation which was continually harassing them." At the "feast of the dead" attended by Raymbault and Jogues in 1641, somewhere E. or N. E. of lake Huron, the Chippewa and Potawatomi appear to have been present. In 1667, Allouez met 300 of their warriors at Chaquamegon A portion of them were dwelling in 1670 on the islands in the mouth of Green bay, chiefly about the Jesuit mission of St. François-Xavier. They were then moving southward. and by the close of the 17th century had established themselves on Milwaukee r., at Chicago, and on St. Joseph r., mostly in territory that had previously been held by the Miami. After the conquest of the Illinois, about 1765, they took possession of the part of Illinois lying N. E. of the country seized by the Sauk, Foxes, and Kickapoo, at the same time spreading eastward over southern Michigan and gradually approaching the Wabash. At the treaty of Greenville, in 1795, they notified the Miami that they intended to move down upon the Wabash, which they soon afterward did, in spite of the protests of the Miami, who claimed that whole region. By the beginning of the 19th century they were in possession of the country around the head of lake Michigan, from Milwaukee r. in Wisconsin to Grand r. in Michigan, extending s. w. over a large part of N. Illinois, E. across Michigan to lake Erie, and s. in Indiana to the Wabash and as far down as Pine er. Within this territory they had about 50 villages. The principal divisions were those of St. Joseph r. and Huron r., Mich., Wabash

r., and the Prairie band of Potawatomi in Illinois and Wisconsin.

The Potawatomi sided actively with the French down to the peace of 1763; they were prominent in the rising under Pontiac, and, on the breaking out of the Revolution in 1775, took arms against the United States and continued hostilities until the treaty of Greenville in 1795. They again took up arms in the British interest in 1812, and made final treaties of peace in 1815. As the settlements rapidly pressed upon them, they sold their land by piecemeal, chiefly between the year-1836 and 1841, and removed beyond the Mississippi. A large part of those residing in Indiana refused to leave their homes until driven out by military force. A part of them escaped into Canada and are now settled on Walpole id. in lake St. Clair. Those who went w. were settled partly in w. lowa and partly in Kansas, the former, with whom were many individuals of other tribes, being known as Prairie Potawatomi, while the others were known as Potawatomi of In 1846 they were all united the Woods. on a reservation in s. Kansas. A part of them was known as the Keotue band. In 1861 a large part of the tribe took lands in severalty and became known as Citizen Potawatomi, but in 1868 they again removed to a tract in Indian Ter. (Oklahoma, where they now are. The others are still in Kansas, while a considerable body, part of the Prairie band, is yet in Wisconsin, and another band, the Potawatomi of Huron, is in lower Michigan.

The Indians of this tribe are described in the early notices as "the most docile and affectionate toward the French of all the savages of the west." They were also more kindly disposed toward Christianity, besides being more humane and civilized than the other tribes. Tailhan says: "Their natural politeness and readiness to oblige was extended to strangers, which was very rare among these peoples. Up to this time (1764) they have resisted the rum and brandy with which the Anglo-Saxons have poisoned the other tribes." Sir William Johnson, however, complained in 1772 of robberies and murders committed by them through the intrigues and jealousy of the French traders. Their women were more reserved than was usual among Indians, and showed some tendency toward refinement in manners. The Potawatomi of Milwaukee r., who were considerably intermixed with Sauk and Winnebago, were described about 1825

2 GEORGE V., A. 1912

as being lazy fellows, as a rule preferring to fish and hunt all summer long rather than to cultivate corn, and noted players of the moccasin game and lacrosse, heavy gamblers and given to debauchery. Polygamy was common among the Potawatomi when they were visited by the early missionaries.

According to Schooleraft, it is believed by the Potawatomi that there are two spirits who govern the world; one is called Kitch -monedo, or the Great Spirit: the other Matchemonedo, or the Evil Spirit; the first is good and beneficent, the other wicked. But all this is the result of Christian teaching. In former times the Potawatomi worshipped the sun to some extent-at least they sometimes offered sacrifice in honour of the sun in order that the sick might recover or that some desire might be obtained. They were accustomed, as were several other tribes of the N. W., to hold what has been called the "feast of dreams," during which their special or individual manito was selected. Dog meat was the flesh chiefly used at this feast. Burial was probably chiefly by inhumation, though there is some evidence that scaffold exposure was practised by the western part of the tribe. Sir Daniel Wilson alludes to certain graves surmounted by small mounds, which the survevors informed him were Potawatomi burial places. Other graves of the same character found in Iowa are also known to have been burial places of people of the same tribe. Cremation was sometimes resorted to, but this appears to have been limited exclusively to those belonging to the Rabbit gens. About the year 1825 many of them took up the doctrine of the Kickapoo prophet Kanakuk. The Potawatomi have a tendency to elide vowels and syllables, due to the rapidity with which the dialect is spoken as compared with that of the Ottawa and the Chippewa W. Jones, infin, 1906).

Chauvignerie (1736) mentions among the Potawatomi totems the golden carp, frog, tortoise, erab, and erane. According to Morgan (Anc. Soc., 167, 1877) they have 15 gentes, as follows: (i) Moah, 'Wolf'; (2) Mko, 'Bear'; (3) Muk, 'Beaver'; (4) Misshawa 'Elk'; (5) Maak, 'Loon'; (6) Knou, 'Eagle'; (7) Nma, 'Sturgeon'; (8) Nmapena, 'Carp'; (9) Mgezewa, 'Bald Eagle'; (10) Chekwa, 'Thunder'; (11) Wabozo, 'Rabbit'; (12) Kakagshe, 'Crow'; (13) Wakeshi, 'Fox'; (14) Penna, 'Turkey'; (15) Mketashshekakah, 'Black Hawk,'

The tribe probably never greatly exceeded 3,000 souls, and most estimates place them far below that number. The principal estimates give them about 1.500 in 1765, 1.750 in 1766, 2,250 in 1778, 2,000 in 1783, 1,200 in 1795, 2,500 in 1812, 3,400 in 1820, and 1,800 in 1843. The last estimate does not include those who had recently fled to Canada. In* 1908 those in the United States were reported to number 2.522, distributed as follows: Citizen Potawatomi in Oklahoma, 1,768: Prairie band in Kansas, 676; and Potawatomi of Huron in Calhoun co., Mich., 78. A few besides these are scattered through their ancient territory and at various other points. Those in British territory are all in the province of Ontario and number about 220, of whom 173 are living with Chippewa and Ottawa on Walpole id, in L. St. Clair, and the remainder (no longer officially reported) are divided between Caradoe and river Ausable. where they reside by permission of the Chippewa and Munsee. (J.M. J.N.B.H.)

E., 1881 (Wyandot name), Wah-hō'-na-hah.-Dunn, True Ind. Stories, 299, 1908 (Miami name). Wáhiúéaqá.—Dorsey in Cont. N. A. Ethnol., vi, pt. 2, 664, 1890 (Omaha name). Wáhiúyaha.—Dorsey, Kansas, MS, vocab., B. A. E., 1882 (Kansa name). Wa-h'ona-ha.-Long, Exped. St. Peter's R , 1, 92, 1824 ('firemakers': Miami name). Wapoos.-La Salle (1680) quoted by Parkman, La Salle, 180, 1883 (identical?). Woraga.—Dorsey, Triwere MS, vocab., B. A. E., 1879 (Iowa, Oto, and Missouri name). Wo-rá-qě.—St. Cyr, inf'n, 1886 (Winnebago name).

Potlas (Pö'tlas). A gens of the Nuhalk people, a Bellacoola subdivision of the coast of British Columbia.—Boas in 7th Rep. N.W. Tribes Can., 3, 1891.

Potlatch. The great winter ceremonials among the tribes of the N. Pacific coast from Oregon to Alaska. The word has passed into popular speech along the N. W. coast from the Chinook jargon, into which it was adopted from the Nootka word patshatl, 'giving,' or 'a gift.'

Although varying considerably in different parts of the coast, these potlatches were mainly marked, as the name implies, by the giving away of quantities of goods, commonly blankets. The giver sometimes went so far as to strip himself of nearly every possession except his house, but he obtained an abundant reward, in his own estimation, in the respect with which his fellow-townsmen afterward regarded him, and when others "potlatched" he, in turn, received a share of their property with interest, so that potentially he was richer than before. During the festival in which the gifts were made, houses and carved poles were raised, chiefs' children were initiated into the secret societies, their ears, noses, and lips were pierced for ornaments, and sales of copper plates, which figured prominently in the social and economic life of the people of this region, took place. Among the Haida,

children were then tattooed. All was accompanied with dancing, singing, and feasting. Consult Boas in Rep. Nat. Mus. for 1895. See Fasting, Feasts, Hospitality. (J. R. S.)

Puhksinahmahyiks ('flat bows'). A band of the Siksika, or Blackfeet.

Flat Bows.—Grinnell, Blackfoot Lodge Tales, 208, 1892. Puh-ksi-nah'-mah-yiks.—Ibid

Puisascamin. An unidentified tribe or band formerly in the neighbourhood of Hudson bay or the Upper lakes, trading with the French. —La Barre (1683) in N. Y. Doc. Col. Hist., IX, 798, 1855.

Pujetung. A spring settlement of Kingua Okomiut Eskimo on an island in Cumberland sd., near the entrance to Nettilling fiord, Baffin island.—Boas in 6th Rep. B. A. E., map, 1888.

Puntlatsh. A Salish tribe on Baynes sd. and Puntledge r., E. coast of Vancouver id. In 1893 they numbered 45; in 1896, the last time their name appears in the Canadian Reports on Indian Affairs, the "Puntledge, Sailup-Sun, and Comox" numbered 69, since which time they have apparently been classed with the Comox. The Puntlatsh dialect embraces the Puntlatsh, Saamen, and Hwahwatl.

(J. R. S.)

P'e'ntlate.—Boas in 5th Rep. N. W. Tribes Can., 10, 1889. Puntlatsh.—Tolmie and Dawson, Vocabs. Brit. Col., 1198, 1884. Punt-ledge.—Can. Ind. Aff. for 1893, 302, 1894.

Qailertetang (Khai-ler-te'-lang). Amazons of Central Eskimo mythology. They have no men among them, but masked figures of them mate the couples in a Saturnalian festival.—Boas in 6th Rep. B. A. E., 605, 640, 1888.

Qanikilak (Q'ānikīlaq). An ancestor of a Nakomgilisala gens, after whom the gens itself was sometimes called.—Boas in Petermanns Mitt., pt. 5, 131, 1887.

Quahaug. A name in use in the Maritime provs. for the round or hard clam (*Venus mercenaria*); spelt also quahog. This word is probably a reduction of poquauhock in the Narraganset, the same as poquahoc in the Massachuset dialect of Algonquian, the Indian name for this shell-fish. The last half of the word has survived in English, while in Nantucket the first part has come down as poaquaw. The word appears also as cohog, and even in the truncated form hog. As a

place name it appears in Quogue, a village in Suffolk co., N. Y.

(A. F. C.)

Quamichan. A Salish tribe in Cowichan valley, s. E. Vancouver id., speaking the Cowichan dialect; pop. 300 in 1901, 245 in 1911.

Kwaw-ma-chin.—Can. Iad. Aff., 308, 1879. Quamichan.—Ibid., pt n, 164, 1901. Xnámitsan.—Boas MS., B. A. E., 1887.

Quane. Given by Kane (Wand. in N. A., app., 1859) as the name of a tribe at cape Scott, N. w. end of Vancouver id., but Boas explains it as merely the native name for the cape. The people included under the designation, said to number 260, must have been part of the Nakomgilisala. (J. R. S.)

Quatsino (Guáts'ēnóx, 'people of the north country'). A Kwakiutl tribe living at the entrance of the sound of the same name at the N. end of Vancouver id., Brit. Col. Their gentes are Hamanao and Quatsino (or Guatsenok). Their principal winter village in 1885 was Owiyekumi, and another called Tenate was occupied in summer. Pop. 20 in 1911.

(J. R. S.)

Gua'ts'ënoq.—Boas in 6th Rep. N. W. Tribes Can, 53, I890. Gua'ts'ënôx. Boas in Rep. Nat: Mus. 1895, 329, 1897. Kwat-se-no.—Can. Ind. Aff., 279, 1894. Kwats'ënoq.—Boas in Petermnans Mitt., XXXIII, 131, 1887. Kwatsino.—Tolmie and Dawson, Vocabs. Brit. Col., 118B, 1884. Kwat-zi-no.—Ibid. Kwawt-se-no.—Can. Ind. Aff., 189, 1884. Quatsenos.—Can Ind. Aff., 113, 1879. Quatsino.—Mayne, Brit. Col., 251, 1862. Quat-si-nu.—Kanc, Wand. in N. A, app., 1859.

QuawqualaIp. A Cowiehan town on lower Fraser r., opposite Yale, Brit. Col.—Brit. Col. map, Ind. Aff., Victoria, 1872.

Queeah. Given in John Wark's list (Schooleraft, Ind. Tribes, v, 489, 1885) as the name of a Haida town of 20 houses with 308 inhabitants in 1836–41. It was perhaps Ninstints (q. v.), which was on an island, Queeah being merely *Guai-a*, 'it is an island,'

(J. R. S.)

Quelshose. Given officially (Can. Ind. Aff., 78, 1878) as a Salish band or village of Fraser superintendency, Brit. Col.; perhaps identical with Clahoose.

Quickhatch (also quickehatch, quiquihatch, quecquhatch). A name, first mentioned by Ellis in 1748, applied by the English residents of the Hudson Bay country to the wolverene, Gulo luscus. The word is from Cree kwikkwāhaketsh = Prairie Cree kikkwāhakes = (minus the derogative suffix -s or -sh) Chippewa qwing-

winge, the 'scathless' or 'invulnerable' beast; from the root kwĭkkw, kĭkkw, 'to be just grazed', but not hit, by a blow or shot aimed at; 'hard to hit' would be a coneise interpretation. (w. R. G.)

Quinaouatoua. A former Iroquois village in Ontario, w. of lake Ontario, between Hamilton and Grand river.

Quinaouatoua.—Bellin, Map, 1755 — Quinaoutoua.—La Tour, Map, 1784. — Tinaoutoua.—Homann Heirs Map, 1756.

Quinnat. An economically important species of salmon (Salmo quinnat) of the Pacific coast of North America: the common salmon of the Columbia, known also as tyee salmon, Chinook salmon, etc. From t'kwinnat, the name of this fish in Salishan dialects current in the Columbia R. region. According to Boas, the Upper Chinook form is iginat.

(A. F. C.)

Quisaht (prob. 'people on the other side'). A name given to the Nootka settlements "beyond the Yuclulaht' (Ucluelet).—Sproat, Savage Life, 303, 1868.

Qunahair ('pleasant place'). An inhabited Niska village of 5 old-fashioned houses with totem-poles in front; situated on a gravel flat at the edge of the woods, on the s. bank of Nass r., Brit. Col., just below the cañon. In 1906 the inhabitants were about to leave it and to settle several miles above, at the lower end of the cañon.

(G. T. E.)

Quoddy. A variety of large herring found in Passamaquoddy bay, Me. From the place and ethnic name Passamaquoddy, Peskěděmakádi, according to Gatschet (Nat. Geog. Mag., VIII, 23, 1897), which signifies 'abundance of pollock' in the Passamaquoddy dialect. The truncated form Quoddy appears also in place nomenclature. There are also ''quoddy boats'' in this region. (A. F. C.)

Rabbit Assiniboin. A small band of Assiniboin living in 1829 in Saskatchewan, w. of the Red River band.—Henry, Jour., 11, 522, 1897.

Race names. The names given to the white man by the various Indian tribes exhibit a wide range of etymological signification, since the newcomers received appellations referring to their personal appearance, arrival in ships, arms, dress, and other accoutrements, activities, merchandise and articles brought with them, as iron, and fancied correspondence to figures of aboriginal myth and legend. A few

2 GEORGE V., A. 1912

tribes borrowed words to designate the white man, probably before they actually saw him. Some others extended the term at first employed for Englishmen or Frenchmen to include all white men with whom they afterward had to do. In the following examples the native names have been simplified so far as possible.

Algorquian names.—Among the various languages of the Algonquian stock a number of different terms for white man are to be found. The Arapaho has wiatha, wanagakamet, nihanatayeche, etc. The last signifies 'vellow hide,' the second 'white-skinned.' Of niatha Mooney (14th Rep. B. A. E., 1020, 1896) says: "The word signifies literally expert, skilful, or wise, and is also the Arapaho name for the spider." Kroeber (Trad. of Arapaho, 8, 1902) says the name is given to the character in Arapaho traditions corresponding to the Algonquian Nanabozho, Napi, etc., and the Siouan Ishtinike, while at the same time it is now "the ordinary word for white men in Arapaho just as in Chevenne the name of the mythical character Vihlo has been applied to the whites." (See also Wake, Nihancan, the White Man, Am. Antiq., xxvi, 224-31, 1904.) In Siksika a white man is called napickwan, in which the -tkwan is a kind of ethnic suffix of the person. As a general term for 'white man' we have the Chippewa wayabishkiwad, 'one who is white' (generally referring to Englishmen only): Miami, wàbkělokéta, 'white skin' (a white man); equally common with these terms for whites in general is misha'kiganäsiwug, 'they of the hairy chest' (Wm. Jones, inf'n, 1906). The former Chippewa term corresponds with the Cree wapiskisiw and related words in cognate dialects. The Delaware woapsi', 'white person,' signifies literally 'he is white.' Delaware also has for 'European' schwonnach, 'person from the salt (sea).' The Chippewa term for 'Englishman,' shaganash, has been extended to mean 'white man,' just as has also the Miemac word for 'Frenchman', wetwoch, Penobscot awenoch, Abnaki awanoch, cognate with such other Algonquian terms for 'white man' as the Narraganset awaumigus, Scaticook wanux, Pequot-Mohegan wonnux, Passamaquoddy weuoch, etc., primarify derived from awan, 'who,' 'somebody,' European being looked upon as 'somebody coming.

Athapascan names.—According to Morice (Anthropos, 1, 236, 1906), the Western Déné call the whites neto, and the French su-neto,

i.e., 'the true white men.' The Navaho term for whites is *Belagana*, a corruption of the Spanish word *Americano*.

Eskimo names,—The representative Eskimo term for 'white man' is kablanak, according to Rink (Am. Anthr., xi, 181-87, 1898), a corruption by Europeans of keydlunak, 'wolf,' preserved in this sense only in the Eskimo language of the far west, the name having been given with reference to the myth of "the girl and the dogs." Another etymology derives the word from the root gauk, 'daylight,' 'white day,' so that it ultimately signifies 'having very light skin.' Petitot favours a derivation which indicates the European fashion of "wearing a cap or hat covering their forcheads down to the evebrows (kablut)." In the secret language of the central Eskimo medicine-men (Boas in Bull. Am. Mus. Nat. Hist., xv, 35, 1901) the word for 'European' is kidlatet. evidently a derivative of kidlak, the secret term for 'iron.' When the crew of the Plover reached point Barrow (Richardson, Polar Reg., 300, 1861), they were termed by the Eskimo shakenatanagmeun, 'people from under the sun,' and emakhlin, 'sea men,' but commonly nelluangmeun, 'unknown people.' The Greenland Eskimo called the Danes ukissut, 'winterers.

Iroquoian names.—The Cherokee, according to Mooney, call the white man yūnwunega, from yūnwi 'person,' and unega 'white.' Cuoq (Lex. Iroq., 112, 1882) gives for 'white man,' kihnaraken, 'my skin is white,' from keraken 'I am white,' and ohna 'skin.' Another Iroquoian term is asseroni, 'he makes axes,' the name applied by the Iroquois to the first Dutch colonists, and in Canada, in the form onseronni, to the French. Other Iroquoian names now or formerly in use are: Wyandot or Caughnawaga tullacesaga, said to mean 'morning-light people,' and ashalecoa, or assaricol, said to mean 'big knife'; Huron agnonha, 'Frenchman.'

Kitunahan names.—The Kutenai call a white man suyapi, a term identical with sucapo, given by Parker (Jour., 381, 1840) as the Nez Percé word for 'American.' Another Kutenai term is natlakene, 'stranger.' A third expression, kannuqtlo aktsnakinik, 'white man,' is probably a translation of the English term.

Sionan names.—Long (Exped. Rocky Mts', It., lxxx, 1823) gives the name for 'white man, in Oto as mazonkka, 'iron-makers,' and the

Omaha name as wahta, 'makers.' A vocabulary of about 1819 has Omaha wahe, Hidatsa washi, i. e. masi. More modern vocabularies and dictionaries give the following Siouan words for 'white man': Dakota, washechu; Mandan, wuashi: Assiniboin, wathsheechooû. These and related words signify 'vich people,' or perhaps 'generous people.' The Hidatsa term (Matthews, Hidatsa Ind., 183, 1877) for 'white' (American) is maetsihateki, or maetsiictia, i. e. 'long or big knife.'

Skitting tan names.—The Skidegate dialect of Haida has for 'white man' kelquidan, 'man white,' and yets-haidagai, 'iron people,' the latter being the usual term.

Wakashan names,—The Nootka word for 'white man' or 'European,' mamathae, signifies really 'house adrift on water,' in reference to the ships of the newcomers. The word in the Clayoquot dialect is mamathe.

The examples cited show the variety existing in the names for 'white man' among the linguistic stocks N. of Mexico and the interesting ways in which such appellations have been made up from peculiarities of a physical, mental, or social character.

Anaricans.-The American, or inhabitant of the English colonies in what is now the United States, received from the Indians during and after the wars which preceded and followed the Revolution, names which distinguished him from the Frenchman and the Englishman. Probably from the swords of the soldiery several tribes designated Americans as 'big knives,' or 'long knives.' This is the signification of the Chippewa and Nipissing chimo'koman, from kechimo'koman, 'great knife,' Cree kitchimokkuman, Delaware m'chonsikan, 'big knife' (i.e., Virginian), and eognate terms in some of the Algonquian dialects. In Menominee is found mokuman (mo'koman, 'knife'): in Wyandot (1819), saraumigh in Shawnee, shemanes:, 'big knife'; in Oto (1823), mahehunjeh; in Omaha (1823), mahhetunguh; in Dakota (1823), menahashah; in Hidatsa (1823), mancrechtect. These, like the Yankton minahanska and Teton milahanska, signify 'long or big knife.' In 1871 Rochrig gave the Dakota word for 'American' as isangtanka, 'big knife.' The Siksika term omak kistoapikwan signifies 'big-knife person'; ommakistowan has about the same meaning. The prominence of Boston in the early history of the United States led to its name being used for 'American' on both the Atlantic and

the Pacific coast. The Micmae to-day call the United States Bostoon, and an American Bostoonkawaach; the Nipissing Bastone, the Canadian Abnaki Bastoui, and the Mohawk Iroquois Wastonrnon, signify not merely the inhabitants of Boston, but the New Englanders or the people of the United States in general. The share of the men in Boston in the development of the Oregon country is recalled by the term Boston, which in the Chinook jargon designates'American.' From the jargon this word passed into a number of the languages of the Pacific coast region: Klamath, Boshtin: Kutenai, Bosten; Déné (Carrier Boston. The eastern Déné name is Besteurh-a-tinue, 'people of the big knives.' The Navaho have adopted Pelikano, or Melikano, from the Spanish *Americano. The Hopi name is Mellycawno (Bourke, Moquis of Arizona, 317, 1884), but among themselves they use the term Palama, 'eastern water people.' The Zuñi call American Melikanakwe (Cushing, in Millstone, x, 100. June, 1885. The Cherokee called Americans Anivatsini, 'Virginians,' from Watsini 'Virginia' (Mooney).

English.—One of the earliest terms for 'Englishman' is the Natick wantacone, 'coat man,' the who wears clothing." Others, the Pequot, waunuux, 'somebody coming,' the term used also for 'Frenchman' in several castern Algonquian dialects; and the Narraganset chanquaquock, 'knife men.' In the latter language Roger Williams cites Englishmanniack, and the form Englishmansog, both plurals, as also in The modern Canadian Abnaki has Iglizmon. A Shawnee vocabulary of 1819 (Trans. Am. Antiq. Soc., 1, 290, 1820 has Englishmanake. To another group belong the Micmae Aglascano, the Abnaki Anglis, the Nipissing Aganesha, the Prairie Cree Akayasiw. the Chippewa Shāganāsh (which possibly is connected with 'spearman' or the 'contempible spearman'-Wm. Jones, infin, 1906, the Ottawa Saganash, the Cree Akaias, etc., all of which are thought to be corruptions of the French 'Anglais' or 'les Anglais.' The older forms of these words, as the Missisauga (1801) zaganassa, the Montagnais 11800 Agaleshou, the Micmae (1800) Angalsheeau, Naskapi Naggaleshou, and the Nipissing Angalesha. seem to justify this belief, although it is possible some of these words may have been corrupted from 'English' instead of from 'Anglais.' The Abnaki corruption of 'Englishman' was Iglismon (Maurault, Abenakis, VII, 1866), Delaware Ingelishman. Long (Ex-

ped, Rocky Mts., 1823) gives for 'British' in Oto ragarrashing, and in Omaha sukanash, both loan words from the Algonquian. In the language of the Siksika 'Englishman' is nitapiapikwan, 'real white man.' The Canadian Mohawk of lake of Two Mountains, Quebec, call an 'Englishman' tiorhensaka, 'inhabitant of the east.' Long, early in the century, gave for 'British' in Hidatsa boshcittochresha, which he interprets as meaning 'the men who bring black cloth.' In the Chinook jargon the word for 'English' is Kintshautsh, and for 'Englishman' Kintshautshman, from 'King George,' the reigning monarch at the period in which the jargon arose. From the jargon these terms have passed into a number of the languages of the Pacific coast region: Klamath, Sking dshudsh or King Dshutch; Kutenai, Skindjatsh, 'Canadian,' 'Englishman.' The western Déné, according to Morice (Anthropos, 1, 236-7, 1906) call the English saganaz, an Algonquian loan-word; the eastern Déné term them tsé-o'tinne, 'inhabitants of the rocks.' In Creek (of the Muskhogean stock) Gatschet eites for Englishmen mikilisi, 'subjects of the great king,' with which goes Choctaw and Chicasaw minkilisi.

Scotch.—According to Cuoq (Lex. Iroq., 166, 1882), the Mohawk of lake of Two Mountains, Quebec, called the first Scotchmen (settlers) with whom they came into contact kentahere, in reference to their headdress, 'Tam O'Shanter,' which reminded them of a cow-dropping (ota). Wilson (Ojebway Lang., 343, 1874) gives Scotchmun as the term in Canadian Chippewa. Another Chippewa name is Opitotowew, 'he who speaks differently.' Rand gives in Micmae Sköjemčn.

French.—The Algonquian languages in particular furnish several special words for 'Frenchman,' individuals of that nationality having come into very close contact with many of the tribes of this stock, as settlers, coureurs des bois, and hunters and trappers, often having Indian wives and becoming members of aboriginal communities. Micmae term was wenjooch (in composition wenjoo), applied to white men, sometimes even to the English, but originally and speeifically to the Frenchman and signifying 'somebody coming.' That this was its original signification the related eastern Algonquian words for 'white man' indicate, as the Penobseot awenoch, the Pequot wanux, the Passamaquoddy wenoch, etc. Another Algonquian term for Frenchman is the Cree wemistikojiw,

Chippewa wemitigoshi, 'people of the wooden canoes,' probably akin to the Fox wämě'těgo $wisit^a$, 'one who is identified with something wooden, 'probably referring to something about clothing or implements. The Fox name for a Frenchman is wāmē tēgoshīa (Wm. Jones, inf'n, 1906); Menomince, wamcytikosiu; Missisauga. wamitigushi, etc. Lahontan translated the the old Algonkin mittigouchiouek, 'builders of vessels,' which Trumbull (Trans. Am. Philol. Asso., 154, 1871) considered incorrect, though he saw in it a reference to the 'wooden boats' of the French, mitigo meaning 'wooden.' An aged Missisauga woman related (Chamberlain, Lang. of Mississagas, 60, 1892) that the word referred to the boxes carried by the early French traders, but this may have been merely a folk etymology suggested by mitigwash, 'trunk,' 'valise.' The Siksika word for 'Frenchman' is nitsappekwan. A Shawnee vocabulary of 1819 gives Tota, and Cotton's old Massachuset vocabulary has the plural form Punachmonog, evidently taken from the Fnglish 'Frenchman.' The Abnaki corruption of 'Frenchman' was Pelajemon (Maurault, Abenakis, viii, 1866). An Hidatsa name is masik'ti, 'true white.' The Hasinai of Texas, according to Bolton, called the French Canos: in allusion to this fact the Spaniards named an Arkokisa partisan of the French, Canos.

The Mohawk of Lake of Two Mountains, Quebec, call a Frenchman onseronni, which Cuoq (Lex. Iroq., 69, 1882) interprets as 'maker of hatchets,' from konnis 'I make,' and osera 'hatchet.' This is the same name as ascronni, the appellation conferred on the first Dutch colonists of New York by the Iroquois, and apparently a more or less general term for 'white man.'

The term in Chinook jargon for Frenchman is Pasaiuks, which Hale (Chinook Jarg., 49, 1890) derives from 'Français' with the Chinook plural suffix uks. It has been used to signify also 'foreigners,' and has passed into several Indian languages of the Pacific coast region, e.g., the Klamath Pashayuks. The Kutenai call a Frenchman notlukene, 'foreigner,' 'stranger.' According to Grossman (Smithson, Rep. 1871, 412, 1873) the Pima called a Frenchman parlesick (plural paparlesick), from parle (Spanish, padre), 'priest.' The Athapascan Takulli call a Frenchman neto or nado.

German.—Some of the Indian tongues have special words for 'German.' The Chippewa term is Anima, a modification of the French Allemand, introduced by traders or mission-

aries. Baraga (Otchipwe Dict., pt. 2, 36. 1880), says: "The Indians also call a German 'Detchman,' a corruption of 'Dutchman,' as the Germans are improperly called in some parts of this country." From the French comes also the Micmac Alma. The Sauk and Fox have Tuchi'a, from 'Dutch.' In Klamath the term for 'German' is Detchmal, while in the Modoc dialect of the Lutuamian stock the name applied to the German settler is muni tchuleks gitko, 'thickset fellow' (Gatsehet, Klamath Inds., 11, 1890). Mooney (Myths of Cherokee, 141, 1902) mentions a noted Cherokee chief about 1830 who was named Tahchee, or 'Dutch.' He gives the plural Cherokee name as Anitûtsi (Cherokee MS, vocab., B. A. E., 1887). A Blackfoot word for 'German' is kistappekwan. The Creek name for a German, according to Adair (Am. Inds., 66, 1775), was yah yah algeh, 'those whose talk was ja ja.' The Chiekasaw name was kish kish tarakshe (ibid., 7.).

Negro.—Among certain Indian tribes the name of the negro signifies simply 'black flesh.' This is the meaning of the Chippewa ma'kadäwiyas, the Cree kaskite wiyas, etc. The Delaware nescalenk signifies 'black face.' Some others designate him as 'black man,' which is the sense of the Nipissing makatewinini, the Yuchi küispi, etc. 'Black Indian' is the meaning of the Kutenai kamkokokatl aktsemakinek, the latter term signifying 'Indian' as distinguished from 'man,' titkat, and kitonaga, 'Kutenai.' The Delaware nesgessit lenape has a similar signification. Sometimes the word for 'black' alone is used, as the Kutenai kamkokokoll, etc. With several tribes 'black white man,' or, in some cases, 'black foreigners,' is the real meaning of the term for negro, as the Mohave waiko kwanil and the Comanche duqtaivo, from duq, black, and taiva, 'white man' or 'foreigner'; also the Siksika siksapikwan, napikwan signifying 'white man'; and the Kiowa konkydon-k'id, 'man with black on, or incorporated into, him.' The Narraganset of Roger Williams' time "called a blackamoor suckauttacone, a coal-black man, for sucki is black and wautacone one that wears clothes"; according to Trumbull (Natick Diet., 226) sucki means 'dark-coloured,' not 'black,' and Wautacone was one of the names by which an Englishman was designated; hence, 'black Englishman' might be a fair rendering of the word. Analogous is the Menominee word for negro, a pésen wa meqtikosiu, 'black Frenchman.'

According to Gatschet the Kiowa Apache word for negro, lizhena, means 'buffalo-black-haired.' In Klamath waiha, applied to the negro, signifies 'servant,' and the Timucua atemimachu means 'his black slave.' The Klamath have besides adopted from the whites the term nigga, from which is derived niggalam shaamoksh, the term for monkey, meaning literally 'negro's kinsman.'

Ramah. An Eskimo mission established on the coast of Labrador by the Moravians in 1871.—Thompson, Moravian Miss., 230, 1890.

Rawhide. The great strength and toughness of rawhide rendered it useful to the Indian in an almost equal degree with sinew and among all tribes it was prized for these qualities. The skins of various large land and aquatic animals were made into rawhide. varying, according to the animal, in thinness. colour, strength, etc. In preparing rawhide the skin was fleshed, dehaired, and stretched till it dried, when it was ready for use. Whole buffalo or cow-skins were used as covers for the bull-boats of the Sioux and other tribes of the upper Missouri, and deerskins and seal and sea-lion skins, joined by sewing, covered the canoes, kaiaks, and umiaks of the tribes of the far N. Pieces of rawhide were folded or sewn to form the partlèche trunks and knife, feather, and arrow cases, pouches, and pemmican bags of the Plains tribes, who used also eircular pieces of thick hide for pemmican or fruit mortars. Buckets, dippers, cups, drumheads, rattles, shields, eradles, etc., were made of rawhide by many tribes, and helmet masks were made of the same material by the Pueblos.

The property which green rawhide has of greatly shrinking in drying was made use of in many ways-notably for casing handles and heads of stone clubs, for mending broken articles, and for making drumheads and lacing them. Sometimes rings of rawhide from the tails of animals were shrunk on club handles or pipestems, like Soles of moccasins were bands of iron. made of this material in the W., and the Plains tribes often utilized old parfièche cases for this purpose. Cut in strips of differing sizes, rawhide was used for harness, thongs, whiplashes, wattling, for making cages, fencing, etc. Narrow strips, called babiche by the French, were employed for fishing and harpoon lines, nets, lacing for snowshoes, rackets,

hall sticks, and gaming wheels. Bags 'sometimes called by their Algonquian name muskemoots) of fine workmanship were knit of babiche. Braided babiche was the material of reatas, halters, cinches, and carrying-straps.

Rehauutass-hade. Quoted by Krause Tlinkit Indianer, 304, 18851 as the name of a branch of the Haida of Queen Charlotte ids. Brit. Col.—It is not identifiable with any known group.

Red River Assiniboin. An Assiniboin band, estimated in 1829 at 24 tipus (Cones, Henry-Thompson Jour., n, 522, 1897), living w. of the Otaopabine (Watopapinah), in Saskatchewan and Alberta.

Reservations.* A natural result of land cessions by the Indians to the British Government and, later, to the Dominion was the establishment of reservations for the natives. This was necessary not only in order to provide them with homes and with land for cultivation, but to avoid disputes in regard to boundaries and to bring them more easily under control of the Government by confining them to given limits. This policy, was followed under both French and English control. It may be attributed primarily to the increase of the white population and the consequent necessity of confining the aboriginal population to narrower limits. This involved a very important, even radical, change in the habits and customs of the Indians, and was the initiatory step toward a reliance upon agricultural pursuits for subsistence. Reservations were formed chiefly as the result of cessions of land; thus a tribe, in ecding land that it held by original occupancy, reserved from the cession a specified and definite part thereof, and such part was held under the original right of occupancy, but with the consent of the Government, as it was generally expressly stated in the treaty defining the bounds that the part so reserved was "allotted to" or "reserved for" the given Indians, thus recognizing title in the Government.

Note —The Colonial Governments of Nova Scotia and New Brunswick made adequate provision for reserves for the aborigines, but it was left for private benefaction to secure

for the Indians of Prince Edward Island the reserves in that Province on which most of the Indians reside. In the province of Quebec at the time of the Conquest, the Indians had been settled on their reserves, which were, in some few cases, held by seigneurial title; others were set apart by private gift and the larger number by direct grants from the King the province of Upper Canada there was a liberal policy as regards reserves. The earliest reserve in what is now the province of Ontario was the purchase made by Governor Haldimand from the Mississaugas for the occupancy of the Six Nations. When the various concessions of land which seem d to the province the Indian rights to the territory we e-made they plovided for ample reserves for the Indians. The whole of Manitoulin island was set apart in 1836 upon the recommendation of Sir John Colborne and the treaty known as the Robinson-Superior Treaty, made in 1850, secured to the Indians the lands on which they had been accustomed to hant and eside. Under the Treaties which are numbered from I to 10, the reserves were usually allotted in an a ca of on square mile to every family of five. Some of the reservés in the western treaties, particularly in Treaty 7, were on a mole liberal basis than thit. The reserves in British Columbia were set apart under arrangement with the Provincial Government by an officer specially appointed. They were more numerous in this province than in any other in the Dominion in all about-1200. They consist for the most part, of small plots of land, fishing stations, etc.

The Indian Act provides special legislation for the admini tration of Indian reserve lands. They cannot be sold without the special consent of the Indians and the concurrence of the Government. The timber and other natural resources are also protested and white persons are not allowed to occupy nor use any reserve lands. (D.C. Scott, MS, 1912.) See Treaties and Appendix I.

Restigouche. An important Micmac village on the N. bank of Restigouche r., near its mouth, in Bonaventure co., Quebec. The French mission of Sainte Anne was established there in the 17th century. In 1884 the village contained 464 souls; in 1911, 513.

Cross Point.—Bradley, Atlas, 1885. Mission Point.—Can Ind Aff for 1884, xxv, 1885. Mistigouche.—Beauharnois (1745) in N. Y. Doe, Col. Hist, x, 15, 1858. Octagouche.—Coffen (1754), ibid., vt, 835, 1855. Ouristigouche.—De Levis (1760), ibid., x, 1100, 1858. Papechigunach.—Vetromile, Abnakis,

^{*}This article has been much abbreviated and, aspublished, refers to Canada only—Some corrections have been made and additional information has been included—A list of the principal Indian reserves in Canada is given in Appendix I—

59, 1866 (='place for spring amusements'). Restigouche.--Can. Ind. Aff. 1880, 32, 1881. Ristigouche. -Le Clercq (ca. 1685) quoted by Shea, Discov. Miss. Val., 86, 1852. Ristigutch.-Vetromile, Abnakis, 59, 1866. Sainte-Anne de Réstigouche.-Roy, Noms Géographiques, Québec, 336, 1906.

Rhaap. Given as the name of a subdivision of the Ntlakyapamuk residing on or near the middle course of Fraser r., Brit. Col., in ISSO. The initial letter in the name is probably a misprint.

Rice Lake. A settlement of the Missisauga in the county of Northumberland, Ontario, usually called "Rice Lake Indians" on account of their proximity to that body of water. In 1911 they numbered 97. In the first half of the 19th century they were noted for their skill in "medicine."

Indians of Rice Lake.-Chamberlain in Jour. Am. Folk-lore, 1, 151, 1888. Rice Lake band.-Can. Ind. Aff. Rep. 1906, 17, 1907.

Richibucto. A Micmae village at the mouth of Richibucto r., in Kent eo., N.B. Elagibucto.-Vetromile, Abnakis, 58, 1866. Richibouctou.-Bollan (1748) in Mass. Hist. Soc. Coll , 1st s., vi, 136, 180). Richibuctos.-Keane in Stanford, Compend, 533, 1878. Rigibucto.-Vetromile, Abnakis, 58, 1866. Rishebouctou.-Frye (1760) in Mass. Hist. Soc. Coll., 1st s., x, 116, 1809. Rishebucta — Ibid 115

River Desert. A band of Algonkin occupying the Maniwaki res., comprising about 44,537 acres, on Desert r., at its confluence with Gatineau r., Quebee. The members of this band, numbering 421 in 1911, gain their livelihood by lumbering, river-driving, hunting, and fire-ranging, and engage to a limited extent in agriculture. The women make moceasins, mittens, baskets, etc., while the men manufacture snowshoes and axe-handles.

River Rouge. An Algonkin settlement in Ottawa (or Argenteuil) eo., Quebec, containing 31 Indians in 1884.—Can. Ind. Aff. 1884, IS4, ISS5.

Rocky Point. A former Miemae village in Prince Edward Island.

Romaine (Orâmānĭshipu, 'vermilion river,' from Montagnais orâmān 'vermihon,' shipu 'river.'—Gerard). A Montagnais village and trading station, Saguenay co., Quebec, at the mouth of Romaine r. In 1911 the inhabitants numbered 239.

Grand Romaine.-Can. Ind. Aff. Rep. 1884, pt. 1, 185, 1885. Olomanosheebo. *-Stearns, Labrador, 264, 1884. Romaine.-Ibid.

Ronatewisichroone. The Iroquois name of a tribe, probably Algonquian, formerly living about the upper Great lakes. They sent a friendly message to the Seneca in 1715.— Livingston (1715) in N. Y. Doe. Col. Hist., v. 445, 1855.

Roundhead (Stiahta). A Wyandot (Huron) chief who espoused the British cause in the War of 1812, being connected chiefly with Col. Procter's command. Nothing is known of his early history, and though spoken of as a fine-looking man and a celebrated Indian chief, his history as recorded refers only to the time of the war mentioned. He was with Mai. Muir, of Procter's command, on the Miami near Ft. Miami, Ohio, Sept. 27-28, 1812. and urged in vain the English commander to hold his position and fight the American forces. In Oct. following he accompanied Maj. Muir to River Raisin, where Procter was gathering his forces, and later in the same year he met his death. Gen. Procter, in a letter dated Oct. 23, 1813, states that "the Indian cause and ours experienced a serious loss in the death of Round Head." A village in the s. w. corner of Hardin co., Ohio, his early home, bore his name, which survives in that of the present town of Roundhead built on its site. Roundhead had a brother known as John Battise, a man "of great size and personal strength," who was killed at Ft. Meigs while fighting for the British. (C. T.)

Saamen. A Salish tribe on Kwalekum r., E. coast of Vancouver id. They speak the Puntlatsh dialect. Probably identical with the Qualicum cited below, who numbered 15 in 1911.

Kwa-le-cum.—Can. Ind. Aff. 1880, 316, 1881. Kwanle-cum.-Ibid., 308, 1879. Qualicum.-Ibid., pt. 11, 164, 1901. Quawticum.-Ibid., 120, 1880. Quhlicum.-Ibid, map, 1891. Saamen.-Poas, M.S., B.A. E., 1887.

Saanich. See Sanetch.

Sabassa. A collective term applied to the Indians of Laredo and Principe channels, Brit. Col. By Kane it was made to include the Kitkatla, Kitkahta, and Neeslous of the Tsimshian, and the Kitimat and Kitlope of the Kwakiutl.

Sabassa.-Dunn, Hist. Oreg., 273, 1844. Sabassas Indians.-Kane, Wand. in N. A, app., 1859. Sebassa.-Dunn, op. cit.

Sadjugahl-lanas $(S^{\circ}adj\bar{u}'gal\ l\bar{u}'nas)$. family of the Eagle clan of the Haida. They claim to be descended from a woman named

^{*}Olomanoshibo river is 125 miles east of Romaine.

²¹A - 26

Hehlu-seingans, along with the Kona-kegawai, Djiguaahl-lanas, Stawashaidagai, and Kaiahl-lanas. Until recently they did not stand very high in the social scale, but owing to his personal popularity their chief in 1901 had become town chief of Masset. This family is said to have had 4 unnamed subdivisions.—Swanton, Cont. Haida, 275, 1905.

Sah ājūgwan alth Lennas.—Harrison in Proc. Roy. Soc. Can., sec. II,125, 1895.—Sgʻadzë'guatl lā'nas.— Boas, Twelith Report N. W. Tribes of Canada, 23, 1898.

Sagaiguninini ('lake people,' from sayaigŭn lake,' inini 'man'). A tribe which lived s. w. of Ottawa r., Ontario, about 1640.

Sagachiganirini8ek.—Jes. Rel. for 1646, 34, 1858 Sagahiganirini.—Jes. Rel. for 1640, 34, 1858. Sāgaiganinini.—Wm. Jones, inf'n, 1906 (correct form). Sakahiganirionek.—Jes. Rel. for 1648, 62, 1858.

Sagakomi. The name of a certain smoking mixture, or substitute for tobacco, applied also to the bearberry bush (Arctostaphylos uva-ursi) or other shrubs the leaves and bark of which are used for the same purpose. The word, which has come into English through Canadian French, is not, as some have supposed (Richardson, Boat Voyage, 11, 303, 1851), a corruption of the sac-à-commis of the voyageurs and courcurs de bois of the N.W., but is of Algonquian origin. It is derived from sagâkomin which, in Chippewa and closely related dialects, signifies 'smoking-leaf berry.' The form sugakomi occurs in Lahontan (Vov., II, 53, 1703) and other writers of the early years of the 18th century. (A. F. C.)

Sagamite. A porridge of boiled corn, a layourite dish of the early settlers, derived from the Indians. The word occurs early in Canadian French, being found in Sagard-Théodat (1632), and survives still in Lonisiana, whither it was carried from New France. As Cuoq (Lex. Algorian, 15, 1886) points out, the term never meant 'soup' or 'porridge' in the language from which it was taken. The word kisagamite signifies in Nipissing, Chippewa, and closely related Algonquian dialects, 'the broth (agami) is hot' (kisågamitew'it is a hot liquid'—Baraga). In English the word occurs also as sagamity as in Lewis and Clark (Trav m, 2, 1817). (A. F. C.)

Sagamore. A corruption of sang'man, the Abnaki name for the chief or ruler of a tribe, the dignity of which was elective, the choice usually falling on an individual who was at the head of a prominent clan. Other spellings are

sagomoh (Rosier, 1603), sogomo, sayomo, sagamo, and sagamour. (2) A term applied by early writers to the lesser sachems among the Massachuset Indians. Josselyn uses the word sagamorship (of which he apparently was the author) as a synonym for suchemship. See Chiefs, Government. (w. R. G.)

Sagangusili (Sa^eyā'nusili). A family belonging to the Raven clan of the Haida. They lived at one time in Naden barbour, Queen Charlotte ids., Brit. Col., and are said to have been related to the Skidaokao.—Swanton, Cont. Haida, 271, 1905.

Sahāgungūsili.—Harrison in Proc. Roy. Soc. Can, 125, 1895. Sgʻāga'ngsilai.—Boas, Twelith Rep. N. W. Tribes Can, 23, 1898.

Sagaunash ('Englishman'). A mixed-blood Potawatomi chief, better known as Billy Caldwell, born in Canada about 1780. His father according to report, was an Irish officer in the British service, and his mother a Potawatomi. Sagannash was educated in Roman Catholie schools, learned to write English and French with facility, and was master of several Indian dialects. From 1807 to the battle of the Thames in Oct. 1813, he was in the British interest and was intimately associated with Tecumseh, whose secretary he is said to have been. After the battle referred to be transferred his allegiance to the United States, establishing his residence at Chicago in 1820. In 1826 he held the office of justice of the peace, and during the Winnebago excitement of 1827 was, with Shabonee, of great service to the Americans. His wife was a daughter of Neeseotnemeg. Sagaunash died at Council Bluffs, Iowa, Sept. 28, 1841, aged about 60 years.

(C. T.)

Sagavok. A Netchilirmiut Eskimo village, s. of Felix harbour, Boothia penin., Franklin. Sagavoq.—Boas in 6th Rep. B. A. E., map, 1888. Shag-a-voke.—Ross, Second Voy., 324, 1835.

Sagdirmiut. An exceedingly primitive Eskimo tribe, having had little intercourse with neighbouring people, formerly inhabiting Southampton id. and the islands of Fox basin, N. Hudson bay, (Boas in 6th Rep. B. A. E., 444, 451, 1888). In 1900 they were estimated to number about 300, but, owing to the establishment of a whaling station on their island soon afterward and the introduction of outside natives with modern guns and superior appliances, by which the food supply of the islanders was quickly

destroyed, the Sagdlirmiut became extinct by the spring of 1903 (Boas in Am. Anthr., vi. 746, 1904).

Sead-ler-me-oo.—Parry, Second Voy., 250, 464, 1824.

Sagewenenewak (contr. and abbrev. of Chippewa Saginawintulwak 'people of the river-mouth.'—Gerard. Another form, Saginaw). A Chippewa division living at the mouth of Red r., Manitoba.

Såge Wenenewak.—Long, Exped. St. Peters R., II. 133, 1824 Sågitawäwininiwag.—Wm. Jones, infin, 1906 (correct name).

Sagnitaouigama. An Algonkin tribe or band living in 1640, s.w. of Ottawa r. in Ontario (Jes. Rel. 1640, 34, 1868). They were possibly the same as the Sinago.

Sagua-lanas (Sa'gua la'nas 'people of the town up the inlet'). A family of the Eagle clan of the Haida. The inlet referred to in their name is probably Virago sd. or Naden harbour. They are said to have branched off from the Tohlka-gitunai, but were afterward so closely associated with the Stustas as to be usually regarded among the Stustas families. Their town was Kung, at the entrance of Naden harbour. A subdivision was called Dotuskusth.—Swanton, Cont. Haida, 275, 1905.

Sa'gua lā'nas.—Swanton, op. cit. Sak'lā'nas.— Boas, Twelith Rep. N. W. Tribes Can, 22, 1898. Shāgwau Lennas.—Harrison in Roy. Soc. Can., sec. II, 124, 1895.

Saguenay (French corruption of Sâginawa 'river-mouth,' variously spelled sagina, saguinau, and saguina.—Gerard. Another form, Saginaw). A group of Naskapi bands that lived on Saguenay r., Quebec.

Saguenay.—Dutch map (1616) in N. Y. Doc. Col. Hist., 1, 1856. Saquenets.—French writer in Me. Hist. Soc. Coll., vt. 212, 1859.

Sagui-gitunai (Sagui' gitanā'-i, 'Gitans living up the inlet'). A family of the Eagle clan of the Haida. They originally formed one family with the Djahuigitinai, but separated from them on account of some internal differences and settled in Masset inlet; hence their name. They occupied half of the town of Kayang, just above Masset. A part of them was called Kialdagwuns.—Swanton, Cont. Haida, 274, 1905.

Sagui' gitanā'-i.—Swanton, op. cit. Saqgui' gyit'-inai'.—Boas, Twelfth Rep. N. W. Tribes Can, 23, 1898. Shāgwikitonē.—Harrison in Proc. Roy. Soc. Can, sec. II, 125, 1895.

Saguikun-Inagai (Sguī'kun lnagā'-i, 'up the inlet point-town people'). A branch of a

Haida family called Kunalanas, belonging to the Raven clan.—Swanton, Cont. Haida, 271, 1905.

Sa-haidagai (Sa 'xā'-idaga-i 'people living on the high ground'). A subdivision of the Stawas-haidagai, a family of the Eagle clan of the Haida, so called from the nature of the ground on which their houses stood.—Swanton, Cont. Haida, 273, 1905.

Sahldungkun (Š'ā'tdaň kun). A former town of the Sagui-gitunai family of the Haida, on the w. side of Yagun r., at its mouth.—Swanton, Cont. Haida, 281, 1905.

Saikez. A Takulli village, probably of the Tatshiautin, s. of Nechako r., Brit. Col., about lat. 53° 55′ x., long. 124° w.

Sai'kez.—Morice in Trans. Roy. Soc. Can, x, 109, 1892. Sy-cus.—Harmon, Jour, 202, 1820.

Sailupsun. A body of Salish of Cowichan agency, Brit. Col.; pop. 69 in 1896, including the Puntlatsh and Comox, but no longer separately enumerated.

Pail-uk-sun.—Can. Ind. Aff. 1894, 278, 1895. Sailk-sun.—Ibid., 1884, 1885. Sail-up-sun.—Ibid., 1895, 360, 1896.

Saint André. A dependency of the Mission des Apôtres which was founded in 1640 and abandoned in the following year; situated in one of the 9 towns of the Tionontati, an Iroquoian tribe inhabiting the hill country s. and s. w. of Nottawasaga bay, in Grey, Brnee, and Huron counties, Ontario. The only known reference to this mission is given in the Jesuit Relation for 1640, 95, ed. 1858.

Sainte Anne. A Malecite mission in 1760 on an island in St. John r., near the present Fredericton, N. B.—Shea, Cath. Miss., 154, 1855.

Saint Antoine. A Huron village in 1640, and one of the dependencies of Mission de la Conception, established among the Bear tribe; situated probably in Simeoe co., Ontario (Jes. Rel. 1640, 78, 1858). Nothing is known of its history or of its exact position.

(J. N. B. H.)

Saint Augustine. A Naskapi and Montagnais station at the mouth of St. Augustine r., on the N. shore of the gulf of St. Lawrenee, Quebec. Pop. 183 in 1911.

Sainte Elisabeth. An Algonquian village among the Hurons in Ontario in the 17th century.

Salncte Elizabeth.-Jes. Rel 1640, 90, 1858.

 $21A-26\frac{1}{2}$

Saint Francis. A Catholic mission village, occupied principally by Abnaki, on St. Francis r., near Pierreville, Yamaska county, Quebec. After the removal of the Christian Indians hither from Chaudiere r. they received constant accessions from the Abnaki and Pennacook, especially the former, who had been driven out of New England by the advance of the English settlements. After the death of Père Rasles in 1724 the greater part of the Abnaki fled to St. Francis, which thus became an Abnaki village. The Arosaguntacook acquired the leading position, and their dialect is that now used in the village. At the beginning of the French and Indian war in 1754 a large number of the hostile Seaticook joined the settlement. As the St. Francis Indians had been driven from their homes, they retaliated upon the New England settlers at every opportunity and soon became noted as the bitterest enemies of the English colonies. In 1759 a force was organized and sent under Maj. Rogers against the village, which then contained about 700 inhabitants. St. Francis was surprised and burned, 200 of the Indiansmen, women, and children-being killed, and the remainder scattered. These afterward returned, and the village was rebuilt, but the fall of the French power in America put an end to further hostility on the part of the Indians. A number of them joined the British forces in the Revolution, and again in the War of 1812. They numbered 360 in 1821, 387 in 1858, 335 in 1908, and 313 in 1911. They still spend a great part of their time in hunting, as well as in making and selling baskets, moccasins, and other Indian wares. See Missions.

Alsigontegok .- J. D. Prince, inf'n, 1905 (present Abname. Arsikantekok.—Ibid. (old name). Nessa8akamighé.—Rasles (1691), Dict., 458, 1833 ('where fish is dried by smoke': Abnaki name). Saint-Français.—Kendall, Trav., 11, 53, 1809. S. Français de Saies.—Le Sueur (1734) quoted by Kendall, ibid., 294. St. Francis.—Chauvignerie (1736) in N. Y. Doc. Col. Hist., 1x, 1052, 1855. St. Francis de Sales.-Shea, Cath. Miss., 142, 1855. St. Francoi. -Clinton (1745) in N. Y. Doc. Col. Hist., vi, 281, 1855. St. François.—Albany conf. (1724), ibid., v. 713, 1855. Saint François du Lac.-Jes. Rel., LXXI, 311, 1901. Skensowahneronon.-Cuoq., Lex., 155, 1882 ('people at St. Francis,' from skensowah, a corruption of St. François, ne 'at,' ronon 'people': Caughnawaga name). Za Piasua.-Wzokhilain quoted by Pilling, Bibl. Algonq. Lang., 539, 1891 (Abnaki pronunciation of "St. Francis").

Saint Francis. A mission village founded in 1683 by some Algonkin and Montagnais converts from Sillery at the falls of Chaudiere r., s. of the St. Lawrence r., Quebec. They were soon joined by the remaining inhabitants of Sillery, which was then abandoned. In 1700 they removed to the new village.

St. françois de Sales.—Jes. Rel , LXIII, 123, 1901.

Saint Jacques. A former village of the Tionontati (q. v.) in Ontario, in 1640.

Sainct lacques.-Jes. Rel. 1640, 95, 1858.

Saint Jacques-et-Saint Philippe. A village of the Tionontati (q. v.) in Ontario in 1640.

sainct Jacques et sainct Philippe.—Jes. Rel. 1640, 95, 858.

Saint Jean. The chief town of the Wolf clan or phratry of the Tionontati in 1649, in which the Jesuit fathers had maintained a mission for some years; situated probably in the hill country of Bruce co., Ontario, on the E. frontier of the Tionontati territory, fronting their enemies, the Iroquois. According to the Jesuit Relation for 1650 (p. 8, ed. 1858) this town contained 500 or 600 families, which, following the rate of $7\frac{1}{2}$ to 8 persons to a family (ibid., p. 3), would give a total population of 3,750 to 4,800, apparently a rather high estimate. In Nov. 1649 the Jesuit fathers then resident on Christian id., Georgian bay, Ontario, learned from two Huron converts who had just escaped from a band of 300 Iroquois warriors that the enemy was undecided whether to attack the Tionontati or the Jesuit fathers and their converts on the island. This information was conveyed to the Tionontati, who received the news with joy, for, exulting in their prowess, they regarded the hostile troop as already conquered. Having awaited the attack of the Iroquois for some days, the Tionontati, and especially the men of St. Jean, resolved, on Dec. 5, to go against the enemy lest they escape; but the Iroquois having learned from two captives the practically defenceless condition of St. Jean, hastened to attack it before the return of the warriors, whom they had failed to meet. On Dec. 7 they appeared before the town, set fire to the bark cabins, and slaughtered the defenceless inhabitants. According to the Jesuit Relation for 1650, Father Garnier refused to attempt to escape, but ran everywhere to give absolution to the Christians he met, and to seek in the burning cabins the children, the sick, and the neophytes, whom he baptized. While thus engaged he was shot twice, and later his skull was erushed by hatchet blows. In the Récit d'un Ami de l'Abbé de Gallinée (Margry, Dec.,

I. 366, 1875 it is said that, before being killed, Father Garnier shot 3 Iroquois with a gun. Two days later the Tionontati warriors returned to find their town in ashes, and the mutilated bodies of their people. This disaster caused them to abandon their country.

(J. N. B. H.)

Saint Jean-Baptiste. A mission in Ontario about 1640, visited by the Hurons and Totontaratonhronon.

S. Iean Baptiste.—Jes. Rel. 1640, 90, 1858.

Saint Joachim. A mission village among the Hurons in Ontario in 1640.

S. Ioachim.-Jes. Rel. 1640, 90, 1858.

Saint Regis. A settlement of Catholic Iroquois, situated on the s. bank of the St. Lawrence, at the boundary between the United States and Canada, with a reservation extending several miles along the river on both sides of the line. They call the place Akwesasne, 'where the partridge drums,' referring to sounds made by a cascade at that point. The village was established about 1755, during the French and Indian war, by a party of Catholic Iroquois from Caughnawaga, Quebec, and it became the seat of the Jesnit mission of Saint François-Regis. The village rapidly increased in population, and in 1806, received a considerable part of those who had been driven from Oswegatchie. When the boundary between the two countries was surveyed the village was found to be thereon, and, since then, a portion of the reservation has been under control of the United States, while the rest is under the Canadian government. The St. Regis Indians numbered 2,850 in 1909, having 1,501* in Quebec and 1,349 in New York. They have sometimes been known as "Praying Indians," and formed a part of the "Seven Nations of Canada."

Aghquessaine.—Ft Stanwix Treaty (1768) in N. Y. Doc. Col. Hist., viii, 129, 1857. Aghquissasne.—Johnson (1763), ibid., viii, 582, 1856. Ah-qua-sos'-ne.—Morgan, League Iroq., 474, 1851. Hist., viii, 660, 1857. the band). Qua-sos-ne.—Morgan, League Iroq., map. 1851. St. Biglin.—Writer of 1756 in N. Y. Doc. Col. Hist., x, 405, 1858. (misprint). Saint Francis Regis.—shea, Cath. Miss., 340, 1855. St. Regis.—Pouchot map. 1759., in N. Y. Doc. Col. Hist., x, 694, 1855. Wakui-saskeóno.—Gatschet, Seneca MS., B. A. E., 1882. Seneca name of tribe).

Saint Simon. An Ottawa mission about 1670 on Manitoulin id. in lake Huron.—Shea, Cath. Miss., 365, 1855.

Saint Simon-et-Saint Jude. A village of the Tionoutati (q. v.) in 1640.

Sainct Simon et sainct Jude.—Jes. Rel. 1640, 95, 1858.

Saint Thomas. A village of the Tionontati in 1640.

Sainet Thomas.—Jes. Rel. 1640, 95, 1858.

Saint Xavier. A mission village of the Hurons in Ontario in 1640.

Sainct Xauier.-Jes. Rel. 1640, 81, 1858.

Saitkinamuks ha Shumahadletza (Sā'it-kinamuxs ha Cumaxā'le'tza, 'people of (chief) Cumaxa'le'tza'. The inhabitants of 2 or 3 small villages on Fraser r., Brit. Col., just above Spence Bridge.—Teit in Mem. Am. Mus. Nat. Hist., n. 171, 1900.

Saiviks (Sai'-yeks, 'liars')—A band of the Siksika, or Blackfeet.—Grinnell, Blackfoot Lodge Tales, 208, 1892.

Sakaedigialas (Saqai'dAgialas, 'he threw grease, dropping from a bird split open, around the house'. A Haida town formerly on, or near, Kuper id., Queen Charlotte ids. Brit. Col. It was owned by the Kas-lanas, who were subsequently exterminated, it is said, by the people of Kaisun. (I. R. S.)

Saqai'da-gialas.—Swanton, Cont. Haida, 280, 1905 Saqai'dagi'lgaña lnagā'-i.—Ibid.

Sakahl. A band of Cowichan at Hope, on Fraser r., Brit. Col.: pop. 79 in 1911.

Fort Hope.—Can. Ind. Aff. Rep. 78, 1878. Hope.— Ibid, 309, 1879. Sakahl.—Brit. Col. map, Ind. Aff., Victoria, 1872. Tskans.—Wilson in Trans. Ethnol. Soc. Lond, 278, 1866.

Sakawithiniwuk ('people of the woods'). The Wood Cree, one of the several divisions of the Cree. They are divided into the Sakittawawithiniwuk and the Athabaskawithiniwuk Ayabāskawiyiniwag.—Wm. Jones, inf'n, 1906 (own name). Cree of the Woods.—Morgan, Consang. and Affin, 286, 1871. Na-he'-ah-wuk.—Ibid. Northern Crees.—Franklin, Journ. Polar Sea, 11, 213, 1824. People of the Woods.—Morgan, op cit, 286. Sackaweéthinyoowuc.—Franklin, op. cit, 168. Sakawiyiniwok.—Lacombe, Dict. de la Langue des Cris, x, 1874. Strongwood Cree.—Maclean, Hudson Bay, v, 264, 1849. Thick Wood Crees.—Franklin, op. cit, 168, 1824. Upper Cree.—Cox, Columbia R, 11, 207, 1831. Wood Crees.—Hind, Lab. Penin, 11, app, 262,

Sakiakdjung. A spring settlement of Kingua Okomiut Eskimo at the head of Cumberland sd., Baffin island.

Sakiaqdjung.-Boasin 6th Rep. B. A. E., map, 1888.

^{*}In 1911, there were 1,515 in St. Regis reserve, Que.

2 GEORGE V., A. 1912

Saki-kegawai. (Sa'ki që yawa-t, 'those born up the inlet'). A prominent family of the Eagle clan of the Haida. They belonged to the Gunghet-haidagai, or Ninstints people, and were said to be a part of the Gunghet-kegawai. Their chief was town chief of Ninstints, which received its name among the whites from one of his names, Nungstins (Nañ stins, 'One who is two').—Swanton, Cont. Haida, 272, 1905.

Sakittawawithiniwuk ('people of the mouth of the river.'—W. J.). A subdivision of the Sakawithiniwuk, or Wood Cree.

Saksinahmahyiks (Sak-si-nah'-mah-yiks, 'short bows'). A subtribe of the Kainah.—Grinnell, Blackfoot Lodge Tales, 209, 1892.

Sakta (8áqla). A Bellacoola town on the N. side of the month of Bellacoola r., Brit. Col. It was one of the S Nuhalk villages.—Boas in Mem. Am. Mus. Nat. Hist., 11, 49, 1898.

Salai. A berry-bearing evergreen plant (Gaultheria shallon) of the Columbia River region, the fruit of which has been an important source of food for the Indians; written also sallal, the name of this fruit in the Chinook iargon, from Chinook kl'kwu-shalla. (A. r. c.)

Salendas (S²ala'ndas). A family of the Eagle clan of the Haida; one of those that migrated to Alaska. One branch settled among the Tongass and another at Sitka, white the Haida portion became subdivided into two house groups, the Hlimul-naas-hadai and the Nahawashadai.—Swanton, Cont. Haida, 276, 1905.

S'alE'ndas.—Boas, Twelfth Rep. N. W. Tribes Can., 22, 1898.

Salishan Family. A linguistic family inhabiting the s. E. portion of Vancouver id. from Thurlow id. to Sooke bay, and all the s. mainland of British Columbia as far as Bute inlet and Quesnel lake, with the exception of that portion held by the Kutenai. although within the Kutenai area, at the Columbia lakes, is a small settlement of Salish. An isolated division of the family, the Bellacoola, had established itself further x, on Dean inlet. Burke channel, and Bellacoola r. In the United States they inhabit the N. portions of Washington, x. Idaho, w. Montana, and a small strip of the N. w. coast of Oregon. The name Salish was originally applied to a large tribe in w. Montana popularly known as Flatheads, thence it was finally extended to cover all those speaking a similar language.

Although lexically distinct from one another, the Salish, Chimakuan, and Wakashan languages belong to the same structural type and have remote points of resemblance with Algonquian. Physically and culturally the coast and interior Salish belong to different groups, the former being affiliated to some extent with the other coast people to the N., and the interior Salish resembling interior stocks in their own neighbourhood.

If his own statements may be relied upon, Juan de Fuca (1592)* was probably the first white man to visit the country inhabited by people of this family. After his time several Spanish navigators passed along their coasts, but their position exposed them less frequently to visits from yessels than that of the Nootka and tribes farther N. Later, British and American vessels came to trade, the most notable expedition being that of Capt. Geo. Vancouver, R. N. (1792-94), whose name became attached to Vancouver id. The first detailed information regarding the Salishan tribes was obtained, however, from the account of the expedition of Lewis and Clark (1804-06), and knowledge of them was extended by the establishment of Astor's fort in 1811 at the mouth of the Columbia, although the fort itself was not within Salish territory. From that time until 1846, most of this region, known as the Oregon territory, was a subject of dispute between Great Britain and the United States, and it was not until after the Oregon treaty and until the California gold fever had somewhat subsided that settlers began to come into this region in numbers. On the Canadian side, employees of the Hudson's Bay Company were among the first to enter the country. The establishment of a post at Victoria in 1843, was one of the most momentous events to the Indians of the entire coast.

The coast Salish form the southern arm of the N.W.Coast culture, which fades away southward from Bute inlet and Comox (where it resembles that of the more highly developed Kwakiutl) to the semi-Californian Tillamook and the Nestucca of Oregon. Unlike the more

^{*}The Spanish records practically demonstrate the absolute falsity of Juan de Fuca's statements. To accept them, one must believe that a Spanish Government expedition was equipped and carried out without the knowledge of, and without any expense to, the government that dispatched it: and that, when it would have been of great assistance in basing a title by discovery the Spanish government did not prefer the claim.

northern Haida, Tlingit, and Tsimshian, descent is usually reckoned through the father.

The Salish dwellings in the northern portion of this area are of the Nootka type, longer than those farther N., and containing several families each with its own fire. They are also built in the same way of heavy planks and beams. They resemble the other coast tribes in the important part fish and shellfish play in their diet, and in the extent to which canoes are employed. The interior Salish depended more on hunting, but so many large salmon streams flow through this country that even they were more given to a fish diet than were the interior tribes generally. The houses of the interior Salish of British Columbia differed considerably from those on the coast. To construct them, holes were dug and poles set up in conical form around their edges; the whole was covered with poles on which was laid grass, and sometimes codar bark, and over all earth was thrown.

War, slavery, and the potlatch (q.v.) were regular institutions on the coast. One of the most characteristic customs, especially prevalent along the coasts of Washington and British Columbia, was artificial head-flattening, but it did not obtain, curiously enough, among the Indians now called Flatheads.

Population (1909): Coast Salish in United States, 3,600; coast Salish in Canada, 4,874. total, 8,474. Interior Salish in United States, 4,988; interior Salish in Canada, 5,390; total, 10,378. Total Salish in United States 8,366, total Salish in Canada, 10,264; grand total, 18,630.

The Salishan dialects may be grouped as follows:

I. Dialects of the interior: 1, Lillooet in w. British Columbia; 2, Ntlakyapamuk (Thompson Indians) in s. w. British Columbia; 3, Shuswap in s. central British Columbia; 4, Okinagan in s. E. British Columbia, extending into the United States, the subdivisions of which are the Okinagan proper, Colville, Nespelim or Sanpoil, Senijextee (Snaichekstik) of the Arrow lakes and Columbia r. below the lakes; 5, Flathcad in E. Washington, Idaho, and Montana, subdivisions of which are the Spokan, Kalispel or Pend d'Oreilles, and Salish or Flathead; 6, Skitswish or Cour d'Alènes in N. Idaho; 7, Columbia groups in the w. portion of the interior of Washington, including the Pisquow or Wenatchi, Sinkius, Methow, and other local divisions.

II. Coast bialects: S, Bellacoola, a group of tribes on Bentinck arm and Dean inlet, Brit. Col.; 9, Comox group on the N. portion of the gulf of Georgia, with two subdivisions— (a) the Comox proper, including the Comox Eëksen, Homalko, Kaäke, Kakekt, Seechelt of Jervis inlet, Sliammon, and Tatpoös; and (b) the Puntlatsh, including the Hwahwatl, Puntlatsh, and Saämen; 10, Cowichan group in the neighbourhood of Nanaimo on Vancouver id., and in the delta of Fraser r. It embraces, on Vancouver id., the Clemclemalats, Comiakin, Hellelt, Kenipsim, Kilpanlus, Koksilah, Kulleets, Lilmalche, Malakut, Nanaimo, Penelakut, Quamichan, Siccameen, Snonowas, Somenos, Tateke, Yekolaos; and, in the Fraser valley, the Chehalis, Chilliwak, Coquitlam, Ewawoos, Katsey, Kelatl Kwantlen, Matsqui, Musqueam, Nehaltmoken, Nicomen, Ohamil, Pilalt, Popkam, Samahquam, Scowlitz, Sewathen, Siyna, Skwawalooks, Snonkweametl, Squawtits, Sumas, and Tsakuam; 11, Squawmish group, including the Squawmish of Burrard inlet and Howe ad. and probably the Nooksak of N. Washington; 12, Songish group, on Juan de Fuga - r., San Juan id., and portions of the chasts of Washington and British Columbia. 1: includes the Clallam (Wash.), Lummi Wash.), Samish (Wash.), Sanetch (Brit. Col., Setuiamu (Brit. Col. and Wash.), Songish (Brit. Col.), Sooke (Brit. Col.); 13, Nisqualli group, embracing all tribes E. of Pager sd and s. to mt. Rainier, and, on the west side. the region up to Olympia, except Hood canal. It includes two dialectic divisions, the Nisqualli and the Snohomish. Well-known divisions are the Nisqualli proper, Dwamish, Puyallup, Skagit, Snoqualmu or Snoquamish. and Squaxon. Following are the names of some of the numerous bands of the Nisqualli. Etakmehu, Kwehtlmamish (?), Nukwatsamish. Nusehtsatl, Potoashees, Sahewamish, Sakumehu, Samamish, Sawamish, Sekamish, Shomamish, Shotlemamish, Skihwamish, Skopamish, Smulkamish, Squaeum, Stehtsasamish, Steilaeoomamish, Suquamish, and Towahhah. Other bands which may belong here, but which cannot be identified, are Neutubvig, Nuchwugh, Opichiken, Sinslikhooish, Sintootoolish, and Sktehlmish; 14, Twana group, on Hood eanal, Puget sd., including the Twana and Sailupsun: 15, Chehalis group, embracing six dialects, which show considerable variation. These are the Quinault and Quaitso of N.W. Washington; the Humptulips of the v. portion of Grays harbour; the Lower Chehalis of Grays harbour and Shoalwater bay; the Satsop E. and N. E. of Grays harbour; the Upper Chehalis E. of Shoalwater bay; and the Cowlitz on the river of that name southward to Columbia r.; 16, Tillamook on the coast of Oregon, including the Tillamook or Nestucca, and the Siletz. Tillarook is the Chinook name for the tribe whose territory is called in Chinook, Newhalem. > Salish. - Gallatin in Trans. Am. Antiq. Soc., II, 134, 306, 1836 for Plat Heads only); Latham in Proc. Philol. Sec. Lond, 11, 31-50, 1846 (of Duponecau; said to be the Okanagan of Tolmie). XSalish.-Keane in Stanford's Compend, Cent. and S. Sarsi (from the Siksika sa arsi, not good'). A tribe of the eastern group of the northern division of the Athapasean family. There is a myth or tradition found among the Tsattine according to which their se ession from the tribe is said to have been the sequel of a blood

feud. According to this story, a dog belonging to a member of one division was killed by a young man of the other division, who was slain by the owner and avenged by his relatives. The animosity engendered between the two factions became so rooted and vindictive that the weaker party migrated. The explanation the Sarsi themselves give is one common in the Plains region. The people were crossing a lake when the hand of a boy became attached to a horn protruding from When the horn was struck the ice broke. Those who had not reached the neighbourhood remained in the N. as the Tsattine; those who had already passed went on to the s. and became the Sarsi, and those near by were engulfed in the lake and became mythical water-beings. At the beginning of the 19th century the Sarsi numbered 120 warriors, in 35 tents (Mackenzie, Voy., I, lxx, 1801). Their hunting grounds were on the upper Saskatchewan, toward the Rocky mts. Umfreville, in 1790 (Maine Hist. Soc. Coll., vi. 270, 1859), spoke of them as one of the leading tribes trading with the Hudson's Bay Co. Mackenzie found them on the North Saskatchewan r., few in number and appearing to have come from the N. W. He identified them with the Sekani. Richardson (Arct. Exped., II, 6, 1851) said they lived near the Rocky mts., between the sources of Athabaska and North Saskatchewan rs. Their customs have been greatly modified by their long residence among the Siksika, but their language remains fairly constant. Gallatin said that the Tsattine and Sarsi together numbered 150 hunters. Wilson, in 1888, found two bands, the Blood Sarsi and the real Sarsi. In 1897 two divisions were reported, one at Calgary, on Bow r., lat. 51°, and the other near Battleford. In 1911 there were 205 engaged in farming, stock-raising, and woodcutting on the reserve near Calgary, Alberta, mingling little with other Indians except on occasions of ceremony. Rev. E. F. Wilson, who visited them in 1888, describes them as inferior in mental capacity to the Siksika, not so fine and tall a race, and less communicative. having no liking for white people.

Their dress consists of the breech-clout, blanket, leggings, beaded moceasins, and a gray, white or coloured blanket thrown loosely over one or both shoulders. Both men and women paint the upper portion of their faces with other or vermilion. They wear brooches, and ear-rings of steel, and bracelets and necklaces of beads, bones, claws, teeth, and brass wire, and finger-rings of coiled brass wire. They live in conical tipis in summer, and in low log huts, plastered with mud, in winter. Their chief handicrafts are the preparation of skins, of which they make their clothing and saddles for their numerous ponies, and the making of bows of cherry wood and arrows of willow, which are winged with feathers and pointed with sharp, filed pieces of scrap iron, the shaft having four shallow grooves down its entire length. Some of the men have from two to four wives, whom they can divorce at pleasure, restoring the presents received with the wife, or their equivalent. Girls are often betrothed at 10 years of age and married at 14. After betrothal they must look no man in the face. A man must not meet his mother-in-law, and if he accidentally touch her he must give her a present. The Sarsi have little knowledge of medicinal roots and herbs; most of their physicians are women. As among many other Indian tribes, a doctor when called in heats a stone in the fire, touches it with his finger, and with the same finger presses various parts of the patient's body in order to divine the seat and character of the malady. He then sucks the affected place, pretending to draw out the disease and spit it from his mouth, the performance being accompanied with the beating of a drum and the shaking of a rattle. The Sarsi know how to cauterize efficaciously with burning touchwood, and they use the vapour bath, building a low bower of bent. green saplings covered with blankets, within which red-hot stones are placed in a hole in the ground, and over these the pa ient pours water that is handed him from outside. When thoroughly steamed he rushes out and plunges into cold water, sometimes with fatal result. The dead are wound in tent cloths and blankets and deposited on scaffolds in a burialground. A warrior's pony is shot, and blankets, elothing, utensils and food are left beside the corpse. The bodies of distinguished warriors or chiefs are placed in tipis (4th Rep. N. W. Tribes Canada, 242-255, 1889). The language of the Sarsi is uncorrupted, notwithstanding association with the Siksika.

Saschutkenne 'people of the black bear'. A tribe of the Sekani who hunt on the w. slope of the Rocky ints., about lat. 56° and northward, and, before 1892, traded at Ft. Connolly, Brit. Col. Dawson Rep. Geol. Surv. Can., 2008, 1889 stated that they had recently returned to the beadwaters of Black r. after having abandoned the region for a number of years. In 1890 Morice gave their habitat as Thutage lake and northward, w. of the Rocky ints.

Al-ta-tin of Bear Lake. Daws n in Rej. Geol. Surv. Can., 1887, 8, 200n, 1889. Bear Lake Indians.—Ibid. Sas-chu-tqène. Mories. cui n. 1890. Sas-chu-tqenne.—Moriec in Trans. Can. Inst., 1892, 93, 29, 1895. Sat-e-loo'-ne.—Dawson, op. (it. (so called by the Titshetina).

Saskatchewan Assiniboin. An Assiniboin band of 50 lodges that dwelt in 1808 about Eagle hills and South Saskatchewan r., Saskatchewan. Henry-Thompson Jour. n. 523, 1897.

Saskatoon. A name in use in w. and N. w. Canada for the service berry Am-lanchier canadensis: probably a corruption of misäskwatomin which is the name applied to the fruit in the Cree dialect of Algonquian, signifying fruit of misäskwat the tree of much

wood,' from mis 'much,' and åskwat 'wood.' Saskatoon occurs as the name of a city in Saskatchewan.

A. F. C.

Sasthut (black-bear bathing place). A Tatshiautin village on Connolly lake, Brit. Col.

Sas-thût, Moriee, Notes on W. Dénés, 27, 1893.
Sést'sethût.—Moriee in Trans. Roy. Soc. Can., x, 109, 1893.

Satchotugottine people of the lake of bears of the plains'. A part of the Kawchodinne living immediately κ , of Great Bear lake, Mackenzie, N. W. T.

Sa-tchô-gottinè.—Petitot in Bul 80% de Géog Paris, chart, 1875 ("people of bear lake"). Sa-tchô t'u gottiné.—Petitet, Diet Dâné-Dindjié, xx, 1876.

Satsk $S\bar{a}/sq$. A Bellacoola town on Dean inlet, Brit, CoI; one of the five still inhabited. See $Konisq\,ii^i$.

Satskömilh. Tolme and Dawson, Vocales Brit. Cel., 1228, 1884. "[people of Sa(sk]) Sätsq.—Boas in Mem. Am. Mus. Nat. Hist., m, 49, 1900.

Saturna Island Indians. The local name for a small body of Sanotch on Saturna id., off the s. E. coast of Valcouver id. Pop. 5 in 1892, the last time the name is officially noted.

Saukaulutuchs. Reported to be the name of a small band of Indians in the interior of Vancouver id. They traded with the Nootka and are said to have spoken the same language; from the latter circumstance the Nootka lad a superstition that they were the spirits of their dead.

Saa-Kaalituck, -Mayne, Brit Cel., 180, 1861. Sankanlutuchs.—Keane, in Stanford, Compend., 534, 1878 Sau-kan-lutuck.—Lerd, Nat. in Brit Cel., 1, 158, 1866.

Sauktich, A Squawmish village community inhabiting Hat id., Howe sd., Brit. Col. Sau'qtite.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Sault-au-Récollet (French: 'rapids of the Récollet,' because a Récollet missionary was drowned there early in the 17th century). A Catholic Iroquois mission village near the mouth of Ottawa r., in Two Mountains co., Quebec, established in 1696 by converts from 'La Montagne' (q.v.). In 1704 the rest of the Indians at La Montagne removed to the new mission. In 1720 the settlement was abandoned, and the inhabitants, numbering about 900, built a new village at Oka (q. v.).

J. N. B. H.)

Annunciation.—Shea, Cath. Miss., 329, 1855 (mission name bestowed in 1704). Lorette.—Ibid, 329 (first mission name; see also Lorette). Sault au Recolet.—Vaudreuil (1711) in N. Y. Doc. Col. Hist, 1x, 860, 1855. Sault au Recollet.—Shea, Cath. Miss., 328, 1855. Saut au Récollet.—Vaudreuil (1717) in N. Y. Doc. Col. Hist., 1x, 961, 1855.

Saumingmiut ('inhabitants of the left side'). A subtribe of the Okomiut Eskimo of Baffin island, inhabiting the extremity of Cumberland penin. Their villages are Kekertaujang and Ukiadliving. Pop. 17 in 1883. See Boas in Trans. Anthr. Soc. Wash., III, 96, 1885.

Shaumeer.—Kumlien in Bull. Nat. Mus., no. 15, 15, 1879. Saumingmiut.—Boas in Deutsche Geog. Blätt., vn. 34, 1885.

Sauniktumiut. An Eskimo tribe on the coast of Hudson bay, s. of the Kinipetu, in the region of Port Churchill; pop. 178 in 1902.

—Boas in Bull. Am. Mus. Nat. Ilist., xv. 6, 1901; 378, 1907.

Saunutung. A spring settlement of the Kinguamiut Eskimo at the entrance to Nettilling fiord, Baffin island.—Boas in 6th Rep. B. A. E., map, 1888.

Savinnars. Given as a tribe on Vancouver id., N. of Nootka sd. Unidentified, but undoubtedly either a Nootka tribe or the Nootka name of a Kwakiutl tribe.

Savinards.—Armstrong, Oregon, 136, 1857. Savinnars.—Jewitt, Narr., 36, 1849.

Sazeutina. A Nahane tribe inhabiting the region between Dease and Black rs., Brit. Col. In 1887 they numbered 94. Petitot considered them an outlying eastern offshoot of the Sekani. Sa-zē-oo-ti-na.—Dawson in Rep. Geol. Surv. Can., 1887-8, 2008, 1880. Sicannees.—Dall in Geol. Surv. Can., 1, 33, 1870 (so called by traders). Thè-kka'nè.—Petitot, Autour du lae des Esclaves, 362, 1891. Thi-kanies.—Hardisty in Snithson. Rep. 1866, 311, 1872.

Scandinavian influence. The discovery of Greenland by the Norsemen in 985 A. D. and their occasional voyages southward apparently as far as Nova Scotia, together with their colonization of Greenland for most of the period between 1000 and 1500, form an episode in the pre-Columbian period the influence of which on the natives has been confined almost exclusively to the Eskimo of Greenland and the coast of Labrador. It is now the generally accepted belief* that the Markland of the Icelandic historians was Newfoundland, and

Vineland a part of Nova Scotia. Storm states that he would identify the inhabitants of Vineland with the Indians-Beothuk or Micmae (Reeves, Finding of Wineland the Good, 176, 1895). The long contact of Scandinavian settlers with the Eskimo of Greenland, although having no marked effect on the habits and customs of the latter in the historic era. has had some influence in this direction. The contact began about 1000, and by 1450 the colonies had ceased to make reports to the home country and were forgotten by the civilized world. They were probably exterminated or absorbed by the natives. Rink (Tales and Trad. of Eskimo, 75, 1875, goes so far as to say: "The features of the natives in the southern part of Greenland indicate a mixed descent from Scandinavians and Uskimo, the former, however, not having left the slightest sign of any influence on the nationality or culture of the present natives." Mason (Am. Anthr. x1, 356, 1898) suggests that the well-known skill of the Eskimo in ivory-carving and etching has arisen since contact with the whites, and is due to the introduction of iron: but Boas (Bull, Am. Mus. Nat. Hist., xv. 367. 1901) considers that the resemblance of Eskimo art to the birch-bark art of the Indians indicates that such origin is impossible, though European influence may account for some of its exuberant development. With the mission of Egede in 1721 began the Christianizing of the Eskimo of the w. coast of Greenland and the institution of schools, charitable and judicial institutions, etc., which have resulted in what is called their civilization (see Missions . Intoxicating liquors have largely been kept from them, but the introduction of firearms has caused deterioration of their ancient skill in fishing and hunting. The adoption of writing, according to some, has impaired the ability of the Eskimo as kaiakers. The abolition of native laws and authority has led, Rink observes, to "a kind of self-abasement and disheartening." Another result of European contact is the tendency to make the houses smaller and the impairment of the power of the head of the family. From the earliest times "Europeans of the working classes have intermarried with native women, and formed their household after the Greenland model, with merely a few European improvements." presence of a few Scandinavian words, for example, kunia 'wife,' in the jargon of the Pt. Barrow Eskimo and whites, is due to Danish rather than to Norse influence. Another

^{*}Nansen, the greatest living authority on the subject, identifies Vineland with the Insulæ Fortunatæ which, in classical legend, lay to the west of Africa. He is, however, of the opinion that the Greenlanders occasionally visited Markland (Newfoundland or the southernmost part of Labrador) perhaps chiefly to obtain wood.

Danish leanword employed in the east may be cited *tripali*, 'tobacco.'

Seandinavian influence is represented also by the results of the Swedish settlements in New Jersey during the period 1638-55, after the Swedes had driven out the English colonists and before they were themselves subjected by the Dutch and succeeded by Lutheran missioneries. As the labours of Campanius, Biörek, Hesselius, and others show, the Swedes came into very close contact with the Indians Nelson, Ind. of New Jersey, 1894;, and the American dialect of Swedish adopted several names of plants and animals from the Indian tongues of the region. As Nelson notes (ibid), 77), Biörek's Disserto'io Gradualis, published in 1731, contains valuable material bearing on the subject of the religion of the tribes of Delaware river.

Anthr., 11, 1900; Iowa Jeur, Hist, and Pol., 111, no. 1, 1905; Leland, Algonquin Legends, 1885; Stefansson in Am. Anthr., viit, no. 2, 1906.

(A. F. C.)

Scanonaenrat. A former Huron village situated between Nottawasaga bay and lake Simcoe, Simcoe co., Ontario. It was occupied by the Tohontaenrat, one of the four Huron tribes. The Jesuit mission of St. Michel was established there. In 1649, on the overthrow of the Hurons, the Tohontaenrat abandoned their village in a bedy and were incorporated with the Seneca. (J. N. F. II.)

Sainct Michel.—Jes. Rel. 1641, 81, 1858. Scanonaenrat.—Ibid. 1636, 77, 1858. Scanonaentat.—Ibid. 1639, 72, 1858. Scanonaerat.—Shea quoted by Schoolcraft, Ind. Tribes, iv, 204, 1854. Scanonahenrat.—Champlain, Œuvres, iv, 30, note, 1870. Scanouaenrat.—Jes. Rel. 1635, 35, 1858. 8t. Michael's.—Shea, Cath. Miss., 192, 1855.

Schachuhil 180 called because the dead were carried down from this place to a village below, called Chutil, to be buried). A former village of the Pilalt, a Cowichan tribe of lower Chilliwak r., Brit, Col.

Steā'teōril.—Hill-Tout in Ethnol. Surv. Can., 48, 1902. Teā'tcōril.—Boas in Rep. Brit. A. A. S., 454, 1894.

Schaeken (S'teaōkEn). A village of the Ntlakyapamuk on Fraser r., above Lytton, Brit. Col.—Hill-Tout in Rep. Ethnol. Surv. Can., 4, 1899.

Schilks (Steilks, 'sling'). A Squawnish village community on the E. side of Howe sd., Brit. Col.— Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Schink (Steink). A Squawmish village community at Gibson landing, on the w. side of Howe sd., Brit. Col. Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Schloss. The local name for a body of Upper Lillooet around Seton lake, interior of British Columbia; pop. 20 in 1911.

Schloss, -Can. Ind. Aff. Rep., pt. 16, 72, 1902. Slosh, --Ibid., pt. 1, 277.

Schoneschioronon ('beautiful-hillside people,'—Hewitt). A clan of the Iroquois, (q.v.)
—French writer (1666) in N. Y. Doc. Col.
Hist., 1x, 47, 1855.

Schoomadits. An unidentified tribe of Vancouver id., probably Nootka.

Schoomadits.—Jewitt. Narr., 36, 1849. Shoomads.—Armstrong, Oregov., 136, 1857.

Schurye. A Cowichan village on lower Fraser r., just above Sumas lake, Brit. Col. Pop. 27 in 1894, the last time it was enumerated separately.

Schuary.—Can. Ind. Aff. Rep. 1891, 276, 1895. Schurye.—Ibid., 1880, 316, 1881. Schuye.—Brit. Col. map. Ind. Aff., Victoria, 1872.

Scitadin. A village on the St. Lawrence, in 1535, below the site of Quebec.—Cartier, Bref Récit., 32, 1863.

Scowlitz. A Cowiehan tribe living at a town of the same name at the mouth of Harrison r., Brit. Col. Pop. 52 in 1904, 39 in 1911.

Harrison Mouth.—Can. Ind. Aff. Rep. 1891, 248, 1892. Scowlitz.—Can. Ind. Aff. Rep., 160, 1901. Sk'au'ëlitsk.—Boas in Rep. 64th Meeting Brit. A. A. 8., 454, 1894. Skowliti.—Brit. Col. map, Ind. Aff., Victoria, 1872.

§ Seakop. A Salish village or band under Fraser superintendency, Brit. Col.—Can. Ind. Aff. Rep., 78, 1878.

Seechelt (Si'ciall). A Salish tribe on Jervis and Seechelt inlets, Nelson id., and the s. portion of Texada id., B.C. They speak a distinct dialect and are thought by Hill-Tout on physical grounds to be related to the Lillooet. Anciently there were 4 divisions or septs—Kunechin, Tsonai, Tuwanek, and Skaiakos—but at present all live in one town, called Chatelech, around the mission founded by Bishop Durieu, who converted them to Roman

Catholicism. The Kunechin and Tsonai are said to be of Kwakiutl lineage. Pop. 236 in 1902, according to the Canadian Department of Indian Affairs, and 325 according to Hill-Tout. The former authority gives 243 in 1911.

Ni'ciatl.—Boas in 5th Rep. N. W. Tribes Can., 10-1889 (Comox name). Seashelth.—Brit. Col. mappind. Aff., Victoria, 1872. Sechelts.—Mayne, Brit. Col., 144, 1862. Seshal.—Tolmie and Dawson, Vocabs. Brit. Col., 1198, 1884. She-shell.—Can. Ind. Aff., 308, 1879. Si'ciatl.—Boas, op. cit. Nanaimo name's. Si'ciatl.—fibid. (own name's.

Sekani ('dwellers on the rocks'). A group of Athapascan tribes hving in the valleys of upper Peace r. and its tributaries and on the w. slope of the Rocky mts., Brit. Col. Morice says they were formerly united into one large tribe, but on account of their nomadic habits have gradually separated into smaller distinct tribes having no affiliation with one another. Harmon (Jour., 190, 1820) said that they came from E. of the Rocky mts., where they formed a part of the Tsattine. Gallatin (Trans. Am. Antiq. Soc., II, 20, 1836 gave their habitat as the headwaters of Peace r. Dunn : Hist. Oreg., 79, 1844) placed them in the mountains near Nahanni r. Wilkes (U. S. Explor, Exped., IV, 451, 1845) said they ranged about Ft. Simpson. E. of the Takulli and beyond the Rocky mts. McLean (Hudson Bay, I. 235, 1849, found some at McLeod lake in 1549. Richardson (Arct. Voy., 11, 31, 1851) placed them between Stikine and Skeena rs. Taylor (Cal. Farmer, July 19, 1862) described them as being in the mountains between McLeod and Connolly lakes. According to Hind Labrador Penin., II, 261, 1863) they inhabited the foot of the Rocky mts, N. w. of Peace r. and a part of New Caledonia w. of the Rocky mts., resorting to Fts. Dunvegan, Halkett, and Liard. Pope (MS., B. A. E.) placed them w. of Tatla lake, Brit. Col. Petitot (Dict. Dènè-Dindjié, xx, 1876) said that most of them were near the trading posts on Fraser r., a small number only frequenting the Peace and Liard, where they have a reputation for great savageness. Morice (Proc. Canad. Inst., 112, 1889) says they roam over the Rocky mts. on both slopes and the adjacent forests and plains from about 54° to 60° N. They are of much slighter build and shorter in stature than any of the neighbouring tribes, from whom they otherwise differ but little except that their bands are numerous and not closely organized socially. Morice deseribes them as slender and bony, in stature below the average, with narrow forehead,

prominent cheek-bones, small, deeply sunk eyes, the upper lip very thin, the lower protruding, the chin very small, and the nose straight. Fathers appear like children, and none are corpulent and none bald. Petitot describes them as built like Hindus, light of colour, with fine black almond eyes, large and of oriental limpidity, firm noses, the mouth large and voluptuous. Many of the males are circumcised. The women wear rings in their noses. These people are very barbarous and licentious. Their complete i-olation in the Rocky mts. and their reputation for merciless and cold-blooded savagery cause them to be dreaded by other tribes. Their manner of life is miserable. They do without tents, sleeping in brush huts open to the weather. Their only clothing consists of coats and breeches of mountain-goat or bighorn skins, the hair turned outside or next to the skin according to the season. They cover themselves at night with goat-skins sewed together, which communicate to them a strong odour, though less pungent than the Chipewyan receive from their smoked elk skins. Petitot (Autour du lac des Esclaves, 309, 1891) pronounces them the least frank and the most sullen of all of the Tinneh. They are entirely nomadic, following the moose, caribou, bear, lynx, rabbits, marmots, and beaver, on which they subsist. They cat no fish and look on fishing as an unreanly occupation. Their society is founded on fatherright. They have no chiefs, but accept the council of the oldest and most influential in each band as regards hunting, camping, and travelling (Morice, Notes on W. Dénés, 28, 1893). When a man dies they pull down his brush hut over the remains and proceed on their journey. If in camp, or in the event of the deceased being a person of consequence. they make a rough coffin of limbs and erect a scaffolding for it to rest on, covering it usually with his birch-bark canoe inverted; or, on the death of an influential member of the tribe, a spruce log may be hollowed out for a coffin and the remains suspended therein on the branches of trees. Sometimes they hide the corpse n an erect position in a tree hollowed out for the purpose. They keep up the old practice of burning or easting into a river or leaving suspended on trees the weapons and clothing of the dead person. When a member of the band was believed to be stricken with death they left with him what provisions they could spare and abandoned him to his fate when the camp broke up. They are absolutely honest.

trad r may go on I trapping expedition, leaving his store unlocked without fear of anything being stolen. Natives may enter and help themselves to powder and shot or any other articles they require out of his stock, but every time they heave the exact equivalent in furs. Movice

Morice Trans. Can. Inst., 28, 1893 divides the Sekani into 9 tribes, each being composed of a number of bands having traditional hunting grounds the limits of which, unlike those of their neighbours, are but vaguely defined. It is not uncommon for them to trespass on the territory of one another without molestation, an unusual custom among the tribes of the N. W. The tribes are as follows: (1) Yutsutkenne, (2) Tsekehneaz, (3) Totatkenne, (4) Tsatkenne (Tsattine), (5) Tsetautkenne, (6) Sarsi, (7) Saschutkenne, (8) Otzenne, (9) Tselone. Besides these there is an eastern division, the Thekkane.

Drake (Bk, Inds., xi. 1818) gave their number as 1,000 in 1820. Dawson (Rep. Geol. Surv., 206-7b, 1887-88) said that in 1888 there were 78 near Ft. Liard and 73 near Ft. Halkett, making 151 in the Mackenzie River region. Morice (Proc. Can. Inst., 113, 1889) said that they numbered 500 in 1887, not more than 250 of them being in British Columbia. The same authority (Notes on W. Dénés, 16, 1893) estimated the total population of the Sekani group at 1,300; the Sekani proper, on both sides of the Rocky mts., numbering 500, the Tsattine 700, and the Sarsi, 100. In 1914 the Sarsi (q. v.) alone were officially reported to number 205.

Al-ta-tin,-Dawson in Rep. Geol. Surv. Can, 1928, 1887 Lhtaten. Morice in Proc. Can. Inst., 118, 1889 ('inhabitants of beaver dams': applied also to Nahane). T'tat-'tenne.-Morice, Notes on W. Thè-ké-ottiné. Petitot, MS vecab, B. A. E., 1865. Thè-khènè.—Petitot in Bull. Soc. Géog. Paris, chart. 1875. Thè-kk'a-nè. Petitot, Antour du lac des Esclaves, 362, 1891. ('people on the mountain'). Thè-kka-nè. Petitot, Diet. Dèmè-Dundjié, xv. 1876. Thè-kké-Ottiné. Petitot in Jour. Roy. Geog. Soc. 651, 1883. Thickeannies.—Hind, Labrador Penin. n., 261, 1863. Thickeannies.—Hardisty in Smithson. Rep. 1866, 311, 1872. Tsekanie.—McLeur, Hadson Bay, 1, 235, 1849. Tsé'kéhne. (Morice, Notes on W. Dènès, 19, 1893. Tsekenné.—Morice in Proc. Can. Inst., 112, 1889. Chilabitants of the rocks'). Tsikanni.—Latham, Nat. Hist. Man, 306, 4850. Tsika-ni.—Richardson, Aret. Exped., n., 31, 1851.

Selelot ($S(l^2l^3l)$). A Squawmish division living on Burrard inlet, coast of British Columbia.—Boas, MS., B. A. E., 1887.

Selkuta (Scl-ku'-la). A Bellacoola village on the N. side of the mouth of Bellacoola r., Brit. Col.—Boas in Mem. Am. Mus. Nat. Hist., 11, 49, 1898.

Sels ('food-steamers'). The name applied, probably contemptuously, to a Haida family of low social rank which formed a subdivision of the Hlgahetgulanas. It is related that the people of this family were so much in the habit of steaming food that one of their women once said, "We shall be called food-steamers'"; and so it happened. Low-class people in other families seem to have received the same name.—Swanton, Cont. Haida, 270, 1905.

Seltsas (Sells'ā's). A Katsey summer village at the head of Pitt lake, which drains into lower Fraser r., Brit. Col.—Boas in Rep. Brit. A. A. S., 454, 1894.

Semehau (Sumexá'u, 'little lynx'). A village of the Spence Bridge band of Ntlakyapamuk on the N. side of Thompson r., 32 m. from Lytton, Brit. Col.—Teit in Mem. Am. Mus. Nat. Hist., 11, 173, 1900.

Semiamu. A Salish tribe living about the bay of the same name in N. w. Washington and s. w. British Columbia. In 1843 they numbered 300, and in 1911 there were 40 of the tribe on the Canadian side.

Birch Bay.—Farnham, Trav., 111, 1843. Samamhoo.—Can. Ind. Aff., 308, 1879. Semiahmoo.—Wilson in Jour. Ethnol. Soc. Lond., 278, 1866. Semiā'mō.—Boas in 5th Rep. N. W. Tribes, Can., 10, 1889. Senatuch. Mentioned by Grant (Jour. Roy. Geog. Soc., 293, 1857) as a Nootka tribe on the s. w. coast of Vancouver id. Seneca ('place of the stone,' the Anglicized form of the Dutch enunciation of the Mohegan rendering of the Iroquoian ethnic appelative Oneida, or, strictly, Oneniute'ā'kă', and with a different ethnic suffix, Ončňiute'ron'non', meaning 'people of the standing or projecting rock or stone'). A prominent and influential tribe of the Iroquois (q. v.). When first known they occupied that part of w. New York between Sencea lake and Geneva r.. having their council fire at Tsonontowan, near Naples, in Ontario co. After the political destruction of the Eric and Neuters, about the middle of the seventeenth century, the Seneca and other Iroquois people carried their settlements westward to lake Eric and southward along the Alleghany into Pennsylvania. They also received into their tribe a portion of these conquered peoples, by which accessions they became the largest tribe of the confederation and one of the most important. They are now chiefly settled on the Alleghany, Cattaraugus, and Tonawanda res., N.Y. A portion of them remained under British jurisdiction after the declaration of peace and live on Six Nations res., near Brantford, Ont. Various local bands have been known as Buffalo, Tonawanda and Complanter Indians; and the Mingo, formerly in Ohio, have become officially known as Seneca from the large number of that tribe among them. No considerable number of the Seneca ever joined the Catholic Iroquois colonies.

In the third quarter of the 16th century the Seneca was the last but one of the Iroquois tribes to give its suffrage in favour of the abolition of murder and war, the suppression of cannibalism, and the establishment of the principles upon which the League of the Iroquois was founded. However, a large division of the tribe did not adopt at once the course of the main body, but, on obtaining coveted privileges and prerogatives, the recalcitrant body was admitted as a constituent member in the structure of the League. The two chiefships last added to the quota of the Seneca were admitted on condition of their exercising functions belonging to a sergeantat-arms of a modern legislative body as well as those belonging to a modern secretary of state for foreign affairs, in addition to their duties as federal chieftains; indeed, they became the warders of the famous "Great Black Doorway" of the League of the Iroquois, called Ka'nho'hwādh'gō'nā' by the Onondaga.

In historical times the Seneca have been by far the most populous of the five tribes originally comprising the League of the Iroquois. The Seneca belong in the federal organization to the tribal phratry known by the political name Hondonnis' hen', meaning, 'they are clansmen of the fathers,' of which the Mohawk are the other member, when the tribes are organized as a federal council: but when ceremonially organized the Onondaga also belong to this phratry (see Government). In the federal council the Seneca are represented by eight federal chiefs, but two of these were added to the original six present at the first federal council, to give representation to that part of the tribe which had at first refused to join the League. Since the organization of the League of the Iroquois, approximately in the third quarter of the 16th century, the number of Scneca clans, which are organized into two phratries for the performance of both ceremonial and civil functions, have varied. The names of the following nine have been recorded: Wolf, Honnat 'hajion'nı'; Bear, Hodidjionni'' qā'; Beaver, Hodigěn''gegā'; Turtle, Hadiniā''dēñ'; Hawk, Hadi'shwen''gaiiu'; Sandpiper, Hodi'ne'si'iu', sometimes also called Snipe, Plover, and Killdee; Deer, Hadinion' gwaiiu'; Doe, Hodinon' deogā', sometimes Honnont'gondjeu'; Heron, $Hodidaio^{n'}q\bar{a}'$. In a list of clan names made in 1838 by Gen. Dearborn from information given him by Mr. Cone, an interpreter of the Tonawanda band, the Heron clan is called the Swan clan with the native name given above. Of these clans only five had an unequal representation in the federal council of the League, namely, the Sandpiper, three, the Turtle, two, the Hawk, one, the Wolf, one, and the Bear, one.

One of the earliest known references to the ethnic name Seneca is that on the original Carte Figurative, annexed to the Memorial presented to the States-General of the Netherlands, Aug. 18, 1616, on which it appears with the Dutch plural as Sennecas. This map is remarkable also for the first known mention of the ancient Erie, sometimes called Gahkwas or Kahkwah; on this map they appear under the name last cited, Gachoi (ch = kh), and were placed on the x. side of the w. branch of the Susquehanna. The name did

not originally belong to the Seneca, but to the Oneida, as the following lines will show.

In the early part of Dec. 1634, Arent Van Curler (or Corlact), the commissary or factor of the Manor of Rensselaerwyck this uncle's estate, set out from Ft. Orange, now Albany, NA_{+} , in the interest of the fur-trade, to visit the Mohawk and the Sinnekens. Strictly speaking, the latter name designated the Oneida, but at this time it was a general name, usually comprising the Onondaga, the Cayuga, and the Seneca, in addition. At that period the Dutch and the French commonly divided the five Iroquois tribes into two identical groups; to the first, the Dutch gave the name Maquas (Mohawk), and to the latter Sinnekens Seneca, the final -ens being the Dutch genitive plural), with the connotation of the four tribes mentioned above. The French gave to the latter group the general name "les Iroquois Superieurs," "les Hiroquois d'en haut," i.e. the Upper Iroquois, "les Hiroquois des pays plus hauts, nommés Sontoucheronnons" diterally, 'the Iroquois of the upper country, called Sontoucheronnons'), the latter being only another form of "les Tsonnontouans" (the Seneca); and to the first group the designations "les Iroquois Inférieurs" (the Lower Iroquois), and "les Hiroquois d'en bas, nommés Agnechronnons' (the Mohawk; literally, 'the Iroquois from below, named Agnechronnons'). This geographical rather than political division of the Iroquois tribes, first made by Champlain and the early Dutch at Ft. Orange, prevailed until about the third quarter of the 17th century. Indeed, Governor Andres, two years after Greenhalgh's visit to the several tribes of the Iroquois in 1677, still wrote, "Ye Oneidas deemed we first nation of sineques." The Journal of Van Curler, mentioned above, records the interesting fact that during his visit to the tribes he celebrated the New Year of 1635 at a place called Enneyuttchage or Sinnekens. The first of these names was the Iroquois, and the second, the Mohegan name for the place, or, preferably, the Mohegan translation of the Iroquois name. The Dutch received their first knowledge of the Iroquois tribes through the Mohegan. The name Enneyuttehage is evidently written for Oneñiute'agā''ge', 'at the place of the people of the standing (projecting) stone.' At that date this was the chief town of the Oneida. Van Curler's Journal identifies the name Sinnekens

with this town, which is presumptive evidence that it is the Mohegan rendering of the Iroquois local name Oneñ'inte', 'it is a standing or projecting stone,' employed as an ethnic appellative. The derivation of Sinnekens from Mohegan appears to be as follows: a'sinni, 'a stone, or rock,' -ika or -iga, denotive of 'place of,' or 'abundance of,' and the final -ens supplied by the Dutch genitive plural ending, the whole Mohegan synthesis meaning 'place of the standing stone'; and with a suitable pronominal affix, like o- or wă-, which was not recorded by the Dutch writers, the translation signifies, 'they are of the place of the standing stone.' This derivation is confirmed by the Delaware name, W'tassone, for the Oneida, which has a similar derivation. The initial w- represents approximately an o-sound, and is the affix of verbs and nouns denotive of the third person; the intercalary -t- is merely euphonic, being employed to prevent the coalescence of the two vowel sounds: and it is evident that assone is only another form of a'sinni, 'stone,' eited above. Hence it appears that the Mohegan and Delaware names for the Oneida are cognate in derivation and identical in signification. Heckewelder erroneously translated W'tassone by 'stone pipe makers.'

Thus, the Iroquois Oneñiute'ā'gă', the Mohegan Sinnekens, and the Delaware Il'tassone are synonomous and are homologous in derivation. But the Dutch, followed by other Europeans, used the Mohegan term to designate a group of four tribes, to only one of which, the Oneida, was it strictly applieable. The name Sinuckens, or Sennecaas (Visscher's map, ca, 1660), became the tribal name of the Seneca by a process of elimination which excluded from the group and from the connotation of the general name the nearer tribes as each with its own proper native name became known to the Europeans. Obviously, the last remaining tribe of the group would finally acquire as its own the general name of the group. The Delaware name for the Seneca was Mexaxlin'ni (the Macchachtinni of Heckewelder), which signifies 'great mountain'; this is, of course, a Delaware rendering of the Iroquois name for the Seneca, Djiionoñdowāněň'aka', or Djiionoňdowāněň'roň'non', 'People of the Great Mountain.' This name appears disguised as Trudamani (Cartier, 1534-35), Entouhonorons, Chouontouaroüon = Chonontouaronon (Champlain, 1615), Ouentouaronons

(Champlain, 1627), and Tsonontouan or Sonontouan (Jes. Rel., passim.).

Previous to the defeat and despoliation of the Neuters in 1651 and the Erie in 1656, the Seneca occupied the territory drained by Genesee r., eastward to the lands of the Cayuga along the line of the watershed between Seneca and Cayuga lakes.

The political history of the Seneca is largely that of the League of the Iroquois, although owing to petty jealousies among the various tribes the Seneca, like the others, sometimes acted independently in their dealings with But their independent action apaliens. pears never to have been a serious and deliberate rupture of the bonds uniting them with the federal government of the League, thus vindicating the wisdom and foresight of its founders in permitting every tribe to retain and exercise a large measure of autonomy in the structure of the federal government. It was sometimes apparently imperative that one of the tribes should enter into a treaty or other compact with its enemies, while the others might still maintain a hostile attitude toward the alien contracting party.

During 1622 the Montagnais, the Algonkin, and the Hurons sought to conclude peace with the Iroquois (Yroquois = Mohawk division? because "they were weary and fatigued with the wars which they had had for more than 50 years." The armistice was concluded in 1624, but was broken by the continued guerrilla warfare of the Algonkin warriors; for this reason, the Seneca ("Ouentouoronons d'autre nation, amis desdits Yrocois") killed in the "village of the Yrocois" the embassy composed of a Frenchman, Pierre Magnan, and three Algonquian ambassadors. This resulted in the renewal of the war. So, in Sept. 1627, the Iroquois, including the Seneca, declared war against the Indians and the French on the St. Lawrence and its northern affluents by sending various parties of warriors against them.

From the Jesuit Relation for 1635 (p. 34, 1858) it is learned that the Seneca, after defeating the Hurons in the spring of 1634, made peace with them. The Hurons in the following year sent an embassy to Sonontouan, the chief town of the Seneca, to ratify the peace, and, while there, learned that the Onondaga, the Oneida, the Cayuga, and the Mohawk were desirous of becoming parties to the treaty.

In 1639 the war was renewed by the Hurons, who in May captured 12 prisoners from the Seneca, then regarded as a powerful people. The war continued with varying success. The Jesuit Relation for 1641 (p. 75, 1858) says the Seneca were the most feared of the enemies of the Hirrons, and that they were only one day's journey from Ongniaahra (Niagara), the most easterly town of the Neuters. The Relation for 1643 (p. 61) says that the Seneca (i. e. "les Hiroquois d'en haut"), including the Cavuga, the Oneida, and the Onondaga, equalled, if they did not exceed, in number and power the Hurons, who previously had had this advantage; and that the Mohawk at this time had three villages with 700 or 800 men of arms who possessed 300 arquebuses that they had obtained from the Dutch and which they used with skill and boldness. According to the Jesuit Relation for 1648 (p. 49, 1858), 300 Seneca attacked the village of the Aondironnons, and killed or captured as many of its inhabitants as possible, although this people were a dependency of the Neuters who were at peace with the Seneca at this time. This affront nearly precipitated war between the Iroquois and the Neuters.

The Seneca warriors composed the larger part of the Iroquois warriors who in 1648-49 assailed, destroyed, and dispersed the Huron tribes; it was likewise they who in 1649 sacked the chief towns of the Tionontati, or Tobacco tribe; and the Seneca also took a leading part in the defeat and subjugation of the Neuters in 1651 and of the Erie in 1656. From the Journal des PP. Jésuites for 1651-52 (Jes. Rel., Thwaites' ed., XXXVII, 97, 1898- it is learned that in 1651 the Seneca, in waging war against the Neuters, had been so signally defeated that their women and children were compelled to flee from Sonontowan, their capital, to seek refuge among the neighbouring Cayuga.

In 1652 the Seneca were plotting with the Mehawk to destroy and ruin the French settlements on the St. Lawrence. Two years later the Seneca sent an embassy to the French for the purpose of making peace with them, a movement which was probably brought about by their rupture with the Erie. But the Mohawk not desiring peace at that time with the French, perhaps on account of their desire to attack the Hurons on the id. of Orleans, Que., murdered two of the three Seneca ambassadors, the other having remained as a hostage with the French. This act almost

resulted in war between the two hostile tribes; foreign affairs, however, were in such a condition as to prevent the beginning of actual hostility. On Sept. 19, 1655, Fathers Chaumonot and Dablon, after pressing invitations to do so, started from Quebec to visit and view the Seneca country, and to establish there a French habitation and teach the Seneca the articles of their faith.

In 1657 the Seneca, in carrying out the policy of the League to adopt conquered tribes upon submission and the expression of a desire to live under the form of government established by the League, had thus incorporated eleven different tribes into their body politic.

In 1652 Maryland bought from the Minqua or Susquehanna Indians, i. e. the Conestoga, all their land claims on both sides of Chesapeake bay up to the mouth of Susquehanna r. In 1663, 800 Seneca and Cayuga warriors from the Confederation of the Five Nations were defeated by the Minqua, aided by the Marylanders. The Iroquois did not terminate their hostilities until famine had so reduced the Conestoga that in 1675, when the Marylanders had disagreed with them and had withdrawn their alliance, the Conestoga were completely subdued by the Five Nations, who thereafter claimed a right to the Minqua lands to the head of Chesapeake bay.

In 1744 the influence of the French was rapidly gaining ground among the Seneca; meanwhile the astute and persuasive Col. Johnson was gradually winning the Mohawk as close allies of the British, while the Onondaga, the Cayuga, and the Oneida, under strong pressure from Pennsylvania and Virginia, sought to be neutral.

In 1686, 200 Seneca warriors went w. against the Miami, the Illinois in the meantime having been overcome by the Iroquois in a war lasting about five years. In 1687 the Marquis de Denonville assembled a great horde of Indians from the region of the Upper lakes and from the St. Lawrence—Hurons, Ottawa, Chippewa, Missisauga, Miami, Illinois, Montagnais, Amikwa, and others-under Durantaye, Du Lhut, and Tonti, to serve as an auxiliary force to about 1,200 French and Colonial levies, to be employed in attacking and destroying the Seneca. Having reached Irondequoit, the Seneca landing-place on lake Ontario, Denonville built there a stockade in which he left a garrison of 440 men. Thence advancing to attack the Seneca villages, he was ambushed by 600 or 800 Seneca, who charged and drove back

the Colonial levies and their Indian allies, and threw the veteran regiments into disorder, Only by the overwhelming numbers of his force was Denonville saved from disastrons defeat.

In 1763, at Bloody Run and the Devils Hole, situated on Niagara r. about 4 m. below the falls, the Seneca ambushed a British supply train on the portage road from Ft. Schlosser to Ft. Niagara, only three escaping from a force of nearly 100. At a short distance from this place the same Seneca ambushed a British force composed of two companies of troops who were hastening to the aid of the supply train, only eight of whom escaped massacre. These bloody and harsh measures were the direct result of the general unrest of the Six Nations and the Western tribes, arising from the manner of the recent occupancy of the posts by the British, after the surrender of Canada by the French on Sept. 8, 1760. They contrasted the sympathetic and bountiful paternalism of the French régime with the neglect and niggardliness that characterized the British rule. Such was the state of affairs that on July 29, 1761, Sir Wm. Johnson wrote to General Amherst: "I see plainly that there appears to be an universal jealousy amongst every nation, on account of the hasty steps they look upon we are taking towards getting possession of this country, which measures, I am certain, will never subside whilst we encroach within the limits which you may recollect have been put under the protection of the King in the year 1726, and confirmed to them by him and his successors ever since and by the orders sent to the governors not to allow any one of his subjects settling thereon but that it should remain their absolute property." But, by the beginning of the American Revolution, so well had the British agents reconciled them to the rule of Great Britain that the Seneca, together with a large majority of the people of the Six Nations, espoused the cause of the British against the Colonies. Consequently Gen. Sullivan, in 1779, after defeating their warriors, burned their villages and destroyed their crops.

There is no historical evidence that the Seneca who were on the Ohio and the s. shore of lake Eric in the 18th and 19th centuries were chiefly an outlying colony from the Iroquois tribe of that name dwelling in New York. The significant fact that in historical times their affiliations were never with the Iroquois but rather with tribes usually hostile to them,

is to be explained on the presumption that they were rather some remnant of a subjugated tribe dependent on the Seneca and dwelling on lands under the jurisdiction of their conquerors. It is a fair inference that they were largely subjugated Erie and Conestoga. Regarding the identity of these Indians, the following citation from Howe (Hist. Coll. Ohio, II, 574, 1896) is pertinent: "The Senecas of Sandusky-so-called-owned land and occupied 40,000 acres of choice land on the E. side of Sandusky r., being mostly in this [Seneca] and partly in Sandusky co. Thirty thousand acres of this land was granted to them on the 29th of September, 1817, at the treaty . . . of Maumee Rapids. . . . The remaining 10,000 acres, lying s. of the other, was granted by the treaty at St. Mary's, . . . 17th of September, 1818." By the treaty concluded at Washington Feb. 28, 1831, these Seneca ceded their lands in Ohio to the United States and agreed to emigrate s. w. of Missouri, on Neosho r. The same writer states that in IS31 "their principal chiefs were Coonstick, Small Cloud Spicer, Seneca Steel, Hard Hickory, Tall Chief, and Good Hunter, the last two of whom were their principal orators. The old chief Good Hunter told Henry C. Brish, their sub-agent, that this band [which numbered 390 in 1908] were in fact the remnant of Logan's tribe, . . . and says Mr. Brish in a communication to us: 'I cannot to this day surmise why they were ealled Senecas. I never found a Seneca among them. They were Cayugas—who were Mingoes-among whom were a few Oneidas, Mohawks, Onondagas, Tuscarawas, and Wyandots.' The majority of them were certainly not Cavuga, as Logan was Conestoga or Mingo on his maternal side.

In 1677 the Seneca had but four villages, but a century later the number had increased to about 30. The following are the better known Seneca towns, which, of course, were not at all contemporary. Canadasaga, Canandaigua, Caneadea, Catherine's Town, Cattaraugus, Chemung, New Chemung, Old Chemung, Chenango, Cheronderoga, Chinoshageh, Condawhaw, Connewango, Dayoitgao, Deonundagae, Deyodeshot, Deyohnegano, Deyonongdadagana, Dyosyowan, Gaandowanang. Gadaho, Gahato, Gahayanduk, Ganagweh, Ganawagus, Ganeasos, Ganedontwan, Ganogeh, Ganondasa, Ganos, Ganosgagong, Gaonsagaon, Gaousage, Gaskosada, Gathtsegwarohare. Geneseo, Gistaquat, Gwaugweh,

Honeoye, Joneadih, Kanagaro (3), Kanagh-saws, Kannassarago, Kashong, Kaskonchiagon, Kaygen, Keinthe, Newtown, Oatka, Ongnia-ahra, Onnahee, Onoghsadago, Onondarka, Owaiski, Sheshequin, Skahasegao, Skoiyase, Sonojowauga, Tekisedaneyont, Tioniongarunte, Tonawanda, Totiakton, Tsonontowanen, Yorkjough, Yoroonwago,

The earliest estimates of the numbers of the Seneca, in 1660 and 1677, give them about 5,000. Later estimates of the population are: 3,500 (1721); 1,750 (1736); 5,000 (1765); 3,250 (1778): 2,000 (1783): 3,000 (1783): and 1,780 (1796). In 1825 those in New York were reported at 2,325. In 1850, according to Morgan, those in New York numbered 2,712, while about 210 more were on Grand River In 1909 there were 213* res. in Canada. on the Six Nations res. near Brantford, Ont., which, with those on the three reservations in New York, 2,749, would give them a total of 2.962. The proportion of Seneca now among the 4,071 Iroquois at Caughnawaga, St. Regis, and Lake of Two Mountains, Quebec, cannot be estimated.

Aff., 1883.

Setlia SE'Lia . A Bellacoola town at the entrance of S. Bentinck arm, coast of British Columbia.

Se'Lia,—Boas in Mem. Am. Mus. Nat. Hist., 11, 48, 1895. Sitteece.—Whymper, Alaska, 55, 1869.

Seton Lake. The local name for a body of Upper Lillooet around a lake of this name in the interior of British Columbia, subsequently subdivided into the Mission, Neciat, and Seton Lake bands.

Seaton Lake.—Can Ind Mf., 279, 1894 Seton Lake.—Ibid., 1884, 190, 1885

Seven Islands. A Montagnais trading and mission station on the N. shore of the gulf of St. Lawrence, near the mouth of Moisie r., Quebec. In 1884 the inhabitants numbered 269; in 1911, 402.

Sept Isles.—Boucher in Can. Ind. Aff. 1884, pt. 1, 37 1885 – Seven Islands.—Ibid., 185

Seven Nations of Canada. The 7 tribes signified are the Skighquan (Nipissing), Estjage (Saulteurs), Assisagh (Missisauga), Karhadage, Adgenauwe, Karrihaet, and Adirondax (Algonkins). The 4th, 5th, and 6th are unidentified. These are the peoples mentioned in N. Y. Doc. Col. Hist., IV, 899, 1854. In the Mass. Hist. Soc. Coll., 3d s., v, 78, 1836, the Caughnawaga are not included in the 7 tribes there mentioned.

Seven Castles.—Knox (1792) in Am. St. Papers, Ind. Aff., 1, 235, 1832. Seven Nations of Canada.—Maumee council (1793), ibid—Seven Nations of Indians inhabiting lower Canada.—Rep. in Williams, Vermont, 11, 291, 1809. Seven nations of Lower Canada Indians.—Caughnawaga address (1798), ibid., 233—234—"Seven Tribes" on the River St. Lawrence.—Mass. Hist Soc Coll 3d s., v. 78, 1836.

Sewathen. A Cowichan tribe formerly living on the coast of British Columbia s. of the mouth of Fraser r. They are now on a reservation near Pt. Roberts, called Chewassan from the name of the tribe. Pop. 51 in 1911.

Isowasson.—Can. Ind. Aff., 74, 1878 Sewā'çen.—Hill-Tout in Ethnol Surv. Can., 54, 1902 Stanâçen.—Boas, MS, B. A. E., 1887. Stenwā'cel.—Boas in Rep. 64th Meeting B. A. A. S., 454, 1894 given as a town). Tche-wassan.—Can. Ind. Aff., 277, 1894

Tsawwassen.—Ibid., pt. 11, 75, 1904 Tsonassan.—Ibid., 2883. Tsowassan.—Ibid., 316, 1880

Sgilgi (Sgi'lgi, 'plenty of scoters'). A Haida town of the Saki-kegawai family, formerly in an inlet on the s. w. coast of Moresby id., Queen Charlotte ids., Brit. Col. It was the most important Ninstints town on the West coast, and its chief became town chief of Ninstints.—Swanton, Cont. Haida, 277, 1905.

Shaganappi. Thongs of rawhide used for rope or cord. Shaganappi, or "Northwest iron," was an important factor in the economic development of the N. W., where it was a godsend to the mixed-bloods and white settlers. Out of it was made the harness of the famous Red River earts and of the dog sleds of the country to the northward. It was one of the most important gifts from the Indian to the white man. A variety of spellings of this word exists, as shaganappi, shaggineppi, and

shaggunappy. It is derived from pisaganābiy, pishaganāpi, in the Cree dialects of Algonquian, the corresponding Chippewa word being bishaganābi, signifying 'a thong of rawhide.' Gerard gives the Wood Cree word as pishaganābii, from pishagan 'hide' (lit. 'what is flayed'), ābii 'cord', 'string', 'rope,' It has been said that ''shaganappi and Scotchmen made the Northwest.'' A corresponding term is babiche (q. v.), though it is not of such importance as the other.

Shagsowanoghroona (Iroquois name). A tribe or band, probably Algonquian, living in Canada in 1759.—Canajoharie conf. (1759) in N. Y. Doc. Col. Hist., vii, 393, 1856.

Shahanik (Sha'xanix, 'little rock'). A village of the Nicola band of Ntlakyapamuk near Nicola r., 16 m. above Spence Bridge, Brit. Col.; pop. 81 in 1901, the last time the name appears.

Ca'xanix.—Teit in Mem. Am. Mus. Nat. Hist., II, 174, 1900. Ceokung.—Hill-Tout in Rep. Ethnol. Surv. Can., 4, 1890. Shahahanih.—Can. Ind. Aff., 308, 1887. Shahahanih.—Ibid., 269, 1889. Sh-ha-ha-nih.—Ibid., 196, 1885. Shahanik.—Ibid., pt. II, 166, 1901.

Shahwundais ('God of the South,' who makes the summer.—J. Jones). A converted Chippewa, generally known as John Sunday, who took an active part in the Methodist missionary work among his people during the early and middle parts of the 19th century. Peter Jones (Hist. Ojeb. Inds., 200, 1861) says he belonged to the Mink "tribe" (probably the Marten gens of Warren). His home, and probably the place of his birth, about 1796, was Alnwick township, Northumberland co., Ont. In 1823 John and Peter Jones, the latter the author of the History of the Ojebway Indians, were converted at the Methodist mission on Credit river, Peel co., Ont. The brothers commenced teaching their people, and with other missionaries in 1826-27 held a eampmeeting near Cobourg, at which Sunday was converted. He began at once to learn to read and write, was ordained as a minister, and entered actively into missionary work among the Chippewa. With George Copway and other native preachers he went on several missionary tours to the Chippewa about lake Superior. They established a permanent mission in 1833 at L'Anse on Keweenaw bay, Mich., and another in 1835 at Ottawa lake, in the same state. Sunday appears to have devoted some time to special work among the Saulteurs at Sault Ste. Marie, where his preach-

ing was so highly regarded that women bearing children in their arms forded streams to reach the meeting place (Jones, op. cit., 227). It was about this period that the Rev. Wm. Case, who had been influential in bringing Sunday into the church, took him on a tour of the States for the purpose of raising funds for the Canadian missions. At the general council of the Christian Chippewa and Ottawa, held at Saugeen, Ont., in 1845, Sunday was present. and his eloquence on this occasion has received special mention. Copway (Life, Hist, and Tray., 197, 1847) says he was "uncommonly eloquent"; Jones (op. cit., 201) says he was "particularly happy in his address at this meeting, and towards the close, thrilled and astonished all present by the ingenuity and power of his appeals." After this he is not mentioned, though he was probably living as late as 1855. Copway speaks of him as a chief, and he signs as chief the report made by him and one Simpson as commissioners of Alnwick in 1842.

(C. T.)

Shakkeen. A (former?) Salish village or band under Fraser superintendency, Brit. Col. —Brit. Col. map, Ind. Aff., Victoria, 1872.

Shamans and Priests. Mediators between the world of spirits and the world of men may be divided into two classes: The shamans, whose authority was entirely dependent on their individual ability, and the priests, who acted in some measure for the tribe or nation, or at least for some society.

Shaman is explained variously as a Persian word meaning 'pagan', or, with more likelihood, as the Tungus equivalent for 'medicine-men', and was originally applied to the medicine-men or exorcists in Siberian tribes, from which it was extended to similar individuals among the Indian tribes of America.

Among the Haida and Tlingit, shamans performed practically all religious functions, including, as usual, that of physician, and occasionally a shaman united the civil with the religious power by being a town or house chief also. Generally speaking, he obtained his position from an uncle, inheriting his spiritual helpers just as he might his material wealth; but there were also shamans who became such owing to natural fitness. In either case the first intimation of his new power was given by the man falling senseless and remaining in that condition for a certain period. Elsewhere in North America, however, the sweat bath was an important assistant in bringing about

the proper psychie state, and certain individuals became shamans after escaping from a stroke of lightning or the jaws of a wild beast. When treating a patient or otherwise performing, a N.W. Coast shaman was supposed to be possessed by a supernatural being whose name he bore and whose dress he imitated, and among the Tlingit this spirit was often supported by several minor spirits which were represented upon the shaman's mask and strengthened his eyesight, sense of smell, etc. He let his hair grow long, never cutting or dressing it. When performing he ran around the fire very rapidly in the direction of the sun, while his assistant beat upon a wooden drum and his friends sang the spirit songs and beat upon narrow pieces of board. Then the spirit showed him what he was trying to discover, the location of a whale or other food animal. the approach of an enemy, or the cause of the sickness of a patient. In the latter case he removed the object that was causing pain by blowing upon the affected part, sucking at it, or rubbing a charm upon it. If the soul had wandered, he captured and restored it, and, in case the patient had been bewitched, he revealed the name of the offender and directed how he was to be handled. Payment for his services must always be made in advance, but in case of failure it was usually returned, while among some tribes failure was punished with death. Shamans also performed sleight-ofhand feats to show their power, and two shamans among hostile people would fight each other through the air by means of their spirits, while no war party started off without

The ideas behind shamanistic practices in other American tribes were very much the same as these, but the forms which they took varied considerably. Thus instead of being actually possessed, Iroquois shamans and probably others controlled their spirits objectively as if they were handling so many instruments, while Chitimacha shamans consulted their helpers in trances.

Among the Nootka there were two classes of shamans, the *Uctūk-n*,, or 'workers', who cured a person when sickness was thrown upon him by an enemy or when it entered in the shape of an insect, and the *K'ok'oā'tsmaah*, or 'soul workers', especially employed to restore a wandering soul to its body.

The Songish of the southern end of Vancouver id. also had two sorts of shamans. Of these the higher, called the squad'am, acquired

2 GEORGE V., A. 1912

his power in the usual way by intercourse with supernatural beings, while the si'oua, who was usually a woman, received her knowledge from another si'oua. The former answered more nearly to the common type of shaman, while the function of the latter was to appease hostile powers, to whom she spoke a sacred language. She was also applied to by women who desired to bear children, and for all kinds of charms.

Among the interior Salish the initiation of shamans and warriors seems to have taken place in one and the same manner, i. e. through animals which became the novices' guardian spirits. Kutenai shamans had special lodges in the camp larger than the rest, in which they prayed and invoked the spirits.

Hoffman enumerates three classes of shamans among the Chippewa, in addition to the herbalist or doctor, properly so considered. These were the wābēnō', who practised medical magic, the jēs'sakkī'd, who were seers and prophets deriving their power from the thunder god, and the midē', who were concerned with the sacred society of the Midē'wiwin, and should rather be regarded as priests.

These latter were evidently represented among the Delawares by the *medeu*, who concerned themselves especially with healing, while there was a separate class of diviners called *powwow*, or 'dreamers.'

Unlike most shamans, the angakunirn of the Central Eskimo communicated with their spirits while seated. It was their chief duty to find out the breaking of what taboos had caused sickness or storms.

As distinguished from the calling of a shaman, that of a priest was, as has been said, national or tribal rather than individual, and if there were considerable ritual his function might be more that of leader in the ceremonies and keeper of the sacred myths than direct mediator between spirits and men. Sometimes, as on the N. W. coast and among the Eskimo, the functions of priest and shaman might be combined, and the two terms have been used so interchangeably by writers, especially when applied to the Lastern tribes, that it is often difficult to tell which is the proper one.

Even where shamanism flourished most there was a tendency for certain priestly functions to centre around the town or tribal chief. This appears among the Haida, Tlingit, Tsimshian, and Kwakiutl in the prominent part

the chiefs played in secret society performances, and a chief of the Fraser River or Coast Salish was even more of a high priest than a civil chief, leading his people in all religious functions.

Most of the tribes of the eastern plains contained two classes of men that may be placed in this category. One of these classes consisted of societies which concerned themselves with healing and applied definite remedies, though at the same time invoking superior powers, and to be admitted to which a man was obliged to pass through a period of instruction. The other was made up of the one or the few men who acted as superior officers in the conduct of national rituals, and who transmitted their knowledge concerning it to an equally limited number of successors. Similar to these, perhaps, were the priests of the Mide'wiwin ceremony among the Chippewa, Menominee, and other Algonquian tribes.

(J. R. S.)

Sheaksh ('new water'). A Niska village site on the s. bank of Nass r., Brit. Col., 5 m. above the cañon, at the month of a stream that came into existence after the eruption that is visible at this point. Several modern fishing houses mark the site. (G. T. E.)

Shediac. A Micmac village or band in 1670 at the present Shediac, on the E. coast of New Brunswick.

Chedaik.—Vaudreuil (1755) in N. Y. Doc. Col. Hist., x, 359, 1858. Gediak.—Frye (1760) in Mass. Hist. Soc. Coll., 1st s., x, 115, 1809. Jediuk.—Stiles (1761), ibid., 116

Shemaukan (Shimagan, 'lance,' 'sword.'—Gerard). The largest of the Cree bands in 1856, at which period they occupied 350 tipis. They roamed and hunted in the Cypress and Prickly-pear mts., s. E. Alberta and s. w. Saskatchewan, but occasionally visited Missouri r. for trade. They took their name from a chief, otherwise known as The Lance.

She-mau-kau. Hayden, Ethnog, and Philol. Mo. Val. 237, 1862 (misprint).

Shemps. A Squawmish village community on the left bank of Skwamish r., Brit. Col.

Cêmps.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900

Shennosquankin. One of the 3 bands of Similkameen Okinagan in British Columbia. Total pop. of Shennosquankin, Ashnola and Chuchuwayha bands in 1911, 175.

Shennoquankin.—Can. Ind. Aff., pt. 11, 166, 1901. Shennoskuankin.—Ibid., 419, 1898. Shen-nosquan-kin.—Ibid., 191, 1883.

Sheshebe ('duck'). A gens of the Chippewa.

Muk-ud-a-shib.—Warren (1852) in Minn. Hist. Soc. Coll., v, 45, 1885 ('black duck'). She-shebe'.—Morgan, Anc. Soc., 166, 1877. Sheshebug.—Tanner, Narr., 315, 1830. Shiship.—Gatschet, Ojibwa MS., B. A. E., 1882.

Shilekuatl (CilEk'uā'll). A Cowichan town at Yale, Brit. Col., belonging to the Tsakuam tribe (q. v.). Probably the Indian name for Yale. Pop. 76 in 1911.

Cilek'uā'ti.—Boas in Rep. Brit. A. A. 8, 454, 1894. Lichaltchingko.—Brit. Col. Map, Ind. Aff., Victoria, 1872. Yale.—Can. Ind. Aff., 74, 1878.

Shimpshon. A body of Salish of Kamloops agency, Brit. Col.; pop. 186 in 1884, the last time the name appears.

Shimps-hon.—Can. Ind. Aff. 1884, 188, 1885.

Shishaiokoi (Cīcai'ōqoi). A Squawmish village community on the E. coast of Howe sd., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Shkuet (C' kūēt). A village of the Ntlakyapamuk on Fraser r., near Spuzzum, Brit. Col.—Hill-Tout in Rep. Ethnol. Surv. Can., 5, 1899.

Shkuokem (*Ckūō'kEm*, 'little hills'). A village of the Ntlakyapamuk on Fraser r., above Spuzzum, Brit. Col.—Hill-Tout in Rep. Ethnol. Surv. Can., 5, 1899.

Shlalki (C'lä'lkī). An insignificant Chilliwak village in s. British Columbia.—Hill-Tout in Rep. Ethnol. Surv. Can., 4, 1902.

Shubenacadie (Schubenakâdi, 'plenty of ground-nuts(?).—Trumbull). A Miemae village and reservation at the head of Shubenacadie r., n. of Halifax, Nova Scotia. Pop. 96 in 1911.

Chibenaccadie.—Doe. of 1746 in N. Y. Doe. Col. Hist., x, 70, 1858. Chigabennakadik.—Frye (1760) in Mass. Hist. Soe. Coll., 1st s., x, 115, 1809. Shubenakadie.—Rand, Miemae Reading Bk, 81, 1875. Shubenecadie.—Macdonald in Can. Ind. Aff. for 1884, xxix, 1885.

Shuimp (Cūimp, 'strong'). A head village of the Ntlakyapamuk just above Yale, Fraser r., Brit. Col.—Hill-Tout in Rep. Ethnol. Surv. Can., 5, 1899.

Shuswap (strictly Sequa'pmuq). The most important Salishan tribe of British Columbia, formerly holding most of the territory between the Columbia r. watershed and Fraser r., including the basin of Thompson r. above Ashcroft, embracing Shuswap and Adams lakes, and extending N. to include Quesnel lake.

They now occupy a number of small village reservations attached to the Kamloops, Okanagan and Williams Lake agencies, together with a small band, descendants of Chief Kinbasket, for about 60 years past, permanently settled among the Kutenai. On the N. they border the Tsilkotin, an Athapascan tribe; on the s. and w. the kindred Okinagan, Ntlakyapamuk, and Lillooet. They have probably dwindled at least one-half since the advent of the miners into their country half a century ago, but still number more than 2,100, in the following bands: Kamloops Agency—Adams Lake, Ashcroft, Bonaparte, Deadman Creek, Kamloops, Neskainlith or Halaut, North Thompson, Little Shuswap Lake; pop. in 1911, 1,135; Okanagan Agency — Spallumcheen; pop. in 1911, 164; Williams Lake Agency - Alkali Lake, Canoe Creek, Canim Lake, Clinton, Soda Creek, Williams Lake, also Fountain and Pavilion (occupied chiefly by Lillooet); pop. in 1911, 1,027; Kootenay Agency—Kinbasket; pop. in 1911, 63.

Consult Dawson in Trans. Roy. Soc. Canada, IX, sec. II, 1892; Teit in Mem. Am. Mus. Nat. Hist., II, Anthr. I, no. 4, 1900; Ann. Rep. Can. Ind. Aff.; Boas in 6th Rep. N. W. Tribes Can., 1891. (J. M.)

Atenas.-Morse, Rep. to Sec. War, 371, 1822 (the variants of this are from the Takulli word meaning 'stranger'). Atnahs.-Gallatin in Trans. Am. Antiq. Soc., n. 16, 134, 1836. At-naks.-Mayne, Brit. 2 GEORGE V., A. 1912

Tribes Can., 10, 1889 ('without shirts and trousers'); Kutenai name). Towapummuk, -Brit Col map, Ind Aff., Victoria, 1872

Shuwalethet (Cuwa'leçet). A winter village of the Katsey tribe of Cowichan at the s. end of Pitt lake, near lower Fraser r., Brit. Col.—Boas in Rep. 64th Mtg. Brit. A. A. S., 454, 1894.

Siamannas ('hunters'). A name applied generally to the interior Indians by those of Washington and British Columbia. This form of the word was used for some Salish on Whatcom and Siamanna lakes, N. w. Wash. Similarly the Ntlakyapannık were called Somena by the Cowichan, while Swādabsh, which was applied by the Nisqualli to the Shahaptian Klikitat and Yakima, is said to have the same meaning. (Gibbs in Cont. N. A. Ethnol., 1, 341, 1877). This last, however, resembles Swēdebish, a name given to one of the Skagit tribes on Whidbey id., Puget sd.

(J. R. S.)

Saw-meena.—Anderson quoted by Gibbs in Hist. Mag., vii, 73, 1863. Semä'mila.—Teit in Mem. Am. Mus. Nat. Hist., ii, 167, 1900. Sia-man-nas.—Fitzhugh in 1nd. Aff. Rep. 1857, 329, 1858. Si-him-e-na.—Mahoney (1869), ibid., 70, 576, 1869 (or Stick Indians). Some-na.—Dawson in Trans. Roy. Soc. Can. 1891, sec. ii, 6, 1892.

Siathelaak (Sīathēlā'aq). A division of the Nuhalk, a branch of the Bellacoola of the coast of British Columbia.—Boas in 7th Rep. N. W. Tribes Can., 3, 1891.

Siccameen. A Cowichan tribe on Oyster bay, s. E. Vancouver id.; pop. 40 in 1906, 42 in 1911.

Ceqemen.—Boas, M.S., B. A. E., 1887 — Siccameen.—Can. Ind. Aff., pt. 11, 164, 1901. — Sickameen.—Ibid. 120, 310, 1880. — Sick-a-mun.—Ibid., 308, 1879. Tickarneens.—Ibid., lix, 1877.

Sichanetl (Sītca'nētl). A Songish division at Oak bay, s. end of Vancouver id.—Boas in 6th Rep. N. W. Tribes Can., 17, 1890.

Siechem (Sīē'tcEm, 'sandy'). A Squawmish village community on the right bank of Skwamish r., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Siguniktawak ('inhabitants of cape Chignecto,' from sigunikt, 'foot cloth,' the native name of the cape). A Micmac band on a reservation near Parrsborough, Cumberland co., Nova Scotia. The number connected with the agency was 90 in 1911.

Siguniktawak. A Miemae band in Pictou co., Nova Scotia (Rand, Miemae Reading Bk., 81, 1875). The Micmac now in this county occupy the Fisher Grant and Indian Island reserves and numbered 161 in 1911.

Sihasapakhcha (Blackfeet proper), A Sihasapa band,

Black footed ones. Culbertson in Smithson. Rep. 1850, 141, 1851. Siha-sapa-qtca.—Dorsey in 15th Rep. B. A. E., 219, 1897. Sihasapa-rca.—Swift, letter to Dorsey, 1884.

Sikokitsimiks ('black doors'). A band of the Piegan division of the Siksika.

Black Doors.—Grinnell, Blackfoot Lodge Tales, 225, 1892—Si-köh'-i-tsim.—Hayden, Ethneg, and Philol. Mo. Val., 264, 1862 (trans. 'band with black doors'). Sik'-o-kit-sim-iks.—Grinnell, op_cit., 209.

Sikopoksimaiks ('black-fat roasters'). A band of the Piegan division of the Siksika.

Black Fat Roasters.—Grinnell, Blackfoot Lodge Tales, 225, 1892. Sik-o-pok'-si-maiks.—Ibid., 209

Sikosuilarmiut ('inhabitants of the shore without an ice floe'). An Eskimo tribe inhabiting the region about King cape, s. w. Baffin island. They are settled in two places, Nurata and Sikosuilak.

Sekoselar.—Gilder, Schwatka's Scarch, 181, 1881. Sekoselar Innuits.—Nourse, Am. Explor, 200, 1884. Sicosuilarmiut.—Boas in Trans. Anthr Soc. Wash., 95, 1884. Sikosuilarmiut.—Boas in 6th Rep. B. A. E., 421, 1888. Ssikosuilar-miut.—Boas in Deutsche Geog Blutt, viii, no. 1, 1885.

Siksahpuniks ('black blood'). A band of the Kainah division of the Siksika.

Blackblood.—Grinnell, Blackfoot Lodge Tales, 209, 1892. Siks-ah'-pun-iks.—Ibid.

Siksika ('black feet', from siksinam 'black', ka the root of oqkatsh'foot'. The origin of the name is disputed, but it is commonly believed to have reference to the discolouring of their moccasins by the ashes of the prairie fires; it may possibly have reference to black-painted moccasins, such as were worn by the Pawnee, Sihasapa, and other tribes). An important Algonquian confederacy of the northern plains, consisting of three subtribes, the Siksika proper or Blackfeet, the Kainah or Bloods, and the Piegan, the whole body being popularly known as Blackfeet. In close alliance with these are the Atsina and the Sarsi.

Within the recent historic period, until gathered upon reservations, the Blackfeet held most of the immense territory stretching almost from North Saskatchewan r., Alta. and Sask., to the southern head-streams of the Missouri in Montana, and from about long. 105° to the base of the Rocky mts. A century earlier, or about

1790, they were found by Mackenzie occupying the upper and middle South Saskatchewan, with the Atsina on the lower course of the same stream, both tribes being apparently in slow migration toward the N. w. (Mackenzie, Voy., lxx-lxxi, 1801). This would make them the vanguard of the Algonquian movement from the Red River country. With the exception of a temporary occupancy by invading Cree, this extreme northern region has always, within the historic period, been held by Athapascan tribes. The tribe is now settled on three reservations in Alberta, and one in N. w. Montana, about half being on each side of the international boundary.

So far as history and tradition go, the Blackfeet have been roving buffalo hunters, dwelling in tipis and shifting periodically from place to place, without permanent habitations, without the pottery art or canoes, and without agriculture excepting for the sowing and gathering of a species of native tobacco. They also gathered the camas root in the foot-hills. Their traditions go back to a time when they had no horses and hunted their game on foot; but as early as Mackenzie's time, before 1800, they already had many horses, taken from tribes farther to the s., and later they became noted for their great horse herds. It is entirely probable that their spread over the plains region was due largely to the acquisition of the horse, and, about the same time, of the gun. They were a restless, aggressive, and predatory people, and, excepting for the Atsina and Sarsi, who lived under their protection, were constantly at war with all their neighbours, the Cree, Assimboin, Sioux, Crows, Flatheads, and Kutenai. While never regularly at war with the United States, their general attitude toward Americans in the early days was one of hostility, while maintaining a doubtful friendship with the Hudson's Bay Co.

Their culture was that of the Plains tribes generally, although there is evidence of an earlier culture, approximately that of the tribes of the Eastern forests. The 3 main divisions seem to have been independent of each other, each having its own Sun dance, council, and elective head-chief, although the Blackfeet proper appear to have been the original nucleus. Each of the 3 was subdivided into a number of bands, of which Grinnell enumerates 45 in all. It has been said that these bands were gentes, but if so, their gentile character is no longer apparent. There is also a military and fraternal organization, similar to that existing in

other Plains tribes, known among the Blackfeet as the Ikunuhkahtsi, or 'All Comrades,' and consisting formerly, according to Grinnell of at least 12 orders or societies, most of which are now extinct. They have a great number of dances—religious, war, and social—besides secret societies for various purposes, together with many "sacred bundles," around each of which centres a ritual. Practically every adult has also his personal "medicine." Both sexes may be members of some societies. Their principal deities are the Sun, and a supernatural being known as Napi, 'Old Man,' who may be an incarnation of the same idea. The dead are usually deposited in trees or sometimes laid away in tipis erected for the purpose on prominent hills.

As usual, many of the early estimates of Blackfoot population are plainly unreliable. The best appears to be that of Mackenzie. who estimated them about 1790 at 2,250 to 2,500 warriors, or perhaps 9,000 souls. In 1780-81, in 1837-38, in 1845, in 1857-58, and in 1869 they suffered great losses by smallpox. In 1864 they were reduced by measles, and in 1883-84 some 600 of those in Montana died of sheer starvation in consequence of the sudden extinction of the buffalo coincident with a reduction of rations. The official Indian report for 1858 gave them 7,300 souls, but another estimate, quoted by Hayden as having been made "under the most favourable circumstances" about the same time, gives them 2,400 warriors and 6,720 souls. In 1909 they were officially reported to number in all 4,635, viz.: Blackfoot agency, Alberta, 795; Blood agency, Alberta, 1,174; Piegan agency, Alberta, 471; Blackfoot agency (Piegan), Montana, 2,195.

Consult Grinnell, Blackfoot Lodge Tales, 1892; Hayden, Ethnog, and Philol. Mo. Val., 1862; Schultz, My Life as an Indian, 1907; Wissler (1) in Ontario Archeol. Rep. for 1905, 1906, (2 in Anthr. Pap. Am. Mus. Nat. Ilist., v, pt. 1, 1910.

Ah-hi'-tä-pe.—Morgan, Consang, and Affin, 289, 1871 (former name for themselves; trans 'blood people'). Ayatchinini.—Baraga, Eng.-Cuch. Dict, 29, 1878 (Chippewa name). Ayatchiyiniw.—Lacombe, Dict Langue Cris, 325, 1864 ('stranger, 'ahen,' 'enemy'; Cree name for Siksika, Bloods, and Piegan. Beaux Hommes.—Dobbs, Hudson Bay, 35, 1744 Black-et.—Writer of 1786 in Mass Hist Soc. Coll, 18t s. III, 24, 1794 Blackfoot.—Lewis and Clark, Discoy,

^{*}In 1911, there were 2,337 in Alberta; 767 in the Blackfoot agency, 1,122 in the Blood and 448 in the Piegan.

Slaves.-Coues, Henry and Thompson Jour, 1814. Stynafyn.—Ibid. (black': Okinagan name). Toñkonko.-Mooney in 17th Rep. B. A. E., 1, 426, 1898 ('black legs': Kiowa name). Tuhu'yti-omokat.--

Gatschet, Comanche MS., B. A. E., 1884 (Comanche name, from tuhūtti 'black'). Wateni'hte.—Gatschet, Arapaho MS., B. A. E., 1882 (Arapaho name). Yatcheé-thinyoowuc.—Richardson quoted by Franklin, Journ. Polar Sea, 96, 1824 ('strangers': Cree name for several tribes, including the Siksika).

Siksika. A tribe of the Siksika confederacy (q. v.). They now live on a reservation in Alberta, Canada, on upper Bow r., and are officially known as the Running Rabbit and Yellow Horse bands. They were divided into the following subtribes or bands: Aisikstukiks, Apikaiyiks, Emitahpahksaiyiks, Motahtosiks, Puhksinahmahyiks, Saiyiks, Siksinokaks, Tsiniktsistsoyiks. Pop. 942 in 1902, 767 in 1911.

Siksinokaks ('black elks'). A subtribe or band of the Kainah division of the Siksika or Blackfeet, and also of the Siksika proper.

Black Elks.—Grinnell, Blackfoot Lodge Tales, 208, 209, 1892. Sik-si-no'-kai-iks.—Hayden, Ethnog. and Philol. Mo. Val., 264, 1862. Siks-in'-o-kaks.—Grinnell, op. cit.

Siksinokaks. A subtribe or band of the Siksika.

Siks-In'-o-kaks.—Grinnell, Blackfoot Lodge Tales, 208, 1892.

Siktokkis. A town of the Ahousaht Nootka on the N. arm of Clayoquot sd., Vancouver id. It was destroyed by Admiral Denham in Oct. 1864 in punishment for the killing of the crew of the trading schooner Kingfisher.

Sik-tok-kis.-Sproat, Savage life, 197, 1868.

Sikutsipumaiks ('black patched moccasins'). A band of the Piegan division of the Siksika or Blackfeet.

Black Patched Moccasins.—Grinnell, Blackfoot Lodge Tales, 225, 1892. Si-ka'-tsi-po-maks.—Hayden, Ethnog. and Philol. Mo. Val., 264, 1862 (trans. band with black patched moccasins'). Sik-ut'-si-pum-aiks.—Grinnell, op cit., 209.

Sillery. A Jesuit mission village established in 1637 on St. Lawrence r., a few miles above Quebec. The Algonkin and Montagnais were first gathered there and were joined at the close of King Philip's war in 1679 by Abnaki from Kennebee r. in Maine in such numbers that it soon became virtually an Abnaki village. In 1683–85 the inhabitants removed to St. Francis, and the village was deserted. (J. M.)

Kamiskwawāngachit.—Vetromile in Me. Hist. Soc. Coll., vr. 213, 1859 ('where they catch salmon with the spear': Abnaki name). Sciller.—Lahontan (1703) quoted by Richardson, Arct. Exped., n. 39, 1851. Silem.—Jefferys, Fr. Doms., pt. 1, map, 1761 (misprint). Sillerie.—Doc. of 1759 in N. Y. Doc. Col. Hist., x, 1037, 1858. Sillery.—Denonville (1687), ibid.,

IX, 354, 1855. St. Joseph.—Vetromile, op. cit. (mission name). Syllery.—Jefferys, Fr. Doms., pt. 1, 10, 1761.

Similkameen. The local name for several bands of Okinagan on a river of the same name, a N. w. tributary of the Okanagan, Brit. Col. Under the term "Similkameen group" are classed 3 or 4 villages in the Canadian Reports of Indian Affairs, namely, Shennosquankin, Keremeos, Chuchuwayha, and, subsequently, Ashnola, having an aggregate population of 175 in 1911. These Indians are also divided into Lower and Upper Similkameen, with 138 and 37 inhabitants, respectively, in 1911.

Chitwout Indians.—Brit. Col. Map, Ind. Aff., Victoria, 1872 (in two villages on Similkameen r.). Samilk-a-muigh.—Ross, Adventures, 290, 1849. Similikameen.—Can. Ind. Aff., 74, 1878. Similkameen.—Ibid., 364, 1897. Smelkameen.—Ibid., 309, 1879. Smilè'qamux.—Teit in Men. Am. Mus. Nat. Hist., 11, 167, 1900 (='people of Similkameen'). Smilkameen. Can. Ind. Aff. 1880, 317, 1881. Smilkamin.—Gat-schet, MS., B. A. E. (Salish name). Smilkěmív.—

Sindas-kun (St'mlas kun, 'village on a point always smelling'). A Haida town in the Ninstints country belonging to the Kaidjukegawai.—Swanton, Cont. Haida, 277, 1905.

Sindatable (Si'ndAt!als, 'gambling place'). A Haida town of a branch of the Kuna-lanas family called Djus-hade, formerly near Tsooskahli, an inner expansion of Masset inlet, Queen Charlotte ids., Brit. Col.—Swanton, Cont. Haida, 281, 1905.

Sinegainsee (Sine-gain'-see, 'erceping thing', i. e. 'snake'). A clan of the Hurons.—Morgan, Anc. Soc., 153, 1877.

Singa (St'ñga, 'winter [village]'). A Haida town of the Kas-lanas family, situated on the N. side of Tasoo harbour, w. coast of Moresby id., Queen Charlotte ids., Brit. Col.—Swanton, Cont. Haida, 280, 1905.

Sinimiut. A Central Eskimo tribe on Pelly bay, Arctic coast, Kee. They live on musk-ox and salmon like the tribes of Hudson bay, and have also an abundance of seals. They numbered 45 in 1902.

Pelly Bay Eskimo.—Ausland, 653, 1885. Sinamiut.—Boas in Bull. Am. Mus. Nat. Hist., xv, pt. 2, 377, 1907. Sinimijut.—Boas in Zeitschr. Ges. f. Erdk., 226, 1883. Sinimiut.—Boas in 6th Rep. B. A. E., 451, 1888.

Sinopah (Sin'-o-pah, 'kit-foxes', 'Piegans'). A society of the Ikunuhkatsi, or All Comrades, in the Piegan tribe of the Siksika. It is now obsolete among the Piegan, but still existed

with the Kainah in 1892.—Grinnell, Blackfoot Lodge Tales, 221, 1892.

Sintaktl (Sinta'kL, 'reached the bottom', or 'bottom of the hill'). A Ntlakyapamuk village 30 or 40 m. above Yale, on the w. side of Fraser r., Brit. Col.

C'nta'k'tl.—Hill-Tout iu Rep. Ethnol. Surv. Can, 5, 1899. Shuitackle.—Can. Ind. Aff, 79, 1878. Sinta'kt.—Teit in Mem. Am. Mus. Nat. Hist., 11, 169, 1900.

Siorartijung. A spring settlement of Padlimiut Eskimo on the coast s. of Home bay, Baffin island, Franklin.—Boas in 6th Rep. B. A. E., map, 1888.

Siouan Family. The most populous linguistic family N. of Mexico, next to the Algonquian. The name is taken from a term applied to the largest and best known tribal group or confederacy belonging to the family, the Sioux or Dakota, which, in turn, is an abbreviation of Nadowesioux, a French corruption of Nadowe-is-iw, the appellation given them by the Chippewa. It signifies 'snake,' 'adder,' and, by metaphor, 'enemy.'

Before changes of domicile took place among them, resulting from contact with whites, the principal body extended from the w. bank of the Mississippi northward from the Arkansas nearly to the Rocky mts., except for certain sections held by the Pawnee, Arikara, Cheyenne, Arapaho, Blackfeet, Comanche, and Kiowa. The Dakota proper also occupied territory on the E. side of the river, from the mouth of the Wisconsin to Mille Lacs, and the Winnebago were about the lake of that name and the head of Green bay. Northward, Siouan tribes extended some distance into Canada, in the direction of lake Winnipeg. A second group of Siouan tribes, embracing the Catawba, Sara or Cheraw, Saponi, Tutelo, and several others, occupied the central part of North Carolina and South Carolina and the piedmont region of Virginia (see Mooney, Siouan Tribes of the East, Bull. B. A. E., 1894), while the Biloxi dwelt in Mississippi along the Gulf coast, and the Ofo on Yazoo r. in the same state.

According to tradition the Mandan and Hidatsa reached the upper Missouri from the N. E., and, impelled by the Dakota, moved slowly upstream to their present location Some time after the Hidatsa reached the Missouri, internal troubles broke out, and part, now called the Crows, separated and moved westward to the neighborhood of Yellowstone r. The Dakota formerly inhabited the forest

region of s. Minnesota, and do not seem to have gone out mon the plains until hard pressed by the Chippewa, who had been supplied with guns by the French, According to all the evidence available, traditional, and otherwise, the so-called Chiwere tribes-- Iowa, Oto, and Missouri -separated from the Winnebago or else moved westward to the Missouri from the same region. The five remaining tribes of this group—Omaha, Ponca, Osage, Kansa, and Quapaw—which have been called Dhegiha by Dorsey, undoubtedly lived together as one tribe at some former time and were probably living on the Mississippi. Part moving farther down became known as "downstream people," Quapaw, while those who went up were the "upstream people," Omaha. These latter moved N. w. along the river and divided into the Osage, Kansa, Ponca, and Omaha proper. As to the more remote migrations that must have taken place in such a widely scattered stock, different theories are held. By some, it is supposed that the various sections of the family have become dispersed from a district near that occupied by the Winnebago, or, on the basis of traditions recorded by Gallatin and Long, from some point on the N. side of the Great lakes. By others, a region close to the eastern Siouans is considered their primitive home, whence the Dhegiha moved westward down the Ohio, while the Dakota, Winnebago, and eognate tribes kept a more northerly course near the Great lakes. tribes of the Manahoae confederacy were encountered by Capt. John Smith in 1608, but, after that time, all the eastern Siouans decreased rapidly in numbers through Iroquois attacks and European aggression. Finally the remnants of the northern tribes, consisting chiefly of Tutelo and Saponi, accompanied the Tuscarora northward to the Iroquois and were adopted by the Cayuga in 1753. On the destruction of their village by Sullivan in 1779 they separated, the Saponi remaining with the Cayuga in New York, while the Tutelo fled to Canada with other Cavuga. From the few survivors of the latter tribe, Hale and J. O. Dorsey obtained sufficient material to establish their Siouan connections, but they are now almost extinct. The fate of the Saponi is probably the same. The southern tribes of this eastern Siouan group consolidated with the Catawba, and continued to decrease steadily in numbers, so that at the present time there are only about 100 remaining of the whole confederated body. Some of the eastern Sionan tribes may have been reached by De Soto; they are mentioned by the Spanish captain Juan Pardo, who conducted an expedition into the interior of South Carolina in 1567.

The Biloxi were first noted by Herville, who found them in 1699 on Pascagoula r., Miss. In the next century they moved x. w. and settled on Red r., La., where the remnant was found by Gatschet in 1886 and their affinities determined. These people reported that another section had moved into Texas and joined the Choctaw.

The Ofo, called Ushpi by their neighbours, are first mentioned by Iberville in 1699, but were probably encountered the year preceding by the missionaries, De Montigny, Davion, La Source, and St. Cosme, though not specifically mentioned. Unlike the other Yazoo tribes, they sided with the French in the great Natchez war and continued to live near the Tuniea Indians. Their Siouan affinity was demonstrated by Swanton in 1908 through a vocabulary collected from the last survivor.

The first known meeting between any western Siouans and the whites was in 1541, when De Soto reached the Quapaw villages in E. Arkansas. The earliest notice of the main northwestern group is probably that in the Jesuit Relation of 1640, where mention is made of the Winnebago, Dakota, and Assiniboin. As early as 1658 the Jesuit missionaries had heard of the existence of 30 Dakota villages in the region N. from the Potawatomi mission at St. Michel, about the head of Green bay, Wis. In 1680 Father Hennepin was taken prisoner by the same tribe.

In 1804–05 Lewis and Clark passed through the centre of this region and encountered most of the Siouan tribes. Afterward, expeditions into and through their country were numerous; traders settled among them in numbers, and were followed in course of time by permanent settlers, who pressed them into narrower and narrower areas until they were finally removed to Oklahoma or confined to reservations in the Dakotas, Nebraska, and Montana. Throughout all this periodethe Dakota proved themselves most consistently hostile to the intruders. In 1862 occurred a bloody Santee uprising in Minnesota that resulted in the removal of all of the eastern Dakota from that state, and in 1876 the outbreak among the western Dakota and the cutting off of Custer's command. Later still the Ghost-dance reli-

gion (q. v.) spread among the Sioux proper, culminating in the affair of Wounded Knee, Dec. 29, 1890.

It is impossible to make statements of the customs and habits of these people that will be true for the entire group. Nearly all of the eastern tribes and most of the southern tribes belonging to the western group raised corn. but the Dakota (except some of the eastern bands) and the Crows depended almost entirely on the buffalo and other game animals, the buffalo entering very deeply into the economic. and religious life of all the tribes of this section. In the E, the habitations were bark and mat wigwams, but on the plains earth lodges and skin tipis were used. Formerly they had no domestic animals except dogs, which were utilized in transporting the tipis and all other family belongings, including children, but later their place was largely taken by horses, the introduction of which constituted a new epoch in the life of all Plains tribes. facilitating their migratory movements and the pursuit of the buffalo, and doubtless contributing largely to the ultimate extinction of that animal.

Taking the reports of the United States and Canadian Indian offices as a basis and making a small allowance for bands or individuals not here enumerated, the total number of Indians of Siouan stock may be placed at about 40,800.

The Tutelo, Biloxi, and probably the rest of the eastern Siouan tribes were organized internally into clans with maternal descent; the Dakota, Mandan, and Hidatsa consisted of many non-totemic bands or villages, the Crows of non-totemic gentes, and the rest of the tribes of totemic gentes.

The Siouan family is divided as follows:

I. Dakota-Assiniboin group: 1, Mdewakanton; 2, Wahpekute (forming, with the Mdewakanton, the Santee; 3, Sisseton; 4, Wahpeton 5, Yankton; 6, Yanktonai; 7, Teton (a) Sichangu or Brulés, (b) Itazipeho or Sans Ares, (c) Sihasapa or Blackfeet, al Miniconjou, (e) Oohenonpa or Two Kettles, (f) Oglala, (g) Hunkpapa; 8, Assiniboin.

II. Dhegiha group: 1, Omaha; 2, Ponea;
3, Quapaw; 4, Osage (a) Pahatsi, (b) Utsehta,
(c) Santsukhdhi; 5, Kansa.

III. Chiwere group: 1, Iowa; 2, Oto; 3, Missouri.

IV. Winnebago.

V. Mandan.

VI. Hidatsa group: 1, Hidatsa; 2, Crows.

VII. Biloxi group: I, Biloxi; 2, Ofo.

VIII. Eastern division: 1, Monacan group, almost extinct: A. Monacan confederacy— (a) Monacan, (b) Meipontsky, (c) Mohemencho: B, Tutelo confederacy—(a) Tutelo, (b) Saponi, (c) Occancechi; C. Manahoac confederacy—(a) Manahoac, (b) Stegaraki, (c) Shackaconia, 'd Tauxitania, 'e) Ontponea, (f) Tegninateo, (g) Whonkentia, (h) Hassinunga; D, Catawba group—'a) Catawba, (b) Woccon, (c) Sissipahaw, (d) Cape Fear Indians (?) (e) Warrennuncock (?), (f) Adshusheer, (g) Eno, (h) Waxhaw, (i) Sugeree, (j) Santee, (k) Waterce (?), (l) Sewee (?), (m) Congaree (?, all extinct except the Catawba; E, (a) Cheraw, (b) Keyauwee, both extinct: F, (a) Pedee (?), (b) Waccamaw (?), (c) Winyaw (?). (d) Hooks (?), (e) Backhooks (?), all extinct.

Sipiwithiniwuk eriver people'). A division of the Sakawithiniwuk, or Wood Cree.

2 GEORGE V., A. 1912

Sirmiling. A winter settlement of the Akudnirmiut Eskimo on the N. coast of Baffin island, near the N. w. end of Home bay.

Sirmilling. -Boas in 6th Rep. B. A. E., map, 1888.

Sisintlae (Nī'sinLaē, 'the Si'nLaēs'). The name of gentes among the Goasila, Nakoaktok, Nimkish, Tlauitsis, and true Kwakiutl.

Sénilaë.—Boas in Petermanns Mitteil., pt. 5, 130, 1887. Si'sintaë.—Boas in Rep. Nat. Mns. 1895, 330, 1897.

Siyita (Siyi'ta). A Cowiehan tribe whose village was Skuhamen, at Agassiz, on lower Fraser r., Brit. Col.—Boas in 64th Rep. Brit. A. A. S., 454, 1894.

Skae (Sqa-i). A Haida town of the Kaidjukegawai, formerly close to cape St. James, at the s. end of Queen Charlotte ids., B.C. It is said to have been so named because its inhabitants here skinned the sea lions which they killed on the Kerouart isles.—Swanton, Cont. Haida, 277, 1905.

Skaiakos ($Sqa\bar{\imath}'aQ\bar{\imath}s$). A Seechelt sept with many settlements but no fixed abode (Hill-Tout in Jour. Anthr. Inst., 23, 1904). For general habitat, see Seechelt.

Skaialo (Sqaià'lō). A Chilliwak village in s. British Columbia, with 13 inhabitants in 1911.

Isquahala.—Cau. Ind. Aff., 78, 1878. Sqaia'lo.—Hill-Tout in Ethuol. Surv. Can., 4, 1902. Squehala.—Can. Ind. Aff., 309, 1879. Squiahla.—Ibid., pt. II, 160, 1901. Squiala.—Ibid., pt. II, 14,1911. Squihala.—Ibid., 74, 1878.

Skaiametl. A Kwantlen village at New Westminster, on Fraser r., Brit. Col. Pop. 42 in 1911, including Kikait.

New Westminster.—Cau. Ind. Aff., pt. 11, 72, 1902. Sqai'ametl.—Hill-Tout in Ethnol. Surv. Can., 54, 1902. Tcē'tstles.—Boas in Rep. B. A. A. S., 454, 1894.

Skaiets (Sqai'Els). A Kwantlen village on Stave r., an affluent of lower Fraser r., Brit. Col.—Hill-Tout in Ethnol. Surv. Can., 54, 1902.

Skaito. A camp on the w. coast of the Queen Charlotte ids., Brit. Col., occupied by Haida at the time of the gold excitement at Gold Harbour in 1852-60. It is sometimes spoken of erroneously as a town and confused with Kaisun and Chaahl.

Kai-shun.—Dawson, Q. Charlotte Ids., 1688, map, 1878 (mis-applied). Sqai'-tāo.—Swanton, Cont. Haida, 280, 1905. Tlg'ā'it.—Boas ,12th Rep. N. W. Tribes, Can., 24, 1898 (misapplied).

Skakaiek (Sqāqai'Ek). A Squawmish village community on the right bank of Skwa-

mish r., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Skanahwahti ('beyond the stream.'—Hewitt). An Onondaga, known generally to the whites as John Buck, the firekeeper of his tribe in Canada; died about 1893 at Brantford, Ontario. He gave Horatio Hale valuable aid in preparing the Iroquois Book of Rites (1883), and was much esteemed. He was official keeper and interpreter of the tribal wampum. (w. m. b.)

Skanuka $(S\chi a-nu-\chi \dot{a})$. A name applied by Dawson (Queen Charlotte Ids., 134, 1880) to one of the four clans into which he erroneously supposed the Haida to be divided. It may be otherwise spelled Sg · anag · wa, and is the native term for "supernatural power." Dawson translates it "killer-whale," but the more usual name for the killer-whale is sg. ana, though this animal was indeed so named because it was held to be supernatural. Dawson's mistake arose from the fact that the Tsimshian of the mainland opposite are divided into four clans, and among the Haida the killer whale is a very important crest belonging to one of the two clans. (J. R. S.)

Skaos (Sq/a'vs, probably 'salmonberry bushes'). A Haida town of the Sagualanas family at the entrance to Naden harbour, Graham id., Brit. Col.—Swanton, Cont. Haida, 281, 1905.

Skappa ('sandy land'). A Ntlakyapamuk village on the E. bank of Fraser r., near Boston Bar, Brit. Col. Pop. 17 in 1911.

Sk'āpa.—Hill-Tout in Rep. Ethnol, Surv. Can., 4, 1899. Skappah.—Can. Ind. Aff., 309, 1879. Skepah.—Ibid., 78, 1878. Skopah.—Brit. Col. map, Ind. Aff., Victoria, 1872. Skuppa.—Can. Ind. Aff. Rep. 1904, sec. II, 71, 1905. Skuppah.—Ibid., map, 1891.

Skasahah. A band of Cowichan on Vaneouver id., numbering 20 in 1882, the last time their name appears.

Ska-sah-ah.-Can. Ind. Aff., 258, 1882.

Skauishan. A Squawmish village community on the right bank of Skwamisht r., w. Brit. Col.

Skáocin.—Boas "M.S., B. A. E., 1887. "Skaui'can.— Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Skaukel. A Chilliwak village in s. British Columbia, with 31 inhabitants in 1911.

Skaukë'l.—Hill-Tout in Rep. Ethnol. Surv. Can., 4, 1902. Skokale.—Can. Ind. Aff., 316, 1880. Skolale.—Brit. Col. map, Ind. Aff., Victoria, 1872. Skulkayn.—Can. Ind. Aff., pt. 2, 45, 1909. Skulkayu.—Ibid., pt. 11, 160, 1901.

Skeakunts (Sk'ē'akunts). A Squawmish village community on Burrard inlet, Brit. Col.
—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Skeawatsut (Skē'awasut). A Squawmish village community at Atkinson pt., E. side of Howe sd., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Skedans (corrupted from Gidansta, from his daughter,' the name of its chief. An important Haida town of the Kagials-kegawai family, formerly on a point of land which extends into Hecate str. from the D. end of Louise id., Queen Charlotte ids., Brit. Col. The town was known to its inhabitants as Kona or Huadji-lanas. They were always on the best of terms with those of the Tsimshian town of Kitkatla, whence they imported many new customs and stories into the Haida country. John Wark, 1836-41, assigned to this town 30 houses and 738 inhabitants. The old people remember 27 houses; in 1878 Dawson noted about 16 houses. It has been abandoned for several years, though a number of housepoles are still standing. (J. R. S.

Kiddan.—Keane in Stanford, Conpend, app., 473, 1878. Koona.—Swan in Smithson, Cent., xxi, 5, 1876. K"u'na.—Boas, 12th Rep. N. W. Tribes Can., 21, 1898. Kwun Hāadē.—Harrison in Proc. Reg. Soc. Can., sec. ii, 125, 1895. qlô'na.—Swanton, Cent. Hadda, 278, 1605. Skedans.—Dawson, Q. Charl tie Ids., 1698, 1880. Skeeidans.—Schoolerait, Ind. Tribes, v., 489, 1855. Skidans.—Peas, op. cit. nd-print from Dawson. Skidanst.—Harrison, op. cit. Skiddan.—Poole, Q. Charlotte Ids., 300, 1872. Xū'adji lnagā'-i.—Swanton, op. cit., 120.

Skekaitin (*SkEka'itin*, 'place of coming up above, or reaching the top'). A village of the Upper Fraser band of Ntlakyapamuk, on the w. side of Fraser r., 43 m. above Lytton, Brit. Col.

Skāikai'zten.—Hill-Tout in Rep. Ethnol. Surv. Can, 4, 1899. Skeka'ītin.—Teit in Mem. Am. Mus. Nat. Hist., 11, 172, 1900.

Skelautuk (SqElu'utūQ, 'painted house,' on account of a painted post in a house there'. A former village or camp of the Pilalt, a Cowichan tribe on lower Chilliwak r., Brit. Col.—Hill-Tout in Ethnol. Surv. Can., 48, 1902.

Skelsh (Sqēlc, 'standing up,' referring to "Siwash roek"). A Squawmish village community on Burrard inlet, Brit, Col.—Hill-Tout in Rep. Brit, A. A. S., 475, 1900.

Skelten (SqE'ltEn). A village of the Ewawoos tribe of the Cowichan on lower Fraser

r., Brit. Col., 2 m. above Hope.—Boas in Rep. Brit. A. A. S., 454, 1894.

Skena (Sqr'(a). A Haida town prominent in the family stories, situated just s. of Sandspit pt., Moresby id., Brit. Col. According to tradition it was composed of 5 rows of houses each occupied by a single family of the Raven clan. These 5 are said to have been the Tadji-lanas, Kuna-lanas, Yaku-lanas, Koetas, and Stlenga-lanas. The Daiyuahl-lanas claimed that their own chief was chief of the town.—Swanton, Cent. Haida, 279, 1905.

Skichistan. A Shuswap village on Deadman r., a N. affluent of Thompson r., Brit. Col. Population of all Deadman River Indians, 417 in 1911.

Dead Man's Greek.—Cr. In l. Aff., 259, 1882 uncludes all the other Shashap on this river). Sketshiotin.—Ibid., 189, 1883. Skichistan.—Ibid., pt. II, 196, 1901. Ski-shis-tin.—Dawson in Trans. Roy. Soc. Can., sec. II, 44, 1891. Stichistan band.—Can. Ind. Aff., 240, 1902.

Skidai-lanas (Skidā'-i bū'nas, 'powerless town-people'. A Haida family of the Eagle clan, belonging to the geographic group known as Gunghet-haidagai, or Ninstints people. It is said to have been a branch of the Gunghet-kegawai, and owned the ancient town of Hlgadun.—Swanton, Cont. Haida, 272, 1905.

Skidaokao (Shi'daoqoo, 'eggs of Ski'dao'). One of the principal Haida families of the Raven clan on Masset inlet, Brit. Col., said to have been named from a man called Skidao. Formerly these people lived with several other families in the town of Naikun, whence they moved to Masset and, until very recent times, owned the town, now known by that name.

(J. R. S.)

Ski'daoqao.—Swanton, Cont. Haida, 271, 1905. Ski-doukou.—Harrison in Proc. Roy. Soc. Can., sec. 11, 125, 1895. Skyit'au'k'ō.—Boas, 12th Rop. N. W. Tribes Can., 23, 1898.

Skidegate. One of the two or three inhabited Haida towns on Queen Charlotte ids., Brit. Col.; situated at the entrance to an inlet of the same name on its N. shore. The native names for this town were Hlgaiu and Illgagilda, Skidegate being the corruption by whites of a name of the chief, Sgedagits (Sge'dagits). Anciently owned by the Illgaiu-lanas, it was given over to the Gitins, according to tradition, in payment for an injury received by a member of the latter family. According to John Wark there were 48 houses between the

years 1836 and 1841, with 738 people. The last row of native houses which stood here numbered only 20, which would give a population of 300 to 400. In 1911 there were 239 people, living almost entirely in houses patterned after those of the whites. There is a Methodist mission at Skidegate, and all the people are nominally Christians. The name of this town has been adopted to designate the Skittagetan family (q. v.). Hyo-hai-ka.-Dawson, Q. Charlotte Ids., 165, 1880 (given as native name; possibly intended for "Hlgai-u"). Illth-cah-getla.—Deans, Tales from Hidery, 58, 1899. Kil-hai-oo.-Dawson, op. cit, 165. Lgagi'-lda.-Swanton, Cont. Haida, 279, 1905 (native name). Lgaiū' .- ibid , 279. Lthagild .- Harrison in Proc. Roy. Soc. Can., sec. II, 125, 1895. Sketigets.—Dunn, Hist. Oregon, 281, 1844. Skid-a-gate.-Poole, Q. Charlotte Ids., 309, 1872. Skid-de-gates.-Dawson, op. cit, Skiddegeet.-Scouler (1846) in Jour. Ethnol. Soc. Lond., 1, 233, 1848. Skidegate-Haade.-Harrison in Proc. Roy. Soc. Can., sec. 11, 125, 1895. Skidegat's town.-Deans, Tales from Hidery, 4, 1899. Skidegattz.-Schoolcraft, Ind. Tribes, 111, 402, 1853. Skidigate .- Can. Ind. Aff., 128, 1879. Skit'-a-get .- Gibbs in Cont. N. A. Ethnol, 1, 136, 1877. Skit-e-gates .-Kane, Wand. N. Am., app., 1859. Skit-ei-get .-Dawson, op. cit , 165. Skittagete .- Gallatin in Trans. Am. Ethnol. Soc, H, 77, 1848. Sklttagets.-Gallatin, ibid., pt. 1, c. Skitt de gates.—Schoolcraft, Ind. Tribes, v, 489, 1855. Skittegas.—Scouler in Jour. Geog. Soc. Lond., x1, 219, 1841. Skittegats.-Scouler (1846) in Jour. Ethnol. Soc. Lond., 1, 233, 1848. Skittgetts.-Anderson quoted by Gibbs in Hist. Mag., 74, 1863. Tlk'āgilt.-Boas, 12th Rep. N. W. Tribes Can., 24, 1898.

Skingenes (Sk'iñgë'ncs). A Songish band living on Discovery id., s. end of Vancouver id. Pop. 25 in 1911.

Discovery Island (Indlans).—Can. Ind. Aff., pt. 2, 66, 1902. Sk'iñgē'nes.—Boas in 6th Rep. N. W. Tribes Can., 17, 1890.

Skistlainai-hadai (Sk!i'sLa-i na-i xadā'-i, 'people of the house where they always have plenty of food'). A subdivision of the Yakulanas, a Haida family of the Rayen clan; probably named from a house.—Swanton, Cont. Haida, 271, 1905.

Skittagetan Family. The name applied to a linguistic family composed of the Indians usually known as Haida (q.v.). It was taken from $Sg\bar{c}'dagits$, a name of one of the Haida town chiefs, which seems to mean 'son of the chiton' [mollusk]. This was first erroneously applied to the town of Hlgagilda, of which he was head chief, and later, under the form Skittagets (see Skidegate), was applied by Gallatin to the people speaking this language, whence it was adopted by Powell.

=Haida.—Tolmie and Dawson, Comp. Vocabs., 15a, 1884 = Haidah.—Scouler in Jour. Roy. Geog. Soc., 81, 224, 1841. > Hai-dai.—Wark quoted by Kane, 81, 224, 1841. > Hai-dai.—Wark quoted by Kane, 9 Wand in N. A., app., 1859. = Hidery.—Deans, Tales from Hidery, passim. 1899. < Hydahs.—Keane in Stanford, Compend., app., 460, 1878. > Kygáni.—Dall in Proc. A. A. A. S., 269, 1869. ×Nootka.—Bancroft, Nat. Races, 111, 564, 1882. ×Northern.—Scouler, op. cit. > Queen Charlotte's Island.—Gallatin in Trans Am. Antiq. Soc., 11, 15, 306, 1836. > Skidegattz.—Gallatin in Schoolcraft, Ind. Tribes, 111, 402, 1853. > Skittagets.—Gallatin in Trans Am. Ethnol. Soc., 11, pt. 1, c, 1848. = Skittagetan.—Powell in 7th Rep. B. A. E., 118, 1891.

Sklau (S'k'lau', 'beaver'). A Squawmish village community on the left bank of Skwamish r., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 47-1, 1900.

Skoachais (Sk'ōālcai's, 'deep hole in water'). A Squawmish village community on Burrard inlet, Brit, Col.—Hill-Tout in Rep. B. A. A. S., 475, 1900.

Skohwak (Skoxwā'k, 'skinny [people]'—Hill-Tout). A village of the Ntlakyapamuk, on the w. side of Fraser r., about 15 m. above Yale, Brit. Col. Pop. 11 in 1897, the last time the name appears.

Skoxwā'k.—Teit in Mem. Am. Mus. Nat. Hist., ii, 169, 1900. Skuhuak.—Can. Ind. Aff. 1892, 312, 1893. Skuōūa'k'k.—Hill-Tout in Rep. Ethnol. Surv. Can., 5, 1899. Skuwha.—Can. Ind. Aff. 1886, 230, 1887. Skuwka.—Ibid., 277, 1894.

Skookumchuck ('strong water'). The local name for a body of Salish of New Westminster agency, Brit. Col.; pop. 106 in 1911.

Skookum Chuck.—Can. Ind. Aff., pt. 2, 160, 1901. Skukem Chuck.—Ibid., 187, 1884.

Skowtous. A division of the Ntlakyapamuk in the neighbourhood of Nicola lake, Brit. Col.—Mayne, Brit. Col., 113, 1862.

Skudus (*Sk!ā'dAs*, a word used when one misses a thing by arriving too late). A Haida town of the Djiguaahl-lanas family on the N. side of Lyell id., Queen Charlotte ids., Brit. Col.—Swanton, Cont. Haida, 278, 1905.

Skuhamen (Squhā'mɛn). A village of the Siyita tribe of Cowichan, at Agassiz, on lower Fraser r., Brit. Col.—Boas in 19th Rep. N.W. Tribes Can., 454, 1894.

Skuingkung (Squi'ñquñ). A Songish band at Victoria, Brit. Col.—Boas in 6th Rep. N.W. Tribes Can., 17, 1890.

Skulteen. A body of Salish of New Westminster agency, Brit. Col. Pop. 122 in 1896, the last time the name appears.

Skumin (Sk'ūmi'n, 'keekwilee-house,' the term keekwilee meaning 'low,' or 'under,' probably referring to the semi-subterranean houses of the N. W. interior.) A Squawmish village community on the left bank of Skwamish r., Brit. Col.—Hill-Tout in Rep. Brit. A.A.S., 474, 1900.

Skutuksen (Sk'u'tuksEn, 'promontory'). A Squawmish village community on the E. side of Howe sd., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Skuzis ('jumping'). A Ntlakyapamuk village on Fraser r. above Spuzzum, Brit. Col.; pop. 33 in 1901, the last time the name appears. Scuzzy.—Can. Ind. Aff., 418, 1898. Sku'zis.—Hill-Tont in Rep. Ethnol. Snrv. Can., 5, 1899. Skuzzy.—Can. Ind. Aff., pt. 11, 164, 1901.

Skwah, A Chilliwak village in s. British Columbia; pop. 108 in 1911.

Skwah.—Can. Ind. Aff., pt. 2, 160, 1901 — Squah.—Ibid., 74, 1878.—Squah-tta.—Gibbs, MS—vocab., B. A. E.

Skwahladas (Sqoā'ladas). A Haida family of the Raven clan, living on the w. coast of Queen Charlotte ids., Brit. Col. The meaning of the name is uncertain, but it has been suggested that it may indicate that they were successful fishermen. This family generally lived with the Hlgahetgu-lanas, but at one time had independent towns opposite Hippa id. and in Rennell sd. There part of them came to be known as Nasto-kegawai. Originally they seem to have formed one family with the Djahuiskwahladagai. (J. R. S.)

Skoa'tfadas.—Boas, 12th Rep. N. W. Tribes Can., 24.

Skwailuh ('hoar frost'). A Shuswap town ou Pavilion er., an E. affluent of upper Fraser r., Brit. Col.; pop. 68 in 1909.

1898. Sqoa ladas .- Swanton, Cont. Haida, 270, 1905

Papillion.—Taylor in Cal Farmer, July 19, 1862. Pavilion.—Can. Ind Aff., pt. 11, 162, 1901 Pavillon. —Teit in Mem. Am. Mus. Nat. Hist., 11, 166, map. 1800. Skwai'-luh.—Dawson in Trans. Roy. Soc. Can., 1891, sec. 11, 44, 1892.

Skwaius (Sk'wai'ns). A Squawmish village community on Burgard inlet, Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 475, 1900.

Skwala (8k'wö'la). A former village or camp of the Pilalt, a Cowichan tribe on lower Chilliwak r., Brit. Col.; so named from a slough on which it was situated.—Hill-Tout, Ethnol. Surv. Can., 48, 1902.

Skwauyik (*Skwa'uyix*). A Ntlakyapamuk village on the w. side of Fraser r., Brit. Col.—

Teit in Mem. Am. Mus. Nat. Hist.; 11, 169, 1900.

Skwawalooks. A Cowichan tribe on lower Fraser r., below Hope, Brit. Col.: pop. 17 in 1911.

Shawahlook.—Can. Ind. Aff. 1904, sec. ii, 75, 1905. Skawah-looks.—Ibid., 1894, 277, 1895. Skowall.—Ibid., 79, 1878. Skwawahlooks.—Ibid., pt. 2, 160, 1901.

Skway. A Chilliwak village on Skway r., which empties into the lower Fraser, Brit. Col.; pop. 30 in 1911.

Skway.—Can. Ind. Aff., pt. 2, 100, 1901. Sqai.—Hill-Tout in Rep. Ethnol. Surv. Can., 4, 1902. Squay.—Ibid., 276, 1894. Squay-ya.—Brit. Col. map., Ind. Aff., Victoria, 1872. Syuay.—Can. Ind. Aff., 188, 1884.

Skweahm. A Nicomen winter village on Nicomen slough, near lower Fraser r., Brit. Col.; pop. 28 in 1911.

Skuyā'm.—Boas in Rep. Brit. A. A. 8, 454, 1894. Skweahm.—Can. Ind. Aff., 160, 1901. Squeam.— Ibid., 313, 1888.

Skwealets (Skweā'lēts, 'coming in of the water'). An abandoned Chilliwak village on upper Chilliwak r., Brit. Col.—Hill-Tout in Ethnol. Surv. Can., 4, 1902.

Slaaktl (Slā'axL). A Bellacoola village on Bellacoola r., Brit. Col., above Snutlelatl.

Slå'aqtl.—Boas in 7th Rep. N. W. Tribes Can., 3, 1891.
Slå'axt.—Boas in Mem. Am. Mus. Nat. Hist., 11, 49, 1898.

Slahaltkam Cupper country'. A Shuswap village at the foot of Little Shuswap lake, South Thompson river, Brit. Col.—It gives its name to a band which includes the people of this village and those of Kwikooi.—Pop. 88 in 1906, 99 in 1911.

Haltham.—Can Ind Aff., pt. 2, 166, 1901 Halthum.—Ibid., 363, 1897 Haltkam.—Ibid., 312, 1892 Halt-kum.—Ibid., 1885, 196, 1886 Little Lake Shuswap.—Ibid., pt. n. 68, 1992 Sahhahlt-kum.—Ibid., 47, suppl., 1992. Sla-halt-kam.—Dawson in Trans. Ro. 86 Cah. see, ii, 44, 1891

Slaves. An ethnic and linguistic Athapascan group comprising, according to Petitot (Diet. Déné Dindjié, XX, 1876), the Etcharcottine, Thlingchadinne, and Kawchodinne. He included also the Etagottine of the Nahane group. The Etcharcottine are specifically designated by this term, which originated with the Cree, who captured them in fornys, and the tribe nearest to the Cree, the Etchaotine, are called Slaves proper.

2 GEORGE V., A. 1912

Sliammon. A Salish tribe on Malaspina inlet, Brit. Col., speaking the Comox dialect; pop. 107 in 1909.

Klaamen.—Brit, Col. Map. Ind. Aff., Victoria, 1872 (given as N. of Malaspina inlet). Sliammon.—Can. Ind. Aff., pt. 11, 169, 1991. Tlaamen.—Bous, MS., B. A. E., 1887.

Slokoi. A Squawnish village community on the right bank of Skwamish r., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Slumach. A band of the Katsey (q.v.) in British Columbia; pop. 69 in 1896, when last separately enumerated.

Slumach.—Can. Ind. Aff., 276, 1894. Slumagh.—Ibid., 313, 1888.

Smelakoa (Smelā'kōā). A Squawnish village community on Burrard inlet, Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 475, 1900.

Smoon (Smö'En). The highest gens or band of the Bellacoola people of Nutlel, Brit. Col.—Boas in 7th Rep. N. W. Tribes Can., 6, 1891.

Smok (Smök). A Squawmish village community on the left bank of Skwamish r., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Snakaim. An unidentified body of Ntlakyapamuk on or near Fraser r., Brit. Col. Pop. 40 in 1901, the last time the name appears.

S-na-ha-em.—Can. Ind. Aff. 1885, 196, 1886. Sna-haim.—Ind. 1886, 200, 1887. Snahaim.—P. H. 1897, 363, 1898. Snakaim.—Ibd., pt. r., 196, 1961.

Snakwametl (Stalkwametl). A village belonging to the Snonkweametl, an extinct tribe of Cowichan on lower Fraser r., Brit. Col.—Hill-Tout in Rep. Ethnol. Surv. Can., 54, 1902.

Snapa (burnt place, according to Teit; barren or bare place, according to Hill-Tout). A village of the Spence Bridge band of Ntlakyapamuk, 1; m. back from the s. side of Thompson r. and 42 m. above Lytton, Brit. Col. Pop. 17 in 1897, the last time it was enumerated separately.

Black Cañon.—White men's name. C'npå.—Hill-Tout in Rep. Ethnol Surv. Can., 4, 1899. Nepa.— Can. Ind. Aff., 230, 1886. Snapa'.—Teit in Mem. Am. Mus. Nat. Hist., 11, 173, 1990.

Snauk. A Squawmish village community at False cr., Burrard inlet, Brit. Col.; pop. 45 in 1911.

False Creek.—Can. Ind. Aff., pt. 11, 72, 1902. Snauq.—Hill-Tout in Rep. Brit. A. A. S., 475, 1900.

Snonkweametl (Snonkwe'ametl). An extinct Cowichan tribe on lower Fraser r., Brit. Col.; their village was Snakwametl.—Hill-Tout in Ethnol. Surv. Can., 54, 1902.

Snonowas. A Salish tribe around Nanoose bay, E. coast of Vancouver id. They speak the Cowichan dialect, and numbered 14 in 1911.

Nanoos.—Tolmie and Dawson, Vocabs, Brit. Col., 120B, 1884. Nanoose.—Mayne, Brit. Col., 243, 1861. Snōnōos.—Poas, M.S., B. A. E., 1887. Snonowas.—Can. Ind. Aff., pt. II, 164, 1901. Sno-no-wus.—Ibid., 417, 1898. Sno-no-wus.—Ibid., 270, 1889.

Snutele (Snū't' Ele). A Bellacoola village on Bellacoola r., Brit. Col., above Tsomootl.—Boas in Mem. Am. Mus. Nat. Hist., II, 49, 1898.

Snutlelatl (Snū'L'ElaL). A Bellacoola village on Bellacoola r., Brit. Col., above Stuik. Snū't.'Elat.—Boas in Mem. Am. Mus. Nat. Hist., r., 49, 1898. Snū't.'Elatt.—Boas in 7th Rep. N. W. Tribes Can., 3, 1891.

Sockeye. One of the names of the Fraser Riversalmon, blueback, or redfish (Salmo nerka) of the N. Pacific coast. The word is a corruption by folk etymology of sukkeph, the name of this fish in one of the Salishan dialects of the N. W. Pacific coast. It is spelled also sugk-eye, sawk-wey, sawk-eye, etc., confirming the derivation.

(A. F. C.)

Soda Creek. A Shuswap village or band situated on upper Fraser r. between Alexandria and the mouth of Chilcotin r., Brit. Col.; pop. 100 in 1911.—Can. Ind. Aff. Reps.

Somehulitk (Sō'mexulitx). A Heiltsuk tribe living at the upper end of Wikeno lake, Brit. Col.: the name is applied also to one of its clans.—Boas in Nat. Mus. Rep. 1895, 328, 1897

Somenos. A Salish tribe in Cowichan valley, s. E. Vancouver id., speaking the Cowichan dialect; pop. 99 in 1911.

Sā'menos.—Boas, MS., B. A. E., 1887. Soleenos.—Can. Ind. Aff., Ix, 1877. So-me-nau.—Ibid., 308, 1879. Somenos.—Ibid., pt. 11, 164, 1901.

Somhotnechau. A Wikeno village on Rivers inlet, Brit. Col.

Somhôtnehau.—Boas, MS. field notes. Somyôtnechau.—Boas in Petermanns Mitteil., pt. 5, 130, 1887.

Songish (adapted by the whites from Statinges, the name of one of their septs). A Salish tribe about Victoria, Vancouver id., and on the w. shore of San Juan id., who call themselves Lkungen. This tribe gives its name to

a Salish dialect spoken also by the Sanetch and Sooke of Vancouver id., by the Clallam of the s, side of Juan de Fuca str., and by the Samish, Semiamu, and Lummi of the coast s. of the Fraser delta. Population of the Songish proper, including Cheerno, Discovery 1d., Esquimalt, and Songish bands, 167 in 1911. Those speaking the Songish dialect number about 1,000. Their bands are Chikauach, Chkungen, Kekayaken, Kltlasen, Ksapsem, Kukoak, Kukulek, Lelek, Sichanetl, Skingenes, Skuingkung, and Stsanges. Etzāmish.-Tolmie and Denson, Vo ales, Prit. Col., 1198, 1884 (so called by the tubes of the s-part of Puget sd.). Hue-lang-uh.-Mackay onoted by Daws n in Trans. Roy. Soc. Can, sec. n, 7, 1891 ('the people') own name. Lku'men.-Boas in 6th Rep. N. W. Tribes Can , 11, 1800 (Nanaimo name: Lkū'mru.-Boas in 5th Rep. N. W. Tribes Can , 10, 1889. Lku'ngen. Told. town name). Lku'ngen .- Boas, 6th Rep., 11, 1890. Lyüngen,-Boas, MS, B. A. E, 1887.

Sooke. A Salish tribe, speaking the Songish dialect, about an inlet of the same name at the s. E. end of Vancouver id.; pop. 30 in 1911.

Songars.—Brit. Col. map, Ind. Aff., Vict. iia, 1872 (given as a settlement N. of Victoria). Songaes.—

Taylor in Cal. Farmer, July 19, 1862. Songhies. -

Mayne, Brit. Col., 72, 1862. Songish.-Hoffman

quoted by Powell in 6th Rep. B. A. E., Mii, 1888. Thongeith.—Spread, Savage Life, 311, 316, 1868 can

alternative for Kowitchan as the designation of the

Salish of Vancouver id.). Tsaumas.—Wilson in Jour. Ethnol. Soc. Lond., 278, 1866. Tsaumass.—Rid , 286.

Tsong.—Gibbs in Cont. N. A. Ethnol., 1, 177, 1877.

Achiganes.—De Smet, Oregon Miss., 192, 1847. Sâ'ck.—Beas in 6th Rep. N. W. Tribes Can., 11, 1890. Sock Indians.—De Smet, Oregon Miss., 192, 1847. Sōk.—Tolmie and Dawson, Vocabs, Brit. Cel., 120b, 1884. Sokes.—Grant in Jour. Roy. Geog. Soc., 293, 1857. Sooke.—Can. Ind. Aff., pt. 11, 164, 1901. Tsohke.—Gibbs in Cont. N. A. Ethaol., 1, 177, 1877.

Sotstl $(S\tilde{v}(sL))$. A Bellacoola town at the mouth of Salmon r., coast of British Columbia. The people of this town and those of Satsk, who together are called Kinisquit, numbered 47 in 1911.

Nût'ğl.—Boas in Petermanus Mitteil., pt. 5, 130, 1887. Nûtl'E'l.—Boas in 7th Rep. N. W. Tribes Can., 3, 1891. Rascals'—Village.—Mackenzie, Voy., 339, 1892; Mayne, Brit. Col., 140, 1862 (so named by Mackenzie from the treatment received there). Sötst.—Boas in Mem. Am. Mus. Nat. Hist., 11, 49, 1900.

South Andrian Band. A band of Shuswap, now known as the Adams Lake band; pop. 196 in 1911.

Spahamin (Spo'xEmin, 'shavings,' 'cuttings,' as of wood or bone). An Okinagan village situated at Douglas lake, 11 m. from Quilchena, Brit. Col. Its people associate much with the Ntlakyapamuk, whose language

they speak as well as their own; they numbered 194 in 1911, probably including some Ntlakyapamuk.

Douglas Lake.—White men's name. Nicola (Upper).—Can. Ind. Aff., pt. 7, 243, 1992. Spah-a-man.—Can. Ind. Aff., pt. 7, 189, 1884. Spa-ba-min.—Ibel., 274, 1889. Spaxamin.—Teit in Mem. Am. Mus. Nat. Hist., 11, 174, 1909. Upper Nicola.—Can. Ind. Aff., pt. 11, 68, 1992. includes some N.lakyapamuk cullages).

Spaim (8pa'-im, 'flit Lind,' 'open flat' [Teit]; 'pleasant, grassy, flowery spot' [Hill-Tout]). A Ntlakyapamuk village on the E. side of Fraser r., Brit. Col.; pop. 27 in 1897.

Spa'im.—Telt in Mem Are Mus Not Hist, u, 109, 1900. Spayam.—Con. Ind Aff., 418, 1800. "Chemok-Spayam". Spa'im.—Hill-Teut in Rep. Lehnel, Surv. Can., 5, 1800. Spayam.—Can. Ind. Aff., 230, 1884.

Spallamcheen. A body of Shuswap on a branch of Thompson r., Brit. Cel., under the Okanagan agency. Pop. 144 in 1904, 164 in 1911.

Spallamcheen,—Can. Ind. Aff., pt. 91, 166, 1901. Spallum-acheen.—Rod., 191, 1883. Spallumcheen.—Rod., 303, 1897. Spelencheen.—Rod., 517, 1880. Spellamcheen.—Rod., 513, 1892. Spellamcheen.—Rod., 79, 1878.

Spapak (Spapa(k)). A Squawnish village community on the right bank of Skwamish r., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Spapium (Spapī'um, 'level grassy land'). A Ntlakyapamuk village on a river beneh opposite Lytton, Brit. Col.; pop. 84 in 1901.

Spa-ki-um.—Can.• Ind. Aff., 196, 1885 (misprint). Spapiam.—Ibid., 312, 1892. Spapi'um.—Hill-Tout in Rep. Ethnol. Surv. Can., 5, 1889.

Spatsatlt (Spatsā'dl'). A Bellacoola band at Talio (q. v.), Brit. Col.—Boas in 7th Rep. X. W. Tribes Can., 3, 1891.

Spatsum (contracted from Spa'_{II}/sEn, 'little Indian hemp place'). A village of the Spence Bridge band of Ntlakyapamuk on the s. side of Thompson r., 35 m. above Lytton, Brit. Col. (Teit in Mem. Am. Mus. Nat. Hist., II, 173, 1900). Pop. 135 in 1901.

Apaptsim.—Can. Ind. Aff., 363, 1897. misprint). Cpa'ptsen.—Hill-Tout in Rep. Ethnol. Surv. Can., 4, 1899. S-pap-tsin.—Can. Ind. Aff., 196, 1885. Spatsim.—Ibid., 419, 1898. Spatsum.—Terf., op. cit.

Spence Bridge Band. One of 4 subdivisions of Ntlakyapanuk occupying the banks of Thompson r., Brit. Col., from about 8 m. below Spence Bridge nearly to Ashcroft.—Teit in Mem. Am. Mus. Nat. Hist., II, 170, 1900.

Nkamtci'nemux.—Teit, op. cit Cpeople of the entrance'; more strictly applied to the Indians immediately about Spence Bridge'

Spukpukolemk (Spuqpuqō'lEmq). A band of the Nuhalk, a subdivision of the Bellaeoola on the coast of British Cohmbia.

Mā'lakyilatl.—Boas in 7th Rep. N. W. Tribes Can., 3, 1891 (secret society name). Spnqpuqō'lemq.—Ibid.

Spuzzum ('little flat.'—Teit. The nearest to the sea of the important towns of the Ntlakyapamuk, lying on the w. side of Fraser r., Brit. Col., 9 m. above Yale, 2 m. below Spuzzum station, Canadian Pacific Ry. Pop. 157 in 1911.

Gpu'zum.—Hill-Tout in Rep Ethnol. Surv. Can., 5, 1899 Spô'zèm.—Teit in Mem. Am. Nat. Hist., 11, 169, 1900. Spuggum.—Can. Ind. Aff., 196, 1885 (misprint Spu'zum.—Hill-Tout, op cit. Spuzzum.—Can. Ind. Aff., 269, 1889 Spuzzum.—Hild., pt. 11, 164, 1901

Squacum. A band of Salish, probably of the Ntlakyapamuk, in British Columbia.— Can. Ind. Aff., 79, 1878.

Squamish. The name given by the Canadian Department of Indian Affairs to that portion of the Squawmish living on Howe sd., Brit. Col. Pop. 37 in 1911.

Shw-aw-mish.—Can. Ind. Aff., 276, 1894 (probably a misprint). Skw-amish.—Ibid., 358, 1895. Skwaw-mish.—Ibid., 308, 1879. Squamish.—Ibid., 195, 1885.

Squaw. An Indian woman. Trom Narraganset squaw, probably an abbreviation of eskwaw, eognate with the Delaware ochqueu, the Chippewa ikwé, the Cree iskwew, etc. As a term for woman squaw has been carried over the length and breadth of the United States and Canada, and is even in use by Indians on the reservations of the W., who have taken it from the whites. After the squaw have been named: Squawberry (the partridge berry), squaw bush (in various parts of the country, Cornus stolonifera, C. sericea, and C. canadensis), squaw carpet (a California name of Ceanothus prostratus), squaw fish (a species of fish found in the N. W.), squaw flower (Trillium erectum, ealled also squaw root), squaw man (an Indian who does woman's work; also a white man married to an Indian woman and living with her people), squaw mint (the American pennyroval), squawroot (in different parts of the country, Trillium erectum, the black and the blue cohosh, Conopholis americana, and other plants), squaw sachem (a term in vogue in the era of New England colonization for a female chief among the Indians), squaw vine (a New England name for the partridge berry), squawweed (Erigeron philadelphicum and Senecio aureus), squaw winter (a term in use in parts of the Canadian N. W. to designate a mild beginning of winter). A species of duck (Harelda glacialis) is called old squaw.

(A. F. C.)

Squawmish. A Salishan tribe on Howe sd. and Burrard inlet, N. of the mouth of Fraser r., Brit. Col. Their former village communities or bands were Chakkai, Chalkunts, Chants, Chechelmen, Chechilkok, Chekoalch, Chewas, Chiakamish, Chichilek, Chimai, Chukchukts, Ekuks, Etlenk, Hastings Sawmill Indians, Helshen, Homulchison, Huikuayaken, Humelsom, Ialmuk, Ikwopsum, Itliok, Kaayahunik, Kaksine, Kapkapetlp, Kauten, Kekelun, Kekios, Kekwaiakin, Kelketos, Ketlalsm, Kiaken, Kicham, Koalcha, Koekoi, Koikoi, Kole-Komps. Kotlskaim, Kuakumchen, lakom. Kukutwom, Kulaken, Kulatsen, Kwanaken, Kwichtenem, Kwolan, Male (shared with the Mithmetlelch, Nkukapenach, Musqueam : Nkuoosai, Nkuoukten, Npapuk, Npokwis, Nthaich, Papiak, Poiam, Pokaiosum, Sauktich, Schilks, Schink, Schelot, Shemps, Shishaiokoi. Siechem, Skakaiek, Skauishan, Skeakunts, Skeawatsut, Skelsh. Sklau, Skoachais, Skumin, Skutuksen, Skwaius, Slokoi, Smelakoa, Smok, Snauk, Spapak, Stamis, Stetuk, Stlaun, Stoktoks, Stotoii, Suntz, Sutkel, Swaiwi, Swiat, Thetsaken, Thetuksem, Thetusum, Thotais, Tktakai, Tlakom, Tlastlemauk, Tleathum, Toktakamai, Tseklten, Tumtls, Ulksin, and Yukuts. There were a few more at the upper end of Burrard inlet. Only six villages are now inhabited: Burrard Inlet (No. 3), False Creek (see Snauk), Kapilano Mission, (Burrard inlet), Seymour Creek (see Chechilkok), and Squamish. (Consult Hill-Tout in Rep. B. A. A. S., 472-549, 1900.) The total population of the Squawmish was 399 in 1911.

(J. R. S.)

Skoomic.—Boas in 6th Rep. N. W. Tribes Can., map, 1890. Sk'qoā'mic.—Boas in 5th Rep., ibid., 10, 1889 (Comox name). Sk qō'mic.—Ibid. Skwāmish.—Tolmie and Dawson, Vocabs. Brit. Col., 119B, 1884. Squamishes.—Sage, Rocky Mtns., 221, 1846. Squamisht.—Brit. Col. Map, Ind. Aff., Victoria, 1872. Squawmisht.—Mayne, Brit. Col., 243, 1862. Squomaish.—Brit. Adm. Chart, no. 1917. Sxqómic.—Boas, MS., B. A. E., 1887.

Squawtits. A Cowiehan tribe on lower Fraser r., Brit. Col., between Agassiz and Hope. Pop. 47 in 1911.

Squatils.—Can. Ind. Aff., 309, 1879 Squatits.—Brit. Col. Map, Ind. Aff., Victoria, 1872. Squattets.—Can. Ind. Aff., 1889, 268, 1890. Squawtas.—Trutch, Map of Brit. Col., 1870. Squawtits.—Can. Ind. Aff., pt. 2, 160, 1901.

Squierhonon. An unidentified tribe, probably Algonquian, dependent on the Hurons.—Sagard (1636), Hist. Can., Huron Diet., IV, 1866.

Stattkemer. A body of Salish belonging to Kamloops agency, Brit. Col. Pop. 230 in 1884, the last time the name appears.

Sratt-kemer.-Can. Ind. Aff., 188, 1884.

Stadacona. A village occupying the site of Quebec, visited by Cartier in 1535. The village had disappeared when Champlain ascended the river 70 years later.

Stadacona.—Hind, Lab. Penin., II, 6, 1863. Stadacone.—Cartier, (1545) Relation, 32, 1, 1863. Tadacone.—Vallard, Atlas (ot. 1543) in Me. Hist. Soc. Coll., 1, 354, 1869.

Stagilanas (Stā'gi lā'nas, 'Stā'gi town-people'). A Haida family of the Eagle clan. It was one of those of Ninstints (Gunghethaidagai), and is said to have been part of the Gunghet-kegawai.—Swanton, Cont. Haida, 272, 1905.

Stahehani (Stacila'ni, 'this side of the ear or cliff.'—Teit!. A Ntlakyapamuk village on the E. side of Fraser r., Brit. Col., between Keefer station and Cisco.

Statcia'ni.—Hill-Tout in Rep. Ethnol. Surv. Can., 5, 1899. Staxèha'ni.—Teit in Mem. Am. Mus. Nat. Hist., rt, 169, 1900.

Stahlouk. A former band of Salish, probably Cowichan, of Fraser superintendency, Brit. Col.—Can. Ind. Afr., 138, 1879.

Staiya (Sta-iya). A settlement just below Lytton, Brit. Col., on the E. bank of Fraser r. Its position corresponds very nearly to that of Cisco, a Ntlakyapamuk village.—Brit. Col. map, Ind. Aff., Victoria, 1872.

Stamis. A Squawmish village on the left bank of Skwamish r., w. Brit. Col.

Sta-amus.—Brit. Adm. chart, no. 1917 — Stámas.—Boas, MS., B. A. E., 1887.—Stámis.—Hill-Tout in Rep. Brit. A. A. S., 474, 1909.

Starnatan. A village on the St. Lawrence, just below the site of Quebec, in 1535.—Cartier (1535), Bref. Récit., 32, 1863.

Stasaos-kegawai (Stasa'os që'gawa-i, 'those born on the Stasaos coast'). A Haida family of the Raven clan who were in the habit of camping on the N. side of the w. entrance of

Skidegate channel, and were so called from the name of the shore there (Stasaos). They were probably a sub-division of the Hlgahetgu-lanas. A minor division of the Stasaos-kegawai was called Gunghet-kegawai. — Swanton, Cont. Haida, 270, 1905.

Stasausk'ë'owai.—Boas, 12th Rep. N. W. Tribes Can, sec. m, 24, 1898.

Stasaos-lanas (Stasa'os lā'nas, 'people of Stasaos coast'). A Haida family of the Eagle clan that received its name from a strip of coast along the N. side of the channel between the largest two of the Queen Charlotte ids., Brit. Col. Probably they were originally a part of the Kaiahl-lanas, with whom they used to go about.—Swanton, Cont. Haida, '274, 1905.

Stawas-haidagai (St!awā's xā'-idaga-i, 'witch people'). A Haida family of the Eagle clan. While these people were living near the Kogahl-lanas the screechowls (st.'aa) were heard to call so much from their side of the creek that a boy in the town opposite said they ought to be called 'Witch people' St'awa's xā'-idaga-i). This story was probably told to alleviate the application of a rather harsh name. They had the same traditional origin as the Kona-kegawai, Diiguaahl-lanas, and Kaiahl-lanas. All of them lived in the town of Cumshews, which was owned by their chief. There were three local sub-divisions, the Hedahaidagai, Sa-haidagai, and Kahligua-haidagai. ---Swanton, Cont. Haida, 273, 1905.

Stella ('the cape'). A Natliatin village at the entrance of Stelako r. into Fraser lake, Brit. Col.; pop. 42 in 1902, 90 in 1911.

Stelaoten.—De Smet, Oregon Miss., 100, 1847. Stela-tin.—Dawsen in Can. Gool. Surv. 1879-80, 30B, 1881. Stella.—Morice, Notes on W. Dénés, 25, 1892. Stillà.—Harmon, Jour., 244, 1820.

Stella. The village of the Tautin, on Fraser r., near Alexandria, Brit. Col.

Alexandria,—Ind. Aff. Can., 138, 1879. Stělla.— Morice in Trans. Roy. Soc. Can., 109, 1892

Stetuk (Stētūqk'). A Squawmish village community on Burrard inlet, Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 475, 1900.

Stick Indians (from stick meaning 'tree,' or 'wood,' in the Chinook jargon). A term universally applied by certain N. W. Coast tribes to any Indians from the interior; that is, to those who live back in the woods. It is more commonly used on the coasts of Alaska and British Columbia to refer to the Athapascan tribes E. of the Coast range, but it was

used also by the Chinook and other Oregon and Washington tribes to designate the Salish and Shahaptian tribes of Columbia r. and Puget sd. (L. F.)

Si-him-e-na.—Mahonev in Sen. Ex. Doc. 68, 41st Cong., 2d. 68, 20, 1870. Thick-wood Indians.— Franklar, Journ. P. lar Sen, 262, 1824. Thick Wood Indians.—Sm. been quot. I by Morzan in Beach,, Ind. Miscel., 179, 1877.

Stikine. A Tlingit tribe on and near the mouth of the river which bears its name. Pop. 1,300 in 1840, 317 in 1880, 255 in 1890. Their winter town is Katchanaak (Wrangell); their ancient village was Kahlteatlan (Old Wrangell). Shake's Village, Shallyany's Village, and Shustak's Village are also mentioned. The following social divisions are found here: Hehlkoan, Hokedi, Kaskakoedi, Katchadi, Kayashkidetan, Kiksadi, Nanyaayi, Siknahadi, Talilkoedi, and Tihittan.

Shikene.-Prince in H. R. Rep. 830, 27th Cong., 2d sess, 62, 1842 (village). Stach'in .- Helmberg, Ethnog. Skizz, map, 142, 1855. Stackeenes.-Horrows in H. R. Ex. Doc. 197, 42d Cong., 2d sess., 4, 1872. Stakeen.-Horrows in Sen. Ex. Dec. 67, 41st Cong., 21 sess., 9, 1870. Stakhin.-Petroff in 10th Census, Alaska, 32, 1884. Stakin. - Eleventh Census, Alaska, 158, 1893. Stekini.-Kane, Wand, in N. A., app., 1859. Stickens.—Crosbie in H. R. Ex. Doc. 77, 36th Cong., 1st sess., 7, 1860. Stickienes.-Beardslee in Sen. Ex. Doc. 105, 46th Cong., 1st sess., 29, 1880. Stickine.-Borrows (1869) in Sen. Ex. Doc. 67, 41st Cong., 2d sess., 2, 1870. Stikin.—Boas, 5th Rep. N. W. Tribes Can., 25, 1889. Stikines.—Scott (1859) in H. R. Ex. Doc. 65, 36th Cong., 1st sess., 115, 1860. Stohenskie.-Elliott, Cond. Aff. Alaska, 225, 1875 (transliterated from Veniaminoff). Sucheen .- George in Sen. Ex. Doc. 105, 46th Cong., 1st sess., 29, 1880.

Sthun $(Sl\bar{d}n'n)$. A Squawmish village community on Burrard inlet, Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 475, 1900.

Stlaz (SLaz, or SLêtz, having reference to a place where the Indians obtained a mineral earth with which they covered the face to prevent it from chapping.—Hill-Tout). A village of the Spence Bridge band of Ntlakyapamuk at a place called Cornwall, near Ashcroft, a mile back from Thompson r., on the N. side, about 45 m. above Lytton, Brit. Col. Pop. 44 in 1911.

Ashcroft.—Can. Ind. Aff., suppl., 47, 1902. Cornwalls.—Can. Ind. Aff., 138, 1879 (white men's name). Sk'lake.—Hill-Tout in Rep. Ethnol. Surv. Can., 4, 1899. Staz.—Teit in Mem. Am. Mus. Nat. Hist., 11, 173, 1900. Slêtz.—Ibid. Stahl.—Can. Ind. Aff., 308, 1887. Stahl-Ich.—Ibid., 230, 1886. Stlahl.—Dawson in Trans. Roy. Soc. Can., sec. 11, 44, 1891. Stlahlilitch.—Can. Ind. Aff., 196, 1885.

Stlenga-lanas (SL!e'ña lā'nas, 'rear town people'). A great Haida family of the Raven clan living along the N. coast of the Queen Charlotte ids., Brit. Col. According to tradition they received their name from having occupied the row of houses farthest back from the coast in the legendary town of Skena. It seems more likely that they became a separate family while at Naikun. There were several subdivisions, the Dostlan-Imagai, Aostlan-Imagai, Teesstlan-Imagai, and Yagunstlan-Imagai.— Swanton, Cont. Haida, 271, 1905.

Stl'enge la'nas.—Beas, 12th Rep. N. W. Tribes Can., 22, 1898. Stling Lennas.—Harrison in Proc. Roy. Soc. Can., sec. u, 124, 1895.

Stlep (St'lep, 'home country'). An abandoned Chilliwak village on upper Chilliwak r., Brit. Col.; so called because the old communal houses of the tribe were situated there.—Hill-Tout in Ethnol. Surv. Can., 4, 1902.

Stlindagwai (SL''c'nd.1gwa-i, 'the village deep in the inlet'). A Haida town of the Hagilanas family in an inlet on the w. coast of Moresby id., not far from Houston Stewart channel, Brit. Col.—Swanton, Cont. Haida, 277, 1905.

Stoktoks. A Squawmish village community on Howe sd., Brit. Col.

St'o'ktoks.—Hill-Tout in Rep. Brit, A. A. S., 474, 1900. St'ox.—Boas, M.S., B. A. E., 1887.

Stone Tsilkotin. A body of Tsilkotin of Williams Lake agency, Brit. Col. Pop. 106 in 1901; 48 in 1911.

Stone.—Can. Ind. Aff. 1887, 310, 1888. Stones.—Can. Ind. Aff. 1901, pt. 11, 102, 1901.

Stotoii (Stō'toiī, 'leaning over [a cliff]'). A Squawnish village community on the right bank of Skwamish r., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Stratten. The local name for a band of Salish of Fraser superintendency, Brit. Col.—Can. Ind. Aff. Rep., 79, 1878.

Stryne. A Ntlakyapamuk village on the w. side of Fraser r., 5 m. above Lytton, Brit. Col. Pop. 57 in 1901, the last time the name appears.

Stā-ai'-in.—Dawson in Trans. Roy. Soc. Can., sec. II, 44
1891. Sta'inn.—Teit in Mem. Am. Mus. Nat. Hist.,
II, 172, 1900. Stain.—Hill-Tout in Rep. Ethnol. Surv.
Can., 4, 1890. Strain.—Teit, op. cit. Stryen.—
Brit. Col. map. Ind. Aff., Victoria, 1872. Stryne.—
Can. Ind. Aff., 164, 1901. Stryne-Nqakin.—Ibid.
418, 1898 (two town names combined). Stryne.—
Libid, 269, 1889. Stryune.—Ibid., 434, 1896. Styne
Creek.—Teit, op. cit. (white men's name).

Stsanges (Stsá'ñges). A Songish band between Esquimalt and Becher bay, s. end of Vancouver id. Pop. 103 in 1904, 94 in 1911. Songish, the name given to this tribe by whites, is corrupted from the name of this band.

Soughees.—Can. Ind. Aff., pt. 11, 164, 1901. Stså'ñ-ges.—Boas in 6th Rep. N. W. Tribes Can., 17, 1899.

Stskeitl (Stsk't'il). A Bellacoola town on the s. side of Bellacoola r., Brit. Col., near its mouth. It is one of the S villages called Nuhalk.

Stskë'etl.—Pons in 7th Rep. N. W. Tribes Can., 3, 1891. Stsk'ë'Il.—Pons in Mem. Am. Mus. Nat. Hist., 11, 49, 1898.

Stuichamukh. An Athapascan tribe, now absorbed into the surrounding Salishan tribes, that inhabited upper Nicola valley, Brit. Col. They have been supposed to be descendants of a war party of Tsilkotin (McKay in Dawson, Notes on Shuswap of Brit. Col., Trans. Roy. Soc. Can., IX, sec. 2, 23, 1891), but the evidence of their long occupancy of Nicola and Similkameen valleys has led Boas (10th Rep. N. W. Tribes, Rep. Brit. A. A. S., sec. 2, 33, 1895) to consider them the northernmost of the isolated Athapascan bands found along the Pacific coast. Four or five generations back they lived in three subterranean lodges, indicating a population of between 120 and 150.

Sei'leqamuq.—Boas in 10th Rep. N. W. Tribes, 32, 1905, ('people of the high country': Ntlakyapamuk name). Smilê'kamu g.—Ibid. (another Ntlakyapamuk name). Stûwi'hamuq.—Ibid.

Stuik (Stū'(x'). A Bellacoola village on Bellacoola r., Brit. Col., 28 m. from its mouth. Stū'(iH.—Boas in 7th Rep. N. W. Tribes Can., 3, 1891. Stū'(x'.—Boas in Mem. Am. Mus. Nat. Hist., II, 49, 1898.

Stumiks (Stü'mīks, 'bulls'). A society of the Ikunuhkatsi, or All Comrades, in the Piegan tribe; it has been obsolete since about 1840.—Grinnell, Blackfoot Lodge Tales, 221, 1892.

Stunhlai (Sta'nla-i, said to refer to "any fat game or fish brought in". A Haida town on the N. w. coast of Moresby id., Brit. Col., occupied anciently by the Kas-lanas.—Swanton, Cont. Haida, 280, 1905.

Stustas (Sta'stas). One of the most important Haida families of the Eagle clan. The name is that given to salmon eggs after the young fish have begun to take form in them. There is a story that this family was once reduced to a single woman, but subsequently increased very rapidly from her children; for

that reason they were likened to spawning salmon. The family is known also as Sā'ngaLlā'nas, referring to sea-birds called sañ;: when these birds find any food on the surface of the sea, all swoop down upon it, making a great noise, and their actions are likened to those of people at potlatches made by this family. According to tradition, part of the Stustas, including that to which the chief himself belonged, came down from Stikine r. in the Tlingit country, while the rest were from the country of the Nass people. Edenshaw (q. v.), the name of the chief, was also transferred from the Stikine. A chief of this family was very friendly to the whites, and it was largely through his influence that a mission was established at Masset. The Stustas' land lay principally around Naikun and in Naden harbour, but their chief town was Kiusta, on the coast opposite North id. There were many subdivisions: Kawas, Kangguad-Lanas, Hlielung-keawai, Hlichung-stustae, Naikun-stustae, Chawagis-stustae, and the Yadus of Alaska. the last being still further subdivided.

J. R. S.

Sā'ngan lā'nas.—Swarton, Cont. H. i.b., 275, 1905.
 Shongalth Lennas.—Harrison in P. or. Il y. Sw., Can. 1895, sec. II, 125, 1895.
 Stastas.—Ibid.

Sugarcane. A Shuswap village on the E. side of Fraser r., Brit. Col.—Moriee in Trans. Can. Inst. 1892-93, iv, 22, 1895.

Suhinimiut ('people of the sun,' that is, living in the east). A tribe of Ungava and Labrador Eskimo extending from Koksoak r., E. to cape Chidley and thence, s. to Hamilton inlet. A part have long been Christianized by Moravian missionaries, but those of the northern districts still retain their heathen customs. Girls are tattooed at the age of puberty, though less elaborately than formerly; they are then forced into marriage, and early show the effects of their harsh and laborious life. Children are few and weak. Many men have two wives, the wealthy several. The aged and the diseased are frequently deserted, sometimes quietly strangled. An unlucky woman is driven out into the wilderness. A bad man is not admitted into the houses, and if he commits murder the others stone him to death. Blood vengeance is incumbent on the next of kin. The people are of the stature of Europeans and very muscular. Their legs are disproportionately short and malformed, owing probably to the habit of earrying infants in

2 GEORGE V., A. 1912

the hood. There is a recognized elder in the community, yet he is controlled by the angekok. These conjurers, who pretend to propitiate the malevolent spirits of nature and each man's evil spirit, work much harm, often separating man and wife on the plea that their union causes ill luck. The people often devour deer meat raw, though they prefer cooked food. The complexion of these Eskimo shows much variation; those who are bleached almost white in winter become quickly browned by exposure to the summer sun.

Subtribes are the Koksoagmiut, Kangivamiut, and Kilinigmiut. The mission stations are Hebron, Hopedale, Nachvak, Nain, Okak, Ramah, and Zoar. A native village on the N. coast is Aukpatuk.

Sahinimyut.—Turner in 11th Rep. B. A. E., 176, 1894. Sukhinimyut.—Turner in Trans. Roy. Soc. Can., v. 104, 1888.

Suk (8'āk, 'valley,' 'depression'). A Ntlakyapamuk village on the E. side of Fraser r., Brit. Col., below Keefer station, C. P. Ry. The population of this place and the neighbouring village of Kimus, with which later reports of Indian affairs have combined it, was 74 in 1901, since which date neither is mentioned.

Cūk'.—Hill-Tout in Ethnol Surv. Can., 5, 1899. Sheooke.—Can. Ind. Aff., 189, 1883. Shoouk.—Prit. Col. map, Ind. Aff., Victoria, 1872. Snuk.—Can. Ind. Aff., 363, 1897. Sook-kamus.—Ibid., pt. II, 164, 1901. S'ūk.—Teit in Mem. Am. Mus. Nat. Hist., II, 169, 1900. Sunk.—Can. Ind. Aff., 269, 1889. Suuk.—Ibid., 230, 1886. Suuk-kamus.—Ibid., 448, 1898.

Sulu-stins $(S\bar{u}'lu\ stins)$. A former Haida town of the Do-gitunai famliy, on the E. coast of Hippa id., Queen Charlotte ids., Brit. Col.

Skao nans.—Swanton, Cont. Haida, 281, 1905. Sülu stīns.—Ibid.

Sumas. A Cowiehan tribe on the lake and river of the same name, which are tributary to lower Fraser r., Brit. Col. Until 1894 three divisions or villages called by this name, and numbered 1, 2, and 3, appeared in the reports of the Department of Indian Affairs, having populations, respectively, of 30, 57, and 53 in 1893. Their total number in 1911 was given as 52.

Sgmåç.—Boas, MS., B. A. E., 1887. Smess.—Mayne, Brit. Col., 295, 1862. Sumas.—Can. Ind. Aff., 300, 1893. Sumass.—Ibid., 160, 1901. Su-mat-se.— Fitzhugh in U. S. Ind. Aff. Rep. 1857, 328, 1858.

Sunteacootacoot (Sun-tea-coot-a-coot). An unidentified body of Salishan Indians said by

Ross (Fur Hunters, 1, 145, 1855) to have lived between Thompson and Fraser rs., Brit. Col.

Suntz. A Squawmish village community on Burrard inlet, Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Sus-haidagai (Nūs xā'-idAga-i, 'lake people'). A subdivision of the Kona-kegawai, a Haida family of the Eagle clan. They owned the town of Illgaedlin and received their name from a lake which lies inland from Skedans bay, Brit. Col.—Swanton, Cont. Haida, 273, 1905.

Susk. More correctly Sisk, the Haida name for Frederick id., off the N. w. coast of Graham id., Queen Charlotte ids., Brit. Col. Dawson (Q. Charlotte Ids., 171, 1880) wrongly supposed it to be the name of a town as well, his informants probably referring to Te, which once stood on the mainland opposite.

(J. R. S.)

Susksoyiks ('band with hairy mouths'). A band of the Piegan tribe of the Siksika, probably extinct.

Sus-kso'-yiks.—Hayden, Ethnog, and Philol, Mo. Val., 264, 1862.

Sutkel (' $S/E q \ell' l$). A Squawmish village community on Burrard inlet, Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 475, 1900.

Swaiwi (Swai'wī). A Squawmish village community on Burrard inlet, Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 475, 1900.

Swampy Ground Assiniboin. A division of the Assiniboin (Coues, Henry-Thompson Jour., 11, 523, 1897). Henry (1808) says that they "inhabit the strong wood w. of Fort Augustus,* along Panbian [Pembina] r..† never frequent the plains, and are excellent beaver hunters. Formerly they were very numerous, but frequent murders among themselves, and the ravages of the smallpox have reduced their number to about 30 tents. They are fully as much addicted to spirituous liquor as the Saulteurs."

Swiat (Swī'at). A Squawmish village community on the w. side of Howe sd., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Ta (T.'ā, 'chiton' [?]). A Haida town formerly on the E. coast of North id., Queen Charlotte ids., Brit. Col. It is said to have been

^{*}Present city of Edmonton.

⁸ tributary of Athabaska r.

occupied by a small family called, after the name of the place, Taahl-lanas.—Swanton, Cont. Haida, 281, 1905.

Taahl-lanas ('the people of the town of Ta'). An extinct Haida family which formerly lived on North id., Queen Charlotte ids., Brit. Col. See *Ta*.

T!ā'al.—Swanton, Cont. Haida, 276, 1905

Tabogimkik. A Miemae village or band in 1760, probably in Nova Scotia.—Frye (1760) in Mass. Hist. Soc. Coll., 1st s., x, 116, 1809.

Tachy ('tail of the water'). A village of the Tatshiautin at the mouth of Thache r., Brit. Cel. Pop. 32 in 1881; 42 in 1911.

Tachy.—Harmon, Jour, 215, 1820. Thatce.—Moriee in Trans. Roy. See. Can., N. 109, 1893.

Tadji-lanas (Tā'dji lā'nas, or Tās lā'nas, 'sand-town people'). Two important Haida families belonging to the Rayen clan. It would probably be truer to say that they were two parts of one family, although they were. later, widely separated geographically. According to tradition this family and 4 others once lived together in a town near Sand-spit pt., Queen Charlotte ids., composed of 5 rows of houses. Those in the front row were called Tadji-lanas, because they were close to the beach; those in the next, Kuna-lanas (Pointtown people't, because their row ran out to a point; those in the third, Yaku-lanas ('Middletown people', because they occupied the middle row; those in the fourth, Koetas CEartheaters'), because they lived near the trails where it was very muddy; and those in the fifth, Stlenga-lanas ('Rear-town people'), because they lived farthest back. Another tradition relates that this family, together with the Kagials-kegawai of Skedans, sprang from a woman who was on House id. (Atana) when it rose out of the flood. One branch was reckoned among the Gunghet-haidagai, and a subdivision called Kaidju-kegawai owned the southernmost town on the island. By a curious coincidence the northern division, after living for a while on the N. w. coast of Graham id., came to occupy Kasaan in Alaska, the most northerly Haida town. The Gunghet branch is almost extinct. (J. R. S.)

Tā'dji lā'nas.—Swanton, Cont. Haida, 268, 272, 1905. Tās lā'nas.—Boas in 12th Rep. N. W. Tribes Can., 22, 1898. Tas Lennas.—Harrison in Proc. Roy. Soc. Can., sec. u, 124, 1895.

Tadoussac ('at the nipples.'—Hewitt). The principal village of the Tadoussac on St. Law-

rence r., at the mouth of Saguenay r. It was formerly an important trading post, founded by Samuel de Champlain, and a Jesuit mission was established there as early as 1616.

Tadeussac.—La Tour map, 1779. Tadoucac.—Dutch map (1621) in N. Y. Doc. Col. Hist., 1, 1856. Tadousac.—Champlain (1603), Œuvres, 70, 1870; Harris, Voy. and Tray., 11, map, 1705. Tadousac.—Dobbs, Hodson Bay, map, 1744 (misprint). Tadoussac.—Harris, op cit., t, map (misprint). Tadoussac.—Champlain (1604), Œuvres, 216, 1870. map of 1616 in N. Y. Doc. Col. Hist., 1, 1856. Tadoussaciens.—Esnauts and Rapilly map, 1777. Tadussac.—Jefferys, Fr. Doms., pt. 1, map, 1761. Tadussékuk.—Gatschet, Penobscot. M.S., B. A. E., 1887. Penobscot. name).

Tadoussac. A Montagnais tribe or band on Saguenay r., Quebec. In 1863 part of the tribe were on a reservation at Manikuagan, while others were at Peribonka.

Taenhatentaron. A former Huron village in Ontario, the seat of the mission of Saint Ignace. It was destroyed by the Iroquois in 1649.

Sainct Ignace.—Jos. Rol. 1639, 74, 1858.—St. Ignatius.—Shea, Cath. Miss., 179, 1855.—Taenhatentaron.—Jos. Rol. 1639, 74, 1858.

Tagish. A small tribe living about Tagish and Marsh lakes, Brit. Col. They are classed with the Tlingit stock on the basis of a vocabulary obtained by Dawson (Rep. Geol. Surv. Can., 1928, 1887); but, as they resemble the interior Athapasean Indians in every other respect, it is likely that they have adopted their present language from the Chilkat. They are probably part of Dall's "Nehaunee of the Chilkaht river."

J. R. S

Stick Indians.—Daws on in Rep. Cool. Surv. Can., 1928, 1887 (coast name for these people and all other interior Indians). Tahk-heesh.—Schwarka in Contury Mag., 747, Sept. 1885. Tank-heesh.—Hid., 743 (may be the Taken of Schwarka.)

Tahagmiut ('people of the shadow,' that is, living toward the sunset). An Eskimo tribe inhabiting the Ungava shore of Hudson str. from Leaf r., w. and the coast of Hudson bay s. to Mosquito bay. They are tall and of fine physique, the men larger on the average than whites, the women equal to the average white women. Their customs are primitive. Men hold women in little respect, but are jealous of their wives. They are fond of games and athletic sports, and both sexes are passionate gamblers. They trap foxes, wolves, and wolverenes, exchanging the furs for guns, ammunition, cutlery, and hardware at Ft. Chimo, distant a whole winter's journey for a

dog team. The skirts of their coats are hung with pear-shaped pieces of ivory that rattle when they walk.

Ig-flurmint. Beas in 6th Rep. B. A. E., 462, 1888 ('people of the other side'); so called by the Eskimo of Baffin estin, I, on the opposite shere of Hudson str.). Iglumint. Bees in Trans. Anthr. Soc. Wash., 10, 95, 1885. Northerners. Turner in 11th Rep. B. A. E., 177, 1894 on call (1by the whites of Ungaya'). Tahagmyut.—Tarser in Trans. Roy. Soc. Can. 1887, sec. 0, 101, 1888. Ta hág myut.—Turner in 11th Rep. B. A. E., 177, 1894. Ungayamint.—Hoas in Am. Antiq. 40, 1888.

Tahltan. The southwesternmost tribal division of the Nahane Indians of the Athapascan family. Their hunting grounds include the drainage basin of Stikine r, and its tributaries as far as the mouth of Iskut r., Dease lake, and the river halfway to McDame er. (but, according to the old law, the head of Dease lake was Kaska territory, and this assumption of rights has never been acknowledged by the Kaska people), the northern sources of the Nass, and some of the southern branches of the Taku, in Alaska and British Columbia. In early days the salmon streams flowing into the Stikine from the N., from 4 m. below Glenora to, but not including, Telegraph cr., were claimed and fished by the Stikine tribe of Tlingit, but this overlapping of the two peoples seems to have produced little friction, possibly because the Tahltan had no living places hereabouts, and, in the matter of the exchange of the products of the coast and the interior, it was of mutual advantage to keep on friendly terms.

The Tahltan have always lived on the upper reaches of the Stikine and near by on the Tahltan and Tuya rs. In early days their living places were used more as storage depots and were resorted to through the summer months for salmon fishing, which was also the season of ease and feasting, when the pursuit of the fur-bearing animals was without profit—for the Tahltan people have always been hunters and trappers, living in the open throughout the year, meat-eaters through necessity and choice, and accepting fish diet only as a change.

The primitive houses were similar to those found in the fishing camps to-day; they were constructed of stout saplings stuck upright in the ground and bound together with bark rope or tree roots and roofed over with slabs of spruce bark. But in camp the typical shelter was a lean-to of bark and brush laid over poles, two being placed opposite each other, with a central fire. To-day, throughout most of the

year, they live in the same manner, excep that canvas has superseded the bark and brush covering.

After the Cassiar gold excitement in 1874 they built a substantial log village on a level space upward of a mile and a half from the junction of the Tahltan with the Stikine, which is generally known as Tahltan, though its native name is Goon-tdar-shaga there the spring water stops 1. The only other native settlement is at Telegraph Creek, where a number of small log houses have been built to keep pace with the growth of the white settlement.

The social organization of the Tahltan without doubt has developed from association with the coast Tlingit. It is founded on matriarehy and is dependent on the existence of two exogamous parties who intermarry. These parties may be designated, from their totemic emblems, as Cheskea (Raven) and Cheona (Wolf). These are subdivided into families, which assume all the functions of the party and supplement each other at all meetings and on all occasions of ceremony. The family is the unit of social and political life, in which all individuality is merged, succession follows, and inheritance is secured. The families are:

- (1) Tuckclarwaydee, of the Wolf party, which besides having the wolf emblem, is represented by the brown bear, the eagle, and the killer-whale. It originated in the interior about the headwaters of Nass r. This family is credited with having been the first to settle in this country and the founders of the Tahltan tribe
- (2) Nanyiee, of the Wolf party, which, besides having the wolf emblem, is represented by the brown bear, the killer-whale, and the shark. The original home of this people was in the interior, about the headwaters of Takur, which they descended to salt water and settled among the Stikine Tlingit; in later years they ascended Stikine r. and became a family of the Tahltan, while others crossed the trail in still more recent times and joined their brethren.
- (3) Talarkoteen of the Wolf party, represented by the Wolf crest. They originated in the interior, about Peace r., and ascended the Liard r. to Dease lake and then crossed to the Tuya. They are nearly extinct.
- (4) Kartchottee, of the Raven party, represented by both the raven emblem and that of

the frog. This family originated in the interior toward the headwaters of the Taku. Some of the family married among the Tahltan in early days. Another branch descended Stikine r. long ago, affiliated with the Kake tribe of the Tlingit people, and generations later their descendants followed up the Stikine and became Tahltan. This is now the most numerous family of the tribe.

The Tahltan live by hunting and trapping. The country is rich in fur-bearing animals and big game. In late years since hunters have been attracted thither, they have earned considerable as guides, besides working for the trading companies' pack-teams. They are an adaptable people, who are fast giving up the traditions of the past for the luxuries of civilization, with which their earnings supply them, and in the course of a few years there will be little left of their more primitive life. They numbered 217 in 1911, and have reached the stage where they are holding their own. They are of medium stature, spare rather than stout, and have high cheek-bones, full mouth. aquiline nose rather broad at the base, small hands and feet, coarse black hair, and mild and pleasant expression. On the whole they are an honest, agreeable, kindly people, hospitably inclined and dignified in bearing. In many instances their admixture with the Tlingit is expressed in their features, producing a much less pleasing type. In addition to the authors cited below, consult Teit in Boas Anniv. Vol., 337, 1906.

(G. T. E.)

Conneuaghs.—Perc. MS. vocab., B. A. E., 1865. Kűn-űn-äh'.—Dall in Proc. Am. A. A. S., XXXIV, 376-1886. Nahanies of the Upper Stikine.—Pope. oc cit. Stick.—Smith quoted by Colyer in U.S. Ind. Aff-1869, 557, 1876. Tahl-tan.—Dawson in Rep. Gool Rep. Surv. Can., 1928, 1889. Talyan.—Smith, op. cit., 568-

Taiaiagon ('at the crossing or landing.'—Hewitt'. An Iroquois village in 1678 on the N. shore of lake Ontario, near the present Toronto.

Taiaiagon.—Hennepin, New Discov., 48, 1608. Tegaogen.—Esnauts and Rapilly map, 1777. Teïaïagon.—La Salle (1684) in N. Y. Doc. Col. Hist., 18, 218, 1855. Tejaiagon.—Bellin map, 1755. Tejajagon.—Hennepin, New Discov., 28, 1608. Tejajahon.—Macauley. N. Y. II, 191, 1829. Tezagon.—French, Hist. Cell. Lu., 1, 59, 1846.

Tailla ('crane.'—Hewitt). An unidentified village on the St. Lawrence, in 1535, near the present city of Quebec,—Cartier (1535), Bref Récit, 32, 1863.

Tait ('those up river'). A collective name for the Cowichan tribes on Fraser r., Brit. Col., above Nicomen and Chilliwak rs.

Haitlin.—Anderson quoted by Gibbs in His' Mag, 1-t s, vii, 73, 1860 Sa-chinco.—Hold. 'strangers', Shuswap name: Sa-chin-ko.— Mayne, Prit. Cel., 205, 1862 Tait.—Truch, Map of Brit. Cel., 1870. Tates.—Fitzhugh in US In i. Arf. Rep., 328, 1857. Teates.—Mayne, on, cr. Teet.—Anderson, op. cit. Tëlt.—Feasin Rep. 61th Meeting Frit. A. A. 8, 454, 1894.

Takfwelottine "people of the living waters". A tribe or band of the Thling-chadinne dwelling s. E. of Great Bear lake and at the source of Coppermine r., Mackenzie dist., N.W.T. Petitot describes them as kindly, jovial, and religious. When he went among them, in 1865, there were 60 shanans for 600 people.

Takfwel-ottiné.—Petitot, Diet. Dêt/-Dindjié, xx, 1870. Takkwel-ottiné.—Pitiet, in Poll Soc de Géog Paris, chart, 1875.—Takkwel-ottiné.—Petitot, Autour du luc des Psalaves, 303, 1801.—Tathelottiné.—Petitot, MS, womb, B. A. E. 1865.

Taku. A Tlingit tribe on the river and inlet of the same name. Stevens channel, and Gastineau channel. Alaskan coast. They were said to number 2,000 in 1860, 260 in 1880, and only 223 in 1890. Their winter towns are Sikanasankian and Takokakaan. Social divisions are Ganahadi. Tsatenyedi, and Yenyedi. A tradition, seemingly well founded, places the ancient home of most of these people in the interior, higher up Taku r. An Athapascan tribe was known by the same name. See Tokutine. (J. R. S.)

Tacos.—Scott in U.S. Ind. Aff. Rep., 311, 1868. Takco.—Anderson quoted by Gibbs in Hist. Mag., 1st s., vii, 75, 1863. Takas.—Halleck in Rep. U.S. Sec. War, pt. i., 43–1868. Tako.—Scotler (1840) in Jour. Ethnel. Soc. Lond., i, 232, 1848. Takon.—Colyer in U.S. Ind. Aff. Rep., 575, 1870. Takoos.—Ibid., 574. Taku-kön.—Krause, Tinkit Ind., 116, 1885. Taku-qwan.—Emmons in Mem. Am. Mus. Nat. Hist., iii, 233, 1803. Takutsskoe.—Veniaminoff, Zapiski, ii., pt. 3, 30, 1849. Tiāqō.—Swanton, field notes, R. A. U., 1904. Tarkens.—Colyer in U.S. Ind. Aff. Rep. 1869, 588, 1870. Tarkoo.—Dennis in Morris, Treas. Rep., 4, 1879. Thākhu.—Holmberg, Ethnog. Skizz., map, 142, 1855.

Takulti ('people who go upon the water'). An ethnic group of Athapascan tribes, under Babine and Upper Skeena and Williams lake agencies: inhabiting the upper branches of Fraser r. and as far s. as Alexandria, Brit. Col. They are described 'Can. Ind. Aff., 210, 1909' as consisting of 19 bands, all of the Hagwilget or Dené nation. Hale (Ethnol. and Philol., 201, 1846) described

them as occupying the country from 52° 30' N., bordering on the Shuswap to 56°, being separated from the Sekani on the E. by the Rocky mts. and on the w. by the Coast range. Anderson (Hist. Mag., vn. 75, 1863), placed them approximately between 52° and 57° N. and 120° and 127° w. Drake (Bk. Inds., viii, 4848) placed them on Stuart lake. Buschmann (Athapask, Sprachst., 152, 1589) placed them on the upper Fraser r., Brit. The British Columbia map of 1872 placed them s. of Stuart lake, between 54° and 55° N. Dawson (Rep. Geol. Surv. Can., 192B, 1889) states that they, together with the Sekani, inhabit the headwaters of Skeena, Fraser and Peace rs. Morice (Proc. Can. Inst., 112, 1889) says that they are one of the three western Déné tribes and that their habitat borders that of the Tsilkotin on the s. and extends as far up as 56° N.

The Takulli were first visited by Mackenzie, who, in 1793, traversed their country on his way from lake Athabaska to the Pacific. In 1805 the first trading post was established among them. They are a semi-sedentary tribe, having fixed homes in regularly organized villages which they leave at regular seasons for purposes of hunting and fishing. They are the most numerous, important and progressive of all the northern Athapascan tribes. They borrowed many customs from the coast Indians, as the Chimmesyan are in close communication with their northern and the Heiltsuk with their southern septs. practice of wearing wooden labrets was obtained from the Chimnesvan, while from the coast tribes they adopted the custom of burning the dead. A widow was obliged to remain upon the funeral pyre of her husband till the flames reached her own body; she then collected the ashes of the dead, placed them in a basket, which she was obliged to earry with her during three years of servitude in the family of her deceased husband, at the end of which time a feast was held, when she was released from thraldom, and permitted to remarry if she desired. From this custom the tribe came to be called Carriers. fewer than 8 kinds of snares were employed by the Takulli, and Morice states (Trans. Can. Inst., 137, 1893) that copper and iron implements and ornaments were used by them before the advent of the whites, but that they wrought copper only. He classes them as Upper and Lower Carriers and Babines, although such a distinction is not recognized by the tribe itself. They have a society composed of hereditary "noblemen" or landowners, and a lower class who hunt with, or for, these; but slavery, as it exists among the neighbouring Athapascan tribes, is not practised by them. They have no head chiefs and are exogamous, all title and property rights descending through the mother. Each band or elan has a well-defined hunting ground, which is seldom encroached on by others of the tribe. They are not so numerous now as formerly, a number of their villages having become extinct. An independent band has settled at Ft. McLeod, in the Sekani country. Drake (Bk. Inds., viii, 1848) said that in 1820 they numbered 100; Anderson (Hist. Mag., vii, 73, 1863) estimated the population in 1835 as 5,000, and in 1839 as 2,625, of which number 897 were men, 688 women, 578 sons, and 462 daughters. Morice (Proc. Can. Inst., 112, 1889) gave the population as 1,600. The number reported in 1902 was 1,551, and 1,614 in 1909. Hale (Ethnol. and Philol., 201, 1846) and McDonald (Brit, Col., 126, 1862) divided them into 11 clans, as follows: Babine (Nataotin and Hwosotenne), Naskotin, Natliatin, Nikozliautin, Ntshaautin, Nulaautin, Tatshiautin, Tautin, Thethiotin, Tsatsnotin (Tanotenne), and Tsilkotin. The Tsilkotin are a distinct group, as determined by Morice (Trans. Can. Inst., 24, 1893), who gives 9 septs of the Takulli: 1, Southern Carriers: 1, Ltautenne (Tautin); 2, Nazkutenne (Naskotin) 3, Tanotenne; 4, Nutcatenna (Ntshaautin); 5, Natlotenne (Natliatin). II, Northern Carriers 6, Nakraztlitenne (Nikozliautin); 7, Tlaztenne (Tatshiautin). III, Babines: 8, Nitutinni (Nataotin); 9, Hwotsotenne. Dawson (Rep. Progr. Geol. Surv., 30B, 1880) makes the Kustsheotin, whose village is Kezehe, distinct from the Tatshiautin, the Tatshikotin from the Nulaautin, and the Stelatin of Stella village from the Natliatin.

Atläshimih.—Tohnie and Dawson, Vocabs Brit. Col., 122B, 1884 (Bellacoola name). Canices.—M'Vickar, Hist. Lewis and Chirk Exped. 11, 356, note, 1842 (misprint for Carriers). Carrien.—Scouler in Jour. Geog. Soc. Lond., xi, 221, 1841. Carrier-Indians.—Mackenzie, Voy., 257, 1801. Carriers.—Ibid. 284. Chargeurs.—Duflot de Mofras, Expl. de l'Oregon, 11, 337, 1844. Chin.—Dunn, Hist. Oreg. Ter., 101, 1844. Facullies.—Drake, Bk. Inds., viii, 1848 (misprint). Nagail.—Latham in Jour. Ethnol. Soc. Lond., 1, 159, 1848. Nagailas.—Mackenzie, Voy., 11, 175, 1802, Nagailer.—Mackenzie, ibid., 246. Nagailer.—Adelung, Mithridates, 117, 216, 1816 (misprint). Porteurs.—Mayne, Brit. Columbia, 298, 1862. Tacoullie.—Balbi, Atlas Ethnog., 822, 1826. Taculli.—Latham, Var. of Man, 372, 1850. Ta-cullies.—Har-

mon, Jour., 313, 1820. Tacully.-Harmon quoted in Pac. R. R. Rep., 111, pt. 3, 84, 1856. Tahculi.-Gallatin in Trans. Am. Ethnol. Soc., 11, 77, 1848. Tahcully.—Anderson quoted by Gibbs in Hist. Mag , 1st s, vii, 73, 1883 ('people who navigate deep waters'). Tahekie.—Can. Ind. Rep. for 1872, 7, 1873. Tahelie. -Ibid., 8. Tahkali.-Hale, Ethnol. and Philol., 201, 1846. Tahka-ii.-Pope, Sicanny MS vocab., B A E., 1865 ('river people,' from tah-kuh, 'a river'). Tah-kallies.—Domenech, Deserts N. Ani, 1, 444, 1860. Tah-khl.-Dawson in Rep. Geol. Surv. Can. 1928, 1887. Tahkoli.—Buschmann in König Akad. der Wiss. zu Berlin, 111, 546, 1860. Takahli.—Brit Columbia map, 1872. Takali.-Wilkes, U. S. Explor. Exped., iv, 451, 1845. Takalli.-McDonald, Brit. Col., 126, 1862. Takeliv.-McLean, Hudson's Bay, t, 265, 1849. Ta-Kej-ne.-Morice, Notes on W. Déné, 29, I893 (own name). Tā-kull.—Richardson, Arct. Exped, п. 31, 1851. Takulli.—Latham in Trans. Philol. Soc. Lond., 66, 1856. Talkpolis.—Fouquet quoted by Petitot, Dict. Dênê Dindjiê, xliv, 1876. Tawcullies.-Richardson in Franklin, 2d Exped Polar Sea, 197, 1828. Taχelh.—Morice in Proc. Canad. Inst., 112, 1889. Táχköli.—Buschmann, Athapask. Sprachst, 152, 1859. Teheili.-Tolmie and Dawson, Vocabs. Brit. Col., 1228, 1884. Tokali.-Duffot de Mofras, Expl. de l'Oregon, 11, 335, 1844 Tukkola.-Taylor in Cal. Farmer, July 19, 1862.

Takutine. A Nahane tribe living on Teslin r. and lake and upper Taku r., Brit. Col., speaking the same dialect as the Tahltan. Their hunting grounds include the basin of Big Salmon r., extending N. to the Pelly r. and E. to upper Liard r. Dall (Proc. A.A.A.S., 19, 1885), as well as Dawson, called them a part of the Tahltan. Dawson (Geol. Surv. Can., 201B, 1889) elasses them as distinct from a tribe of similar name in the upper Pelly valley, but they are probably the same, and so also, are probably the Nehane of Chilkat r., living on a stream that falls into Lewes r. near lake Laberge. Dall describes the latter as bold and enterprising, great traders, and of great intelligence, while the Takutine, he said (Cont. N. A. Ethnol., 1, 33, 1577), are few in number and little known.

Chilkaht-tena.—Dall in Cont. N. A. Ethnol., r., 33, 1877. Nehaunees of the Chilkaht River.—Ibid. Tāh-ko-tin'neh.—Ibid. Ta-koos-oo-ti-na.—Dawson in Rep. Geol. Surv. Can. 1887-88, 2008, 1889. Taku.—Ibid., 1938.

Talio. The name, according to Boas, of 4 Bellacoola towns (Koapk, Nuiku, Aseik, and Talio) at the head of S. Bentinck arm, Brit. Col. The people of these towns, or the Taliomh, were divided into 4 gentes—Hamtsit, Ialostimot, Spatsatlt, and Tumkoaakyas. In 1911 they were reported as numbering 272 in two towns, Kinisquit and Bellacoola (or Palamey), under the Bellacoola agency, the town of Talio apparently having become extinct.

Taléomχ.—Boas in Petermanus Mitteil., pt. 5, 130 · 1887. Talicomish.—Tolmie and Dawson, Vocabs. Brit. Col., 122β, 1884. Tā/lio.—Boas in Mem. Ann. Mus. Nat. Hist., π, 49, 1900. Tālio/mπ.—Boas in 7th Rep. N. W. Tribes Can., 3, 1891. Tallion.—Can. Int. Aff., pt. π, 162, 1901. Tallium.—Hid., 1889, 272, 1890. Talomey.—Ibid., pt. π, 70, 1904. Taluits.—Brit. Col. map, Ind. Aff., Victoria, 1872.

Talirpingmiut ('inhabitants of the right side'). A subdivision of the Okomiut Eskimo, residing on the w. shore of Cumberland sd. Pop. 86 in 1883. Their villages are Umanaktuak, Idjorituaktuin, Nuvajen, and Karusuit. Koukdjuaq was a former village.

Talirpingmiut.—Boas in 6th Rep. B. A. E., 426, 1888. Tellirpingmiut.—Boas in Trans. Anthr. Soc. Wash., III, 96, 1885.

Talon. A division of the Ottawa on Manitoulin id., in lake Huron, that afterward moved to Michilimackinac, Mich., on account of Iroquois hostility. — Lahontan (1703) quoted in N.Y. Doc. Col. Hist., 1x, 176, note, 1855.

Tamakwa (*Ta-ma'-kwa*, 'beaver,' lit. 'woodcutter'). A gens of the Abnaki.—Morgan, Anc. Soc., 174, 1878.

Tangouaen. A village where Algonkin and Hurons united for protection against the Iroquois in 1646, perhaps near Georgian bay, Ont.—Jes. Rel. 1646, 76, 1858.

Tanintauei. An Assiniboin band.

Gens des Osayes.—Maximilian, Trav., 194, 1843 ('bone people'). Tanintauei.—Ibid.

Tannaouté. An Iroquois village formerly on the N. shore of lake Ontario, Ontario.

Tannaouté.—Bellin, map, 1755. Tonnaouté.—E-nauts and Rapilly map, 1777

Tanotenne ('people a short distance to the north'). A band of the Takulli, apparently officially known as the Fort George band, under Babine and Upper Skeena agency, at the junction of Stuart and Fraser rs., Brit. Col., numbering 130 in 1892, 119 in 1911, in the village of Leitli. Their other village, Chinlak, was destroyed by the Tsilkotin. They have extensive hunting grounds E. of Fraser r. as far as the Rocky and Cariboo mts.

Aunghim.—Lennard, Brit Col., 213, 1862. Ta-notenne.—Morice, letter, B. A. E., 1890. 'people a short distance to the north'). Tsatsnótin.—Hale, Ethnol. and Philol., 202, 1846. Tsatsuotin.—McDonald, Brit. Col., 126, 1862.

Taqwayaum. A Ntlakyapamuk village on Fraser r., Brit. Col., below North Bend: pop. 73 in 1901, when last reported.

2 GEORGE V., A. 1912

Taqwayaum.—Can. lad. Aff., pt. 11, 164, 1961. Ta-kuyaum.—Ibid., 1893, 301, 1894. Tk'kōčau'm.—Hill-Tout in Rep. Ethnel. Surv. Can., 5, 1899. Tkua-yaum.—Can. Ind. Aff. 1892, 312, 1893. Tquayaum.—Ibid., 230, 1886. Tquayum.—Ibid., 277, 1894. Tqwayaum.—Ibid., 1886, 448, 1899.

Tarthem. A Salish band formerly under Fraser superintendency, Brit. Col.—Can. Ind. Aff., 79, 1878.

Tasis. A winter village of the Nootka at the head of Nootka sd., Brit. Col.

Tashees.—Jewitt, Narr., 101, 1815. Tasis.—Galiano, Relacion, 1:12, 1802.

Tatapowis. A town of the Wiweakam and Komoyue, gentes of the Lekwiltok, situated on Hoskyn inlet, Brit. Col.

Ta-ta-pow-is.—Dawson in Trans. Roy. Soc. Can., sec. 11, 45, 1887.

Tateke $:T\tilde{a}'t_{\nu}^{2}q_{\nu})$. A Cowichan tribe on Valdes id. the second of the name), s. e. of Vancouver id. and n. of Galiano id., Brit. Col.; apparently identical with the Lyacksun of the Canadian Indian reports. Pop. 83 in 1911.

Li-icks-sun.—Can. Ind. Aff., 308, 1879. Lyach-sun.—Ibid., 270, 1889. Lyacksum.—Ibid., pt. II, 161, 1901. Lyacksun.—Ibid., 220, 1902. Tä'teqe.—Peas, MS., P. A. F., 1887.

Tatlitkutchin ('Peel river people'). A Kutchin tribe, closely allied to the Tukkuthkutchin, living on the E. bank of Peel r., Yukon ter., between lat. 66° and 67°. For a part of the season they hunt on the mountains, uniting sometimes with parties of the Tukkuthkutchin. They confine their hunting to the caribou, as they no longer have moose hunters among them. In 1866 they numbered 30 hunters and 60 men.

Fon du Lac Loucheux.—Hooper, Tents of Tuski, 270, 1853. Gens du fond du lac.—Ross, notes on Tinne, S. I. MS., 474. Peel's River Indians.—Kirkby in Hind, Labrador Penin., II, 254, 1863. Peel's River Loucheux.—Anderson, ibid., 260. Sa-to-tin.—Dawson in Rep. Geol. Surv. Can., III, pt. 1, 202B, 1889. Tä-kit kutchin.—Gibbs, MS. notes from Ross, B. A. E. "people of the bay"). Tä-tlit-Kutchin.—Kirkby in Smithson. Rep. 1864, 417, 1865. T'é-tllet-Kuttchin.—Petitot, Diet. Dèné-Dindjié, xx, 1876. Tpétlé-(k-uttchin.—Petitot, MS. vocab., B. A. E., 1865 ('dwellers at the end of the water'). T'etliet-Kuttchin.—Petitot in Bull. Soc. Géog. Paris, 6th s., x, map, 1875. Te-tliet-Kouttchin.—Petitot, Autour du lac des Es-laves, 361, 1891.

Tatpoös (T'atpō'os). An extinct Salish tribe formerly occupying the E. portion of Valdes id., E. coast of Vancouver id., and speaking the Comox dialect.—Boas, MS., B. A. E., 1887.

Tatsanottine ('people of the scum of water,' seum being a figurative expression for copper). An Athapascan tribe, belonging to the Chipewyan group, inhabiting the northern shores and eastern bays of Great Slave lake, Mackenzie dist., N. W. T. They were said by Mackenzie in 1789, to live with other tribes on Mackenzie and Peace rs. Franklin in 1824 (Journ. Polar Sea, 1, 76, 1824) said that they had previously lived on the s. side of Great Slave lake. Gallatin in 1836 (Trans. Am. Antiq. Soc., II, 19, 1856) gave their situation as N. of Great Slave lake on Yellowknife r., while Back placed them on the w. shore of Great Slave lake. Drake (Bk. Inds., vii, 1818) placed them on Coppermine r.; Richardson (Arct. Exped., n, 4, 1851) gave their habitat as N. of Great Slave lake and from Great Fish r. to Coppermine r. Hind in 1863 (Labrador Penin., n, 261, 1863) placed them N. and N. E. of Great Slave lake, saying that they resorted to Ft. Rae and also to Ft. Simpson on Mackenzie r. Petitot in 1865 (MS., B. A. E.) said that they frequent the steppes E. and N. E. of Great Slave lake; but 10 years later (Dict. Dênê-Dindjié, xx, 1876) he placed them about the E. portion of the lake. They were more nomadic than their neighbours, which doubtless accounts for the wide area ascribed to them by some of the earlier travellers who met them during their hunting trips in territory belonging to the Etchareottine. Prior to 1850 they were in the habit of visiting the N. end of Great Bear lake to hunt musk-oxen and reindeer; but many of their influential men were killed by treachery in a fend with the Thlingchadinne; since then they have kept more to the E. end of Great Slave lake. In their hunting trips northward they eame in contact with the Eskimo residing near the mouth of Back r., with whom they were continually at war, but in recent years they seldom travelled farther coastward than the headwaters of Yellowknife r., leaving a strip of neutral ground between them and their former enemies. According to Father Morice, "they now hunt on the dreary steppes lying to the N. E. of Great Slave lake," and that formerly they were "a bold, unserupulous and rather licentious tribe, whose members too often took advantage of the gentleness of their neighbours to commit acts of highhandedness which finally brought down on them what we cannot help calling just retribution" (Anthropos, 1, 266, 1906). Back, in

 1 836, stated that the Tatsanottine were once powerful and numerous, but at that time they had been reduced by wars to 70 families. Ross in 1859 (MS., B. A. E.) made the census for the Hudson's Bay Company as follows, but his figures evidently included only one band: At Ft. Resolution, 207; at Ft. Rae, 12; total, 219, of whom 46 males and 54 females were married, 8 unmarried adult males, 14 widows and unmarried females, 44 boys, and 53 girls, giving 98 males and 121 females of all ages. According to Father Morice they now number about 500, of whom 205 are at Ft. Resolution. The Tatsanottine were the Montagnais (see Chipewyan) of the Hudson's Bay Company, for whom a special alphabet was designed and books printed in it by the English missionaries (see Pilling, Bibliog. Athapascan Lang., 1892). Petitot found them serious and religiously inclined like the Chipewvan, from whom they differed so slightly in physique and in language that no novice could tell them apart. They formerly manufactured, and sold at fabulous prices, copper knives, axes, and other cutting tools, according to Father Morice. The metal was found on a low mountain in the vicinity of Coppermine river. The diffusion of iron and steel implements at length so depreciated the value of the aboriginal wares that, finding the main source of their revenue cut off through the new order of things, they finally moved to the s.

The Tatsanottine have a myth that one of their women was kidnapped and carried blindfolded off to the country of the Eskimo in Asia and married to one of these, and that she made her escape with her infant in an umiak, reached the shore of America by paddling from isle to isle of the Aleutian archipelago, being protected on the vovage by a white wolf. Reaching the shore of Alaska she abandoned her Eskimo child because it robbed her of permican she had made. Seeing a blazing mountain she ascended it, thinking to find a party eamping on the summit. She found that the flames were emitted by a molten metal, and when eventually she reached the camp of her own people they accompanied her back by the path she had marked with stones to get some of the metal, which they ealled bear's dung or beaver's dung, because it was red. They thought she was a woman descended from the skies, but when they had made the journey for the third time some of them laid violent hands on her, whereupon she sat down beside her precious copper, refusing to go home with them. When they came back some time later to seek the volcano of molten copper, she was still there, but sunk to her waist into the earth. She gave them copper but again refused to go back with them, putting no faith in their promises. She said she would give good metal to those who brought her good meat, iron if the gift were lung, liver, or heart of the caribou, copper for whomsoever gave red flesh, but if anyone brought bad meat they would get brittle metal in return. Those who came back later for more metal found her buried to the neck in the ground. The last time they came she had disappeared into the bowels of the earth. and from that time no more copper could be found on the bank of Copper r., though there may still be seen the huge stones which the metal woman placed to mark the way. Her tribe have since been called the Copper People, for water scum and beaver dung are both figurative names for this metal.

Base-tlo-tinneh.—Ross. MS. B. A. E. Birch-rind Indians.-Franklin, Journ. Polar Sea, 1, 76, 1824 Birch-Rind men.—Prichard, Phys. Hist., v. 377, 1847. Tatshiautin ('people of the head of the lake'). A Takulli clan or division, officially known as the "Tatche band," at the head of Stuart lake and on Thache r. and Tatla,

Trembleur, and Connolly lakes, Brit. Col.; pop. 78 in 1911. Settlements: Kezche, Sasthut, Tatchi, Tsisli, Tsisthainli, Yucuehe, and probably Saikez.

Tatshiantins.—Domenech, Deserts of N. Am., 1, 444, 1860. Tatshiāutin.—Hale, Ethnol and Philol., 202, 1846. Ta-tshi-ko-tīn.—Tolmie and Dawson, Vocabs. Brit Col., 1238, 1884. Ta-tshik-o-tīn.—Dawson in Geol Surv Can. 1879, 308, 1881. Tlaz'tenne.—Morice, Notes on W. Dénés, 26, 1895 ('people of the end of the lake').

Tautin (Ltau'tenne, 'sturgeon people'). A sept of the Takulli living on Fraser r. about old Ft. Alexandria, Brit. Col., once an important post of the Hudson's Bay Co., now abandoned. They were originally some hundreds in number, but died off from the effects of alcohol and loose morals until not 15 were left in 1902 (Moriec, Notes on W. Dénés, 24, 1902). Their village, Stella, was contiguous to the fort.

Alexandria Indians,-Brit, Col. map, 1872 Atnalis .- Taylor in Cal. Farmer, July 19, 1862. Calkobins .- De Smet, Letters, 157, 1843 (in New Caledonia, w. of the mountains). Enta-otin. - Gibbs, after Anderson, in Hist. Mag., 1st s., vn. 77, 1863 ('the lower people,' as being the lowest Carrier tribe on Fraser r.). Te $(T.\bar{\epsilon})$. A Haida town, the principal one owned by the Tas-lanas before they migrated to Alaska. It formerly stood on the w. coast of Graham id., Queen Charlotte ids., Brit. Col., opposite Frederick id. (J. R. S.)
Ti Hnigē.—Harrison in Proc. Roy. Soc. Can., sec. 11, 124, 1895. Tiē.—Swanton, Cont. Haida, 281, 1905.

Teanaustayae. One of the most important Huron villages formerly in Ontario. In 1638 the mission of St. Joseph was removed there from Ihontiria. It was destroyed by the Iroquois in 1648.

Ieanaustealae.—Jes. Rel. 1637, 107, 1858 (misprint). St. Joseph.—Shea, Cath. Miss., 178, 1855. Teananstayae.—Ibid., 174 Teanansteixé.—Jes. Rel. 1640, 63, 1858 (misprint). Teanaustaiae.—Ibid., 1637, 107, 1858. Teanaostaiaé.—Ibid., 161. Teanosteaé.—Ibid., 70.

Tecamamiouen (native name of Rainy lake). A Chippewa band living on Rainy lake, Minn., numbering 500 in 1736. Cf. Kojejew ninewuq.

Tecamamiouen.—Chauvignerie (1736) in N. Y. Doc. Col. Hist., IN, 1054, 1855

Tecumseh (properly Tikamthi or Tecumtha: 'One who passes across intervening space from one point to another,' i. e. 'springs' (Jones); the name indicates that the owner belongs to the gens of the Great Medicine Panther, or Meteor, hence the interpretations 'Crouching Panther' and 'Shooting Star'). A celebrated Shawnee chief, born in 1768 at the Shawnee village of Piqua on Mad r., about 6 m. s. w. of the present Springfield, Ohio. It was destroyed by the Kentuckians in 1780. His father, who was also a chief, was killed at the battle of Point Pleasant in 1774. His mother is said to have been by birth a Creek, but this is doubtful. It must be remembered that a considerable body of Shawnee were domiciliated among the Creeks until long after the Revolution. On the death of his father, Teeumseh was placed under the eare of an elder brother, who, in turn, was killed in battle with the whites on the Tennessee frontier in 1788 or 1789. Still another brother was killed by Teeumseh's side at Wayne's victory in 1794. While still a young man, Tecumseh distinguished himself in the border wars of the period, but was noted also for his humane character, evinced by persuading his tribe to discontinue the practice of torturing prisoners. Together with his brother Tenskwatawa the Prophet (q. v.), he was an ardent opponent of the advance of the white man, and denied the right of the Government to make land purchases from any single tribe, on the ground that the territory, especially in the Ohio Valley country, belonged to all the tribes in common. On the refusal of the Government to recognize this principle, he undertook the formation of a great confederacy of all the western and southern tribes for the purpose of holding the Ohio r. as the permanent boundary between the two races. In pursuance of this object he or his agents visited every tribe from Florida to the head of the Missouri r. While Teeumseh was organizing the work in the S. his plans were brought to disastrous overthrow by the premature battle of Tippecanoe under the direction of the Prophet, Nov. 7, 1811. On the breaking out of the war of 1812, Teeumseh at once led his forces to the support of the

British, and was rewarded with a regular eommission as brigadier-general, having under his command some 2,000 warriors of the allied tribes. He fought at Frenchtown, Raisin River, Ft. Meigs, and Ft. Stephenson, and covered Procter's retreat after Perry's victory on lake Erie, until, declining to retreat farther, he compelled Procter to make a stand on Thames river, near the present Chatham, Ont. In the bloody battle which ensued the allied British and Indians were completely defeated by Harrison, Tecumseh himself failing in the front of his warriors, Oct. 5, 1813, being then in his 45th year. With a presentiment of death, he had discarded his general's uniform before the battle and dressed himself in his Indian deerskin. He left one son, the father of Wapameepto, alias Big Jim. From all that is said of Tecumseh in contemporary record, there is no reason to doubt the verdict of Trumbull that he was the most extraordinary Indian character in Canadian and United States history. There is no true portrait of him in existence, the one commonly given as such in Lossing's War of 1812 (1875) and reproduced in Appleton's Cyclopedia of American Biography (1894), and Mooney's Ghost Dance (1896), being a composite result based on a pencil sketch made about 1812, on which were mounted his cap, medal, and uniform. Consult Appleton, Cvcl. Am. Biog., vi, 1894; Drake, Life of Tecumseh, 1841; Eggleston, Tecumseh and the Shawnee Prophet, 1878; Law, Colonial Hist. Vincennes, 1858; Lossing, War of 1812, 1875; McKenney and Hall, Ind. Tribes, 1, 1854; Mooney, Ghost Dance Religion, in 14th Rep. B. A. E., pt. 11, 1896; Randall, Teeumseh, in Ohio Archæol. and Hist. Quar., Oct. 1906; Trumbull, Indian

Teepee. See Tipi.

Wars, 1851.

Tees-gitunai (T!ē'esgūtanā'i, 'rocky-coast eagles'). A small branch of the Gituns of Masset, N. coast of the Queen Charlotte ids., Brit. Col.—Swanton, Cont. Haida, 275, 1905.

Teeskun-lnagai (T!ē'es kun lnagā'-i, 'rocky coast point-town people'). A branch of a Haida family called Kunalanas. They are named from the rocky coast between Masset inlet and Virago sd., Brit. Col., where they used to camp.

T'ës kunilnagai'.—Boas, 12th Rep. N. W. Tribes Can., 23, 1898. T'ë'es kun lnagā'-1.—Swanton, Cont. Haida, 270, 1905. Teesstlan-Inagai (T/ē'es sL'an lnagā'-i, 'rocky-const rear-town people'). A subdivision of the Stlenga-lanas, a great Haida family of the Raven clan, named from the coast between Masset inlet and Virago sd., where they used to camp.—Swanton, Cont. Haida, 271, 1905.

Temtltemtlels (TE'mLtEmLels, 'those under whom the ground shakes'). A gens of the Nakoaktok and also of the Mamalelekala, Kwakiutl tribes.—Boas in Nat. Mus. Rep. 1895, 330, 1897.

Tenaktak (Tena'xtax or Dena'x'da⁸x^a). A Kwakiutl tribe residing on Knight inlet, Brit. Col., with the following gentes, according to Boas: Gamgamtelatl, Gyeksem, Koekoaainok, Yaaikakemae, and Pepatlenok. In 1885 their principal town, which they owned conjointly with the Awaitlala, was Kwatsi. Pop. (probably of these two tribes together) 101 in 1908, 94 in 1911.

Tetanetlenok (T'é't'anêLênôx). A gens of the Klaskino, a Kwakiutl tribe.—Boas in Rep. Nat. Mus. 1895, 329, 1897.

Têtes de Boule (French: 'round heads'). A rude tribe of wandering hunters formerly roving over an extensive region on the upper branches of St. Maurice, Gatineau, and Ottawa rs., Quebec. As described by Henry, about the year 1800, they depended chiefly on rabbits for food and clothing, built mere brush windbreaks for shelter, and placed small piles of firewood near the bark-covered graves of their dead for the use of the spirits. Chauvignerie (1736) gives them and the Abitibi as totems, the pheasant and the eagle. They have been reduced by smallpox and other calamities to 287, living in 1911 on a reservation on St. Maurice r., in Champlain co., Quebec. They seem to be closely cognate with their western neighbours, the Nopeming (q. v.), with whom they are often confounded, although apparently a distinct people. See Michacondibi, Michipi-

Thayendanegea (Thayĕñdanē'kĕn', 'He sets or places together two bets,' referring to the custom of fastening together the articles of

approximate value placed as wagers by two phratrics in tribal contests. The elements are t for te 'two'; ha 'he-it'; yenda' 'a wager'; $-n\bar{c}'k\tilde{e}n'$ 'set side by side iteratively'). A celebrated Mohawk chief, popularly known as Joseph Brant, who took an active part against the white settlers in the border wars during the Revolution, and who first came into official notice as a so-called "Pine-tree chief." He was born on the Ohio in 1742 while his parents were on a hunting expedition to that section. The home of his family was at Canajoharie Castle in the Mohawk valley, N.Y. His father, Tehowaghwengaraghkwin, according to Stone, was a full-blood Mohawk of the Wolf gens, and his mother was also Indian or at least half-blood. While Joseph was still young his father died, and the mother then married an Indian known among the whites as Brant: hence the name by which Brant is commonly known. His sister Molly, the elder child, became the acknowledged wife, according to the Indian method, of Sir William Johnson. Thavendanegea's career as a warrior began at the age of 13, when he joined the Indians under Sir William Johnson at the battle of lake George in 1755. Johnson sent him to Dr. Wheelock's charity school at Lebanon, Conn., where he learned to speak and write English, and acquired some knowledge of general literature and history. He married the daughter of an Oneida chief about 1765, and settled at Canajoharie, where he joined the Episcopal church and for a time led a peaceful life. His wife died in 1771, leaving a son and a daughter; in the year following he married his first wife's half-sister. He was with Johnson in the Niagara expedition of 1759, and took part in the Pontiac war of 1763, fighting on the English side. Having visited England in 1775, he returned prepared to devote his energies to the British cause in the Revolution, then imminent. He was given a colonel's commission by Gov. Carleton, and took an active part in the raid that desolated Minisink, Orange co., in 1779. He was conspicuous in the battle of Oriskany, Aug. 6, 1779, but was not present at the massacre of Wyoming in 1778, as has been charged. After the treaty of peace between Great Britain and the United States in 1783, still retaining his commission in the British service and drawing half pay, Brant was granted a tract of land, 6 m, wide, on each side of Grand r., Ontario, on which he settled with his Mohawk and other Iroquois followers. and continued to rule over them until his death,

Nov. 24, 1807. He was thrice married; his second wife died childless, but by his third wife he had seven children. His youngest son. John (Ahvouwaighs), became chief of the Mohawk tribe through his mother, who was the eldest daughter of the head chief of the Turtle gens. His daughter Elizabeth married William Johnson Kerr, grandson of Sir William Johnson. The last survivor of the Brant children was Catherine B. Johnson, who died in 1867. Thavendanegea was buried near the little church he had built on Grand r., 3 m. from Brantford, Ontario, and a monument placed over his grave bears the inscription. "This tomb is erected to the memory of Thavendaneges or Capt. Joseph Brant, principal chief and warrior of the Six Nations Indians, by his fellow-subjects, admirers of his fidelity and attachment to the British Crown." In 1879 the grave was desecrated and the bones were stolen by a physician and medical students, but most of them, including the skull, were recently restored to their former resting place. Consult Stone, Life of Brant, 1864. (J. N. B. H.

Thilanottine "dwellers at the foot of the head," i. e. of the great glacier. An Athapascan tribe of the Chipewyan group who dwell on the shores of Ile-a-la-Crosse lake and in the country between Cold lake and La Loche r., Alta. and Sask. Ross (MS., B. A.

E.) gives their habitat as extending from Churchill r. to Athabaska and Great Slave lakes. Kennicott (MS., B. A. E.) states that. they extend as far x as Ft. Resolution on the s. shore of Great Slave lake. The Thilanottine are of good stature, having well-proportioned bodies, long narrow heads, flat faces, high cheek-hones, and depressed temples, giving the head a marked pear shape. Their hands and feet are unusually small and well formed. They are mild-mannered and docile. selfish, and grasping, great liars, but otherwise noted for honesty. Polygamy exists, but is not common. A Roman Catholic mission was established among them in 1856, and their native beliefs and customs have been influenced thereby: otherwise they do not differ materially from the tribes on the v. Their snowshoes are of superior workman-hip, the inner part of the frames being straight, the outer edge curved, and both ends nomiced, the one in front being turned upward. The lacing is neatly made of deerskin thongs Their sledges are made of thin strips of red sprace-fir turned up in front and highly polished with a crooked knife to make them run easily. In 1859 the tribe numbered 211, of whom 100 were males and 111 females. In 1911 there were 279-59 adult men, 73 adult women, and 147 children and young people, attached to Onion Lake agency-living in better built houses than the Cree, and engaged in hunting, fishing, and raising cattle, the women doing the farm work, and all enjoying a good reputation for piety, morality, and temperance. Another hand of 70°-composed of 13 men, 20 women, and 37 children—lived entirely by fointing, trapping, and fishing in the district surrounding Heart. lake Can. Ind. Rep., 169, 1902. The Thilanottine have a legend of the Metal Woman, differing from that of the Taltsonottine. A giant in the time when there were gian so encountered another on the shore of the Arctic ocean and a fierce combat resulted, in which he would have succumbed had not a man whom he had befriended cut the tendon of his adversary's leg, causing him to fall so as to form a bridge across Bering strait, over which the reindeer entered America, and later a strange woman came, bringing iron and copper. She repeated her visits moul her beneficiaries offered her violence once, whereupon she went underground with her treasure to come back no more.

Thlingchadinne ('dog-flank people'). An Athapascan tribe or group of tribes. Their habitat, according to Dobbs (1744), was on Seal r., in the musk-ox country. They did not trade with the French because they were afraid to go through the territory of the hostile Maskegon. La Potherie in 1753 located them at the sources of Churchill r. Jefferys in 1761 placed them near Hudson bay N. of their foes, the Maskegon. Franklin in 1824 found them between the Tatsanottine country and Mackenzie r. Back (1835) said that they were in the barren lands about Great Slave lake. Dunn (1844) gave their habitat as Mackenzie r and Great Bear lake. According to Richardson (1851) they occupied the inland country, E. of the Kawchodinne, from lac La Martre to Coppermine r. Hind in 1863 located them about the N. and N. E. portions of Great Slave lake, resorting to Tt. Rae and Ft. Simpson. Petitot (Dict. Dèné Dindjié, xx, 4876) gave their habitat as being between Great Slave and Great Bear lakes, E. of Mackenzie r., extending as far as Coppermine r. Expelled from their pristine home by their Cree enemies, they have migrated continuously northward during two centuries. Franklin, Dease, and Simpson found them N. and N. E. of Great Bear lake between 1819 and 1836. Since then they have returned to some of the southern districts. Petitot found Great Slave lake their extreme southern limit.

According to a fable told by the Chipewyan, Tatsanottine, and Kawehodinne, as well as by the Thlingehadinne themselves, the tribe originated from the union of a supernatural dog-man with a Tinne woman. After the discovery of copper by a Tatsanottine woman another woman of the same tribe was dwelling with her two brothers x, of Great Slave lake. One day a strong and handsome stranger arrived, who, on the proposal of the brothers, took her for his wife. Waking in the middle of the wedding night she found her husband gone and heard an animal crunching bones at the fireplace. (There were no dogs then among the Tatsanottine; Franklin found them without these animals in 1820). The same thing happened the next night. The bride and her brothers lighted torches, but found no animal. On the third night one of the brothers hurled

a stone axe into the corner whence the noise of gnawing proceeded. A cry of agony was heard, and when a torch was lighted a great black dog was seen twitching in the death throes. As the human husband did not reappear, the brothers chased forth their sister because she had married a dog-man, a sorcerer, a Thingit. She wandered into the treeless desert of Coppermine r., where in the course of time she brought forth a litter of puppies, which she kept hidden in a bag of reindeer skin. When they could run alone she was astonished to find on her return from hunting, prints of infants' feet in the ashes. Hiding one day, she saw the little dogs leap from the bag, becoming handsome children as soon as they reached the light. She ran and pulled the string of the bag, but not before three succeeded in jumping back into the dark hole. Two boys and two girls were kept forcibly in the daylight, and these became the progenitors of the Thlingchadinne (Petitot, Autour du Lac des Esclaves, 296, 1891).

Ross (MS., B. A. E.) states that adjoining the Tatsanottine are the Dog-ribs, whose lands extend from Coppermine r. to the s. E. side of Great Bear lake and to about midway between lac La Martre and Mackenzier. In the latter tract they are much intermingled with the Etchareottine, from whom they can scarcely be distinguished except by their larger stature and their thick, stuttering, and disagreeable manner of enunciation. Petitot describes them as tall and well built, of a bronze or terracotta colour, nervous of temperament, their hands and feet small and well modelled, the chest wide and deep, with black hair and eyes, heavy eyelids, a sad and reserved look, large mouths, full lips, furnished with slender moustaches on the men, sometimes accompanied by thin beards, their countenances having a peculiar Egyptian cast. The same author (Bull. Soc. Géog. Paris, chart, 1875) divides them into Takfwelottine, Lintchanre, Tseottine, and Tsanticottine. The Thlingchadinne subsist chiefly on the reindeer. They are said to treat their women and dogs with more kindness and consideration than do the Chipewyan tribes. The father loses his name on the birth of a child and is thereafter known as the father of so-and-so, the child. Other tribes of this group have the same custom, but these people change the name after the birth of every child, while an unmarried man is called the father of his favourite dog. Ross in 1858 gave their population as 926, of whom 533 were men and

393 were women; of this number 23 were found at Ft. Resolution on Great Slave lake, 150 at Ft. Simpson, and 133 at Ft. Norman. Father Morice in 1906 gave the total number of Dog-ribs as 1,150.

Tinne (Tin'-uc, 'people'). The name sometimes given to the northern division of the Athapascan family, comprising the Kaivuhkhotana, Knaiakhotana, Ahtena, Kuilchana, Unakhotana, Kutchin, Kawchodinne, Thlingchadinne, Etcharcottine, Chipewyan, Nabane, Sekani, Takulli, and Tsilkotin. They were divided by Petitot (Dict. Dènè-Dindjié, xx, 1893) into the following groups: 1. Montagnais, comprising (1) Chipewyan proper, (2) Athabascan, (3) Etheneldeli, (4) Tatsanottine. H. Montagnards, comprising (1) Tsattine, (2) Sarsi, (3) Sckani, (4) Nahane, (5) Ettchaottine, (6) Esbataottine. III. Esclaves, comprising (1) Etchareottine, (2) Slaves proper, (3) Lintchange, (4) Kawchodinne, (5) Etagottine. IV. Diudjić, comprising (1) Kwitchakutchin, (2) Nakotchokutchin, (3) Tatlitkutchin, (4) Tukkuthkutchin, (5) Vuntakutchin, (6) Hankutchin, (7) Ahtena, (8) Kutchakutchin, (9) Tengeratsekutchin, (10) Tenankutchin, (11) Unakhotana, (12) Knaiakhotana, (13) Kovuhkhotana. He classified them later (Autour du Lac des Esclaves, 361, 1893) as follows: 1. Danè, vnlgo Ingaliks, (1) Koyukukhotana, (2) Unakhotana, (3) Yukonikhotana, (4) Koyuhkhotana. 11. Dindjić, vulgo Loucheux, (1) Tenankutchin, (2) Natsitkutchin, (3) Kutchakutchin, (4) Tengeratsekutchin, (5) Hankutchin, (6) Vuntakutchin, (7) Tukkuthkutchin, (8) Tatlitkutchin, (9) Nakotehokutchin, (10) Kwitchakutchin, HI. Dounić, vulgo Montagnais, (1) Etagottine, (2) Klokegottine, (3) Krazlongottine, IV. Danė, (1) Nahane, (2) Esbataottine, (3) Sekani, (4) Tsattine, (5) V. $D\hat{e}n\hat{e}$, vulgo Hareskins, (1) Sarsi. Nellagottine, (2) Kawchodinne, (3) Thliugchadinne, (4) Kfwetragottine, (5) Etatehogottine, (6) Nigottine. VI. Dènè Esclares, vulgo Slaves, (1) Desnedeyarelottine, (2) Eleidlingottine, (3) Ettchcridicottine, (4) Etchaottine, VII. Douné, vulgo Dogribs, (1) Tscottine, (2) Takfwelottine, (3) Tsanticottine, (4) Lintchange. VIII. Dine Chipewyan, (1) Tatsanottine, (2) Edjieretrukenade, (3) Desnedekenade, (4) Athabasca, (5) Etheneldeli, (6) Thilanottine. The Takulli and Tsilkotin as well as the Ahtena he classes with the Dane.

Morice divides the Tinne as follows: 1. Western Dinis, (4) Tsilkotin, (2) Takulli, (3) Nahane. 11. Intermediate Dinis, (1) Sekani. 111. Eastern Dinis, (1) Chipewyan, (2) Etheneldeli, (3) Tsattine, (4) Tatsanottine, (5) Thlingchadinne, (6) Etchareottine, (7) Ettchaottine, (8) Kawchodinne, 4V. Northern Dines, (1) Loucheux (Proc. Can. Inst., 113, 1889).

In Anthropos (i, 255-277, 1906) Father Morice makes the following classification, though the names here given are often quoted from other writers and are not always indorsed by him.-1. Loucheux, including the 'Kaiyuh-kho-'tenne, Koyū-kūkh-otā'-nā, Yunakho-'tenne, or Yunu-kho-'tenne, Tana-kut'qin, Kut'qakut'qin, Natche-kŭtchin' or Nätsit'kut-chin', Voen-kut'qin, Tükkuth-Kutchin, Han-kut'qin, Tütconc-kut'qin, Artez-kut'qin, Thét'lét-kut'qín, Nakotco-ondjig-kut'qin, and Kwit'qakut'qin. H. The Subarctic Denés, including the Hares, Dog-Ribs, Slaves, and Yellow-Knives. III, Athabaskans or Eastern Dénés, including the Cariboo Eaters, Athabaskans, and Chippewyans. IV. The Intermediate Dénés, including the Sheep Indians, Mountain Indians, Strong Bows, Nahanais, Beavers, Sarcis, and Sékanais. V. The Western Dénés, including the Babines, Carriers, Chilcotins, and the Ts'ets'aut of Boas. Athapascon Family.

Tintlan. A Cowichan settlement on the s. bank of lower Fraser r., Brit. Col., below Sumas lake.—Brit. Col. map, Ind. Aff., Victoria, 1872.

Tionontati ('there the mountain stands.'-Hewitt). A tribe formerly living in the mountains s. of Nottawasaga bay, in Grey and Simcoe cos, Ont. They were first visited in 1616 by the French, who called them the Nation du Petun, or Tobacco Nation, from their having large fields of tobacco. In 1640 the Jesuits established a mission among them. The tribe then had 2 clans, the Decr and the Wolf, and 9 villages. On the destruction of the Huron tribes by the Iroquois, in 1648-49, many of the fugitives took refuge with the Tionontati. This drew down upon the latter the anger of the Iroquois, who sent a strong force against them in Dec. 1649. Etarita, one of their principal villages, was surprised during the absence of the warriors, the houses burned, and many of the inhabitants, together with the missionary, massacred. The Tionontati,

with the Hurons, who had joined them, now abandoned their country and fled to the region s. w. of lake Superior. In 1658 there were about 500 of the tribe at the Potawatomi mission of St. Michel, near Green bay, Wis. Soon afterward they were with the Hurons at Shaugawaumikong (La Pointe), and about 1670 the two tribes were together at Mackinaw, at the entrance to lake Michigan. The Tionontati soon became blended with the Hurons, and the united tribes were henceforth known under the modernized name of Wyandot. As late, however, as 1721, the Tionontati, then living with the Hurons near Detroit, preserved their name and hereditary chieftaincies. They were frequently designated as Tionontati Hurons and have also been confounded with the Amikwa. Their villages, so far as their names are known, were Eliouac (St. Pierre-et-St. Paul., Ekarenniondi St. Matthieu), Etarita (St. Jean), St. Andre, St. Barthelemy, St. Jacques, St. Jacques-et-St. Philippe, St. Simon-et-St. Jude, St. Thomas.

Tipi from the Siouan root ti 'to dwell,' pi 'used for'. The ordinary conical skin dwelling of the Plains tribes and of some of those living farther to the x.w. The tipi must be distinguished from the wigwam, wikiup, hogan, and other types of residence structures in use in other sections of the country.

The tipi consisted of a circular framework of poles brought together near the top and covered with dressed buffalo skins sewn to form a single piece, which was kept in place by means of wooden pins and ground pegs. It commonly had about 20 poles, averaging 25 ft. in length, each pole being hewn from a stout sapling, usually cedar, trimmed down to the heart wood. The poles were set firmly in the ground so as to make a circle of about 15 ft. in diameter, and were held together above by means of a hide rope wound around the whole bunch about 4 ft. from the upper ends, leaving these ends projecting above the tipi covering. There were 3 main poles, or with some tribes 4, upon which the weight

of the others rested. The cover consisted of from 15 to 18 dressed buffalo skins cut and fitted in such a way that, when sewn together with sinew thread, they formed a single large sheet of nearly semicircular shape. This was lifted into place against the framework by means of a special pole at the back of the structure, after which the two ends were brought around to the front and there fastened by means of 8 or 10 small wooden pins running unward from the doorway nearly to the crossing of the poles. The lower border was kept in place by means of pegs driven into the ground at a distance of about 2 ft. apart around the circle. The doorway faced the E., the usual door being a piece of dressed skin stretched over a rectangular or elliptical frame, frequently decorated with porcupine quills or other ornaments. The dressed skin of a panther, coyote, or buffalo calf, with the hairy side outward, was sometimes used. The fire-pit was directly in the centre, and the smoke escaped through the opening in the top, at the crossing of the poles. By means of moveable skin flaps on each side of the smoke hole, the course of the smoke could be regulated as the wind shifted, the flaps being kept in place by 2 poles on the outside of the tipi. There were commonly 3 beds or seats one at each side and one at the back of the tipi, each consisting of a long platform covered with a sort of mat of light willow rods, over which were thrown buffalo robes or blankets. The head end of the mat usually hung from a tripod in hammock fashion. Decorated curtains above the beds kept off the drops of water which came through the smoke hole in rainy weather. The ground was the floor, the part nearest the beds being sometimes cut off from the open space by means of a circular border of interwoven twigs. In warm weather the lower portion of the tipi cover was raised to allow the breeze to pass through. In cold weather the open space around the bottom was chinked with grass. The tipi was renewed every one or two years, its completion being the occasion of a dedicatory ceremony, and those of prominent families decorated with heraldic paintings and other ornaments. On account of its exact adaptability to the necessities of prairie life, the tipi was taken by Gen. Sibley as the model for the tent which bears his name. Owing to the smaller number of ponies available for dragging the poles, the tipis of the northern tribes were usually fewer in proportion and larger in size than among the southern

tribes. According to Grinnell, the Blackfeet in ancient times had a sort of large triple tipi, with 3 fireplaces. See *Habitations*. (J. M.)

Titshotina. A Nahane tribe inhabiting the country between the Cassiar mts. and Liard and Dease rs., Brit. Col. In 1887 they numbered 70 persons.

Achéto-tinneh.—Dall, Alaska, 106, 1870 (='people living out of the wind'). Ti-tsho-ti-na.—Dawson in Rep. Geol. Surv. Can. 1888, 2008, 1889

Titymegg. A name used by the first English settlers in the Hudson Bay country for the whitefish (Coregonus allms). Ellis (Voy. to Hudson's Bay, 185, 1748) says it was called by the French whitefish, but by the Indians and English titymagg. This word is evidently a corruption of the Chippewa atikameg, in Cree atikkamek, 'caribon fish,' from ati'k, 'deer,' 'caribou,' and amek, 'fish.' In Rep. U. S. Fish Com., 1894, attihawhmeg is given as a name of the Labrador whitefish (C. Labrad.), another species.

(A. F. C.)

Tiun (Tî'An). A llaids town of the Dostlanlnagai family, formerly on the w. coast of Graham id., s. of port Lewis, Queen Charlotte ids., Brit. Col. In the Skidegate dialect this is T!i'gan, which is said to mean 'Slaughter village.' It is probably the settlement referred to in John Wark's list (1816) as "Too," with 10 houses and 196 inhabitants. It was one of the first places occurring in his list to be abandoned. (J. R. s.)

Ti'an.—Swanton, Cont. Haida, 280, 281, 1905.
Tian Hnigē.—Harrison in Proc. Roy. Soc. Can., sec. n, 124, 1895.
Tii'gAn.—Swanton, op. cit.
Too.—Wark (1840) in Kane, Wand, in N. A., app., 4, 1859 (probably identical)

Tkeiktskune $(Tx^*\vec{v}'ix'tskun\vec{v})$. A Bellacoola village on the N. side of Bellacoola r., Brit. Col., near its mouth. It was one of the eight villages called Nuhalk.

Nuthë'iatskönë.—Boas in 7th Rep. N. W. Tribes Can. 3, 1891 – Tx'ë'ix'tskunë.—Boas in Mem. Am. Mus. Nat Hist., 11, 49, 1900.

Tktakai (T'k'(akoi, 'vine-maple'). A Squaw-mish village on the right bank of Skwamish r., Brit. Col.—Hill-Tout in Rep. Brit. A.A.S., 474, 1900.

Thaduis (Laa'luis). One of the five original septs of the Lekwiltok, living on the coast of British Columbia between Bute and Loughborough inlets. After the great war between the Kwakiutl and the Salish they were so reduced in numbers that they joined the Kucha as another gens. (J. R. s).

Ā-wā-oo,—Dawson in Trans. Roy. Soc. Can, sec. u,

Tlduldjitamai (LdA'ldji tāmā'-i, 'Mountain-woman's children'). A subdivision of the Djiguaahl-lanas, a great Haida family of the Eagle clan. It has long been extinct.—Swanton, Cont. Haida, 273, 1905.

Tleatlum (The atlum). A Squawmish village community on Burrard inlet, Brit, Col.—Hill-Tout in Rep. Brit, A. A. S., 475, 1900.

Tiekem (Lē'q'Em). A gens of the Walas Kwakiutl, a sept of the true Kwakiutl.—Boas in Rep. U. S. Nat. Mus. 1895, 330, 1897.

Tlesko. A Tleskotin village on Chilcotin r. near its junction with Fraser r., Brit. Col.—Morice in Trans. Roy. Soc. Can., sec. n. 1, map. 1892.

Tieskotin ('people of the Splint river'). A division of the Tsilkotin living in the village of Tiesko (q. v.); pop. 75 in 1892.

Tles-koh-tin.—Morice, Notes on W. Dénés, 23, 1893.

Tletlket (Lē'Lqē', 'having a great name'). A gens of the Walas Kwakiutl and another of the Tlauitsis.

në'nqët.—Boas in Rep. U.S. Nat. Mus. 1895, 330, 1897, të'nqëtë.—Boas in Petermanis Mitteil, pt. 5, 131, 1887

Tlgunghung (LgA'ñxAñ, face of the ground'[?]). A Haida town of the Djiguaahllanas family, formerly on the N. side of Lyell id., Queen Charlotte ids., Brit. Col.—Swanton, Cont. Haida, 278, 1905.

Thingus \(\(\percent L'\pi\hat{u}\hat{u}\hat{s}\), 'flat slope' . A Haida town of the Kagials-kegawai family, formerly on Louise id., Queen Charlotte ids., Brit. Col. —Swanton, Cont. Haida, 279, 1905.

Tliktlaketin LiqLa'qEtin, 'ferry,' 'crossing place'). A Ntlakyapamuk village on the E.

side of Frascr r., 3 m. below Cisco, Brit. Col.; so named because the Indians were accustomed to cross the river in their canoes here.—Teit in Mem. Am. Mus. Nat. Hist., 11, 169, 1900.

Tkikuta1h (TTf'kntath). A sept of the Opitchesaht, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes Can., 32, 1890.

Tliqalis (*Tli'qulis*). The name of an ancestor of a Quatsino gens, by which the gens was sometimes known.—Boas in Petermanns Mitteil., pt. 5, 131, 1887.

Tlitlalas (Tl'i'dalas). An ancestor of a Quatsino gens, by whose name the gens itself was sometimes called.—Boas in Petermanns Mitteil., pt. 5, 131, 1887.

Tlkamcheen (Lkamter'n, 'confluence [of rivers]'). A village of the Lytton band of Ntlakyapamuk, on the s. side of Thompson r. at its junction with the Fraser r., Brit. Col. Pop. 137 in 1901; in 1911, evidently including other bands, 470.

Toanche (Teandeouïata, 'one enters by it'). A Huron village situated at different

times, at several points on, and adjoining, Georgian bay, Ontario, and bearing several names. It was a port of entry of the Huron Bear tribe, hence its name. Before 1635 it had been twice destroyed by fire. Through fear of French revenge for the killing of Brulé at this place, it was abandoned in 1633, and a new village, Ihonatiria, was established by a part of its inhabitants, while the remainder went to Ouenrio. (J. N. B. H.)

Otoüacha.—Champlain (1632), Œuvres, v, pt. 1, 249, 1870 Saint Nicolas.—Sagard (1626), Hist. Can., 11, 296, 1866 Teandeonïata.—Jes Rel. 1635, 28, 1858. Tobique. A band of Malecite living on a reserve consisting of 14,800 acres of forest and farming lands at the junction of Tobique and St. John rs., Victoria co., New Brunswick. They numbered 179 in 1911, and are Roman Catholies. They gain a livelihood by hunting, by serving as guides and humbermen, and as labourers for the residents of Perth and Andover; they also sell their native wares, such as snowshoes, axe-handles, baskets, and barrel-stayes, and farm to some extent.

Tohic.—Vetromile, Abnakis, 122, 1866. Tobique.—Shea, Cath. Miss., 157, 1855.

Tohlka (T/ō/lk/a). A Haida town of the Tohlka-gitunai family, formerly on the N. coast of Graham id., just w. of the entrance to Masset inlet, Brit. Col.—Swanton, Cont. Haida, 281, 1905.

Tohlka-gitunai (T/ö'lk!a gitAnā'-i, 'the Gituns of Tohlka'). A Haida family of the Eagle clan, named from its town, Tohlka (q. v.). They formed one family with the Widja-gitunai, Chets-gitunai, and Djus-hade.

(J. R. s.)

Tiō'ikia git vnā'-i.—Swanton, Cont. Haida, 275, 1905, Tōtigya gyit'inai'.—Foas, 12th Rep. N. W. Tribes Can., 23, 1898

Tohontaenrat ('they are white-eared.'—Hewitt). A Huron tribe formerly living in Ontario and a member of the Huron confederation. Scanonaenrat, where the Jesuits established the mission of St. Michel, was their only recorded village. In 1649, on the overthrow of the Hurons by the Iroquois, the Tohontaenrat abandoned their village and were adopted by the Seneca.

(J. M.)

Tahontaenrat.—Jes Rel. 1644, 93, 1858. Tohontaenras.—Jes Rel. 1637, 113, 1858. Tohontaenrat.— Jes Rel. 1639, 50, 1858. Tohotaenrat.—Parkman, Jesuits, map, 1883.

Tokoaath (Tok'oā'ath, 'Toquat proper'). A sept of the Toquart, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes Can., 32, 1890.

Tokoais (Tok'oā'is, 'looking down on his family'—the name of an ancestor). A division of the Nuhalk, a subdivision of the Bellacoola of the coast of British Columbia.—Boas in 7th Rep. N. W. Tribes Can., 3, 1891.

Toktakamai ('place of thimble-berries'). A Squawmish village on the right bank of Skwamish r., w. Brit, Col.

Tawkamee,—Brit Adm. chart, no 1917 Töktä'-kamal.—Hill-Tout in Rep. Brit A A S, 474, 1900 Tqt'à'qumai.—Boas, MS, B, A E, 1887

Tondakhra ('beaver'). A Huron village in Ontario in 1637. It was situated on the w. side of the N. peninsula of Tiny twp., 4 m. N. w. of Lafontaine and about 1 m. s. e. of Clover pt. See Jes. Rel., Thwaites ed., XIII, 270, 1898, XXXIV, 254, 1898.

Tonihata. An island in the St. Lawrence, upon which was a mixed Iroquois village in 1671 and later. It is supposed to have been the modern Grenadier id., St. Lawrence river, Leeds co., Ont.

Konlata.—Esnauts and Rapilly map, 1777 Oton-diata.—De Courcelles (1671) in N. Y. Doc. Col. Hist., 1x, 77, 1855. Otoniata.—Denonville (1687), ibid, 361. Otoniato.—Ibid Toniata.—Chauvignerie (1736), ibid, 1056. Tonlhata.—Jefferys, Fr. Doms., pt. 1, 15, 1761 Tonniata.—Frontenac (1692) in N. Y. Doc. Col. Hist., 1x, 531, 1855.

Too. A Haida town given in John Wark's list (Schooleraft, Ind. Tribes, v. 489, 1855) as containing 10 houses and 196 inhabitants in 1836-41. This was probably Tiun.

Toosey. A band of Tsilkotin, seemingly named from a chief, under Williams Lake agency, Brit. Col. Pop. 62 in 1908, 50 in 1911.

Taasey.—Can. Ind. Aff. Rep. 1895, 359, 1896. Tassey.—Ibid, 1894, 279, 1895. Toosey.—Ibid, pt. 1, 162, 1901. Toosey's tribe.—Ibid, 1884, 190, 1885.

Toquart. A Nootka tribe on the N. shore of Barkley sd., s. w. coast of Vancouver id. Their septs, according to Boas, are Tokoaath, Maakoath, Wastsanek, Totakamayaath, Tsaktsakoath, Mukchiath, Tushkisath, Kohatsoath, Chenchaath, Metstoasath, and Chomaath. Their village is Mahcoah. Pop. 24 in 1911.

Tök'oā'ath.—Boas in 6th Rep. N. W. Tribes Can., 31 1890. Tokwaht.—Swan in Smithson. Cont., xvi. 3.

1870 Too-qu-aht.—Can. Ind. Aff. 1883, 188, 1884, Toquaht.—Sproat, Savage Life, 308, 1868 Toquart.—Mayne, Brit Col., 251, 1862. Toquatux.—Grant in Jour Roy Geog Soc., 293, 1857. To-quh-aht.—Can. Ind Aff. 1880, 315, 1881 Touquaht.—Can Ind Aff., pt. 2, 88, 1910. Toyn-aht.—Brit. Col. map, 1872

Tornait. A winter village of the Nugumiut Eskimo above Bear sd., in Frobisher bay, Baffin island.—Boas in 6th Rep. B. A. E., 422, 1888

Tornit. A fabulous race which the Central Eskimo believe to be akin to themselves, but much taller and stronger, having very long arms and legs and being able to toss huge boulders as though they were pebbles. The Akudnirmiut call them Tuniqdjuait. They lived with the Eskimo in stone houses larger than theirs, as shown by the ruins that are still pointed out. Under their long deerskin coats they carried lamps with which to cook the meat of seals as soon as they were killed. They could make stone implements only, no bows nor kaiaks, but these they stole from the Eskimo, who were afraid to defend their property until a young Eskimo drilled a hole in the skull of one of them who had ruined his kaiak, while the giant was asleep. The Tornit then feared that they would all be killed, and secretly stole away, cutting off the skirts of their coats and tying up their hair so that they should not be recognized if pursued. The Greenland Eskimo believed the Tornit to be a mythical race of giants who lived on the ice cap and were seen rarely hunting at the heads of the flords. The Labrador Eskimo, like those of Hudson bay and Baffin island, imagine them to be more like themselves.-Boas in 6th Rep. B. A. E., 634, 640, 1888; Trans. Roy. Soc. Can., v, sec. 2, 38, 1888.

Toryohne ('wolf'). A clan of the Iroquois. Cahenhisenhonon.—French writer (1666) in N. Y. Doc. Col. Hist., 1x, 47, 1855. Çkwă-ri'-năn.—Hewitt, inf'n. 1886. (Tuscarora name). Enanthayonni.—French writer (1666) in N. Y. Doc. Col. Hist., 1x, 47, 1855. Okuaho.—Megapolensis (1644), ibid., 111, 250, 1853. Tor-yoh-ne.—Morgan, League Iroq., 80, 1851 (Seneca form)

Totakamayaath (Tö'tak'amayaath). A sept of the Toquart, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes Can., 32, 1890.

Totatkenne (To-ta-t'qenne, 'people a little down the river'). A Sekani tribe inhabiting the E. slope of the Rocky mts. and adjacent plains s. of Peace r., Brit. Col.—Morice in Trans. Can. Inst., 29, 1895.

Totem (irregularly derived from the term ototeman of the Chippewa and other cognate Algonouian dialects, signifying generically 'his brother-sister kin,' of which ote is the grammatic stem signifying (1) the consanguine kinship existing between a propositus and a uterine elder sister or elder brother; and (2) the consanguine kinship existing between uterine brothers and sisters, inclusive of alien persons naturalized into such kinship group by the rite of adoption (q. v.); that is, the uterine brother-sister group of persons, thus delimited by blood ties or legal fictions, who in each generation are severally and collectively related as uterine brothers and sisters, among whom intermarriage is strictly forbidden, and who therefore constitute an incest group in so far as its members are severally concerned. The stem ote is never employed in discourse without a prefixed personal pronoun denotive of the grammatic relation of person, or without the nominal suffix -m, indicative of exclusive possessive relation, approximately equivalent to English 'own,' or without the objective third person ending -an in Chippewa and -a in Cree. In the following irregular manner has the word totem been produced from the first cited expression ototeman (ototema in the Cree): by dropping the initial o-, 'his,' by unwarrantedly retaining as a proclitic the epenthetic -t- whose use in this and similar combinations is for the purpose of avoiding the coalescence of the two adjunct o-vowels, and by dropping the objective third person suffix -an, and by erroneously retaining the exclusive possessive suffix -m, thus producing totem from ototeman instead of the grammatic stem ote. Thus the word totem in form is not in any sense a grammatic derivative of its primary. And so ote, the conceptual element of the factitious word totem, has no demonstrable relation to the notion "clay," or "mark," as hitherto assumed).

The Abbé Thavenet, a missionary to the Algonkin at lake of the Two Mountains, Quebec, in the early part of the 19th century, wrote an explanation of the use and meaning of the stem ote, in part as follows: "It is to be presumed that in uniting into a tribe, each clan preserved its manitou, the animal which in the country whence the clan came was the most beautiful or the most friendly to man, or the most feared, or the most common; the animal which was ordinarily hunted there and which was the ordinary subsistence of the clan, etc.; that this animal became the symbol of

each family and that each family transmitted it to its posterity to be the perpetual symbol of each tribe [clan]. One then must when speaking of a clan designate it by the animal which is its symbol. Makwa nindotem then signifies 'the Bear is my clan, I am of the clan of the Bear,' and not at all, as is commonly said, 'the Bear is my mark.' When an Indian says to another pindiken nindotem, can one believe that he says to him, 'enter then, my mark?' Is it not more reasonable to believe that he says to him, 'enter then, my clansman,' as we say 'enter then, my countryman?' But since the traders, and the Indians in imitation of them, attach to the word otem, the idea of mark, I know that I must not offend too much against this prejudice" (cited by Cuoq, Lex. de la Lang. Algonq., 313, 1886). Here, Thavenet gives the correct native Algonkin usage of the term, and also the traditional native explanation of the origin of the clau patron spirits. As a translation of 'family-mark,' Bishop Baraga (Otehipwe Dict. and Gram., 1878-82) wrote odem; but, being evidently aware that this rendering does not express the true sense of the term, he added parenthetically, "odem or otem, means only his parents, relations. In Cree, ototema, his relations"—thus clearly indicating that 'familymark' is a definition of ote-m, which is not an element of the native concept of the stem. Under ototema, in his list of terms of kinship, Lacombe (Dict. de la Langue des Cris, 1874) wrote "kinsman, relation," without any reference to 'family-mark.' Constructively confirmative of the definition of the stem ote, given above, is the evidence found in the analvsis of the common Algonquian term otenā or otenaw, signifying 'village, town, or settlement.' Its component lexical elements are ote, 'brother-sister kin,' 'clan,' and the nominal adformative $-n\bar{a}$, signifying 'a dwelling-place'; whence it is seen that otenā or otenaw originally meant 'the dwelling-place of the clau.' or 'dwelling-place of the brother-sister kin.'

In specifying the name of a particular clan or gens it is necessary commonly to employ the name, usually a cognomen only, of the object or animal by which that clan or gens is distinguished from all others and by which it is protected, where such a cult is in vogue. There are other methods of distinguishing related or confederated groups one from another. The purely philosophical term "totemism" is of course a Cancasian derivative of the word totem, and has a wide and varied application.

The term totem has been rather indiscriminately applied to any one of several classes of imaginary beings which are believed by a large number of the Indian tribes and peoples of North America to be the tutelary, the guardian, or the patron spirit or being of a person, or of an organization of persons, where such a cult or practice prevails.

The native American Indian, holding peculiar self-centred views as to the unity and continuity of all life and the consequent inevitable inter-relations of the several bodies and beings in nature, especially of man to the beings and bodies of his experience and environment, to whom were imputed by him various anthropomorphic attributes and funetions in addition to those naturally inherent in them, has developed certain fundamentally important cults, based on those views, that deeply affect his social, religious, and civil institutions. One of these doctrines is that persons and organizations of persons are one and all under the protecting and fostering tutelage of some imaginary being or spirit. These tutelary or patron beings may be grouped, by the mode and the motive of their acquirement and their functions, into two fairly well defined groups or classes: (1) those which protect individuals only, and (2) those which protect organizations of persons. But with these two classes of tutelary beings not infrequently confounded another class of protective imaginary beings, commonly ealled fetishes (see Fetish), which are regarded as powerful spiritual allies of their possessors. Each of these several classes of guardian beings has its own peculiar traditions. beliefs, and appropriate cult. The modes of the acquirement and the motives for the acquisition of these several classes of guardian beings differ in some fundamental and essential respects. The exact method of acquiring the clan or gentile group patrons or tutelaries is still an unsolved problem, although several plausible theories have been advanced by astute students to explain the probable mode of obtaining them. With respect to the personal tutelary and the fetish, the data are sufficiently clear and full to permit a satisfactory description and definition of these two classes of tutelary and auxiliary beings. From the available data bearing on this subject, it would seem that much confusion regarding the use and requirement of personal and communal tutelaries or patron beings has arisen by regarding certain social, political, and religious activities as due primarily to the influence of these guardian deities, when in fact those features were factors in the social organization on which has been later imposed the cult of the patron or guardian spirit. Exogamy, names and class names, and various taboos exist where "totems" and "totemism," the cults of the guardian spirits, do not exist.

Some profess to regard the clan or gentile group patron or tutelary as a mere development of the personal guardian, but from the available but insufficient data bearing on the question, it appears to be, in some of its aspects, more closely connected in origin, or rather in the method of its acquisition, with the fetish, the Iroquois otchină'kĕn''dă', 'an effective agency of sorcery,' than with any form of the personal tutelary. This patron spirit of course concerns the group regarded as a body, for with regard to each person of the group, the clan or gentile guardian is inherited, or rather acquired, by birth, and it may not be changed at will. On the other hand, the personal tutelary is obtained through the rite of vision in a dream or a trance, and it must be preserved at all hazards as one of the most precious possessions. The fetish is acquired by personal choice, by purchase, or by inheritance, or from some chance circumstance or emergency, and it can be sold or discarded at the will of the possessor, in most cases; the exception is where a person has entered into a compact with some evil spirit or being that, in consideration of human or other sacrifices in its honour at stated periods the said spirit undertakes to perform certain obligations to this man or woman, and in default of which the person forfeits his right to live.

"Totemism" is a purely philosophical term which modern anthropological literature has burdened with a great mass of needless controversial speculation and opinion. The doctrine and use of tutelary or patron guardian spirits by individuals and by organized bodies of persons were defined by Powell as "a method of naming," and as "the doctrine and system of naming." But the motive underlying the aequisition and use of guardian or tutelary spirits, whether by an individual or by an organized body of persons, is always the same, namely, to obtain welfare and to avoid ill-fare. So it appears to be erroneous to define this cult as "the doctrine and system of naming." It is rather the recognition, exploitation, and adjustment of the imaginary mystic

relations of the individual or of the body of organized persons to the postulated orendas, mystic powers, surrounding each of these units of native society. With but few exceptions, the recognized relation between the clan or gens and its patron deity is not one of descent or source, but rather that of protection, guardianship and support. The relationship as to source between these two classes of superior beings is not yet determined; so to avoid confusion in concepts, it is better to use distinctive names for them, until their connection, if any, has been definitely ascertained; this question must not be prejudged. The hypothetic inclusion of these several classes in a general one, branded with the rubric "totem" or its equivalent, has led to needless confusion. The native tongues have separate names for these objects, and until the native classification can be truthfully shown to be erroneous, it would seem to be advisable to designate them by distinctive names. Notwithstanding the great amount of study of the literature of the social features of aboriginal American society, there are many data relative to this subject that have been overlooked or disregarded.

Long (Voy. and Trav., 86-87, 1791), a trader among the Chippewa in the latter half of the 18th century, wrote: "One part of the religious superstition of the Savages, consists in each of them having his totam, or favourite spirit, which he believes watches over him. This totam they conceive assumes the shape of some beast or other, and therefore they never kill, hunt, or eat the animal whose form they think this totam bears." He adds: "This idea of destiny, or, if I may be allowed the phrase, 'totamism,' however strange, is not confined to the Savages." From this misleading and confused statement have the words totam and its derivative totamism, slightly changed in spelling, been introduced into literature. In this crude statement Long described the personal tutelary, but gave it the name signifying 'elan kinship.' He or his interpreter was evidently led into this error by the custom of distinguishing a particular clan from others. when speaking of them, by the class name or cognomen of its patron or tutelary; it was due to faulty diction, for it is not probable that the Chippewa and their related tribes would bave an object, believed to shape the course of human life, which had no distinctive name. Such a name is recorded by the eminent German traveller, Kohl, who was among the Chippewa and neighbouring tribes in 1855. said (Kitchi-Gami, 58, 1860) that these Indians deify natural strength and terrestrial objects; that nearly every Indian had discovered such an object, in which special confidence is placed by him, and to which he more frequently directs his thoughts and to which he more zealously sacrifices, than to any other being; that the Chippewa proper name for these objects is nigouimes, which signifies 'my hope,' approximately; that one calls a tree, another a stone or rock, 'his hope.' The rendering 'my hope' is probably only an approximate expression of the native concept embodied in the term, the derivation of which is not definitely known. It may possibly be related to the Chippewa nagamôn, 'song, chant,' and to the Cree nigamohew, 'to teach the knowledge of medicines by chanting.' But nigonimes is the Chippewa name of the personal tutelary. whatever may be its etymologic derivation.

Owing to misapprehension of externals and therefore to misinterpretation of them in the vast body of literature on the significance of imaginary patrons or tutelaries of persons and of organizations of persons, totem has come to signify the patron or guardian, the tutelary or protector, of a person, of a clan or a gens, or of a society or tribe, hence to denote the name, crest, brand, or symbol of a clan, a man, a society, or a tribe, and, finally, to the fetish or familiar of a person. Its primary native use, with certain important limitations, makes it approximately equivalent to the English term 'one's kinship.'

The fact that the Indians themselves distinguished the fetish, the personal tutelary or guardian, and the clan, gentile, or society patron, one from another, by the use of appropriate appellations, rites, and observances, indicates, it would seem, a consciousness on their part that the differences in function, character, and mode of acquirement of these several classes of objects were sufficiently great to warrant them in doing so.

According to Boas, the social organization of the Salish tribes of the interior of British Columbia is very loose, there being no recognized tribal unit. Village population among them undergoes frequent and considerable fluctuation, and there were no exogamic groups, no hereditary nobility, and no ritualistic societies. Nevertheless, the acquisition of guardian spirits at the age of puberty is an essential feature of their religious beliefs, and

these tutelaries are obtained through prescribed ceremonials. However, only a few shamans are believed to have inherited their guardian spirits from their parents.

Hill-Tout says that the most characteristic feature of the social side of the religious activity of the Salish tribes of the coast and of the lower Fraser delta is "their totem or kingroup crests," and that these kin-groups are not commonly called by animal or plant names as among the Haida and the Tlingit. They are, however, distinguished one from another by crests, "each family of standing possessing its own crest or crests." These are plastic or pictographic emblems of the supposed ancestral "totems of the family or kin-group." and are regarded as the guardian spirits of the household. Among the Vancouver Island tribes, these inherited crests largely replace the personal tutelary of the interior Salish which is there acquired by means of dreams and visions -not the ordinary dream or vision, but one superinduced by long and special ceremonial preparation. As the tutelary usually has only specific or specialized functions or spheres of action, the initiate may not be satisfied with the first one thus received, and so enters upon a second, a third, and even a fourth ceremonial preparation for a dream or a vision; and so he may be years in seeking what is satisfactory to him (Ontario Arch. Rep., xviii, 229, 230, 1905. Hill-Tout adds that between the tutelary and the person a very mystic relationship is supposed to exist. Prayer in the usual sense was not offered to the tutelary, but its aid and protection were rather expected as its duty in warning the obsessed person by dreams and visious of approaching danger in all the issues of life.

Teit (Mem. Am. Mus. Nat. Hist., Anthr., 1, 354, 1898-1900, writing of the Thompson River Indians (Ntlakyapamuk ,says that every person had his own guardian spirit which was obtained during the puberty ceremonies, and that none except a few shamans inherited without these rites their parental tutelary spirits which had been regarded as particularly powerful. He also states that "there were no totems, except at Spuzzum, where two families who were descendants of members of the coast tribes, claimed the totems of their ancestors," but that "blood relationship was considered a tie which extended over generations, both in the male and the female lines," a statement which clearly indicates that

blood kinship with what it implies a above all others the great cohesive force in savage life.

Father Morice says that among the western Déné there were several kinds of tutelary or patron spirits or beings-the clan patron, the fetish (his honorifie), and the personal tutelary, to which may be added those local deities which preside over some rock, cave, or consecrated spot. Father Morice believes that the cult of the clan patron and the fetish his honorific, came to the Dene from the natives of the Pacific coast. He states that the honorific was assumed with appropriate rites by any person desirous of gaining social rank, to which they could not otherwise aspire owing to certain restrictions of the laws of heredity. This authority does not relate how the clan tutelary is acquired among these people, but he says that the "person I totems" are those primary spirits which occasionally manifest themselves to man, are personified in the earthly individuals of the faunal and the floral worlds, and give evidence of a beneficent disposition by adopting a person as a ward and protecting him through life in return for some kindness shown their incarnate and terrestrial representatives-the animals and the plants and other objects of human environment. They reveal themselves in dreams and visions. Father Morice is of the opinion that "totemism" among the Déné is not a social institution, but that it is exclusively a religious cult; he is inclined to regard the clan patron spirit as a more extension of the cult of the personal tutelary, but assigns no satisfactory reason for this belief. The owner of a tutelary must circumspectly bear about his person and openly exhibit in his lodge the spoils of the animal denoted by it—its entire skin, or only a part of it, or a carved emblem of it; and under no circumstances would anything induce him wilfully to kill it, or at least to eat the flesh of the being, the prototype of which had become as it were, sacred to him. Its aid and protection are asked on all important occasions and emergencies. It would appear that this writer, in his attempt to explain the clan patron, has confused the fetish thonorific with the personal tutelary. The hidden power with which the devotee believes he has thus become possessed he calls coen in the Carrier tongue, which signifies 'at the same time magic and song,' thus closely approximating the Iroquois orenda. Morice (Ontario Arch. Rep., XVIII,

206, 1905) relates that in preparing himself for practice, the shaman divests himself of all his raiment and dons the spoils (a bearskin, the claws of a grizzly bear, the feathers of an owl, etc.) or the mask of his fetish or tutelary. He states that each of the Déné clans has a patron spirit, an animal or other being, traditionally connected with the establishment of these political and social units in pristine times and to which the members of the clans paid great respect and even veneration. On ceremonial occasions the entire clan is impersonated by it, for it becomes the symbol or crest of the clan. He adds that the personal tutelary, common to both the eastern and the western Déné, "being as indigenous to them as most of the institutions in vogue among all the northern American Indians," is an essential element of their religious system and does not affect "society as such."

According to Boas (Kwakiutl Indians), Rep. U. S. Nat. Mus., 1895, 1897) the Tlingit, Haida. Tsimshian, Bellabella, and Kitimat have "animal totems in the proper sense of this term," but these tutelary guardians are not found among the Kwakiutl, who belong to the same linguistic stock as the Kitimat. This author states that the natives do not regard themselves as descendants of the "totem" or tutelary, and that the northern tribes of the coast Salish have no "animal totem in the restricted sense of this term." Boas was unable to obtain any information regarding the conjectured origin of the clan or gentile patron or tutelary, except the dubious light drawn from the native traditions, but states that these legends correspond in character "almost exactly to the tales of the acquisition of manitows among the eastern Indians, and they are evidence that the 'totem' of this group of tribes is, in the main, the hereditary manitow of a family." He also states that "each man among these tribes acquires a guardian spirit," but is restricted to only such as belongs to his clan. Native tradition can shed no satisfactory light on the question of the source and origin of the clan or gentile patron spirit.

Like that of the Yuchi, one of the cardinal doctrines of the Iroquoian and Algonquian mythic philosophy is that every kind of animal being has an elder brother, a primal being, wonderfully large and potent, which is, so to speak, the source of all the individuals of its own kind. These primal beings are the

vounger brothers of Teharonhiawagon of the Iroquois and of Nanabozho of the Algonouian tribes, respectively the impersonations of all the thousand forms of faunal and floral life on earth. He who sees one of these elder brothers of any kind of animal being will be successful in the succeeding hunt of that animal; for it is by the favour of these elder brothere of the game animals that the hunter obtains any measure of success in killing the younger brothers of the primal beings (Hewitt, Iroq. Cosmol., 21st Rep. B. A. E., 1903). For in fulfilment of engagements with Teharonhiawagon and Nanabozho in the second cosmic period, these elder brothers are in duty bound to provide man not only with protection but also with animal food by means of the sacrifice of their younger brothers who are enjoined to permit themselves to be taken by man, so long as the hunter makes himself ritualistically pure for the purpose and is solicitons not to kill his victim except with the least possible erucity. For this reason prayers for the successful hunting and fishing were addressed to the game it is desired to kill, a procedure naturally assumed to be pleasing to the ruling elder brother.

Long has declared that the favourite spirit must not be killed or eaten, but the Omaha must kill his personal tutelary before its tutelaryship is established. Conversely, there were some Iroquois who feared the death of the animal or bird which he regarded as his personal tutelary, lest he himself should also die. The ground that is common in these two methods is the manner of ascertaining or discovering the tutelary (through the rite of dreaming or seeing in vision) and in the motive for acquiring it, namely, the effort to obtain the favour of the imaginary bodies on which it was supposed human welfare largely depended. In the last analysis human welfare is the motive for acquiring a guardian or tutelary power or being. There are, of course, many ways of providing the means of entering into close relation with these supposed controlling powers of the sources of human wellbeing, and consequently there are many methods of establishing this inter-relation between a person and some assumed protecting power, or between an organized body of persons and a guardian or patron being or power, for a specific or a general aid and auxiliary to the promotion and preservation of the well-being of the person or persons guarded.

(J. N. B. H.)

Totem Poles. Carved cedar poles erected by Indians along the x. Pacific coast from Vancouver id. to Alaska. Among the Haida they are of three principal varieties; the outside and inside house poles, and memorial columns. Besides the house poles the four main supporting posts and the two outside front corner posts were sometimes carved. The outside house pole, standing in front of the house midway between the corners, was 3 ft. or more wide at the base and sometimes more than 50 ft. high, being hellowed along the back for easier handling. Close to the base it was pierced with a round aperture which served as a door, though some of the latter poles were left solid, a door of European pattern being made at one side. Inside house poles were creeted only by the very wealthy. They stood in the middle of the house, directly behind the fire, and marked the seat of honour. Grave posts were of many different shapes. Sometimes they consisted of a very thick post surmounted by a large carved box, which contained smaller boxes holding the bones of the deceased; sometimes the box was longer and was supported by two posts. Oftentimes, however, the body of the deceased was placed in a mortuary house, and the pole, usually a tall, slender shaft, was erected elsewhere. The earvings on grave posts and grave boxes were almost always crests owned by the family of the deceased, while those on house poles might be crests or they might illustrate stories, and occasionally a figure of the house-owner himself was added, or the figure of some one whom he wished to ridicule. These posts were crected during the great feasts commonly known as potlatches, when an immense amount of property was given away and quantities of food were consumed. The trunks out of which they were to be carved were cut down, rolled into the water, and towed to the village amid songs and dancing. One or more regular carvers were employed to put on the designs and they were paid handsomely. (For specific descriptions see works cited below. In comparatively modern times numbers of models of these poles have been made by native carvers to sell to white visitors. These are sometimes of wood, sometimes of a peculiar black slate found at one place not far from Skidegate. Queen Charlotte ids. According to native Haida accounts carved designs were originally made directly on the front slabs of the house, afterward on a broad, thick plank, and finally on poles. This comparatively modern evolu-

tion is corroborated by the Tlingit, who have only the grave post, upon which they carve representations of stories as well as crests. Tsimshian posts were more slender than those put up by the Haida, but the ones erected in front of Kwakiutl houses are usually much more slender still, and are all heraldic, referring to the tradition of the house-owner. The main supporting posts bear crests or record an episode connected with the building of the house. The main posts which support the houses of the Nootka and the coast Salish. when carved at all, represented an event that happened to the owner, such as the acquiring of a guardian spirit, or an event in the history of his sept. Some eastern tribes, such as the Creeks, Delawares, Shawnee, and Iroquois, set up small poles that are analogous to these totem poles, although the outward resemblance is slight. Those of the Delawares and Shawnee were erected in the four corners of their medicine-lodges, while those of the Iroquois were similarly placed in the houses of shamans and were adorned with representations of the shamars' tutelary spirits.

Touaguainchain. A Huron village in Ontario in 1615 Champlain, 1615, Œuvres, iv. 28, 1870. A note by the editor of Champlain suggests that it may have been the Sainte Madeleine of the Jesuit Relation of 1640.

Touladi. The great lake-trout (Salveicous namayeash, called by the French Canadians quede-fourchue; a word written also toladi, in use among the fishermen and settlers, French and English, of E. Quebec, According to

Chambers (The Ouananiche, 270, 1896) touladi is the name of this fish in the Micmac and Abnaki dialects of Algonquian. (A. F. C.)

Trading Posts. The earliest trade between Europeans and the Indians N. of Mexico was through the Basque people. These daring sailors, by following the whale, reached the fishing banks of Newfoundland at an early period. In 1497 Cabot touched upon that island and noted its "bigge fysshe." It has been erroneously stated that he was told by the natives that they were called baccalaos, the Basque for 'codfish,' and that he gave that name to Canada. The word still lingers in Newfoundland as the designation of an island north of Conception bay. Bretons, Normans, Portuguese, Spaniards, and Englishmen made their way to these fisheries. the Basques, who preceded them, had to a degree familiarized the natives with their tongue, and Basque words became a part of the trade jargon that came into use. Cartier, in 1534-35, found the natives of the gulf and river of St. Lawrence familiar with the European fur trade, and certain places on that stream were known to both races as points for the drying of fish and the trading of furs.* The traffic spread to the southward, and from a letter of Pedro Menendez to Philip H it is learned that in 1565 and for some years earlier "bison skins were brought down the Potomae and thence carried along shore in canoes to the French about the gulf of St. Lawrence. During two years 6,000 skins were thus obrained." The first trading post in 1603 was at Tadoussac, on the St. Lawrence at the month of the Saguenay; five years later, Quebec was founded, and in 1611 Montreal was made the trading post for all the region westward. The carliest English post was with the colony on James r., Va., where pelts and corn were traded." In 1615, six years after the navigation by Hudson of the river which bears his name, the Dutch built a large post at Albany. For the next 50 years the eastern colonies made no special attempt to penetrate the interior of the continent, but in 1673 Canada authorized the movement by which the priest Marquette and the trader Jolliet discovered the Mississippi. Meanwhile individual traders had travelled beyond the Great lakes, and Groseilliers and Radisson, French traders, had found that Hudson bay could be reached overland. The failure of the French Government to award to these men the right to trade and to establish a post on the bay caused them to apply to England, in which they were successful, and in 1668, Ft. Charles [Rupert] was built at the southeastern extremity of James bay. The success of this post led to the formation of the monopoly called "The Governor and Company of Adventurers of England trading into Hudson's Bay." In 1670, they were incorporated by royal charter. For nearly a century the posts of this company controlled the trade and administered whatever of law there existed in the vast regions N. and W. of the Great lakes to the Pacific. La Salle landed on the coast of Texas opening the way for French trading enterprises on the lower Mississippi and its tributaries, and for the establishment of colonies in that region under the control of commanders of the posts. French trade during the 17th and 18th centuries developed a class of men known as coureurs des bois, who made themselves at home with the natives. These were the advance guard of civilization, and later served as interpreters, clerks, etc., to the Hudson's Bay, North West, American Tur, and other less important companies engaged in Indian trade up to the middle of the 19th century.

The trading post was generally a large square inclosed by a stockade; diagonally at two corners were turrets, with openings for small cannon and muskets in each turret so as to defend two sides of the wall. Within the stockade were the storehouses, quarters for the men, and a room for general trade.

In Virginia beads early became the "current coin" in trade with the Indians, and in 1621 Capt. Norton was sent over with some Italian workmen to establish a glass furnace for the manufacture of these articles. In 1640 and 1643 wampum (q. v.) was made legal tender in New England and was extensively used in trading with the Indians. During the next century trade was mostly by barter or in the currency of the colonies or the Government. The employment of liquor to stimulate trade began with the earliest venture and was more

There is no evidence worthy of credence that the Basques preceded Cabot and there is absolutely no evidence that the natives used "Basque words" (Ed.)

^{&#}x27;That they reached Hudson bay overland is exceedingly doubtful. They had, however, obtained from the Indians, valuable information respecting the rivers draining into it and their possibilities in connection with the fur trade. The British navigators, Hudson, Button, Foxe and James, had explored Hudson bay during the period, 1610-31.

and more used as trade increased. * * * From Colonial days and until the decline of the fur trade, near the middle of the 19th century, wars, in which both Indians and the white race were implicated, were fomented by the rivalry of competing traders. Posts were scattered along the rivers from the Great lakes to the Pacific. Montreal and St. Louis were the two great outfitting centres, as well as the distributing markets for the furs. Where Kansas City now stands the traders bound up the Missouri by boat and those who were going overland parted company. Here the great Oregon trail started and stretched, a brown ribbon, across hundreds of miles of prairie. Forty-one m. to the westward, near the present town of Gardner, Kans, this trail branched to Santa Γê, where trade was maintained with the Pueblos and other Indians of the S.W. A sign-board set up at the parting of the trail indicated the long western branch as the "Road to Oregon." Along this historic trail trading posts were located to which white and Indian trappers and hunters from the surrounding region brought their pelts. Fts. Laramic. Bridger, Hall. Boisé, Wallawalla, Vancouver, and Astoria have now become cities. So also have the principal posts along the lakes and rivers, Detroit, Prairie du Chien, Council Bluffs, Pierre, Mandan, Spokane, Winnipeg, and many others, all of which are now centres of rich agricultural regions. In recent years steps have been taken to mark some of the old routes with suitable monuments. See also Commerce, Fur Trade, Trails and Trade routes.

Trails and Trade routes. All early accounts indicate that from a period long prior to the coming of the whites the Indian was familiar with places often hundreds of miles distant one from another, and that they travelled over the same route in coming and going. The trader was inclined to follow the water courses, unloading his boat to pass obstructions and transporting the canoe and its cargo over short distances, called 'portages' or 'carries,' between different waters. Supplemental, however, to these open, and in time of war, obviously dangerous routes, were paths or trails, many of them originally made by the tracks of deer or buffalo in their seasonal migrations between feeding ground- or in search of water or salt licks. The constant passing over the same path year after year and generation after generation often so packed the soil that in places, especially on hillsides, the paths are still traceable by depressions in the ground or by the absence of, or the difference in vegetation. Many of them have been obliterated by the roads and railways of modern times. The Jesuit Relations (1658) indicate the several routes followed from the St. Lawrence and the Great lakes to Hudson bay for trade, hunting, or fishing; one of these is mentioned as having extended a distance of 250 leagues. Many maps of the colonial period, supplemented by other records, indicate that these ways of communication extended with few breaks practically the entire length and breadth of the continent. While the streams answered in eertain instances as suitable routes of travel, at times they had their drawbacks, owing to snags, freshets, or when the channel approached close to the shore, thus exposing persons in boats or on rafts to attack from enemies concealed in the vegetation along the banks. In many instances distant points were connected by trails, or traces, the latter word adopted from early French maps. Owing to the Indian habit of marching in single file, the eastern trails seldom exceeded 18 in, in width, yet these were the ordinary roads of the country travelled by hunters, migrating bands, traders

embassies, and war parties. So long as the trails led through friendly territory, they followed the line of least natural resistance. War parties after leaving friendly territory passed into the wilderness over routes selected by scouts, which routes they followed by significant marks, natural or artificial. In some places the paths of wild beasts were followed, in others the beds of streams were chosen, so that the footprints of the party would be obliterated. Other things being equal, the trail was not laid out along rough, stony ground, because of the rapid wearing away of footgear; nor through green brier, nor dense brush, nor laurel or other thickets, because of the difficulty of making rapid progress. These trails were generally along high ground, where the soil dried quickly, where the underbrush was least dense, where the fewest and shallowest streams were to be crossed; and on journeys where mountains were encountered, the paths, with few exceptions, followed the lowest points, or gaps, in many of which stone piles are found. In the extreme S. W. these stone heaps have resulted from the Indians casting a stone when approaching a steep ascent, in order, they say, to prevent them from becoming The numerous and wide waterfatigued. courses and the dense forest growth along the coast of New England made progress on foot almost impossible; consequently the birchbark canoe was almost the only means of conveying the natives and their goods from point to point. Farther s, the dugout eanoe was of such weight as to make any but the shortest portages most difficult. In the Middle states the country is more open and freer from underbrush, and the use of paths became a matter of necessity. Along the N. W. eoast travel was along the beach or off shore in canoes. In the E. trails consisted of footpaths, whereas those of the plains in later times were wide roads beaten down by large parties passing with horses dragging tipi poles and travois. These trails were well marked, often being depressed 2 ft. below the surface, the difference in vegetable growth along them showing distinctly for many years where the path had been. In the S. W. there were long trails by which the Hopi and other Pueblo Indians travelled to and from the sources of supply of salt from the Colorado r. and elsewhere; long journeys were also made to obtain supplies of shells or turquoise for ornaments, elay for pottery, or stone to answer the requirements of trade or domestic use. The Iroquois

of central New York were familiar with the country as far w. as the Black hills of Dakota, whence they returned with prisoners; the same Indians went from New York to South Carolina to attack the Catawba and into Florida against the Creeks. Western Indians travelled hundreds of miles to obtain blankets from the Pueblos, and some Plains Indians are known to have travelled 2,000 m, on raids. Santa Fé trail and the Oregon trail were wellknown routes whose beginning was Independence, Mo., one ending in New Mexico, the other at the Willamette. On early maps many Indian trails and trade routes are indicated, some along the streams and others across country. The route from Montreal up the Ottawa to lakes Huron and Superior may readily be traced; or from Montreal down to the Richelicu, up the latter, through lake Champlain into lake George, and by a portage to the From lake Superior, the fur-trader followed the Grand portage route—along the present international boundary—or the Kaministikwia route past the present city of Fort William, to the lake of the Woods, thence, by way of Winnipeg river to lake Winnipeg. Here, he could, by way of the Red river, reach what is now Manitoba, Minnesota and North Dakota; or, by portaging from lake Traverse, at its head, to Bigstone lake, he could reach any point within the vast basin of the Mississippi. From the "forks" of the Red river, at Fort Garry, the Assiniboine formed a route to western Manitoba and eastern Saskatchewan. From the foot of lake Winnipeg, he could descend to Hudson bay by the Hayes or the Nelson; or, ascending the mighty Saskatchewan, he could reach the Rocky mountains and, by way of the Fraser, Columbia and other rivers, descend to the Pacific. From the Saskatchewan, at Cumberland House, the main route to the Mackenzie River district ran by way of Frog portage, Churchill, Clearwater and Athabaska rivers, to Athabaska lake. From Fort Chipewyan on the latter, the Peace River route led to northern British Columbia and the Slave and Mackenzie to the Arctic. From the Maekenzie, the route by the Liard river led to the Pelly, Lewes and Yukon. * The white man, whether

* * * * The white man, whether hunter, trader, or settler, blazed the trees along the Indian trails in order that seasonal changes might not mislead him should he return. The winter trails of the N. were over the frozen rivers or lakes or along paths made

by snowshoes and sleds, which packed the snow solidly. These trails of the Indians, first followed by the trapper and trader, were later used by the missionary, the hunter, the soldier, and the colonist in their conquest of the wilderness. See Commerce, Fur trade, Trading posts, Travel, and the authorities thereunder cited.

(J.D.M.)

Traps. Although devices for inducing animals to effect self-imprisonment, self-arrest, or suicide differ from hunting weapons in that the victim is the active agent, the two classes merge into each other. The Indians had land, water, and air traps, and these acted by tension, ratchet, gravity, spring, point or blade. They were self-set, ever-set, victim-set, or man-set, and were released, when necessary, either by the hunter out of sight or by the victim. The following list embraces all varieties of traps used by Indians N. of Mexico, and they were very clever in making them effective without the use of metal: A. Inclosing traps: (a) pen, (b) cage, (c) pit, (d) door; B. Arresting traps: (e) meshes, (f) hooks, (g)nooses, (h) clutches; C. Killing traps: (i)weights, (k) piercers, (l) knives. Pen traps were of the simplest kinds—dams placed in the water or stockades on land. Some of these were immense, covering many square miles. The eage was merely a pen for flying creatures. Doors or gates for this whole class were vertical shutters sliding between stakes and set free by some kind of latch or trigger. Arresting traps were all designed to take the place of the human hand. Meshes were the opened fingers; hooks, the bent forefinger; nooses, the encircling closed fingers; the clutch, the grasping hand. Killing traps were weapons acting automatically. They were complex, consisting of the working part and the mechanism of setting and release. Eskimo and Indian devices were of the simplest character, but very effective with unwary game. The victim was caught in a pound, deadfall, cage, hole, box, toil, noose, or jaw; or upon a hook, gorge, pale, knife, or the like. The Indian placed an unstable prop, catch, or fastening, to be released in passing, curiously prying, gnawing, rubbing, or even in digesting, as when the Eskimo doubled up a skewer of baleen, inclosed in frozen fat and threw it in the snow for the bear to swallow. Inclosing traps were common on land and in waters abounding in fish. Parry describes traps of ice with doors of the same material. The tribes of California and of the plains dug pits and covered them with brush on which a dead rabbit was tied, and the hunter concealed beneath grasped the bird by the feet. dragged it below, and crushed it between his knees. Arresting traps were most common, working by meshes, barbs, nooses, or by means of manual seizure. The aborigines were familiar with the gill net, trawl lines, gorge hook, snares, springs, trawl snares, and birdline. Killing traps included ice, stone, and logdeadfalls for crushing, impaling devices, and set knives for braining or for inciting mutual slaughter, the object of perhaps the most ingenious and efficient of Indian traps, consisting of a sharp blade, inclosed in frozen fat, which was set up in the path of wolves. When a wolf in licking the fat cut its tongue the smell of blood infuriated the whole pack and drove them to destroy one another. See Fishing, Hunting.

Consult Mason in Smithson. Rep. 1901, 461-73, 1902, and authorities cited; Stites, Economics of the Iroquois, 1905; Boas, Murdoch, Nelson, Turner, and others in the Reports of the Bureau of American Ethnology; Niblack in Nat. Mus. Rep. 1888, 294, 1890.

(O. T. M.)

Travel. The North American Indian had poor facilities for getting about on land. The Arctic peoples, however, with their sleds and dogs, may be said to have been pioneers of fast travel. Of such great and universal use was this method of locomotion among them that before their language became differentiated into dialects that rendered them unintelligible one to another they had covered the entire Arctic coast from E. Greenland to Siberia. The Algonquian tribes of northern Canada, together with the Athapaseans in the Mackenzie River country, also used the dog and sled for transportation and travel. South of this region the tribes had everywhere to walk until the Spaniard introduced the horse. The Indians were not discouraged by the lack of beasts of burden. They had covered the entire continent with a network of trails, over which they ran long distances with phenomenal speed and endurance; the Tarahumare mail carrier from Chihuahua to Batopilas, Mexico, runs regularly more than 500 m. a week; a Hopi messenger has been known to run 120 m. in 45 hours; and there are many instances of journeys extending over months or years, involving great hardship. It is most probable that the narrow highways alluded to were first laid down in the food quest. The

2 GEORGE V., A. 1912

animals that were wanted knew where were the best feeding grounds and supplies of water, and the Indians had only to follow the paths already made by the game to establish the earliest roads. Hulbert in his "Historic Highways of America" traces the trails followed by the Indians in their migrations and their ordinary trade routes, especially those of the mound-builders, and he gives lists, especially of the trails in the Ohio valley, where these mounds were most abundant. The range of the buffalo afforded especially favourable routes. The portages across country between the watersheds of the different rivers became beaten paths. The Athapascan Indians were noted travellers; so also were the Sionan and other tribes of the Great Plains, and to a smaller degree the Muskhogean, while the Algonomian tribes journeyed from the extreme E. of the United States to Montana in the w., and from the headwaters of the Saskatchewan to the gulf of Mexico. Evidences of such movements are found in the ancient graves, as copper from lake Michigan, shells from the Atlantic ocean and the gulf of Mexico, and stone implements from various quarters. Pipes of cathinite are widely distributed in the graves and mounds. These articles show that active trade was going on over a wide region. There is good evidence that the men engaged in this trade had certain immunities and privileges, in so far as the pipestone quarry was on once neutral ground. They were free from attack and were allowed to go from one tribe to another unimpeded. See Boats, Commerce, Fur trade, Stedges, Snow-shoes, Trails, and Trade Routes.

(O. T. M.)

Treaties.* The British Government has always recognised the title of the Indian tribes to the territory they occupied. The Indian title to the portion of southern Ontario that had not previously been acquired by the French was extinguished by a series of purchases of which the following are the most important:

 Mississauga.—Lands purchased prior to 1784.

- B. Chippewa.—May 19, 1790, for £1,200 ev.
- C. Chippewa.—Purchased in 1785; northern and eastern boundaries doubtful.
- D. Mississauga.—Dec. 7, 1792, for £1,180-7-1 stg.
- E. Chippewa.—Sept. 7, 1796, for £800 ey.
- F. Chippewa.—Sept. 7, 1796, for £1,200 ey.
- G. Chippewa.—May 22, 1798, confirming surrender of May 19, 1795; for £101 cy.; 28,000 acres.
- Mississauga.—Aug. 1, 1805, confirming surrender of Sept. 23, 1787; for 10s.
 and divers good and valuable considerations given on 23rd September, 1787."
- Mississauga.—Sept. 5-6, 1806, confirming the surrender of Aug. 2, 1805; for £1,000 cy.; \$5,000 acres.
- J. Chippewa —Nov. 17-18 1815, for £4,000 ev.; 250,000 acres.
- K. Chippewa.—Oct. 17, 1818, for £1,200 cv.; 1,592,000 acres.
- L. Missis auga.—Oct. 28, 1818 for annuity of £522-10 ey.; 648,000 acres.
- M. Mississauga.—Nov 5, 1818, for annuity of £740 cv.; 1.951,000 acres.
- N. Mississauga.—Nov. 28, 1822, confirming surrender of May 31, 1819; for annuity of £642-10 cv.; 2.748,000 acres
- O. Chippewa.—July 8, 1822, confirming surrenders of Mar. 8, 1819 and May 9, 1820; for annuity of £600 cy.; 580,000 acres.
- P. Chippewa.—July 10 1827, confirming surrender of April 26, 1825; for annuity of £1,100 cy.; 2,200,000 acres.
- Q. Chippewa (Saugeens).—Aug. 9, 1836, for annuity of £1,250 ey.; 1,500,000 acres.
- R. Chippewa.—Oct 13, 1854; for "interest of principal sum arising out of the sale of our lands."

In 1811, Lord Selkirk purchased from the Hudson's Bay Company a tract of land including practically the whole of the drainage basins of the Assiniboine and Red rivers, the country to the south and west of Winnipeg to Rainy river and the tertitory lying between lake Winn'peg and approximate long. 102°30′ and extending northward to lat. 52° to 52°30′. This trac included a large area now comprehended in the states of Minnesota and North Dakota. In 1817, Selkirk entered into negotiations with the Chippewa and Crees for the extinction of their title to a tract along the Red and Assiniboine rivers. It was explained

^{*}As the article in the original dealt only with treaties between the Indians and Great Britain prior to the Revolution, and with the United States subsequent to it, this article has been substituted by the editor.

See also accompanying maps.

to the Indians that the width of the tract they were surrendering was "the greatest distance, at which a horse on the level prairie could be seen, or daylight seen under his belly between his legs." This area was described in the treaty, as follows:

"All that tract of land adjacent to Red River, and Assiniboyne River, beginning at the mouth of Red River and extending along the same as far as Great Forks at the mouth of Red Lake River and along Assiniboyne River as far as the Musk Rat River, otherwise called Rivière des Champignons, and extending to the distance of six miles from Fort Douglas on every side, and likewise from Fort Dacr, and also from the Great Forks and in other posts extending in breadth to the distance of two English statute miles back from the banks of the said river."

The agreement provided that each nation should receive 100 pounds of "good and merchantable tobacco," annually.

On Soptember 7, 1850, Hon, Wm. B. Robinson concluded the Robinson-Superior treaty with the Ojibewa (Chippewa) of Lake Superior whereby the latter surrendered their right and title to the

"Northern shore of Lake Superior, in the said Province of Canada, from Butchewanaung [Batchewana] Bay to Pigeon River, at the western extremity of said lake, and inland throughout the extent to the height of land which separates the territory covered by the charter of the Honourable the Hudson's Bay Company from the said tract. And also the islands in the said lake within the boundaries of the British possessions therein."

The agreement provided for the payment of £2,000 cy. and an annuity of £500 cy. The number of Indians included in this treaty was estimated at 1,240 including 84 half-breeds.

On September 9, 1850, Mr. Robinson concluded the Robinson-Huron treaty on similar terms with the Ojibewa (Chippewa) of Lake Huron. They received a gratuity of £2,160 ey. and an annuity of £600 cy. This treaty covered the

"eastern and northern shores of Lake Huron from Penetanguishene to Sault Ste. Marie, and thence to Batchewanaung [Batchawana] Bay on the northern shore of Lake Superior, together with the islands in the said lakes opposite to the shores thereof, and inland to the height of land which separates the territory covered by the charter of the Honourable Hudson's Bay Company from Canada; as well as all unconceded lands within the limits of Canada We-t to which they have any just claim."

The Lake Huren Chippewa were stated to number 1.422 including some 200 halfbreeds.

Both these treaties contained the precision that, if the territory should, at any time, produce an amount which would enable the Government of the Province, withour incurring loss, to increase the annuity, it would be augmainted, but it was not to exceed the sum of £1 cy, per head in any one year. Parsuant to this provision, the annuity has been increased to \$4.00 per augum.

Ch October 6, 1862, the Ott; wa shill Chipper a of Manitoulin Island signed the Manitoulin Island treaty. It recited that: the Indian title to the shid island was surrendered to the Crown, August 9, 1806, by vulue of a treaty between Sir Francis Bond Herel and the chiefs of the Ottawa and Chippers, then claiming title: that, but few mainland Indians had removed to the island, and that it was deemed expedient to assign to the Indians, certain portions and to sell the portions available for settlement.

The treaty covered the portion of Manitoulin island west of Heywood island and South bay, the Indians refusing to code the eastern portion. It stipulated that the Crown would grant each head of a family 100 acres, each single person over twenty-one, 50 acres: each family of orphan children under twenty-one, containing two or more persons, 100 acres: each single orphan 50 acres and, that interests from the investment of proceeds of land sales should be paid annually.

On August 3, 1871. Treaty Number One, or Stone Fort Treaty was concluded with the Chippewa and Swampy Crees (Maskegon) of Manitoba. In 1870, owing to the influx of settlers, the Indians had manifested much uneasiness. They repudiated the Selkirk Treaty and interfered with settlers and surveyors. Proclamations were issued inviting the Indians to meet the Indian Commissioner, Wemyss McDonald Simpson, and Lieut. Governor Archibald at the Stone Fort, Man., July 27. When the meeting opened, there were a thousand Indians and a considerable number of half-breeds.

2 GEORGE V., A. 1912

The treaty covered the tract described as follows:

"Beginning at the International boundary line near its junction with the Lake of the Woods, at a point due north from the centre of Roseau Lake: thence to run due north to the centre of Roseau Lake; thence northward to the centre of White Mouth Lake, otherwise called White Mud Lake: thence by the middle of the lake and the middle of the river issuing therefrom, to the mouth thereof in Winnipeg River; thence by the Winnipeg River to its mouth; thence westwardly, including all the islands near the south end of the lake. across the lake to the mouth of the Drunken River; thence westwardly, to a point on Lake Manitoba, half way between Oak Point and the mouth of Swan Creek; thence across Lake Manitoba, on a line due west to its western shore; thence in a straight line to the crossing of the Rapids on the Assiniboine; thence due south to the International boundary line; and thence easterly by the said line to the place of beginning.'

It provided for the reservation of tracts of land sufficient to furnish 160 acres of land to each family of five; a present of \$3 per head and payment of an annuity of \$3 per head.

On August 21, 1871, Number Two or Manitoba Post Treaty was concluded with Chippewa, of Manitoba. It ceded a tract described as follows:

"Beginning at the mouth of Winnipeg River, on the north line of the lands ceded by said treaty;* thence running along the eastern shore of Lake Winnipeg, northwardly as far as the mouth of Beren's River; thence across said lake to its western shore at the north bank of the mouth of the Little Saskatchewan or Dauphin River; thence up said stream and along the northern and western shores thereof, and of St. Martin's Lake, and along the north bank of the stream flowing into St. Martin's Lake from Lake Manitoba by the general course of such stream to such last-mentioned lake: thence by the eastern and northern shores of Lake Manitoba to the mouth of the Waterhen River; thence by the eastern and northern shores of said river up stream to the northernmost extremity of a small lake known as Waterhen lake;

thence in a line due west to and across Lake Winnipegosis; thence in a straight line to the most northerly waters forming the source of the Shell River; thence to a point west of the same, two miles distant from the river, measuring at right angles thereto; thence by a line parallel with the Shell River to its month and thence crossing the Assiniboine River and running parallel thereto and two miles distant therefrom, and to the westward thereof, to a point opposite Fort Ellice; thence in a south-westwardly course to the northwestern point of the Moose Mountains; thence by a line due south to the United States frontier; thence by the frontier eastwardly to the westward line of said tract ceded by treaty as aforesaid; thence bounded thereby by the west, northwest and north lines of said tract, to the place of beginning, at the mouth of Winnipeg River."

The terms respecting allotments of land, presents and annuities were same as Treaty Number One.

All the Indians included within the treaty limits, with one exception—the Portage band were summoned to the conferences and assented to the terms. The omission of the Portage band proved, later, a fruitful source of trouble. In 1870, they had warned off settlers and the Hudson's Bay Company had had to make terms with them for three years for the admission of settlers. In 1874, they endeavoured to prevent the conclusion of Treaty "Number Four" by sending a message that "the white man had not kept his promises." To obtain their adhesion to the treaty, (Number Two), the Commissioners gave them preferential treatment. In addition to the 160 acres per family of five, they conceded them "a further tract enclosing said reserve, to contain an equivalent to twenty-five square miles in breadth, to be laid out around the reserve." Under this clause they claimed nearly half the province of Manitoba. In 1876, an agreement was arrived at and, as the original band had divided into three, reserves were assigned to each.

When Treaties Number One and Number Two were made, certain verbal promises were made to the Indians but were not included in the treaty nor recognized by the Dominion Government. On April 30, 1875, an Order in Council was passed which authorized the distribution of the agricultural implements, etc.,

^{*}Treaty Number One,

promised by the Commissioners. It also authorized the increase of the annual payments from \$3 per head to \$5. This was accepted by the bands who were parties to Treaties Number One and Number Two.

The North-west Angle Treaty, or Number Three, was concluded October 3, 1873, with Saulteaux (Chippewa) of north western Ontario and of Manitoba. It extinguished the Indian title to the following tract:

"Commencing at a point on the Pigeon River route where the international boundary line between the Territories of Great Britain and the United States intersects the height of land separating the waters running to Lake Superior from those flowing to Lake Winnipeg; thence northerly, westerly and easterly along the height of land aforesaid, following its sinnosities, whatever their course may be, to the point at which the said height of land meets the summit of the watershed from which the streams flow to Lake Nepigon; thence northerly and westerly, or whatever may be its course, along the ridge separating the waters of the Nepigon and the Winnipeg to the height of land dividing the waters of the Albany and the Winnipeg; thence westerly and northwesterly along the height of land dividing the waters flowing to Hudson's Bay by the Albany or other rivers from those running to English River and the Winnipeg to a point on the said height of land bearing north forty-five degrees east from Fort Alexander, at the mouth of the Winnipeg; thence south forty-five degrees west to Fort Alexander, at the mouth of the Winnipeg; thence southerly along the eastern bank of the Winnipeg to the mouth of White Mouth River; then southerly by the line described as in that part forming the eastern boundary of the tract surrendered by the Chippewa and Swampy Cree tribes of Indians to Her Majesty on the third of August, one thousand eight hundred and seventy-one, namely, by White Mouth River to White Mouth Lake, and thence on a line having the general bearing of White Mouth River to the forty-ninth parallel of north latitude; thence by the forty-ninth parallel of north latitude to the Lake of the Woods, and from thence by the international boundary line to the place of beginning."

For the surrender of this tract, comprising about 55,000 sq. miles, the Dominion Government covenanted to reserve not more than one square mile for each family of five, "or in that proportion for larger or smaller families", to pay \$12 per head and an annuity of \$5 per head, each Chief to receive \$25 per annum and each subordinate officer, \$15 per annum.

The Qu'Appelle Treaty, or Number Four, was concluded September 15, 1874, at Fort Qu'Appelle with Cree, Saulteaux (Chippewa) and other Indians. They surrendered all their rights, titles and privileges in the following tract, and elsewhere:

"Commencing at a point on the United States frontier due south of the northwestern point of the Moose Mountains, thence due north to said point of said Mountains: thence in a north-easterly course to a point two miles due west of Fort Ellice; thence in a line parallel with and two miles westward from the Assiniboine River to the mouth of the Shell River: thence parallel to the said river and two miles distant therefrom to its source; thence in a straight line to a point on the western shore of Lake Winnipegosis, due west from the most northern extremity of Waterhen Lake: thence east to the centre of Lake Winnipegosis; thence northwardly, through the middle of the said lake (including Birch Island), to the mouth of Red Deer River; thence westwardly and south-westwardly along and including the said Red Deer River and its lakes, Red Deer and Etoimaini, to the source of its western branch: thence in a straight line to the source of the northern branch of the Qu'Appelle; thence along and including said stream to the forks near Long Lake; thence along and including the valley of the west branch of the Qu'Appelle to the South Saskatchewan; thence along and including said river to the mouth of Maple Creek;* thence southwardly along said creek to a point opposite the western extremity of the Cypress Hills; thence due south to the international boundary: thence east along said boundary to the place of commencement."

The terms respecting annuities, gratuities and reserves were same as in Treaty Number Three.

^{*}Now called Ross creek

In 1875, the Chippewa, Cree and Assimboin who had not been present at Qu'Appelle gave their adhesion to the treaty. In the same year, a treaty was concluded with the Fort Ellice Chippewa. They were within the bounds of Treaty Number Two but, owing to their distance from Manitoba House, had not been treated with when that treaty was made.

The Winnipeg Treaty, or Number Five, was signed September 20, 1875. It comprehends an area of approximately 100,000 sq. miles inhabited by Chippewa and Swampy Cree (Maskegon) of Manitoba and Ontario. The tract surrendered is defined as follows:

"Commencing at the north corner or junction of Treaties Numbers One and Three; thence easterly along the boundary of Treaty Number Three to the "Height of Land" at the north-east corner of the said treaty limits, a point dividing the waters of the Albany and Winnipeg Rivers; thence due north along the said "Height of Land" to a point intersected by the 53° of north latitude; and thence north-westerly to "Favourable Lake"; thence following the east shore of said lake to its northern limit; thence north-westerly to the north end of Lake Winnipegosis; thence westerly to the "Height of Land" called "Robinson's Portage"; thence north-westerly to the east end of "Cross Lake"; thence north-westerly* crossing "Foxes Lake"; thence, north-westerly to the north end of "Split Lake"; thence south-westerly to "Pipestone Lake", on "Burntwood River"; thence south-westerly to the western point of "John Scott's Lake"; thence south-westerly to the north shore of "Beaver Lake"; thence south-westerly to the west end of "Cumberland Lake"; thence due south to the "Saskatchewan River"; thence due south to the north-west corner of the northern limits of Treaty Number Four, including all territory within the said limits, and all islands on all lakes within the said limits, as above described; and it being also understood that in all cases where lakes form the treaty limits, ten miles from the shore of the lake should be included in the treaty."

The terms of the treaty were identical with those of Treaties Number Three and Number Four except that only 160 acres, and, in some cases, 100 acres, were granted to each family of five. The gratuity was only \$5 per head. It was agreed that \$500 annually, should be expended for ammunition and twine for nets.

In the years 1908, 1909 and 1910 adhesions were obtained to Treaty Number Five. The Indians north and east of lake Winnipeg, and at forts Churchill and York on Hudson bay, ceded 133,100 square miles as follows:

"All that portion of the North West Territories of Canada comprised within the following limits, that is to say: Commencing where the sixtieth parallel of. latitude intersects the water's edge of the West shore of Hudson Bay, thence West along the said parallel to the Northeast corner of the Province of Saskatchewan, thence south along the East boundary of the said Province to the Northerly lim't of the Indian treaty number Five, thence North Easterly, then South Easterly, then South Westerly and again South Easterly following the northerly limit of the said Tr atv number Five to the intersection of a line drawn from the North East corner of the Province of Manitoba, North Fiftyfive degrees East; thence on the said line produced fifty miles; thence North twenty-five degrees That one hundred and eighty miles more or less to a point situated due South of Cape Tatnam, thence due North ninety-eight miles more or less to the said Cape Tatnam; thence South Westerly and then Northerly following the water's edge of the West shore of Hudson Bay to the point of commencement, together with all the foreshores, and Islands adjacent to the said described tract of land, and containing approximately an area of one hundred and thirty-three thousand four hundred (133,400) square miles."

In August and September 1876, Treaty Number Six was signed at Carlton and at Fort Pitt with the Plain Cree (Paskwawininiwuk) the Wood Cree (Sakawithiniwuk) and 'Assiniboin of the Plains' of Saskatehewan and Alberta. It covered an area of 120,000 sq. miles comprised within the following limits:

"Commencing at the mouth of the river emptying into the north-west angle of Cumberland Lake; thence westerly up the said river to the source; thence on a straight line in a westerly direction to the head of Green Lake; thence northerly to

[&]quot;Should read "north-easterly."

the elbow in the Beaver River; thence down the said river northerly to a point twenty miles from the said elbow; thence in a westerly direction, keeping on a line generally parallel with the said Beaver River (above the elbow), and about twenty miles distant therefrom, to the source of the said river; thence northerly to the north-easterly point of the south shore of Red Deer Lake,* continuing westerly along the said shore to the western limit thereof; and thence due west to the Athabaska River; thence up the said river, against the stream, to the Jasper House, in the Rocky Mountains; thence on a course south-eastwardly, following the easterly range of the Mountains, to the source of the main branch of the Red Deer River; thence down the said river. with the stream, to the junction therewith of the outlet of the river, being the outlet of the Buffalo Lake; thence due east twenty miles; thence on a straight line south-eastwardly to the mouth of the said Red Deer River on the south branch of the Saskatchewan River: thence eastwardly and northwardly, following on the boundaries of the tracts conceded by the several Treaties numbered four and five to the place of beginning."

The Indians received reserves on the basis of 640 acres for a family of five. The treaty also provided for a gratuity of 812 each, a payment of \$5 each, annually, and certain expenditures for provisions, etc.

On the 11th February, 1889, an important adhesion was made to this Treaty redling 11,066 square miles as follows:

"Commencing at a point being the northwest corner of projected Township No. 70, Range 10, west of the Third Initial Meridian; thence easterly along the northern boundaries of projected Townships Nos. 70 to the north-east corner of projected Township No. 70, Range 13, west of the Second Initial Meridian; thence southerly following the east boundary of said 13th Range of projected Townships to the northern limits of Treaty No. 6 into the projected Township No. 60; thence westerly following the northerly limit of Treaty No. 6 to the south-eastern shore of Green Lake, being at the north-easterly part of projected Township No. 58, Range 10, west of the Third Initial Meridian; thence following the westerly shore of Green Lake to the main inlet thereof known as Beaver River; thence up the right bank of Beaver River to its intersection with the west boundary of projected Township No. 62, Range 10, west of the Third Initial Meridian; thence northerly following the west boundary of projected Townships of Range 10, west of the Third Initial Meridian, to the point of commencement."

The Blackfeet Treaty or Number Seven, was concluded September 22, 1877, with the Blackfeet (Siksika), Bloods (Kainah), Peigan, Sarsi and Stonies (Assiniboin) of Alberta. It covered an area of 35,000 sq. miles, bounded as follows:

"Commencing at a point on the International Boundary due south of the western extremity of the Cypress Hills; thence west along the said boundary to the central range of the Rocky Mountains or to the boundary of the Province of British Columbia; thence north-westerly along the said boundary to a point due west of the source of the main branch of the Red Deer River; thence south-westerly* and southerly following on the boundaries of the tracts ceded by the Treaties Numbered Six and Four to the place of commencement."

The conditions respecting reserves were allotted in more generous proportions, but the gratuities and annuities were same as Treaty Number Three.

In addition to the reserves segregated under the provisions of the foregoing treaties, reserves at Oak River and Birdtail Creek were set apart, in 1874, for a body of United States Sioux who had fied to Canada after the massacres of the whites in Minnesota in 1862. In 1876, another reserve was allotted to them, near Oak Lake, Man.

In June, July and August, 1899, Treaty Number Eight was concluded with the Indians occupying the territory south and west of Great Slave lake. The area covered by this surrender was defined as follows:

"Commencing at the source of the main branch of the Red Deer River in Alberta, thence due west to the central range of the Rocky Mountains, thence northwesterly

^{*}Lac la Biche

^{*}South-easterly.

along the said range to the point where it intersects the 60th parallel of north latitude, thence east along said parallel to the point where it intersects Hay River, thence northeasterly down said river to the south shore of Great Slave Lake, thence along the said shore northeasterly (and including such rights to the islands in said lakes as the Indians mentioned in the treaty may possess), and thence easterly and northeasterly along the south shores of Christic's Bay and McLeod's Bay to old Fort Reliance near the mouth of Lockhart's River. thence southeasterly in a straight line to and including Black Lake, thence southwesterly up the stream from Cree Lake, thence including said take southwesterly along the height-of-land between the Athabasea and Churchill Rivers to where it intersects the northern boundary of Treaty Six, and along the said boundary easterly, northerly and southwesterly, to the place of commencement."

The Dominion Government agreed to segregate reserves to the extent of 160 acres to each Indian; to pay gratuities of \$32 to each chief, \$22 to each headman and \$12 to every other Indian and annuities of \$25, \$15 and \$5, respectively. Reserves can be set apart in severalty which condition occurs in only one other Treaty, in Number Ten.

In 1899, 2,217 Indians gave their adhesion: in 1900, 1,106 Indians were admitted, making a total of 3,323. The Indian annuitants under this treaty are classified as follows: 1,161 Crees, 326 Beavers, 1,238 Chipewyans, 282 Slaves, 194 Yellow-knives and 122 Dogribs.

In July and August, 1905, and June, July and August, 1906, the James Bay Treaty, or Number Nine, was concluded with the Indians occupying the portion of Outario lying to the north of the height-of-land, south of Albany river and east of the limits of Treaty Number Three.

It extinguished the Indian title to the area described as follows:

"That portion or tract of land lying and being in the province of Ontario, bounded on the south by the height of land and the northern boundaries of the territory ceded by the Robinson-Superior Treaty of 1850, and the Robinson-Huron Treaty of 1850, and bounded on the east and north by the boundaries of the said province of Ontario as defined by law, and on the west by a part of the eastern boundary of the terri-

tory ceded by the Northwest Angle Treaty No. 3; the said land containing an area of ninety thousand square miles, more or less."

It provided for the segregation of reserves in the proportion of 160 acres for each family of five, a gratuity of \$8 each and an annuity of \$1 each.

An agreement made July 3, 1905, provides that the province of Ontario shall repay to the Dominion amounts disbursed under the provisions of this treaty, for gratuities and annuities.

Treaty Number Ten was concluded in August and September, 1906. It extinguished the Indian title in northern Alberta and northern Saskatchewan. The area included in this treaty is defined as follows:

"All that territory situated partly in the province of Saskatchewan and partly in the province of Alberta, and lying to the east of Treaty Eight and to the north of Treaties Five, Six and the addition to Treaty Six, containing approximately an area of eighty-five thousand eight hundred (85,800) square miles and which may be described as follows:—

Commencing at the point where the northern boundary of Treaty Five intersects the eastern boundary of the province of Saskatchewan; thence northerly along the said eastern boundary four hundred and ten miles, more or less, to the sixtieth parallel of latitude and northern boundary of the said province of Saskatchewan; thence west along the said parallel one hundred and thirty miles, more or less, to the eastern boundary of Treaty Eight; thence southerly and westerly following the said eastern boundary of Treaty Eight to its intersection with the northern boundary of Treaty Six; thence casterly along the said northern boundary of Treaty Six to its intersection with the western boundary of the addition to Treaty Six; thence northerly along the said western boundary to the northern boundary of the said addition; thence easterly along the said northern boundary to the eastern boundary of the said addition; thence southerly along the said eastern boundary to its intersection with the northern boundary of Treaty Six: thence easterly along the said northern boundary and the northern boundary of Treaty Five to the point of commencement."

The terms respecting reserves, gratuities and annuities were same as Treaty Number Eight.

In 1906, 312 Chipewyans and 82 Crees received gratuity and annuity moneys under Treaty Number Ten. In August, 1907, the Barren Land and Lac la Hache bands of Chipewyans gave their adhesions to the treaty. In the Barren Land band 232 were treated with and, in the Lac la Hache band, 97, making a total of 641 Chipewyans and 82 Crees under this treaty.

Among the North American Indians a tribe is a body of persons who are bound together by ties of consanguinity and affinity and by certain esoteric ideas or concepts derived from their philosophy concerning the genesis and preservation of the environing cosmos, and who, by means of these kinship ties, are thus socially, politically, and religiously organized through a variety of ritualistic, governmental, and other institutions, and who dwell together occupying a definite territorial area, and who speak a common language or dialect. From a great variety of circumstances -climatic, topographical, and alimental-the social, political, and religious institutions of the tribes of North American Indians differed in both kind and degree, and were not characterized by a like complexity of structure; but they did agree in the one fundamental principle that the organic units of the social fabric were based on kinship and its inter-relations, and not on territorial districts or geographical areas.

In order to constitute a more or less permanent body politic or tribe, a people must be in more or less continuous and close contact, and possess a more or less common mental content—a definite sum of knowledge, beliefs, and sentiments—which largely supplies the motives for their rites and for the establishment and development of their institutions, and must also exhibit mental endowments and characteristics, that are likewise felt to be common, whose functioning results in unity of purpose, in patriotism, and in what is called common sense.

The tribe formed a political and territorial unit, which, as has been indicated, was more or less permanently cohesive; its habitations were fixed, its dwellings were relatively permanent, its territorial boundaries were well established, and within this geographical district the people of the tribe represented by their chiefs and headmen assembled at stated times at a fixed place within their habitation

and constituted a court of law and justice. At the time the North American Indians were first brought within the view of history, they were segregated into organized bodies of persons, and wherever they assembled they constituted a state, for they united the personal and the geographical ideas in fact, if not in theory.

Various terms have been employed by discoverers, travellers, and historians to designate this political and territorial unity. French writers employed "canton," "tribu," and "nation"; English writers used "tribe," "canton," and "kingdom"; while others have used "pagus," "shire," and "gau," the territorial meaning of which is that of a section or division of a country, whereas the concept to be expressed is that of a country, an entire territorial unit. Because the word "tribe" in its European denotation signifies a political unit only, its use without a definition is also inaccurate. The jejune and colourless terms "band" and "local group" are often employed as adequately descriptive of an organized body of Indian people; but neither of these expressions in the majority of cases should be used except when, from the lack of definite ethnological information regarding the institutions of the people so designated, the employment of a more precise and descriptive term is precluded.

The effective power of the tribe for offence and defence was composed not only of the accumulated wealth of its members and the muscular strength, stamina, and experience of its quota of warriors, but also of the *orenda* (q. v.), or magic power, with which, it was assumed, its people, their weapons, and implements, and their arts and institutions, were endowed.

Some tribes constituted independent states while others through confederation with other tribes became organic units of a higher organization, retaining governmental control of purely local affairs only. Sometimes alliances between tribes were made to meet a passing emergency, but there was no attempt to coordinate structures of the social fabric in such manner as to secure permanency. Nevertheless in North America a number of complex, powerful, and well-planned confederations were established on universal principles of good government. Of this kind the League of the Five Tribes of the Iroquois in the closing decades of the 16th century was especially typical. This League was founded on the recognition and practice of six fundamentals: (1) the establishment and maintenance of public peace; (2) the security and health or welfare of the body; (3) the doing of justice or equity; (4) the advocacy and defence of the doing of justice; (5) the recognition of the authority of law, supported as it was by the body of warriors; and (6) the use and preservation of the orenda or magic power. The sum of the activities of these six principles in the public, foreign, and private life of these tribes so confederated resulted in the establishment and preservation of what in their tongue is called the Great Commonwealth.

In the history of the American Indian tribes, differences in culture are as frequent as coincidences. Different peoples have different ideas, different ideals, different methods of doing things, different modes of life, and of course different institutions in greatly different degrees and kinds. The course of the history of a people is not predetermined, and it is divergent from varying and variable conditions. Different results are consequent upon different departures. In some places tribal organizations are established on a clan or a gentile basis; in other regions a system of village communities was developed; and in still others pueblos or village communities were founded. From these different modes of life, influenced by varying environment and experiences, many new departures, resulting in unlike issues, were made. For the reason that the elementary group, the family, whence the other units are directly or mediately derived, is always preserved, coincidences are not infrequent. The term "family" here is taken in its broad sociological sense, which is quite different from the modern use of it as equivalent to fireside (see Family). In gentile and clan tribal organizations a family consists of the union of two persons, each from a different gens or clan, as the case might be, and their offspring, who, therefore, have certain rights in, and owe certain obligations to, the two clans or gentes thus united in marriage by the two parents.

In historical times, in the group of Iroquois peoples, the tribes consisted of from 3 to 12 or 14 clans, irrespective of population. For social, political, and religious purposes the clans of a tribe were invariably organized into two tribal portions or organic units, commonly denominated phratries, each of which units in council, in games, in ceremonial assemblies, or in any tribal gathering occupied around

the actual or assumed fire a place opposite to that held by the other phratry. In the placing of these clan groups the cult of the quarters is merely vestigial, having long ago lost its influence. In the great tribal gambling games between the units of the tribe (for phratry must at all times contend against phratry), the eastern side of the "plot" was regarded as insuring success; but at the present day the phratries alternate annually in occupying this auspicious quarter, although the phratry occupying this side is not at all times successful.

This dualism in the organization of the social, religious, and political units, next in importance to that of the tribe itself, is seemingly based on a concept derived from the primitive philosophy of the tribe regarding the procreation, reproduction, and maintenance of life on earth. The clans of a phratry, or association of clans, called one another "brothers," and the clans of the opposite phratry "cousins" or "offspring." In the elder period the phratry-the organic unit next to the tribe—was an incest group to the members of it, and consequently marriage was prohibited within it, hence the phratry was exogamous. But owing to the many displacements of the tribes by the advance of Caucasians this regulation in regard to the phratry has fallen into disuse, so that at the present time the clan alone is in the exogamous group, just as the gens is the only exogamous group in those tribes in which gentile organizations prevail and gentile brotherhoods were formerly in There were, however, never any phratriarchs as such. The chiefs and other officers of the several clans acted as the directors and rulers of the two phratries, whose acts, to have tribal force and authority, must have had the approval of both phratries acting conjointly through their recognized representatives. Neither phratry could act for the tribe as a whole. The members of a phratry owed certain duties and obligations to the members of the opposite one; and these obligations were based not only on considerations of consanguinity and affinity but also on esoteric concepts as well. The reason for the last expression will be found to be cosmical and will be emphasized later.

Selecting the Iroquois tribes as fairly typical of those in which the clan organization had reached its highest development, it is found that in such a tribe citizenship consisted in being by birth or adoption a member of a clan, and membership by birth in a clan

was traced only through the mother and her female ancestors; hence it was solely through the mother that the clan was preserved and kept distinct from every other. But although the child acquired his birth-rights only through his mother, singularly enough it was through the father that his or her kinship was extended beyond his own into that of his father's clan. which owed to the offspring of its sons certain important obligations, which bound these two clans together not only by marriage but by the stronger tie of a recognized kinship. By this process the clans of the tribe were bound together into a tribal unity. By the organization of the clans of the tribe into two exogamic groups, the possible number of clans between which the said mutual rights, privileges, and duties of fatherhood might subsist were in most cases reduced by about half; but this reduction was not the object of this dualism in tribal structure. The wise men of the early Iroquois, having enclowed the bodies and elements of their environment and the fictions of their brains with human attributes, regarded these bodies and phenomena as anthropic beings, and so they imputed to them even social relations, such as kinship and affinity, and not the least of these imputed endowments was that of sex-the principles of fatherhood and motherhood. These beings were therefore apportioned in relative numbers to the two sexes. Even the Upper and the Lower and the Four Quarters were regarded as anthropic beings. They, too, were male and female; the Sky was male and a father; and the Earth was female and a mother; the Sun their elder brother, was male, and the Moon. their grandmother, was female. And as this dual principle precedent to procreation was apparently everywhere present, it was deemed the part of wisdom, it would seem, to incorporate this dual principle by symbolism into the tribal structure, which was of course devised to secure not only welfare to its members living and those yet unborn, but also to effect the perpetuation of the tribe by fostering the begetting of offspring. If, then, a clan or a gens or a phratry of clans or gentes came to represent symbolically a single sex, it would consequently be regarded as unnatural or abnormal to permit marriage between members of such a symbolic group, and so prohibition of such marriage would naturally follow as a taboo, the breaking of which was sacrilegious. This would in time develop into the inhibition of marriage commonly called exogamy as a protest against unnatural and incestuous sex relations. The union of man and woman in marriage for the perpetuation of the race was but a combination in the concrete of the two great reproductive principles pervading all nature, the male and the female—the father and the mother. It would seem, then, that exogamy is not an inhibition arising from any influence of the clan or gentile tutelary, as some hold, but is rather the result of the expression or the typifying of the male and the female principles in nature—the dualism of the fatherhood and the motherhood of nature expressed in the social fabric.

In pursuing the study of this dualism in organic tribal structure it is important to note the appellations applied by the Iroquois to these two esoteric divisions.

When the Five Tribes, or the Five Nations. as they were sometimes called, united in the formation of their famous League of the Iroquois, this dualistic concept was carefully incorporated into the structure of the organic federal law. The Mohawk, the Onondaga, and the Seneca were organized into a phratry of three tribes, ceremonially called the "Father's Brothers," while the Oneida and the Cavuga were organized into a phratry of two tribes, ceremonially called "My Offspring," or the plmatry of the "Mother's Sisters." These esoteric designations are echoed and re-echoed in the long and interesting chants of the Condolence Council, whose functions are constructive and preservative of the unity of the League, and of course adversative to the destructive activity of death in its myriad forms.

It is equally important and interesting to note the fact that the name for "father" in the tongues of the Iroquois is the term which in the cognate Tuscarora dialect signifies 'male,' but not 'father,' without a characteristic dialectic change. It is thus shown that fundamentally the concepts "father" and "male" are identical.

In the autumn at the Green Corn Dance, and in the second month after the winter solstice at the extensive New Year ceremonies, the chiefs and the elders in each phratry receive from those of the other the enigmatic details of dreams dreamed by fasting children, to be interpreted by them in order to ascertain the personal tutelary (? totem, q. v.) of the dreamer. And in the earlier time, because the procreation of life and the preservation of it must originate with the paternal clan or

association of clans, the members of such a elan should in reasonable time replace a person killed or captured by enemies in the clan of their offspring. The paternal clan and the phratry to which it belonged was called, with reference to a third person, hondonnis' hen', i. e. 'his father's brothers (and kindred).' Since the clan, and therefore the tribe of which it is a component part, is supported by the numbers of those who compose it, whether men or women (for its power and wealth lie chiefly in the numbers of its constituents), it followed that the loss of a single person was a great one and one that it was necessary to restore by replacing the lacking person by one or many according to the esteem and the standing in which he was held. This peculiar duty and obligation of the members of the paternal clans to their offspring in the other claus is still typified among the modern Tuscarora and other Iroquois tribes on the first day of the new year. On this day it is customary to make calls of congratulation and for the purpose of receiving a present, usually some article of food, such as small cakes, doughnuts, apples, pieces of pie, etc. But every person on entering the house of a clansman of his or her father may demand, in addition to the ordinary presents provided, "a baby," using for this purpose the ordinary term for a baby, owi'rā'ā'. To comply with these apprehended demands, the thrifty housewife, to aid her good man in fulfilling his obligations, usually has prepared in advance a goodly number of small mummy-like figures of pastry, S or 10 inches in length, to represent symbolically the "babies" demanded.

So it would seem that marriage, to be fruitful, must be contracted between members of the male and female parts of the tribal unity. In primitive thought, kinship, expressed in terms of agnatic and enatic kinship, of consanguinity and affinity, was the one basis recognized in the structure of the social organization. At first all social relations and political and religious affiliations were founded on ties of blood kinship of varying degrees of closeness; but later, where such actual blood kinship was wanting, it was assumed by legal fictions. Within the family as well as outside of it the individual was governed by obligations based primarily on kinship of blood and on certain fundamental cosmical concepts consonant therewith.

* × × * * * *

According to Boas there are remarkable differences in the complex social organizations of the tribes of the N. W. eoast. Of these the Haida and the Tlingit, both having maternal descent, are each composed of two exogamous organic and organized balves or units, which among the Tlingit are called the Raven and the Wolf, respectively, while among the Haida they are known by the names Eagle and Rayen. The sociology of these two tribes, while approximating in general structure that of the Tsimshian, having likewise a definite maternal organization, is less complex, for among the latter there are apparently four exogamous associations with subdivisions or sub-clans. Before any satisfactory knowledge of the tribal structure and its functions can be obtained, it is necessary to possess in addition to the foregoing general statements a detailed and systemized knowledge of the technique by which these several organic units, singly and jointly, transact the affairs of the tribe. This kind of information is still in large measure lacking for a great proportion of the North American Indian tribes. Among the Kwakiutl, Boas found a peculiar social organization which closer study may satisfactorily explain. Among the northern Kwakiutl tribes there are a number of exogamie clans in which descent is traced preferably in the maternal line, but in certain cases a child may be counted as a member of his father's elan. Yet, Boas adds, "By a peculiar arrangement, however, descent is so regulated, that it proceeds in the maternal line."

In speaking of the widely prevalent dualism in the highest organie units of the tribal structure, especially with reference to these tribes of the N. W., Boas remarks: "Since the two-fold division of a whole tribe into exogamic groups is a phenomenon of very wide occurrence, it is fruitless to speculate on its origin in this special ease, but it is worth while to point out that Dr. Swanton in his investigations among the Haida was led to the conclusion that possibly the Eagle group may represent a foreign element in the tribe," and states what but few others appear to see: that the crest system ("totemism") on the Pacific coast is not necessarily connected with this peculiar division of the tribe. But it has already been herein indicated in what manner this dualism has been made a feature in the social structure of at least two linguistic stocks, and that the reasons there advanced

may be tentatively accepted as at least a probable explanation of such divisions in other tribes having analogous social institutions, unless it can be shown with greater reason to be due to some other equally potent cause.

Among the Salish, the clan and the gentile forms of social structure do not occur. In this respect the littoral Salish differ materially from those of the interior. Among the latter, according to Hill-Tout, the social fabric is so simple and loose, that it "borders closely upon anarchy," while among the former it is eomparatively complex, and the commune is divided into "a number of hard and fast elasses or eastes," three in number, exclusive of the slave class. Boas, writing in 1905 of the Salish tribes of the interior of British Columbia, says that in the "very loose" social organization of these people, if such it may be called, no tribal unit is recognized; that there are no exogamic groups; and no hereditary nobility was found, personal distinction being acquired chiefly by wealth and wisdom. While the exigencies of the food quest compelled these Indians to change their habitations from season to season, their permanent villages were situated in the river valleys. There are according to this author frequent and considerable fluctuations in the population of the villages, but it does not appear that these changes result in a diminution of the tribal population. It appears that deer-fences and fishing-places were the property of certain persons and families, and moreover that the hunting territory was regarded as the common property of the whole tribe. From the prominence given to the "family" in marriage observances, in burial customs, and in property rights, it is possible that further investigation will reveal a much more complex and cohesive organization than is now known to exist.

According to Chamberlain the social structure of the Kutenai is remarkably simple, being in strong contrast to the social systems of great complexity found elsewhere in British Columbia and on the N. W. coast. There is, no evidence that the Kutenai have or ever had clan or gentile institutions or secret societies. Each tribal or local community had a chief whose office was hereditary, although the people always had the right to select some other member of the family when for any cause it was needful so to do. The power and authority of the chief was limited by the advice and action of the Council. Formerly, a chief was elected to direct the

great hunting expeditions. The population of the tribe was supported by the adoption of aliens by residence and by marriage. Descent was probably traced through the mother, and marriage of first cousins was strictly forbidden. These apparently tentative statements of Chamberlain indicate that the tribe was held together by the ties of consanguinity and affinity.

Trotsikkutchin ('people of the fork of the river'). A Kutchin tribe on Yukon and Stewart rs., Yukon territory, extending up the latter stream to the mouth of Beaver r. where they meet the Esbataottine, to whom they are hostile. They are said to spear salmon in the shoals of the Yukon. Ross described their songs as more musical than those of any other northern Indians.

Rampart Indians .- Ross, notes on Tinne, B. A E Tathzev-kutchi,-Richardson, Arct. Exped. 1, 395 1851 ('rampart people'). Tathzey-kutshi.—Lathan., Nat. Races Russ. Tsaeqalalis (*Tsāēqālalis*). The name of an ancestor of a Koskimo gens; also applied to the gens itself.—Boas in Petermanns Mitteil., pt. 5, 131, 1887.

Tsaganha. An Iroquoian term, having here the phonetics of the Onondaga dialect. and freely rendered, 'One utters unintelligible speech,' and so approximately synonymous with 'alien,' 'foreigner.' Its literal meaning is 'one rolls (or purls) one's mouth (speech ... This term was applied to the several Algoriquian tribes dwelling E. and s. of the Iroquois in widely separated localities; the Hurons applied the name to the "Canadiens" of 1626. i.e. the Algonquians dwelling on the lower St. Lawrence. It was applied indiscriminately to the Abnaki, Mohegan, Mahican, Delawares. Munsee, Stockbridges, Brothertons, and generally to all the New England and contiguous southern Algonquian tribes. (J. N. B. H.)

Agotsaganens.—Jogues (1643) in Jes. Rel , Thwaites ed , xxviii, 113, 1898. Agotsaganes.—Clark quoted

A body of Tsahwitook (Tsah-wit-ook). Salish of Victoria superintendency, Brit. Col.: pop. 71 in 1882, the last time the name ap-

Tsaiiyeuk : Tsai'-ī-yc-uk+. A village of the Kucha sept of the Lekwiltok at the entrance of Bute inlet, Brit, Col.—Dawson in Trans. Roy. Soc. Can. 1887, sec. 11, 65, 1888.

Tsaite ($Tsai-t\bar{\epsilon}$). An ancient village on the w. end of Harbledown id., Brit. Col.—Dawson in Can. Geol. Surv., map. 1887.

Tsaktsakoath (Tsa'k'tsak'oath). A sept of the Toquart, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes Can., 32, 1890.

Tsakuam (Ts'ākuā'm). A Cowiehan tribe living in the town of Shilekuatl, at Yale, on Fraser r., Brit. Col. (Boas in Rep. Brit. A.A.S., 454, 1894). The Indian population of Yale in 1911 was 76.

Tsakwalooin. A village of the Wiwekae, near cape Mudge, Brit. Col.

Euclitus .- Downie in Jour. Roy. Geog. Soc., xxxi. 249, 1861. Tsa-kwa-loo'-In. - Dawson in Trans. Roy, See Can, see. II, 65, 1887. Uculta.-Ibid.

Tsantieottine ('people of the excrement lake'ı. A clan or division of the Thlingehadinne dwelling on La Martre lake and r. Mackenzie dist., N. W. T.

Tsan-t'iè-ottine.-Petitot in Bull. Soc. Geog Paris, chart, 1875. Tsan-t/ié- ottiné.-Petitot, Autour du Lac des Esclaves, 363, 1891. Tson-t-ié- ottiné .-Ibid, 303. Western Dog-riboed Indians .- Hearne, Jour, to N. Ocean, 262, 1795.

Tsartlip. A body of Sanetch on the s. E. end of Vancouver id.; pop. 73 in 1911. Tsartlip.-Can. Ind. Aff. 1904, pt. ii, 69, 1905.

Tsattine ('dwellers among the beavers').

An Athapascan tribe belonging to the Sekan group, who roam over the wide prairies s. of

Peace r. and E. of the Rocky mts. Mackenzie spoke of them as one of the small tribes of Rocky Mountain Indians living in the Chipewyan country and speaking their language (Mass. Hist. Soc. Coll., 2d s., 11, 42, 1814). On his map he locates them between Peace r. and Liard r., and says their name is derived from that of an affluent of the latter. It was, however, Peace r. that they called Tsades, 'the river of beavers' (Petitot, La Mer Glaciale, 292, 1887), and was the source of the supply of beaver furs early in the 19th century. Ross (MS., B. A. E.) said in 1858, that they resided in the country along Peace r. from below Ft. Vermilion to the Rocky mts., roaming as far as the upper Hay r. on one side and Lesser Slave lake on the other. Gibbs (MS., B.A.E.) located them w. of lake Athabaska, on Peace r. Hind (Labrador Penin., II, 261, 1863) said that they resorted to Fts. Vermilion and Dunvegan. Petitot (Dict. Dènè-Dindjié, xx, 1876) said that they hunted along Peace r, and that they formerly included the Sarsi. Dawson (Rep. Geol. Surv. Can., 1879-80, 51, 1881) gave their territory as along Peace r. N. to Battle r., E. to Simonette r. to the fork of Smoky r., and w. to the Mountain of Rocks portage on Peace r., where they mingled with the Sekani. Morice (Trans. Can. Inst., 113, 1889) placed them in his Eastern Déné division of the Athapascan, following the classification of Ross and Gibbs, and gave their habitat as along Peace r., trading at Hudsons Hope and Ft. St. John. In 1890 he stated that they inhabited both sides of Peace r. from Hudsons Hope to Ft. Dunvegan. They are bolder and braver than their neighbours on the x, and superior in most ways to the Chipewyan, whom they much resemble in features, customs, and moral character. Their dialect is softer than that of the other Tinne tribes, it having been modified by their intercourse with the Cree. Possessing horses and subsisting principally on the products of the chase, they are more nomadic than the other mountain tribes. They are good workers in iron and make neat spurs and crooked knives out of worn-out files. In 1858 Ross found 35 of the tribe at Ft. Resolution, on Great Slave lake. In 1889 Morice gave their supposed population for the entire tribe as 800, in 1906 as 700.

Beaver.-Mackenzie, Voy., II, 81, 1802. Beaver Hunters.-De Smet, Oregon Miss., 164, 1847. Beavers. —Morice in Anthropos, 1, 272, 1906. Castors.—Petitot. Diet. Dênê-Dindjiê, xx, 1876. Copper.-Keane in

Tschantoga ('people of the woods,' from chan, 'tree'). A division of the Assiniboin, which Dobbs (Hudson Bay, 35, map. 1744) placed a considerable distance N. w. of lake Winnipeg. De Smet (Oregon Miss., 150, 1847) said that they did not number more than 50 lodges, divided into several bands, and were seldom seen on the plains, but "travel over the mountains and through the

woods, over the different forks and branches of the sources of the Sascatshawin and Athabaska." Jefferys in 1741 placed them n.w. of lake Winnipeg, and in 1776, in lat. 55°. Their usual habitat at that time was not far from Saskatchewan r. They are probably the same as the Strongwood Assiniboin, who, in 1808, were on Battle r. and between it and the South Saskatchewan, according to Henry (Coues. Henry-Thompson Jour., II, 522, 1897). They ranged as far s. as Little Missouri r., if identical with the Oseegah of Lewis and Clark (Discov., 13, 1806) and the Waziah that Hayden found in United States territory, though they traded at the Hudson's Bay Co.'s posts on Assiniboine r. Denig said that the Waziah whom he niet in Dakota, 60 lodges under chief Le Robe de Veut, came from the N. in 1839. According to Hayden they numbered 120 to 200 persons in 1862. Lewis (Starist, View, 1817) said there were between Little Missouri and Assiniboine rs. 100 lodges, 250 warriors, and a total population of 880. Under the official designation "Stonies" they now occupy a reserve of 69,720 acres divided by Bow r., in the foothills of the Rocky mis, about 40 m. w. of Calgary, Alberta. They are described as of pleasant visage, active and fleet of foot, and the most energetic of all the tribes of the Canadian N.W. They gain a livelihood by stock raising. by selling timber, furs, and beadwork, and by labouring for ranchmen. A mission was established among them in 1873, and, in 1904, the McDougall boarding school at Morley accommodated 48 children. Pop. 665 in 1911. Cî. Chabin, or Gens des Montagnes, of Maximililan.

Ts'ē'okulmiX.—Boas in Rep. Nat. Mus 1895, 328, 1897. Ts'ē'uitx.—Ibid.

Tseoomkas. The principal village of the Klaskino, on Klaskino inlet, N. w. coast of Vancouver id., Brit. Col.

Tsē-oom'-kas.—Dawson in Trans. Roy. Soc. Can. 1887, sec. 11, 65, 1888.

Tseottine ('people of the bark canoes'). A clan or division of the Thlingchadinne living along the s. shore of Great Bear lake, Mackenzie dist., N. W. T. The dog is their totem. Ttsé-ottiné.—Petitot, Dict. Dènè-Dindjié, xx, 1876. Ttsè-/ottinè.—Petitot, Autour du Lac des Esclaves, 363, 1891.

Tseshaath (Ts'ēcā'ath, 'Seshart proper'). A sept of the Seshart, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes Can., 32, 1890.

Tsetautkenne ('people against the rocks'). A division of the Sekani, residing about the E. base of the Rocky mts., N. of Peace r., chiefly around Ft. St. John. Brit. Col.

Cheta-ut-tinné.—Richardson, Arct. Exped., r. 180, 1851. 'Dtcheta-ta-ut-tunne.—Bid. Tse-ta-hwo-tqenne.—Morice, letter, B. A. E., 1890. Tsé'-ta-ut'qenne.—Morice in Trans. Can. Inst. 1893, 29, 1895.

Tsetsaa (Tsē'tsaa). A gens of the Koskimo, a Kwakiutl tribe.—Boas in Rep. U. S. Nat. Mus. 1895, 329, 1897.

Tsetsaut $(Ts'Ets'\tilde{a}'ut, 'people of the in$ terior': Niska name). An Athapascan band long settled among the Niska on Portland canal, Alaska, reduced in 1895 to 12 individuals. They are a branch of the western Nahane speaking a dialect similar to the Tahltan. This territory extended from Chunah r. to Observatory inlet and northward to the watershed of Iskut r. About 1830 they numbered 500, but were practically exterminated by continued attacks of their kinsmen, the Lakweip, and of the Tlingit. They once lived on Behm channel, and were friendly with the Sanya until these determined to kill them and enslave their women and children, whereupon they migrated to Portland channel and, when reduced in numbers, fell under the control of the Niska. See Boas in 10th Rep. N. W. Tribes Can., 34, 1895, and in Jour. Am. Folklore, ix, No. 4, 1896; x, No. 1, 1897.

Bear lake, is at the head of the Skeena river. 'Plain' should, probably, read 'valley'

Tsetsetloalakemae (*Tsētsē Loā'laq Emaē*, 'the famons ones'). A gens of the Nimkish, a Kwakiutl tribe.—Boas in Rep. U. S. Nat. Mus. 1895, 331, 1897.

Tsilkotin ('people of young-man's river'). An Athapascan tribe of British Columbia, occupying, a territory lying chiefly in the valley of Chilcotin r. at about lat. 52°. Their nearest relatives are the Takulli, or Carriers, whose territory is adjacent on the N., and who are the only Athapascan people with whom they come in contact. Toward the w. a pass leads through the Coast range to Bellacoola, and intercourse with the tribe of that name, which was formerly frequent (see Nakuntlun), is still kept up to some extent. In early days there was also some communication with the Kwakiutl of Knight inlet on the s. w. the E. the Tsilkotin are separated from the Shuswap by Fraser r., and do not hold very intimate relations with that people. In earlier times the two tribes were constantly at war, the Tsilkotin invading their country and penetrating as far as Similkameen valley, whose inhabitants are descended from the invaders, who compelled the Salish to make peace and permit intermarriage. Even to-day there is a decided undercurrent of suspicion between the Tsilkotin and the Shuswap. Toward the s. their nearest neighbours are the Lillooet, but contact between the two tribes is slight. In former times and down to within about 40 years, the centre of the territory and population of the Tsilkotin was Anahim lake; and, from here, they covered a considerable extent of country, the principal points of gathering being Tatlah, Puntzee. They ranged as far s. and Chizikut lakes. as Chilko lake, and at the time of salmon fishing were accustomed to move in large numbers down to Chilcotin r., to a point near the present Anahim res., always returning to their homes as soon as the season was past. More recently they have been brought to the eastward, and to-day the chief centres of the tribe are three reservations in the valley of the Chilcotin—Anahim, Stone, Riske Creek and the Carrier res. at Alexandria, on Fraser r., where a few Tsilkotin families reside (see Stella). Besides these there are a number of families leading a semi-nomadic life in the old tribal territory, in the woods and mountains to the westward. These latter Indians, considerably less influenced by civilization than their reservation relatives, are known by the

whites as "Stone Chilcotin," or "Stonies." Although subjected to intercourse with the whites for a comparatively short period, the Tsilkotin have assimilated the customs and ideas of their civilized neighbours to such an extent that their own have largely disappeared, except among the families still living in the The sedentary Tsilkotin, who mountains. have abandoned semi-subterranean huts and live like their white neighbours in log houses covered with mud, now cultivate cereals, peas, and potatoes, and are reported to be moral, temperate and religious. These Morice divides into the Tleskotin, Tlathenkotin, and Toosey. Their population was estimated at 450 in 1906. For their mythology, see Farrand in Mem. Am. Mus. Nat. Hist., Anthr. III, No. 1, 1900. (L. F.)

Tsimshian ('people of Skeena r.') most important of the three main divisions of the Chimmesyan linguistic family, and that which gives it its name. In the strictest sense it designates the following closely related tribes or divisions living between Nass and Skeena rs., N. Brit. Col.; Kilutsai, Kinagingeeg, Kinuhtoiah, Kishpachlaots, Kitlani, Kitsalthlal, Kitunto, Kitwilgioks, Kitwilksheba, and Kit-To these are sometimes added the Kitsalas and Kitsumgallum, who live farther up Skeena r., near the cañon, but speak the same dialect. The appellation has also been extended to cover all other tribes speaking this dialect, viz. the Kitkahta, Kitkatla, and Kittizoo, who live on the islands southward. The divisional names given are also names of the ancient towns. To these may be added the following modern towns: New Kitsalas, Metlakatla (New and Old), Port Essington, and Port Simpson. Pop. in 1911 (including 465 enumerated in Dunean's colony, Alaska, 1900), 1,944.

2 GEORGE V., A. 1912

The name for this division has been so often extended to include other branches of it that some of the synonyms may have a similar extension.

Tsiniksistsoyiks (*Tsin.-ik-sis'-tso-yiks*, 'early finished eating'). A band of the Piegan tribe of the Siksika, as well as of the Siksika proper. Early Finished Eating.—Grinnell, Plackfoot Lodge Tales, 225, 1892. Tsin-ik-sis-tso-yiks.—Ibid, 209.

Tsiomhau (Ts'iomxau'. A Wikeno village on Rivers inlet, Brit. Col.—Boas in Petermanns Mitteil., pt. 5, 130, 1887.

Tsisli. A village of the Tatshiautin at the mouth of Tatla r., Brit. Col., connected with Tsisthainli.—Can. Ind. Aff., 213, 1902.

Tsisthainli. A Tatshiautin village on lac Trembleur, Brit. Col.; pop. 13 in 1902, 28 in 1911.

Tsistiks (Tsĭ-stīks', 'little birds'). A society of the Ikunuhkahtsi, or All Comrades, in the Piegan tribe of the Siksika. It includes boys from 15 to 20 years of age.—Grinnell Blackfoot Lodge Tales, 221, 1892.

Tsitoklinoton. A part of the Hankutchin living near the mouth of Forty-mile cr., on Yukon r., Yukon.

Tcn-Kutchi.—Richardson, Arctic Exped, n. 397, 1851 ('people of the water'). Tshu-Kutshi.—Latham in Frans. Philol. Soc. Lond, 67, 1856. Tslt-o-klinotin.—Dawson in Rep. Geol. Surv. Can., 1888, 2028, 1889.

Tsitsi. A former village of the Ntshaautin of British Columbia.—Morice in Trans. Can. Inst., iv. 25, 1895.

Tsitsimelekala (Tsītsimē'lEqala, 'the Tsimē'lEqalas'). A gens of the Nakoaktok, a Kwakiutl tribe.—Boas in Rep. Nat. Mus. 1895, 329, 1897.

Tsitualaqumae (Tsitualaqumāe). The name of an ancestor of a Tlauitsis gens; also sometimes given to the gens itself.—Boas in Petermanns Mitteil., pt. 5, 130, 1887.

Tskoakkane ($Tsxoaxq\bar{a}'n\bar{e}$). A Bellacoola village on Bellacoola r., Brit. Col., above Nukaakmats.

Tsqoaqk'ā'nē.—Boas in 7th Rep. N. W. Tribes Can., 3, 1891 — Tsxoaxqā'nē.—Boas in Mem. Am. Mus. Nat. Hist., n., 49, 1898.

Tsomootl (Tsomō'oL). A Bellacoola village on Bellacoola r., Brit. Col., above Senktl.—Boas in Mem. Am. Mus. Nat. Hist., 11, 49, 1898

Tsomosath $(Ts\bar{o}'m\bar{o}s'ath)$. A sept of the Opitchesaht, a Nootka tribe.

Somass.—Mayne, Brit. Col., 167, 1862. Tsomass.— Ibid., 251. Tsō'mōs'ath.—Boas in 6th Rep. N. W. Tribes Can., 32, 1890.

Tsonai (Tsō'nai). A Seechelt sept which formerly lived at Deserted bay, the junction of Queens reach and Princess Royal reach, Jervis inlet, Brit, Col.—The founder is said to have come from Ft. Rupert.—Hill-Tout in Jour. Anthr. Inst., 21, 1904.

Tsooquahna. A Nitinat village on the s.w. coast of Vancouver id., about 1 m. w. of the outlet of Nitinat lagoon; pop. 20 in 1902.

Tsuquanah.—Can. Ind. Aff , suppl., 81, 1902.

Tsoowahlie. A Chilliwak town on Sagwalie res. near Fraser r., Brit. Col.; pop. 49 in 1911.

Snowahlle.—Can. Ind. Aff., pt. n, 75, 1904. Sowhy-lie.—Ibid., 78, 1878. Sñwā'lē.—Hill-Tont in Rep. N. W. Tribes Can., 4, 1902. To-y-lee.—Can. Ind. Aff., 317, 1880. To-ylee.—Ibid., 188, 1884. Tsoowahlle.—Ibid., pt. n, 160, 1901. Ts'uwä'lē.—Boas in Rep. 64th Meeting Brit. A. A. S., 454, 1894.

Tsotaee (Tso-tä'-ee, 'stick-cutter,' i. e. 'beaver'). A clan of the Hurons or Wyandot.—Morgan, Anc. Soc., 153, 1878.

Tsotsena (Ts'ō'/s'ēna, 'thunder-birds'). A gens of the Awaitlala, a Kwakintl tribe.—Boas in Rep. Nat. Mus. 1895, 331, 1897.

Tsulus ('open' or 'open flat'). A village of the Nicola band of Ntlakyapamuk near Nicola r., about 40 m. above Spence Bridge, Brit, Col.

Cūlū'c.—Hill-Tout in Rep. Ethnol Surv. Can, 4, 1899. Sulu's.—Teit in Mem. Ann. Mus. Nat. Hist, 11, 174, 1900. Tshoo-loos'.—Dawsen in Trans. Roy. Soc. Can, sec. 11, 44, 1891. Tsulu's.—Teit. op. cit.

Tsutsiola (Tson-tsī-ola). A Quatsino village on the E. side of the mouth of Forward inlet, w. coast of Vancouver id.—Dawson in Can. Geol. Surv., map, 1887.

Tsuzel (Tsuzel, 'palisaded enclosure containing houses'). A Ntlakyapamuk village on Fraser r., Brit. Col., above Lytton.—Hill-Tout in Rep. Ethnol. Surv. Can., 4, 1899.

Tuakdjuak. An Okomiut Eskimo summer settlement of the Saumingmiut subtribe on Cumberland penin., Batfin island.

Touagdjuag. -Boas in 6th Rep. B. A. E., map, 1888.

Tuarpukdjuak. A winter village of the Nugumiut Eskimo in Countess of Warwick sd., Baffin island.

Tuarpukdjuaq.—Boas in 6th Rep. B. A. E., 422, 1888. Twerpukjua.—Hall, Aret. Researches, 268, 1865.

Tuhezep (Tuxeze'p, shortened form of xuxe'ep sharp ground or place for pitching lodges, so called from small sharp stones around there.—Teit). A Ntlskyapamuk village on the E. side of Fraser r., about a mile above Lytton, Brit. Col.

Taynsap.—Can. Ind. Aff., 79, 1878. Tûxezê'p.—Teit in Mem. Am. Mus. Nat. Hist., 11, 172, 1990.

Tuiskistiks (Tūis-kīs'-tīks, 'mosquitos'). A society of the Ikunuhkahtsi, or All Comrades, in the Piegan tribe of the Siksika. It is composed of men who were constantly going to war.—Grinnell, Blackfoot Lodge Tales, 221, 1892.

Tukkuthkutchin ('squint-eyed people'). A Kutchin tribe at the head of Porcupine r., occupying the territory between the headwaters of the Porcupine r. and Ft. McPherson, in N. E. Yukon ter. and N. W. Mackenzie dist. Their eyes are frequently small and oblique, hence their name. Asthoug Ibarbarous, they are more intelligent than other tribes. They are

a commercial people, living by barter. Though good hunters, rarely lacking food, they do not hunt furs, but exchange their beads, which form the circulating medium, for the peltry of the neighbouring tribes. They are foud of oratorial display, and in their harangues the voice of the speaker gradually rises, becoming a screech at the climax. They subsist at all seasons almost exclusively on earibou, which they hunt on the mountains. Formerly they were numerous, but by 1866 they had become reduced to 15 hunters or 40 men. Dawson (Rep. Geol. Surv. Can. 1888, 206B, 1889) gave the number of inhabitants of Peel r. and La Pierre House, the Tatlitkutchin and Tukkuthkutchin together, as 337, consisting of 185 Morice estimated males and 152 females. their number at 150 in 1906.

Tuladi. See Touladi.

Tulibee. A species of whitefish (Coregonus tullibee) of the Great lakes and the waters of the Canadian Northwest, the mongrel whitefish. The Canadian-French form of the word, which came into English as tulibee, or tullibee, from N. w. Canada, is toulibi, representing the otonabi of the Cree-Chippewa dialects of Algonquian, with the well-known interchange of n and l and the dropping of the first syllable. The word signifies literally 'mouth water,' from oton, 'its mouth,' and abi, 'water,' 'liquid,' referring to the watery flesh of this fish.

(A. F. C.)

Tumkoaakyas (Tumqoā'akyas). A Bellacoola gens at Talio, Brit. Col.—Boas in 7th Rep. N. W. Tribes Can., 3, 1891.

Tumtls ('paint'). A Squawmish village on the E. side of Howe sd., Brit. Col.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Tununirmiut ('people of the back country'). One of the two subdivisions of the Agomiut Eskimo, living at Ponds inlet, opening into Eclipse sd., N. E. coast of Baffin island.

Toonoonek.—Parry, Second Voy., 359, 1824. Tud-

Toonoonek.—Parry, Second Voy., 359, 1824. Tudnunlrmlut.—Boas in Trans. Anthr. Soc. Wash., III, 96, 1885. Tununirmlut.—Boas in 6th Rep. B. A. E., 442, 1888.

Tununirusirmiut ('people of the smaller back country'). A subtribe of Agomiut Eskimo living at Admiralty inlet, the N. shore of Cockburn id., and the s. shore of Devon island.

Toonoonee-roochiuh.—Parry, Second Voy., 370, 1824. Tuduunirossirmiut.—Boas in Trans. Anthr. Soc. Wash., III, 96, 1885. Tununirusirmiut.—Boas in 6th Rep. B. A. E., 442, 1888.

Tupirbikdjuin. A summer settlement of the Kingnait Okomiut Eskimo near the coast of Cumberland sd.—Boas in 6th Rep. B.A.E., map, 1888.

Turtle Mountain Sioux. An Assiniboin band occupying a reserve of 640 acres at the base of Turtle mt., 12 m. s. E. of Deloraine,

Manitoba. They numbered 45 until the autumn of 1908, when 30 of their number joined the Oak Lake band on its reservation 5 m. N. of Pipestone, Manitoba.

Tuscarora (Skarū'rèn', 'hemp gatherers,' the Apocynum cannabinum, or Indian hemp, being a plant of many uses among the Carolina Tuscarora; the native form of this appellative is impersonal, there being no expressed pronominal affix to indicate person, number, or gender). Formerly an important confederation of tribes, speaking languages cognate with those of the Iroquoian linguistic group, and dwelling, when first encountered, on the Roanoke, Neuse, Taw (Torhunta or Narhontes), and Pamlico rs., North Carolina. The evidence drawn from the testimony of writers contemporary with them, confirmed in part by tradition, makes it appear that while occupying this primitive habitat the Tusearora league was composed of at least three tribal constituent members, each bearing an independent and exclusive appellation. The names of these component members still survive in the traditions of the Tuscarora now dwelling in w. New York and s. Ontario first of these tribal names is Kă'tĕ'nu'ā'kā'. i. e. 'People of the Submerged Pine-tree'; the second Akawěñtc'ākā' (meaning doubtful); and the third, Skarū'rĕn', 'Hemp Gatherers.' Cusick (Hist. Six Nations, 34, 1828) wrote these tribal appellations "Kautanohakau," "Kauwetseka," and "Tuscarora" respectively, and (p. 31) refers also to the "Esaurora, or Tusearora," from which it may be inferred that Esaurora is a synonym of Skarn'rĕ". According to the same authority (p. 36), the Tuscarora, on traditionary evidence, possessed in early times, the "country lying between the sea shores and the mountains, which divide the Atlantic states," in which they had 24 large towns and could muster 6,000 warriors, probably meaning persons. Lawson, a better authority, wrote that in 1708, the Tuscarora had 15 towns and about 1,200 warriors-perhaps a minimum estimate of the true number of their fighting men; and Johnson (Legends, etc., of the Iroquois, 1881) says that the Tuscarora in North Carolina had 6 towns and 1,200 warriors, which was probably approximately true of the Tuscarora proper. Col. Barnwell, the commander of the South Carolina forces in the war of 1711-12, said that the Tuscarora or "the enemy can't be less than 1,200 or 1,400 [warriors], which may be easily

judged by their large settlements;" but Gov. Spotswood of Virginia placed their fighting strength at 2,000 men in 1711. According to Barnwell the Tusearora had 3 towns on Pamlico r., of which one was Ucouhnerunt, but that most of their towns were on Neuse r. and its many affluents. Some indication of the extent of the territory claimed by the Tuscarora may be obtained from the terms of the truce declared between the Tuscarora and Col. Barnwell in 1712. It was agreed therein that the Tuscarora were "to plant only on Neuse river, the creek the fort is on, quitting all claims to other lands. . . . To quit all pretensions to planting, fishing, hunting, or ranging to all lands lying between Neuse river and Cape Feare, that entirely to be left to the So. Carolina Indians, and to be treated as enemies if found in those ranges without breach of peace, and the enemy's line shall be between Neuse and Pamblico . . . fishing on both sides Bear river." This would indidicate that Cape Fear r, was the southern boundary of the Tuscarora territory.

History.—The data for the history of the Tuscarora are meagre and fragmentary, hence while they were at first, an important people of North Carolina, little is definitely known regarding them, and that little usually applies to only a part of the people. The first authentic information concerning the Tuscarora is that recorded by Lawson, the Surveyor General of North Carolina, who knew them well, having lived in close contact with them for many years. His History of Carolina, having been written about 1709 and published in 1718, contains nothing in regard to the Tuscarora during the most eventful period of their history, namely, that covering the years 1711 to 1713. During this time they fought two wars with the colonists of North Carolina, who were effectively aided by those of South Carolina and Virginia, reinforced by their tributary Indian allies. The first war began with the capture of Lawson and the Baron De Graffenried by about 60 Tuscarora and the condemnation to death of the former in Sept., 1711. Immediately following, a portion of the Tuscarora under Hencock, the Coree, Pamlico, Matamuskeet, Bear Rivers, and Machapungo, conspired to cut off the whites, each one of the tribes agreeing to operate in its own district whence they were being driven by the steady encroachment of the colonists. This compact resulted in the massacre of about 130 of the colonists on Sept. 22, 1711,

on Trent and Pamlico rs., by the tribes mentioned. Col. Barnwell was sent by South Carolina to aid the hard-pressed colonists of North Carolina, and succeeded in driving the Tuscarora into one of their palisaded towns about 20 m. above Newbern, N. C., where he defeated them and later induced them to accept terms of peace; but Barnwell violated this treaty by seizing some of the Indians and sending them away into slavery. This was the beginning of the second war between the Tuscarora and their allies and the people of North Carolina. Again an appeal was made to South Carolina for aid, which responded by sending Col. James Moore with a small militia force and about 900 tributary Indians.

The date of the adoption of the Tuscarora into the council board of the League of the Iroquois, through the Oneida, their political sponsors, is indefinite, judging from the differing dates, ranging from 1712 to 1715, given by various well-informed writers. In their forced migration northward the Tuscarora did not all decamp at once. The hostiles and their most apprehensive sympathizers were most probably the first to leave their ancient homes in North Carolina. On the total defeat and dispersion of the hostile Tuscarora and their allies in 1713, the scattered fragments of tribes fled and sought an asylum with other tribes, among whom their identity was not always maintained. Although the Five Nations gave asylum to the fugitive Tuscarora, there is also abundant evidence that, for political reasons perhaps, the Tuscarora were not for many years after their flight from North Carolina formally admitted into the Council Board of the League of the Five Nations as a constitutive member. The fact is that the Tuscarora were 90 years in removing from their North Carolina home to more friendly dwellingplaces in the N., and there is no evidence that they were formally incorporated into the confederation of the Five Nations as a co-equal member, before Sept. 1722. On Sept. 6, 1722, Gov. Burnet held a conference with the Five Nations at Albany, at which Governor Spotswood of Virginia was present. For the purpose of preventing forays between the Five Nations and their allies on the one hand, and the Southern Indians on the other, Spotswood induced the Five Nations to consent to the running of a dividing line along the Potomac and the high ridge of the Alleghany mts. This agreement was made in the name of the

Five Nations and the Tuscarora, indicating that the latter had become a factor in the councils of the League of the Iroquois. In closing the conference, it is stated that the Indians "gave six shouts-five for the Five Nations and one for the castle of Tuscaroras, lately seated between the Oneidas and Onondagas." The record continues that at the conclusion of this conference, on Sept. 13, the Five Nations sought a special interview with the Governor of Pennsylvania, and that on Sept. 14 the governor received "the ten chiefs of the Five Nations, being two from each, together with two others, said to be of the Tuscororoes." This appears to be the first official mention of the Tuscarora as taking part in the management of the public affairs of the League. The Tuscarora mentioned here, however, did not include those who dwelt on the Juniata and on the Susanehanna at Oquaga and its environs, nor those still in North Carolina.

Major portions of the Oneida and the Tuscarora, espoused the American cause during the Revolution. When the Indian allies of the British, even some of their brethren of the Six Nations, learned that a majority of the Tusearora had east their lot with the Colonies, they invaded the Tusearora country, burned their lodges, and destroyed their crops and other property. Thus again by the fortunes of war the Tuscarora were scattered and homeless. A large party of these settled at a place called Oyonwayea, or Johnson Landing, in Niagara co., N. Y., about 4 m. E. of the outlet of Niagara r., at the mouth of Four Mile er., in order not to be directly among the many Indians friendly to the British cause camped around Ft. Niagara. At the close of the war, two families, probably clans, of Tuscarora from Oyonwayea made their way to the N.E. limits of their present reservation, where they found many walnuts and butternuts, and a fine stream. Here they decided to winter. Being missed from Oyonwayea, scouts were sent out, who found them in their newly chosen settlement, a situation so favourable that, after the gratuitous cession of their former home among the Oneida, Ovonwayca was abandoned and all the families removed to the new site. Although the Tuscarora had only a tacit permission from the Seneca to reside at this place, the last settlement became the foundation of the present Tuscarora reservation in

New York. At the treaty held at Genessee, Sept. 15, 1797, between Robert Morris and the Seneca tribe, the Tuscarora chiefs complained, for the first time since their admission to the councils of the League, that the Five Nations had, from time to time, allotted lands to their people, but that each time these lands had been included in a subsequent cession to the whites, and that the Tuscarora had received nothing in return for their rights of occupancy or for their improvements. The justice and merits of their complaint having been acknowledged by the Five Nations, Morris reserved to the Tuscarora, by grant, two square miles, covering their settlement on the ridge mentioned above, and the Sencea thereupon granted them an adjoining square mile. About 1800-02 a deputation was sent to North Carolina to learn whether they could obtain funds in payment for the lands they formerly occupied there, with the result that, by aid of the North Carolina legislature, they were able to lease the Carolina lands, which yielded a fund of \$13,722. This sum enabled the Secretary of War in 1801, under authority of Congress, to purchase 4,329 acres for the Tuscarora from the Holland Land Co., adjoining the three square miles already occupied by them. Such is the origin of the land holdings of the New York Tuscarora.

It was while the Tuscarora deputation was in North Carolina that the remnant of the tribe still residing there was brought to the N. and joined their brethren in New York state.

The Tuscarora in sympathy with those of the Six Nations that adhered to the cause of Great Britain in the Revolution were granted lands in severalty on the Six Nations res. on the Grand river, Outario.

The evangelizing work of Christian missionaries began among the Tuscarora in w. New York as early as 1805 under the patronage of the New York Missionary Society. At first there were only six persons among the Tuscarora willing to abjure their ancient faith and customs, at least in name and appearance, and join in the missionary work; the remainder were generally strongly averse to the work of the missionaries. So violent were the struggles between the two unequal parties that in the spring of 1820 the "pagans" succeeded in inducing about 70 persons to emigrate to Canada, where they settled on the Six Nations res, on the Grand river, Ontario. The church membership at this time was 16 persons.

Little progress was apparent in the education of the Tuscarora although the New York Society had maintained a school among them.

Ethnology.—The Tuscarora in New York are governed by a council of irresponsible chiefs, for the Indians have forgotten and so neglect the means to be employed in enforcing the will of the clan in case a chief fails in his plain duty; the criminal law of New York at this point nullifies the early sovereignty of the clan over its members. In common with the other tribes of the Iroquoian linguistic stock, the Tuscarora traced the descent of blood through the line of the mother, and made the civil and official military chieftainships hereditary in the olevateira of certain clans (see Clans) over which the woman chiefs and the elder women presided. The simplest political unit was the ohwachira, of which one or more constituted a clan, which was the simplest organized political unit. The Tuscarora were constituted of at least eight clans, which primitively were organized into phratries. There are no data, other than those furnished by tradition and analogy, as to the organization of the Tuscarora confederation. The clans were exogamic as to their own members, as were also the phratries in primitive times. The Tuscarora of New York being completely isolated from any of their own people who still profess their ancient dogmas and beliefs and who still practise their ancient rites and ceremonies, have preserved only a hazy recollection of their early eustoms, ceremonies, and rites; even less do they comprehend the meaning of the ceremonies still practised by the so-called pagan members of cognate tribes. They are all professed Christians, and so turn away from the old forms of thought and practice of their ancestors.

The exact number of clans still existing among the Tuscarora is not definitely known, for the native authorities themselves do not agree on the number and the names of those still recognized—some informants give seven, while others with equal credibility give eight. There is likewise some diversity in regard to the correct names of certain clans. One list has Bear, Wolf, Turtle, Beaver, Deer, Eel, and Snipe; another has Bear, Eel, Large Turtle, Small Turtle, Beaver, Deer, Wolf, and Snipe; still another list has Bear, Eel, Deer, Turtle, Grey Wolf, Yellow Wolf, Beaver, and Snipe; and yet another is like the last, except

that the Turtle clan is replaced by the clans Small Turtle and Large Turtle. Like differences appear in the lists of clans of the other Iroquois tribes.

The names of the civil chiefs still in use among the present two divisions of the Tuscarora (that in Ontario and the other in w. New York are: (A. Sakwari''cra' (Sacharissa), 'The spear trailer'; Ni'hawčňnā''à', 'His voice is small'; Hotio kwawa "kew, 'He holds or grasps the multitude,' or possibly, 'He holds or grasus his own loins'; these three belong to the Turtle elan. (B) Nākāis ū'tēn' signification not clear; Utākwā těn'ā, 'The Bear cub'; Ionentchanen''naken, 'Its fore-paw pressed against its breast'; these three belong to the Bear elan. (C Nāio kāwe 'a signification not known); Neiotchā'k'don', 'It is bent'; these two belong to the Wolf clan. D Karondawa"kēn, 'One is holding the tree': Thanadāk'hwā' signification not clear; these two belong to the Snipe clan. (E) Kari'hēn'tîa', 'It goes along teaching'; Ni'hno'kā'wa', 'He anoints the hide'; Nakā'hĕñwā''ç'hĕñ, 'It is twenty canoes'; these three belong to the Beaver clan. Among the Canadian Tuscarora on Six Nations res., Ontario, the first and last names of the Turtle clan, the first title of the Wolf clan, and the first title of the Snipe clan appear to be the only ones now in use, although these four titles are questionably also in use among the New York Tuscarora.

There is no definite information available as to the former and more complete organization into clan phratries. Some of the translations of the chieftain titles above would seem to indicate that they were originally designations of some habit, attitude, or other characteristic feature of the clan tutelary or patron, questionably called "totem." The clan name, with one or two exceptions, is not the ordinary name of the clan guardian or patron, but is rather descriptive of some feature or attitude, or is the name of the usual habitat of the tutelary; for example, the name of the Bear clan signifies literally, 'Broken-off tail'; that of the Plover or Killdee (Snipe, 'Cleansand people'; that of the Beaver, 'People of the stream': that of the Turtle clan, 'Climbingthe-mountain people,' named from the position of the turtle basking; etc. It is probable that the plover or killdee should be substituted in the foregoing lists of clans, for the name clearly refers to the killdee's habit of running along the clean sand at the water's edge.

De Graffenried gives (N. C. Col. Rec., 1, 905 et seq.) an interesting account of the preparations made for the execution of Lawson and himself by the hostile Tuscarora. In the open space or public square mentioned there was a large fire, near which was the shaman or high priest, a grizzled soreerer, who made two white rings on the ground, whether of flour or white sand was not stated. In front of the two victims was placed a wolf skin, and a short distance farther there stood an Indian in a terrifying posture, holding in one hand a knife and in the other a tomahawk; he was apparently the executioner. He did not move from the spot. On the farther side of the fire were assembled young men, women, and children, who danced with weird and frightful contortions and attitudes. In the centre of the circle of dancers were seated two singers who intoned a dismal song, "rather fit to provoke tears and anger than joy." Within the circle of dancers the shaman stood unterrified, uttering his threatenings and adjurations and performing his exoreisms, against the foes of his people and their orenda or "medicine," when there would come a pause in the dancing. Finally, with shouts and howls the dancers ran into the neighbouring forest. In a short time they returned with their faces painted black, white, and red, in bands, and with their hair loose and flying, oiled and sprinkled with fine down or cotton from the cat-tail flag and with small white feathers, and some returned arrayed in all kinds of furs. After their return, the dance was renewed. Back of the two vietims stood a double line of armed warriors who kept their posts until everything was over; back of this guard was the council of war, whose members were seated on the ground in a circle, gravely deliberating on the fate of the two noted prisoners. Finally, they acted on the advice of "King" Tom Blunt, the head-chief of their neighbours, "the villages of the Tuscaroros," properly so called, that "King" Hencock should liberate De Graffenried, and could deal with Lawson as he and his council pleased. The manner of Lawson's death, as learned from Indian information, is found in a letter of Maj. Christopher Gale to his brother, Nov. 2, 1711, wherein it is said that the Indians stuck the unfortunate prisoner "full of fine small splinters of torchwood, like hogs' bristles, and so set them gradually on fire." De Graffenried was not permitted to know how Lawson was executed.

To this account of the Tuscarora method of preparing for the execution of captives may be added their triumphal ceremonies which De Graffenried says they performed after their defeat of a large party of Swiss and Palatines. He reports that they built bonfires at night, and especially a large one in the place of executions, where they raised "three wolf's hides, figuring as many protectors or gods," to which offerings, consisting of jewels, were made by the women. In the middle of the circle, the chief shaman performed all manner of contortions, conjurations, and imprecations against the enemies of his country, while the populace danced in a circle around the wolfhides.

The council of "King" Hencock, which consisted of 40 elders, was ealled by the Tuscarora, according to De Graffenried, the "Assembly of the Great," a translation of the Tuscarora terms for the council of chiefs, the general word for chief signifying 'one is great,' either in size or position. At the council before which Lawson and De Graffenried were tried the "forty elders" were seated around a great fire kindled in a large open space devoted to important festivals and public executions. On this occasion these chiefs and the accused were seated on rush mats, which were customarily provided for the comfort of guests as a mark of deference and honour. Although the two captives were acquitted by the first council, they were again tried before a second conneil after Lawson had, incautiously, had a bitter quarrel with Cor Tom, the chief of Cor town, who was not at the first council. The two captives were not given mats upon which to sit, and Lawson was condemned to death and De Graffenried was acquitted.

Lawson asserts that the most powerful tribe "scorns to treat or trade with any others of fewer numbers and less power in any other tongue but their own, which serves for the lingua of the country; with which we travel and deal." As an example of this the Tuscarora are cited. Being the most numerous tribe on North Carolina, their language was necessarily understood by some persons in every town of all the neighbouring tribes.

The Tuscarora carried on a pernicious trade in rum with the Indians dwelling to their westward. In 1708 rum had been but recently introduced among the latter—chiefly by the Tuscarora, who transported it in rundlets several hundred miles—amongst other Indians.

They sold it at "so many mouthfuls for a buckskin, they never using any other measure," the buyer always choosing a man having the largest mouth possible to accompany him to the market, and the mouthful was scrupulously emptied into a bowl brought for the purpose. The Tuscarora also traded with the Shakori and Occanecchi, selling them wooden bowls and ladles for rawhides.

Their lodges, usually round in form, were constructed of poles, covered with the bark of cypress, red or white cedar, or sometimes pine. At one place Lawson met more than 500 Tuscarora in one body in a lunning camp. They had constructed their lodges with bark "not with round tops, as they commonly use, but ridge fashion, after the manner of most Indians." Among them he found much corn, while meat and venison were scarce, because of the great number of people, for although they were expert hunters, they were too populous for one range.

According to Lawson, the native Tuscarora of North Carolina had rather flat bodies, due probably to the fact that in early infancy the children were swathed to cradle-boards. He adds: "They are not of so robust and strong bodies as to lift great burdens, and endure labour and slavish work, as Europeans are: yet some that are slaves prove very good and laborious." They were dexterous and steady, and collected in the use of their hands and feet; their bearing was sedate and majestic; their eyes were commonly full and manly, being black or dark hazel in colour, and the white of the eye was usually marbled with red lines; their skin was tawny, and somewhat darkened by the habit of anointing it with bear's oil and a pigment resembling burnt cork. When they wished to be very fine they mixed with the oil a certain red powder made from a scarlet root growing in the hilly country. The root was held in great esteem among them, selling it one to another at a very high price, on account of the distance from which it came and the danger to which they were exposed in obtaining it. The Tusearora and other Indians attempted to cultivate this plant, but it would not grow in their land. As a substitute they sometimes used puccoon root, which also has a crimson colour, but this dyed the hair an ugly hue. The heads even of the aged were scarcely ever bald; their teeth were tinged yellow from smoking tobaeco, to which habit both men and women were much addicted; they however did not

snuff or chew tobacco. They plucked the hair from their faces and bodies. There were but few deformed or crippled persons among them.

The Tuscarora had many dances suitable to various occasions; these, as a rule, were accompanied with public feasts prepared under the direction of the women chiefs. Every dance had its peculiar song, but probably was not changed for every occasion on which the dance was performed, although Lawson states that "all these songs are made new for every feast; nor is one and the same song sung at two several festivals. Some one of the nation. which has the best gift of expressing their designs, is appointed by their king and war captains to make these songs." To these festivals the people came from all the towns within 50 or 60 m., "where they buy and sell several commodities."

The Tuscarora, in like measure with the northern Iroquois, were passionately given to gaming, frequently stripping one another of every piece of property available. Sometimes they went even so far as to bet themselves away to the winner, readily becoming his slave until he or his relatives could pay the redemption price; nevertheless they bore their losses with great equanimity, no matter how ruinous they were. Among their games was that of a bundle of 51 split reeds about 7 in. in length and neatly made. The game consisted in throwing a part of the bundle before an opponent, who must on sight guess the number thrown. It is said that experts were able to tell the number correctly ten times in ten throws. A set of these reeds was valued at a dressed doe skin. The Tuscarora also had the well-known bowl and plum-seed game, which is such an important adjunct to the thanksgiving festivals of the northern Iroquois. They also had a number of other games, but some of their neighbours had games which they did not have.

There were feasts among the Tuscarora when several villages united to celebrate some event or when two or more tribes assembled to negotiate peace. There were feasts and dances of thanksgiving, and invocations to the gods that watched over their harvests, when their crops were garnered and when the first fruits of the year were gathered.

Population.—No trustworthy estimates of the Tuscarora population at any given date, exclusive of those of Lawson and Barnwell, previous to 1830, are available for the entire Tuscarora people. The earliest and perhaps most authoritative estimate of the total Tuscarora population at a given time was that of Lawson in 1708. His estimate of 15 towns and 1,200 fighting men would indicate a population of about 4,800 at that date; Colonel Barnwell's figures are somewhat larger than Lawson's, though they appear to be conservative; his estimate was 1,200 to 1,400 warriors, or a maximum population of about 5,600 persons. The estimate of Chauvignerie in was 250 warriors, or about 1,000 persons. His estimate was restricted to the Tuscarora living near Oneida, N.Y., hence did not include those living in North Carolina or on the Susquehanna and Juniata rs. Other estimates of this group give them 1,000 (1765), 2,000 (4778), 1,000 (1783), 400 (1796) in the United States; 414 (1885) in New York and an equal number in Canada, or a total of \$28; 364 (1909) in New York, and 421 (1911) in Canada. a total of 785.

Settlements.—The following Tuscarora towns have been mentioned in writings pertaining to this people: Annaooka, Chunaneets, Coerntha, Cohunche, Conauhkare, Contahnah, Cotechney, Coram, Corutra, Eno, Ganasaraga, Ganatisgowa, Harooka, Harutawaqui, Ingaren, Junastriyo, Jutaneaga, Kanhato, Kaunchsuntalikeh, Kenta, Kentanuska, Naurheghne, Nonawharitse; Nursoorooka, Nyuchirhaan, Ohagi, Oonossora, Oneida (in part), Oquaga, Shawhiangto, Tasqui, Tiocherungwe, Tonarooka, Torhunte, Tosneoe, Tuscarora, Unanauhan, Ucouhnerunt. Some of these towns were in North Carolina, others on Juniata r. in Pennsylvania, others on the Susquehanna in Pennsylvania, others on the Susquehanna in New York, while others were s. of Oneida lake in New York, and one in Genessee valley. The exact situation of the majority of these towns is not definitely known. In some ininstances the Tuscarora shared a town with other tribes, as was the case at Anajot (Oneida or Ganowarohare) and Onohoonaga.

Tushkisath (Tuckis'a'th). A sept of the Toquart, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes Can., 32, 1890.

Tutchonekutchin ('erow people'). A Kutchin tribe on Yukon r. from Klondike r. to Ft. Selkirk, Yukon ter. They number about 1,100 and differ but little from their Kutchin neighbours below.

Caribou Indians.-Dall in Cont. N.A. Ethnol, 1, 32, 1877 (so called by Hudson's Bay Co. people). Carribon Indians.-Ross, MS. notes on Tinne, B.A.E. Crow People.-Dall in Cont. N. A. Ethnol., 1, 32, 1877. Gens de bois.-Whymper, Alaska, 255, 1869. Gens des Foux.-Dall, Alaska, 429, 1870. Gens-de-wiz.-Raymond in U. S. Ind. Aff. Rep. 1869, 593, 1870 (misprint). Klo-a-tsul-tshik'.-Dawson in Rep. Geol. Surv. Can. 1888, 202B, 1889. Mountain Indians.-Hardisty in Smithson. Rep. 1866, 311, 1872. Nehaunee.—Dall in Cont. N. A. Ethnol., 1, 32, 1877 (so called by Hudson's Bay Co. men). Tatanchaks.-Colyer in U. S. Ind. Aff. Rep. 1869, 593, 1870. Tatauchakutchin.—Raymond, in Jour. Am. Geog. Soc., 111, 178, 1873. Tatanchok-Kutchin.-Whymper in Jour. Roy. Geog. Soc., 233, 1868. Tatchone Kutchin.-Keane in Stanford, Compend., 464, 1878. Touchon-ta-Kutchin.-Kirkby in Smithson. Rep. 1864, 418, 1865. Touchon-tay Kutchin.-Kirkby (1862) quoted by Hind, Lab. Penin., II, 254, 1863. Tüt-chohn'-küt-chln.—Dall in Proc. Am. A. A. S., 379, 1886. Tutchóne-Kutchin.-Dall, Alaska, 429, 1870.

Tutchone-kut'qin.—Morice in Anthropos, v. 5 4, 1906, Tutchon Kutchin.—Whymper, Alaska, 271, 1869, Tütch-ün-th' kütchin.—Ross, Notes on Time, S.L., MS, 474. Tütcone-kut'qin.—Morice in Anthropos, v. 261, 1906. = 'erow people'). Wood Indians.—Dewson in Rep. Geol. Surv. Can., 2028, 1889 (so. - il'sl by fur traders).

Tutelo. One of the eastern Sionan tribes, formerly living in Virginia and North Carolina, but now extinct. Hale (Proc. Am. Philos. Soc., Mar. 2, 1883; first made it known that the Tutelo language pertained to the Siouan stock, a discovery which, followed by the investigations of Gatschet, Moones, and J.O. Dorsey, brought to light the fact that a considerable group of Siouan tribes formerly inhabited the piedmont region of Virginia and the Carolinas. The relation of the Tutelo appears to have been most intimate with the Saponi, the language of the two tribes being substantially the same. Their intunate association with the Occaneechi and their allied tribes indicates ethnic relationship. The history of the Tutelo is virtually the same as that of the Saponi. The name Tutelo, although by the English commonly used to designate a particular tribe, was by the Iroquois applied as a generic term for all the Sionan tribes of Virginia and Carolina, being applied more particularly to the allied tribes gathered at Fort Christanna. They are first mentioned by Capt. John Smith in 1609 under the names of Monacan and Mannahoae, with many subtribes, occupying the upper waters of James and Rappahannock rs., Va., and described by him as very barbarous, subsisting chiefly on the products of the chase and wild fruits. They were at constant war with the Powhatan Indians and in mortal dread of the Iroquois. Lederer, in his exploration from Virginia into North Carolina in 1670, passed through their territory and mentions the names of Nahvssan (Monahassanough) and Sapon (Saponi). In their frontier position at the base of the mountains the Saponi and Tutelo were directly in the path of the Iroquois.

Unable to withstand the constant attacks of these northern enemies, they abandoned this locality some time between 1671 and 1701, and removed to the junction of Staunton and Dan rs., where they established themselves near their friends and kinsmen, the Occaneechi, occupying two of the islands in the Roanoke immediately below the forks, the Tutelo settling on the upper one. How long they remained here is unknown; it is certain, how-

ever, that in 1701 Lawson found the Saponi on Yadkin r., N.C., and says that the Tutelo were living in the neighbouring mountains toward the w., probably about the headwaters of the Yadkin. At this time, according to Lawson, the 5 Siouan tribes, the Tutelo, Saponi, Keyauwee, Occaneechi, and Shakori, numbered together only about 750 souls. Soon after Lawson's visit they all moved in toward the white settlements, and, crossing the Roanoke, occupied a village called Sapona town, a short distance E. of the river, about 15 m. w. of the present Windsor, Bertie co., N. C. Soon after this they removed and settled near Ft. Christanna.

In 1722, through the efforts of the Colonial governments, peace was finally made between the Iroquois and the Virginia tribes. consequence the Saponi and Tutelo some years later moved to the N. and settled on the Susquehanna at Shamokin, Pa., under Iroquois protection, later moving up the river to Skogari. Their chiefs were allowed to sit in the great council of the Six Nations. In 1763 the two tribes, together with the Nanticoke and Conov, numbered, according to Sir Wm. Johnson, 200 men, possibly 1,000 souls. In 1771 the Tutelo were settled on the E. side of Cayuga inlet, about 3 m. from the s. end of the lake, in a town called Coreorgonel, which was destroyed in 1779 by Gen. Sullivan. The last surviving full-blooded Tutelo known was Nikonha, from whom Hale obtained the linguistic material by which he determined the relation of the tribe to the Siouan stock. He died in 1871. It is believed there are still a few mixed-bloods in Canada, but the last one who could speak the language was John Key, or Gostango ('Below the Rock'), whose Tutelo name was Nastabon ('One Step'), and who died in 1898, aged about 80 years (Chadwick, People of the Long-house, 19, 1897; Boyle in Ann. Archæol. Rep. Ontario, 55, pl. xvIII, b, 1898). Lawson describes the Tutelo as "tall, likely men, having great plenty of buffaloes, elks, and bears, with every sort of deer amongst them, which strong food makes large, robust bodies." Nevertheless the evidence is clear that they were cultivators of the soil and relied thereon to a large extent for subsistence. The photograph of Nokinha, given by Hale, shows a face full oval in outline and large features of an almost European cast, "evidently," says Hale, "not individual or family traits, as they reappear in the Tutelo half-breeds on the Reserve, who do not claim a near relationship to Nikonha." On the other hand, Zeisberger, who visited the remnant of the tribe while settled at Shamokin, speaks of the village as "the only town on the continent inhabited by Tuteloes, a degenerate remnant of thieves and drunkards." Lederer describes the Nahyssan chief as an absolute monarch, and the people as tall, warlike, and rich. In their temples, or medicine lodges, they had large quantities of pearls, which they had taken in war from more southern tribes. Their tribal ensign consisted of three arrows.

Consult Hale in Proc. Am. Philos. Soc., xxi, No. 114, 1883; Mooney Siouan Tribes of the East, 1894.

Tutonaguy. A village in 1535 on the N. bank of St. Lawrence r., 25 leagues above the site of Quebec.—Cartier (1534) quoted in Hakluyt, Prin. Navigations, 235, 1598.

Tuvak. A Tahagmiut Eskimo village on the N. coast of Ungava, long. 70°.—Hind, Lab. Penin., II, map, 1863.

Tuwanek (Tūwánekq). Λ Seechelt sept which formerly lived at the head of Narrows arm, Seechelt inlet, Brit. Col.—Hill-Tout in Jour. Anthr. Inst., 25, 1904.

Tyee. 1. A man of importance; a chief; somebody. 2. Important; superior; great. The word is used in parts of the Pacific coast: from tyee 'chief,' in the Chinook jargon, a term ultimately derived from the Nootka dialect of the Wakashan family.

(A. F. C.)

Tyendinaga (named in honour of *Thayendanegea*, q.v.). A Mohawk reservation of about 17,000 acres of tillable land, occupied in 1911 by 1,343 Indians, on the bay of Quinte near the E. end of lake Ontario, in Hastings co. Ontario. The Indians are known officially as "Mohawks of the Bay of Quinte."—Cau. Ind. Aff. Reps.

Tzauamuk (refers to the noise of rolling stones in the bed of a stream). A Ntlakyapamuk village 6 or 7 m. above Boston Bar, Fraser r., Brit. Col.; pop. 5 in 1897, when last separately enumerated.

Chomok.—Can. Ind. Aff., 230, 1884. Chomok-Spayam.—Ibid., 418, 1898 (names of two towns combined). Tay-ab-Muck.—Can. Ind. Aff., 79, 1878. Tsa'umâk.—Teit in Mem. Am. Mus. Nat. Hist., 11, 169, 1900. Tzau'āmuk.—Hill-Tont in Rep. Ethnel. Surv. Can., 5, 1899.

Uchucklesit. A Nootka tribe on Uchucklesit harbour, Barkley sd., w. eoast of Vancouver id., Brit. Col. Pop. 35 in 1911. Their principal village is Elhlateese.

Cojuklesatuch.—Grant in Jonr. Roy. Geog. Soc., 293, 1857. Häutcu'k'tds'ath.—Boas, 6th Rep. N. W. Tribes Can, 31, 1890. How-chuck-les-aht.—Can. Ind. Aff., 308, 1879. Howchuck-lus-aht.—Brit. Col. nap, 1872. Howchuk-lis-aht.—Can. Ind. Aff., 1897, 357, 1898. Howchuk-lis-aht.—Can. Ind. Aff., pt. II, 158, 1901. Howschueselet.—Kelley, Oreg., 68, 1830. Ouch-uchlisit.—Mayne, Brit. Col., 251, 1861. Ouchuk-lis-aht.—Can. Ind. Aff., 51, 1875.

Uclenu. Mentioned by Kane (Wand, in N. A., app., 1859) as the name of a tribe occupying Scott id., N. w. of Vancouver id., Brit. Col. According to Boas it is the name of the island "Yutl," belonging to the Nakom-gilisala, compounded with -ēnoq 'inhabitants of.'

Ucluelet. A Nootka tribe at the N. entrance of Barkley sd., w. coast of Vancouver id., Brit. Col. Not to be confounded with the Lekwiltok. Their principal town is Ittatso; pop. 150 in 1904, 134 in 1911.

Emlh-with-laht.—Can. Ind. Aff., 310, 1892. Ewlbwiehaht—lbid, pt. 2, 158, 1901. Ewlhwiehaht.—Ibid., pt. 2, 74, 1902. Ewl-hwith-aht.—Ibid., 357, 1897. Ucle-tah.—Mayne, Brit. Col., 251, 1862. Uclú-let.—Swan, MS, B. A. E. Ugluxlatuch.—Grant in Johr. Roy. Geog. Soc., 293, 1857. W-Itoo-lith-aht.—Can. Ind. Aff., 308, 1879. Yongletats.—Domenech, Deserts, 445, 1860. Youchehtaht.—Brit. Col. map, 1872. You-clui-aht.—Sproat, Savage Life, 308, 1868. Yutlū'lath.—Boas, 6th. Rep. N. W. Tribes Can., 31, 1890.

Udekumaig (adt'kamäg, 'caribou fish,' meaning whitefish.—W. J.). A gens of the Chippewa.

Ad-dik-kuu-maig.—Tanner, Narr., 314, 1830. Adi-'kamäg.—Wm. Jones, inf'n, 1907. Ude-kumaig.— Warren (1852) in Minn. Hist. Soc. Coll, v, 44, 1885.

Ugjuktung ('abounding in seal'). An Okomiut Eskimo winter village of the Saumiugmiut subtribe in Baffin island.—Boas in Deutsche Geog. Blätt., viii, 32, 1885.

Ugjulirmiut ('people possessing seal'). A tribe of Eskimo occupying King William id. and Adelaide penin., Arctic eoast. These are the Eskimo who fell heir to the wrecked ship of Franklin. The Netchilirmiut, who in recent times regularly visited King William island, became mixed with the Ugjulirmiut. Their village is Kingmiktuk.

Křikeřtalořméut.—Petitot in Bib. Ling. et Ethn. Am., III. vi, 1876 (sig. 'islanders': Kopagmiut name). Oo-geoo-lik.—Ross, Second Voy., 308, 1835. Ook-joo-lik.—Gilder, Schwatka's Search, 85, 1881. Ookwollk.—Ibid., 199. Ugjulik.—Boas in Zeitschr. Ges. Erdk., 220,

1883 Ugjulirmlut.--Boas in Trans. Anthr. Soc. Wash, 101, 101, 1885. Ukdschulik.--Schwatka quoted in Ausland, 653, 1885. Ukdshúlik. --Schwatka in Century Mag., XXP, 76, 1881.

Uglariak. A winter settlement of the Aivilirmint Eskimo at the entrance of Repulse bay, N. end of Hudson bay.

Uglariaq. -- Boas in 6th Rep. B. A. E., 447, 1888.

Uglirn. A winter settlement of Iglulirmiut Eskimo on an island in N. W. Fox channel, N. Hudson bay.

Ooglit.—Parry, Second Voy, 559, 1824 Ooglitt.— Lyens, Priv. Jour., 406, 1825. Uglirn.—Boas in 6th Rep. B. A. F., map, 1888.

Uissuit. Dwarfs which the Central Eskimo believe to inhabit the depths of the sea. They fish for them with hook and line, but none is ever caught, because, it is believed, when one is hooked and drawn up, as soon as he comes near the surface he flashes his legs above water and dives below.—Boas in 6th Rep. B. A. E., 621, 1888.

Ukadlik. A winter village of Nugumiut Eskimo on the coast between Frobisher bay and Cumberland sd., Batfin island.

Ukadilq.—Boas in 6th Rep. B. A. E., 422, 1888. Ukadila.—Boas in Petermanns Mitteil, xvii, suppl, No. 80, 67, 1885.

Ukiadliving ('autumn settlement'). A winter settlement of Okomiut Eskimo of Saumia on N. Cumberland sd., Baffin id.; pop. 17 in 1883.

Okkiadliving.—Boas in Trans. Anthr. Soc. Wash, ur. 98, 1885. Ukiadliving.—Boas in oth Rep. B. A. E., map. 1888; Boas in Petermanns Mitteil, No. 80, 70, 1885. Ukiolik.—Rink, Eskimo Tribes, 33, 1887.

Ukusiksalik. A winter village of the Aivirlirmiut Eskimo on Wager inlet, x. w. Hudson bay.—Boas in 6th Rep. B. A. E., 449, 1888

Ukusiksalirmiut ('people possessing potstone kettles'). A tribe of the Central Eskimo living on Back r., Kee., and formerly on the shores of Boothia penin. According to Schwatka they are nearly extinct, the few survivors living at Dangerous rapids. They live on musk-ox and fish, do not hunt seal, and have no fuel.

Oogueesik Salik.—Schwatka in Science, 543, 1884. Ooguensik-salik-Innuits.—Ausland, 653, 1885. Ooqueesiksillik.—Schwatka in Century, XXII, map, 1881. Ootkooseek-kalingmœoot.—Franklin, Journ. to Polar Sea, II, 42, 1824. Stone Kettle Esquimaux.—Ibid Thleweechodezeth.—Back, Narr., map, 1836. Ukusiksalik.—Boas in 6th Rep. B.A.E., 458, 1888. Ukusiksalimiut.—Boas in Trans. Anthr. Soc. Wash, III, 101, 1885. Ukusiksalirmiut.—Boas in 6th Rep. B.A.

E., 458, 1888. Ukusiksillik.— Klutschak, Als Eskimo unter den Eskimo, map, 63, 1881. Utku-hikalik.— Richardson, Polar Regions, 170, 1801. Ut-ku-hikaling-mëut.—Hid, 300. Ut-ku-sik-kaling-me'ut.—Richardson, Aret. Exped, 1, 362, 1851. Utkusiksalik.— Boas in Zeitsch. Ges. f. Erdk., 226, 1883. Utkutçiki-aliñ-méut.—Petitot in Bib. Line. et Ethn, Am., 11, 36, 1876. Uvkusigsalik.—Rink, Eskimo Tribes, 33, 1887.

Ulksin (U'lk's'n, 'point'). A Squawnish village community on Burrard inlet, Brit. Col.
—Hill-Tout in Rep. Brit. A. A. S., 475, 1900.

Umanaktuak. A winter settlement of Talirpia Okomiut Eskimo on an island near the s. w. coast of Cumberland sd., not far from the entrance, Baffin id.

Annanactook.—Kumlien in Bull 15, U. S. Nat. Mus., 15, 1879. Umanaqtuaq.—Boas in 6th Rep. B. A. E., 426, 1888. Umana&tuak.—Boas in Petermanus Mitteil., xvn., No. 80, p. 70, 1885.

Umiak. See Oomiak.

Undl-skadjins-gitunai ("An_T squadji'ns gitanā'-i, 'Gituns on the river Skadjins'). A subdivision of the Gituns, a Haida family of the Eagle clan living at Masset, Q. C. ids. The name was derived from that of a small stream which flows into the upper expansion of Masset inlet, and upon which they used to camp.—Swanton, Cont. Haida, 275, 1905.

Upeshipow. A tribe, related to the Cree, living near the E. coast of James bay, Quebec, between Rupert and Great Whale rs., bordering on the Eskimo of Ungava penin. One band, the Winnepeskowuk, lived on Eastmain r., another was said to live on Moose r., probably the Monsoni, who were doubtless a cognate if not the same tribe.

Upe-shi-pow.—Hutchins (1770) quoted by Richardson, Arct. Exped., n., 38, 1851.

Upper Fraser Band. One of 4 subdivisions of the Upper Ntlakyapamuk of the interior of British Columbia.

SLaxa'yux.—Teit in Mem. Am. Mus. Nat. Hist., n, 170, 1900. Upper Fraser band.—Ibid.

Upper Kutenai. The larger of the 2 divisions of the Kutenai, speaking a different dialect and more amenable to civilizing influences than the Lower Kutenai. They live in the region inclosed between the Selkirks and Rocky mts., on the lakes at the head of Columbia r., and on upper Kootenay r., B.C. Their sub-divisions are Akiskenukenik, Akamnik, Akanekunik, and Akiyenik.

Ki'tōnā'qa.—Chamberlain in 8th Rep. N. W. Tribes Can., 6, 1892. Upper Kootanais.—Mayne, Brit. Col., 208, 1862. Upper Kootanie.—Tolmie and Dawson,

Comp. Vocabs., 124B, 1884. Upper Kootenay.—Boas in 5th Rep. N. W. Tribes Can, 10, 1889. Upper Kootenuha.—Tolmie and Dawson, op. cit.

Upper Thompson Indians. The Ntlakyapamuk on Fraser r, and its tributaries above Cisco, Brit. Col. They embody 4 minor divisions: the Lytton, Upper Fraser, Spence Bridge, and Nicola bands.

Nku'kûmamux.—Teit in Mem. Am. Mus. Nat. Hist, n. 168, 1900. ='people above'). Upper Thompsons.—Ibid.

Utikimitung. A village of the Talirpingmiut Okomiut Eskimo, on the s. shore of Cumberland sd., Baffin id.

Utigimitung.-Boas in 6th Rep. B, A. E, map, 1888.

Utlums. An abandoned Salishan village on the s. side of Galiano id., Brit. Col.

Ut-lums.—Dawson, Can. Geol. Sirv., map, 1887.

Viger. A Malecite settlement in Viger township, Temiscouata co., Quebec, containing 106 inhabitants in 1911.

Wabezhaze ('marten'). Λ gens of the Chippewa.

Wa-be-zhaze'.—Morgan, Anc. See., 106, 1877 Wab-ishesh.—Gatschet, Ojibwa MS, B.A.E., Waub-ish-ash-e.—Warren in Minn. Hist. Soc. Coll., v, 44, 1885.

Wachapalaschuk (Wachap'abischuk). The name of an ancestor of a gens of the Kwakiutl proper; also applied to the gens itself (Boas in Petermanns Mitteil, pt. 5, 131, 1887).

Wachaskesouek. A tribe mentioned in 1648, in connection with bands of the Ottawa, as allies of the Hurons, living s. of lake Huron. Ouachaskesouek.—Jes. Rel. 1648, 62, 1858. Wachaskesouek.—Jes. Rel., 10, in lex, 1858.

Wachegami (prob. 'beaver-dam lake,' or possibly 'shining lake,'—Hewitt). An unidentified tribe or band living in Canada N. of lake Nipissing; probably named from a lake on which they resided.*

Ouachegami.—Jes. Rel. 1640, 34, 1858 - Wachegami. —Jes. Rel., 111, index.

Waddington Harbour Indians. A body of Salish of Fraser River agency, Brit. Col., numbering 37 in 1895, the last time the name appears.

Waddington Harbour.—Can. Ind. Aff., 277, 1894. Wadington Harbour.—Ibid., 189, 1883.

Wadjahonak ('those who seek a living' ... The name given by the Algonkin of Oka (q.v.) to the Iroquois women of the same settlement on account of their custom of peddling their manufactures to the neighbouring whites, a thing which the Algonkin women of Oka never do.—Cueq. Lexique Algonquine, 416. 1886.

Waitlas. A village of the Goasila at the mouth of Samo r., Smith inlet, Brit, Col. Oi-cle-la.—Kane, Wand, in N. A., app., 1855. Wycless.—Beas in Bull. Am. Go. p. Sos., 226, 1887.

Wakashan Family. A linguistic family occupying the w. coast of British Columbia between lat, 54° and 50° 3°), the x, and w portions of Vancouver id, and the extreme n.w. corner of Washington, nearly to lat. 48: The name is derived from analysis, 'good, which Cook heard at Priendly cove, Nootka sd., and supposed to be the name of a tribe. The culture of these people is almost identic a with that of the coast Salish to the S. and E. of them, and with that of the Tsimshian. Haida, and Tlingit in the N. In physical characteristics they rather approach the coas-Salish, and their language conforms in type most closely with that of the Salish and Chineakuan. Juan de Fuea probably reached the coast of British Columbia and was the first white man to see the lands of the Wakashan. If Fuentes be not an imaginary person, nor his voyage a fable, he sailed in 1940 through the archipelago where the Wakashan live.* Ensign Juan Perer is believed to have anchored in Nootka sd. in 1774. In the following year Bodega and Maurelle passed along the W: kashan coast on their way's. In 1786 English vessels under Capts, Hanna, Portlock, and Dixon called at this coast, and, from that time visits of British and American trading vessels were constant, Nootka in particular being much frequented. Between 1792 and 1794 Capt. George Vancouver. R.N., the famous British explorer, made the first accurate and detailed survey of the coast. In 1803 the Boston, of Boston, of Mass., was destroyed by the people of Nootka, and all on board except two persons were killed. From the account of one of these. John R. Jewitt, we have important information regarding the tribes of the w. coast of Vancouver id. The Hudson's Bay Co. established a post at Victoria in 1843, and from that time relations with the natives became more intimate. Since then the native population has pretty steadily declined. Mission stations have been established at many points with considerable

^{*}Probably Shining-tree lake in Gowganda dist, N. E. of Sudbury, Ont.

^{*}Both voyages are utterly discredited.

success in the N., but half of the southern Kwakiutl still hold to their ancient customs and beliefs. Most of the Nootka have been converted by Roman Catholic missionaries. Wakashan dwellings were large structures of large cedar beams and planks, and stood in a row fronting the sea. Each accommodated several families which had separate fires. The canoe was one of the essentials of existence on these shores, where there were no better seamen than the tribes of the w. coast of Vancouver id. These and a few of the neighbouring tribes in Washington were the only people who pursued and killed the whale, others being content to wait until the animals drifted ashore dead. For the rest of their diet they depended mainly upon fish, but they also hunted land and sea animals and collected shell-fish, roots, and berries, each family owning its own fishing grounds and salmon creeks. which it guarded jealously. Although good carvers of wood, they were excelled in this respect by the Haida and Thingit. The northern tribes, the Heiltsuk Kwakiutl, reekoned descent in the female line; but the southern tribes, though in a transitional stage, are rather to be reckoned in the paternal stage. Intertribal warfare was constant and slavery an institution. Head flattening was practised by the tribes of Vancouver id. The potlatch was one of the cardinal institutions, and around it centred a large part of the social and religious interests of the people. Owing mainly to smallpox and vices, the number of Wakashan has fallen off steadily since their first contact with whites. In 1909 there were enumerated in the Dominion of Canada 4,150, to which are to be added 434 Makah in Washington; total, 4,584. Of these, 2,090 were Kwakiutl and 2,494 Nootka.

Walas (Wā'las, 'the great ones'). A gens of the Nakoaktok and of the Mamalelekala Kwakintl tribes.—Boas in Rep. U. S. Nat. Mus. 1895, 329, 1897.

Walas Kwakiutl ('the great Kwakiutl'). A sept of the true Kwakiutl, comprising the Tsentsenkaio, Gyekem, Waulipoe, Tlekem, and Tletlkete gentes. Pop. 30 in 1889, the last time they were enumerated separately. Lâ'kuifila.—Boas in Rep. U. S. Nat. Mus. 1895, 330, 1897 ('the tramps': a nickname). Lock-qua-lillas.—Lord, Natur. in Brit. Col., 1, 165, 1866. Wa'las Kwakiutl.—Boas, op. cit, 330. Wālis-kwā-ki-ool.—Dawson in Trans. Roy. Soc. Can., sec. II, 65, 1887. Waw-lis-knahkewith.—Can. Ind. Aff., 189, 1884. Waw-lis-knahk-newith.—Ibid., 1889, 270, 1890.

Walasnomoqois. An ancestor of a Kwakiutl gens whose name was sometimes given to the gens itself.—Boas in Petermanns Mitteil., pt. 5, 131, 1887.

Wamnughaoin. ('shell ear pendant'). A band of the Sihasapa or Blackfoot Sioux. Wamnuga-oig-—Dorsey in 15th Rep. B. A. E., 219, 1897. Wamnuxa-oia.—Ibid.

Wampum (the contracted form of New England Algonquian wampumpeak, wampumpeage, or wampompeag, expressed phonetically as wanpanpiak or wanbanbiag, the component lexical elements of which are wamp, for wanb, a derivative of wab, '(being) white'; umpe or ompe, for $a^n bi$ or $a^n pi$, 'a string (of shell-beads)'; ak or aq, the grammatic sign of the animate plural. As the native expression was too cumbersome for ready utterance by the New England eolonists, the sentence-word was divided by them into wampum and peak or peage, regardless of the exact line of phonetic division between the component lexical elements of the The shell beads in use among expression). the North American Indians, wrought out of several kinds of shells found along both the western and the eastern littorals of the continent, including various species of Veneridæ, as the poquaûhaug (Venus mercenaria), usually eontracted to quahaug or quahog, formerly sometimes called hens, the common round or hard-shell clam, which in the S. sometimes attains a weight of 4 pounds; the periwinkle (Pyrula eariea and P. eanaheulata), or winkle, the meteaûhock of Roger Williams; the whelk (Buceinum undatum); fresh-water shells of the genus Unio; and, on the Paeific eoast, the Dentalium (D. entalis, and D. indianorum), the abalone or haliotis (H. rufescens, H. splendens, and H. eracherodii), the scallop shells or pectens, and the olivella (O. biplicata), and a number of other sea shells.

In the manufacture of these shell beads much patient labour and a marked degree of skill and eareful manipulation were required. Their manufacture was apparently not confined to any class of persons among the natives. for Roger Williams (Key, 128, 1827) remarks that, in general, those who live along the seashore manufacture the beads, and that "as many make as will." In New England and along the Atlantic seaboard wampum was ehiefly of two colours: the white and the violet or purple, which latter varied in shade from pale or pink violet to dark rich purple. The value of these shell beads was determined by their colour and degree of finish. In form they were cylindrical, being from about $\frac{1}{5}$ to $\frac{3}{15}$ in. in diameter, and from $\frac{1}{8}$ to $\frac{1}{16}$ in. in length. Notwithstanding the abundant literature coneerning the multifarious uses of these shell beads in trade, in the embroidering of articles of dress, the making of objects for personal adorument and badges of rank and official dignity, and in the fiducial transactions of private and public life, no technical statement of the exact methods employed by the natives in their manufacture is available.

According to Barber and Howe (Hist. Col. N. J., 1844) the method of manufacture after contact with the whites was as follows: The wampum was wrought, largely by the women, from the thick blue portions of the shell, and the process, though simple, required a skill acquired only by long practice. The intense hardness and brittleness of the materials made it impossible to wear, grind, and bore the shell by machinery alone. First the thin portions were removed with a light, sharp hammer, and the remainder was clamped in a seissure sawed in a slender stick, and was then ground into an octagonal figure, an inch in length and half an inch in diameter. This piece being ready for boring was inserted iuto another piece of wood, sawed like the first stick which was firmly fastened to a bench, a weight being so adjusted that it caused the seissure to grip the shell and to hold it securely. The drill was made from an untempered handsaw, ground into proper shape and tempered in the flame of a candle. Braced against a steel plate on the operator's chest and nicely adjusted to the centre of the shell, the drill was rotated by means of the common hand-bow. To clean the aperture, the drill was dexterously withdrawn while in motion, and was cleared by the thumb and finger of the particles of shell. From a vessel hanging over the closely

clamped shell drops of water fell on the drill to cool it, for particular care was exercised lest the shell break from the heat caused by friction. When the drilling reached halfway through the shell, the shell was reversed and the boring was completed from the opposite side. To finish the surface and to shape the edges were the next processes. A wire about a foot long was fastened at one end to a bench; beneath and parallel with the wire was a grindstone with a grooved face, which was worked by a foot-treadle. The beads were strung on the wire; the free end was grasped in the left hand and the wire of beads was drawn into the groove of the fast-revolving grindstone. By means of a flat piece of wood, held in the right hand, the beads were continually turned. By this process the beads soon became round, smooth, and polished, and were then strung on hempen strings about a foot in length. Five to ten such strings could be made in a day, and were sold to country merchants at the rate of 1215 cents apiece.

Wampum very early in the intercourse between the whites and the Indians, as it already was among themselves, became a medium of exchange at fixed values, not only in merchandise but also in dollars and cents. So important was this use of it that Weeden (Johns Hopkins Univ. Stud., 2d s., viii-ix, 1884) wrote a monograph on wampum with the suggestive title, "Indian Money as a Factor in New England Civilization." in which this phase of the subject is fully discussed. Powers, Stearns, Goddard, and others mention facts showing that, at an early time on the Pacific coast, shell money became a medium of exchange, not only among the Indians but also among the whites. Goddard (Life and Culture of the Hupa, 48-49, 1900) says that a single shell of the decorated dentalium is measured and its value determined by the creases on the left hand; that strings of these shells reaching from the thurab-nail to the point of the shoulder contain 11 of the largest and 11 of the smallest of these shells; that some of the natives have a set of lines tattooed on the inner side of the left forearm, which indieate the length of 5 shells of the several standards of length. Rosendale (Wampum Currency, 1896) shows by ample citations from the ordinances of New Netherland that the period from 1611 to 1662 "marked the decadence of wampum as currency." His article is valuable and interesting for giving the value of the different kinds and grades of wampum in stivers and guilders at the periods mentioned.

Williams (op. cit.), speaking of the poquaûhock or quahaug, called hens by the English, or the hard round clam, says that the Indians "break out of the shell about half an inch of a black part of it, of which they make their suckaáhock, or black money," and that they manufacture from the stem or stock of the meteaāhock, or periwinkle, their "wompam or white money," of half the value of the suckáwhock or black money or shell beads. In his lexicon Williams gives the words sawhôog and sawhösachick as the native terms for loose beads,' enomphosachick as that for 'strung ones,' and machequoce as 'a girdle, or belt,' curiously made from one to five or more inches in width of these shell beads. Such a belt, he tells us, was worth sometimes more than £10 sterling, and was worn either as a girdle or as a scarf or sash around the shoulders or breasts, hence the common name of belt for this article. Strings were also so worn as ornaments around the necks of women and children. Williams quaintly adds: "Princes make rich caps and aprons (or small breeches) of these heads, thus curiously strung into many forms and figures; their black and white finely mixed together." As to their means of manufacture he says also before the Indians obtained awl blades from Europeans they "made shift to hore this their shell money with stone," and that the work of smoothing the beads "they doe on stones" and other things.

Lawson (Hist. Car., 315-316, 1714) writes that the Indians of Carolina had two different kinds of shell money, called peak and ronoak, chiefly the former kind, which at New York went by the name of wampum, and was used as current money. He believed that peak was used on the continent "as far as the bay of Mexico." The peak, he says, was called "porcelan" by many writers, and was made in great quantities in New York and "with us in some measure." It was made from shells found on the coast, very large and hard, so that it was difficult to cut them; that some English smiths attempted "to drill this sort of shell money" for profit, but found the task too hard and saw that nothing could be gained for the "drilling was the most difficult part of the work to the Englishmen, which the Indians manage with a nail stuck in a cane or reed, which was rolled by them on their thighs with the right hand and the bit of shell was held in the left, so in time they drill a

hole quite through it, which is a tedious work; but especially in making their ronauk, four of which will scarce make one length of their wampum." He does not say how the drilling was done before the Indians had nails. For this shell money "skins, furs, slaves, and whatever the Indians possessed might be bought; by it they might be entired to do anything-to part with anything except their children for slaves; by its means murders and other crimes were adjusted and settled." Beverley (Hist. Va., bk. III, 58, 1705) says that the Indians of the Virginia and Carolina littoral had peak and roenoke; that the peak was of two colours, dark purple and white: that they (presumably the purple and the white, were alike in size and figure, being made of different portions of the same shell (evidently the poquathack); they were polished as smooth as glass, and were strung through holes drilled through their centres; the purple or dark-coloured beads were more valuable than the white, bringing among the Indian traders 18 pence per vard, while the white brought only 9 pence; and that these Indians made of these shell beads pipes (probably tubular objects (, 2 or 3 in, long and "thicker than ordinary, which are much more valuable; that they also made runtees of the same shell. grinding them smooth as the beads of the peak, "the strung beads," and that these conters were either large like an oval head; drilled through the length of the oval, or they were flat and circular, nearly an inch in width and 3 in. thick, and were drilled edgewise. The reak, the runtees, and the "pipes." he continues, were used for coronets, bracelets, belts, or else the shell beads were made into long strings to hang down before the breast, to lace up their garments, or to adorn their tomahawks and other weapons and implements; lastly, he adds, that these Indians made another kind of beads, of less value than the other, from the cockle shell, which was broken into small fragments, which were left with rough edges. and drilled through in the same manner as the other shell beads forming the peak; these rough-edged "beads" were called roenoke (the ronoak of Lawson, and they were used in the same manner as the peak or strung beads.

To the Iroquois and to many other Indians white as a colour was auspicious, and its use in ritual and ceremony therefore indicated peace, health, welfare, and prosperity—ideas expressed by white wampum when ceremonially employed; on the contrary, black as a colour

was inauspicious, and its use therefore indicated hostility, sorrow, death, condolence, and mourning—ideas expressed by dark or purple wampum when ceremonially employed; nevertheless the dark or purple variety of wampum was commercially much more valuable than the white kind, and the darker its shade the more valuable it was. Commonly the ratio was as one to two. In commercial transactions wampum was used strung or unstrung. In trade it was usually exchanged by count when loose, by the string, or by the fathom. The fathora was a count. Williams Key, chap. XIV says that pidekq off was the native name for 10 sixpence, or 60 pence, and that this was called ng Johnsen, that is, one fathorn, 5 shillings. So a fathom was a count of beads. the number of which was determined by the number legally current for a penny. Williams said that 6 white and 3 black locads were current for a penny; therefore at this ratio 360 white and 180 black beads constituted a fathom. A large portion of the white shell beads was consumed in the manufacture of various articles of personal adormacht and in the embroidery of various articles of raiment for both men and women. For use in public affairs and in official communications. in ritualistic and fiducial transactions, wainpum was wrought into two well-known products-strings, often tied into bundles or sheaves of strings, and belts or searfs or sashes. The first variety was made originally by stringing the wampum beads on small strands of skin or sinew, and, later, on a strong thread or on several threads twisted together; these strings of shell beads were called "branches" by French writers generally, probably including the bunches or sheaves. In making these strings of beads it was possible, by using all white, all purple, or by a combination of the two colours in definite proportions, regulated by the colour symbolism of the people, to convey mnemonically a variety or a difference of ideas, indicated by the proportion, the sequence of the two colours, and the figures or outlines portraved by them on the strand or string; for example, there might be one white bead and then one purple bead alternately on the strand, or a white bead and then two purple beads alternately, or there might be two or more white heads followed by two or more purple beads alternately on the strand; or the strand might be composed one half of white and the other half of purple beads; or one-half of the string of beads might

be arranged in one way and the other half in another. Thus it was possible by these simple devices to indicate by means of the two available colours a number of combinations, differing one from another sufficiently to convey a number of ideas without much chance of eonfusion. The white strings tinged red by vermilion or some other red colour were used as a challenge or declaration of war, or as an invitation to friends to join in a war. these reasons some strings of beads consisted wholly of white beads, while others were composed entirely of purple or dark beads. A string composed entirely of dark beads is the official string of beads by which one of the Iroquois tribes notifies its brother and cousin tribes of the death of one or more of its chiefs. White strings were commonly employed in matters of ordinary routine, requiring only some degree of formality, or merely as preliminary exhibits to others of more and deeper import. The second kind of shell-bead product was the more or less broad sash, scarf, or belt, on which the white and purple beads, first suitably proportioned on strings, were fastened together by small strands of sinew or skin in such manner as to form a neat and durable fabric. By suitable combinations of the two colours dominant in the beads various symbolic figures and devices were neatly and deftly wrought into the body of the belt or scarf. Sometimes the fabric took the form of a symbolic sun. But the breadth and length of the belt or sash, and the proportions of the white and the purple beads composing it, were naturally determined by the nature and importance of the occasion for its use. According to Lafitau (1724), a very good authority, the usual size of a belt in his time was 11 strands of 180 beads each, or about 1,980 wampum beads. There are references to belts composed of 6,000 and 7,000 beads, and proportionately long. Some belts were employed to convey a double message—that is, one half to one person and the other half to another, or two messages to one person or people,

The chiefs and the clders of the people were accustomed to assemble to rehearse the matters mnemonically connected with the several wampum strings, sheaves of strings, and belts in their keeping. In complex and important affairs, certain of these annalists were charged with remembering only a particular portion of the record, while to others were entrusted other portions, thereby rendering it the more easy to remember the details of the entire

matter without forgetting any material circumstance. To aid these annalists and others they devised the complex and varied forms of wampum strands, sheaves, and belts already noted. Belts were used for various purposes, as the ratification of treaties, the confirmation of alliances, and the authentication of proposals made by one people to another.

In addition to packs of skins and furs, the public treasure of a people, such as the tribes of the Iroquois league, consisted largely of wampum, together with the strands, bunches, or sheaves of strings or strands, and the belts, scarfs, or sushes made from it, as above described. Not having the use of writing of any kind, the Indians, naturally apt to forget events and occurrences happening among them, devised the variety of uses for wampum and its products.

In addition to the descriptive names or merely denotive designations of wampum and the things made from it, a number of terms of political import were applied to these wampum strings and belts by the Iroquoian tribes, which indicate the importance attached to these several objects. By all these tribes the term kană''să', 'a braid or plaited object,' was applied to strings of wampum of whatever nature. The Mohawk applied the term gāioñ'ni' to the belt of wampum, while the Onondaga and the Seneca use kăs'hwĕn''tă'. Figuratively, and perhaps ceremonially, these • people apply the following names to wampum employed officially and formally: kari"hwa" (gāi''hwā', dialectic variant), 'the business, the affair, or the authentic credential'; gawěñ' $n\check{a}$, 'the voice, the word, or the proposition,' because every proposal of a public nature, as an edict, required for its authentication a belt or a string of wampum according to its importance and to the exigency of the case; and kāianerē"'serā' (gāianēn''sä', a dialectic variant 'welfare,' 'the commonwealth,' 'justice,' here 'the law.' For wampum the Mohawk have the name oneko'r'hă', which by strict dialectic changes of sounds (n=t), and the dropping of r) becomes otko"ä, which is the Onondaga and the Seneca name for it.

The Dutch about New York (Manhattan) applied the Algonquian term sewan (also written sewant, sewared, zeewand, etc.), 'scattered or loose (beads),' to all shell beads, in the same manner that the English called all peage, or strung beads, wampum, 'white.' The Dutch applied the name Sewan hacky, 'Wampum

land,' to Long island, perhaps in imitation of the natives, for it was noted for its abundance of shells suited to shell bead making. In New England mowhackees, 'black beads,' was used.

As early as 1640, in New England and especially in New Netherlands, there was much trouble and discontent owing to the manufacture of counterfeit and unfinished wampum. It was complained that payments were made in nothing but rough, unpolished stuff, while the good, polished beads, commonly called "Manhattan wampum," were exported, concealed, or at least not to be had at all. Many ordinances of the Director and Council of New Netherlands were passed in more or less successful attempts to remedy this growing evil. The following citation from such an ordinance, passed May 30, 1650, shows to what an alarming extent wampum was counterfeited: "Whereas, we have by experience, and for a long time seen the decline and daily depreciation of the loose wampum among which are circulating many with holes and half finished; also some of stone, bone, glass, muscle-shells, horn, yea, even of wood and broken beads, together with the manifold complaints of the inhabitants that they cannot go to market with such wampum, nor obtain any commodities, not even a small loaf of white bread or a pot of beer from the traders, bakers, or tapsters for loose wampum. . . in order hereby to prevent the further importation of all lump and unperforated wampum, so as in future to obviate all misunderstanding. the Hon'ble Director and Council aforesaid do ordain that the commercial shall pass and be good pay as heretofore, to wit, six white or three black for one stiver; on the contrary, poor strung wampum shall pass eight white and four black for one stiver [stiver = one penny]."

On the Pacific coast, according to Powers, Gibbs, and other writers, immense quantities of shell money or beads were in circulation, the value of which fluctuated greatly from tribe to tribe. Much of it was made from the so-called tusk-shell, a species of dentalium. which was obtained in the following manner: To the end of a suitable pole a strip of wood was secured, being placed transversely to the line of the pole, and first studded with bone or wooden teeth. From the bow of a canoe or boat, propelled usually by a woman, the tuskshell fisher stood and carefully prodded the sands at the botton of the water a number of times with his comb-like instrument, and then

drew it to up see whether any of the shells had become impaled on the teeth of the instrument. Sometimes four or five of the shells were brought up, and sometimes none at all. This was a practical method of obtaining these shells, as they are not found between tide marks. The form of this shell, which gave it its name of tusk-shell, is toothor fang-shaped, having an orifice at each end. A fine specimen is about 3 in. in length, but usually they are much shorter. With the small end invariably downward, it is found burrowed in the sand in from 4 to 8 fathoms of water in sheltered harbours or inlets. The women string these shells neatly on bits of dried sinew; they are afterward ornamented with fragments of haliotis shell and with tufts of mountain-goat's wool. A string of 25 of these shells, which, placed end to end, reached one fathom, or 6 ft., was called a hiaqua and was the standard of value. The shorter broken shells were strung in like manner, and these inferior strings were called kopkops, of which 40 were equal in value to one hiaqua. Bands or belts were also made of dentalium shells, and these also served as currency and for ornament. But according to Gibbs "forty to the fathom" was the standard, or one hiaqua, which would purchase as a rule one male and two female slaves: this was approximately £50 sterling. According to Powers and others álli-co-chick was the name of this tusk-money in California. In the central and southern portions of the state there was a staple currency known as hawock or hawok, made from the shells of "a bivalve, a ponderous clam when adult." The shell was cut into small discs, of which the larger were worth about 25 cents and the smaller about 4 cents. Some of the discs, 2 in. in diameter and $\frac{1}{2}$ in. in thickness, were worth a dollar apiece. Powers mentions a necklace of hawok, worn by a young woman, which was 10 yds. long, consisting of 1,160 pieces, and was worth about \$225. The olivella shell money was known as kolkol, or col-col. The shell was prepared by simply grinding off the apex and stringing it mouth-to-mouth with others. This money it is said, was "slightly esteemed," perhaps owing to the great abundance of the species. The abalone or haliotis shell money was known as uhl-lo or ul-lo; this was made from a very beautiful shell, rather too large and cumbersome to be used as money. The shell was prepared for use by cutting it into oblong strips from 1 in. to 2 in, long and about $\frac{1}{2}$ in.

in width. Holes were drilled near one end of the strip, and the strips were then strung edge to edge. Ten pieces constituted a string. The larger pieces are worth \$1 apiece, thus making the value of a string about \$10.

The literature pertaining to shell money and to shell objects is extensive. The more important writings on the subjects are: Barber and Howe, Hist. Coll. N. J., 1844; Beach, Indian Miscel., 295, 1877; Beauchamp (1) in Am. Antiq., Mar. 1889; (2) in Bull. N. Y. State Mus., vni, No. 41, 1901, with bibliog.; Beverley, Hist. Va., bk. m, 58, 1705; Boas, (1) in Rep. Brit. A. A. S., 36, 1889; (2) in Rep. on N. W. Tribes Can., S5, 1890; Bradford in Mass, Hist, Soc. Coll., 4th s., 3, 234-35, 335-36, 1856; Brinton, Myths of the New World, 1903; Burnaby, Travels in N. Am., 60, 1775; Bushnell, in Jour. Anthr. Inst. Gt. Brit., XXXVI, 172, 1906; Cartier in Hakluyt, Voy., m. 272, 1600; repr. 1810; Carver, Travels. 235, 1796; Cox, Adventures, 332-33, 1831; Eells in Smithson, Rep. 1887, 647, 1889; Forsyth, Acet. Amer., 1827 and 1866; Woodward, Wampum, 1878. (J. N. B. H.)

Waneta ('The Charger'). A Yanktonai Sioux of the Pabaksa or Cuthead band, son of Shappa or Red Thunder; born on Elm r., in the present Brown co., S. Dak., about 1795. He enlisted with his father in the English service in the War of 1812, and fought valiantly at Ft. Meigs and Sandusky, winning his name by his bravery in charging the Americans in the open, and being seriously wounded in the battle at the latter place. After the war he was given a captain's commission by the British, and visited England. He continued to sympathize with the British until 1820, when he attempted to destroy Ft. Snelling by stealth, but being thwarted in his enterprise by Col. Snelling, he afterwards heartily supported American interests. Waneta was a dominant chief of the Sioux and exceedingly active in his operations. He signed the treaty of trade and intercourse at Ft. Pierre, July 5, 1825, and, on Aug. 17 of the same year, signed the treaty of Prairie du Chien which fixed the boundaries of the Sioux territory. He died in 1848 at the mouth of the Warreconne, the present Beaver cr., Emmons co., N. Dak. His name is variously spelled, as Wahnaataa, Wanotan, and Wawnahton.

(n. R.)

Wanigan. A receptacle in which small supplies or a reserve stock of goods are kept; also a large chest in which the lumbermen of New Brunswick, Maine and Minnesota keep their spare clothing, pipes, tobacco, etc. Called also wongan-box, and spelled wangun and wingan. (2) A boat used on the rivers of New Brunswick and Maine for the transportation of the entire personnel of a logging camp, along with the tools of the camp and provisions for the trip. (3) A place in a lumber camp where accounts are kept and the men paid. "Running the wangan" is the act of taking a loaded boat down a river, from station to station, particularly in swiftly flowing water. The word is from Abnaki waniigan, 'trap'; literally, that into which any object strays, wanders, or gets lost; a receptacle for catching and holding stray objects; from wan, 'to wander', 'go astray,' 'get lost,' -igan, often used in Abnaki in the sense of 'trap.' Similarly, a locker in a hunting phaëton is called a 'trap,' and this eventually gave its name to the vehicle itself.

(W. R. G.)

Wanineath (Waninen'th). A sept of the Seshart, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes Can., 32, 1890.

Wanlish. A division of the true Kwakiutl, probably named mistakenly from its chief.—Lord, Nat. in Brit. Col., 1, 165, 1866.

Waokuitem (Waō'kuitem). A clan of the Wikeno, a Kwakiutl tribe.—Boas in Rep. Nat. Mns. 1895, 328, 1897.

Washatnagunashka. A Montagnais village on a bay on the N. shore of the gulf of St. Lawrence, Quebec.—Stearns, Labrador, 271, 1884.

Wastsanek ($W\bar{a}'slsanEk$). A sept of the Toquart, a Nootka tribe.—Boas in 6th Rep. N. W. Tribes Can., 32, 1890.

Watap. Roots of the pine, spruce, tamarack, etc., used to sew birch-bark for canoes and other purposes: from watap, in the Chippewa and closely related Algonquian dialects, signifying root of the tamarack. The word has come into English through Canadian French. Cuoq (Lex. Alg., 426, 1886 says the word is known from one end of Canada to the other and deserves adoption by the French Academy.

Watshishu. A Montagnais village near Manikuagan bay, on the N. shore of the gulf of St. Lawrence, Quebec.—Stearns, Labrador, 271, 1884.

Watopapinah ('canoe people'). A band of the Assiniboin which, according to Lewis and Clark, in 1804, roved on Souris r. and the branches of the Assiniboine N. of the Mandan tribe, in the United States and Canada. At this period they numbered 450 warriors, in 200 tipis. In 1806, Henry (Coues, Henry-Thompson, H. 522, 1897) said they had 160 lodges; while Hayden (Ethnog, and Philol. Mo. Val., 387, 1862) in 1856, said that they ranged from White Earth r. to the sources of the Souris and Pembina rs. and occupied 220 lodges, averaging 4 persons.

Assiniboin Menatopa.—Lewis and Clark Exped, 1, 146, 1814 Band lar Gru (crain) or canoe.—Orig. Jour. Lewis and Clark, vt, 104, 1905. Canoe and Paddling Assiniboines.—Henry, quoted by Coues, Henry-Thompson, 522, 1897. Canoe Assiniboines.—Ibid. Ganoe band.—Culbertson in Smithson. Rep. 1850, 143, 1851. Canoe Indians.—U. S. Ind. Aff. Rep., 289, 1854. Gens de Canot.—Brackenridge, Views of Ls., 79, 1814 (=Manelopec, ibid., ed. 1817. Gens des Canoe.—Iewis and Clark Discov., 43, 1806. Gens des canots.—Us indian, Travels, 194, 1843. Les gens des Caruts.—U.S. Ind. Aff. Rep., 289, 1854. Manelopec.—Bracken-

ridge, op cit, 1814. "Gens de Canots, ibid, ed. 1815). Ma-ne-to'-pā.—Lewis and Clark, Discov., 43, 1806. Ma-ne-to-par.—Orig. Jour. Lewis and Clark, vi. 104, 1845. Menatopa.—Lewis and Clark Fixped., 184, 1847. Otaopabinė.—Maximilian, Travels, 194, 1843. sig. des. gens des canots! Wate-pana.—Iapi Caye, xiii, no. 5, p. 17, 1884. Wah-to-pan-ah.—Denig. quoted. by Dorsey in 15tl. Rep. B. A. E., 222, 1807. Wah-to'-pap-i-nah.—Haydan, Ethney. and Philol. Mo. Val., 387, 1862.

Wauanouk. A former village near St. Francis, Quebec, probably of refugee Wewenoc.—Lattré map, 1784.

Waulipoe (Wa'ulipot, 'those who are feared'. A gens of the Kwakintl proper on the coast of British Columbia.—Boas in Rep. U. S. Nat. Mus. 1895, 330, 1897.

Wawikyem (Wā'wik'em). A clan of the Wikeno, a Kwakiutl tribe.—Boas in Rep. U.S. Nat. Mus. 1895, 328, 1897.

Wazhush (wazhash, 'muskrat'). A gens of the Chippewa. In the beginning of the 19th century they were considered a division of the Kenozhe gens, and resided on the N. shore of lake Superior at Grand portage and Thunder bay.

Hawoyzask.—Long. Voy. and Trav., 62, 1791. Musquash.—Ibid. Omackāsiwag.—Wm. Jones, infin, 1907. Ömāschkāse Wenenewak.—Long, Exped. St. Peter's R., II., 153, 1824. Omush-kas.—Warren (1852) in Minn. Hist. Soc. Coll., v. 84, 1885. Osmush-kasug.—Ibid. Rat nation.—Long, Voy. and Trav., 117, 1791.

Weendigo, Wendigo. See Windigo.

Weperigweia. An Algonquian tribe living in 1635 N. of St. Lawrence r., below Tadoussac, Quebec.

Oueperigoueiaouek.—Jes. Rel. 1643, 38, 1858. Oueperigoue-ouaouakhi.—Jes. Rel. 1635, 18, 1858. Weperigoueiawek.—Jes. Rel., 111, index, 1858.

Weskarini. An Algonquian tribe that lived on the N. side of Ottawa r. below Allumettes id., Quebec, with the people of which they appear to be closely associated in the Jesuit Relations.

Little Natlon of the Algomquins.—Jefferys, Fr. Doms, pt. 1, map, 1761. Ouaouechkafrini.—Jes. Rel. for 1640, 34, 1858. Ouaouechkafrini.—Jes. Rel. for 1658, 22, 1858. Ouaouechkafrini.—Champlain (1613), Envres, III. 299, note, 1870. Sa8iechkarini8ek.—Jes. Rel. for 1646, 34, 1858. 8e8eskariniens.—Jes. Rel. for 1643, 61, 1858. Oueschafini.—Champlain (1613), Euvres, III. 299, 1870. Petite Nation.—Jes. Rel. for 1633, 34, 1858. Petite natlon des Algonquins.—Jes. Rel. for 1640, 34, 1858. Petits Algonquins.—La Tour map, 1784. Quieunontateronons.—Sagard, Hist. du Can, III, 738, 1866 (Huron name). Wawechkafrini.—Jes. Rel, III, index, 1858. Waweskafrini.—Ibid. Wewechkafrini.—Ibid.

Wewamaskem ($W\tilde{e}'wamasqEm$, 'the noble ones'). A gens of the Mamalelekala, a Kwakiutl tribe.—Boas in Rep. U. S. Nat. Mus. 1895, 330, 1897.

Wewanitowuk. A band of Cree.--Hutchins (1770) quoted by Richardson, Arct. Exped., и, 37, 1851.

Wewenoc. A tribe of the Abnaki confederacy that lived on the coast of Maine about the mouth of the Kennebec r., in Lincoln and Sagadahoc cos. They were closely related to the Arosaguntacook, with whom they combined at an early period when displaced by the English. They figured in the Falmouth treaty of 1749 and other treaties of that period. Before 1727 most of them had removed to St. Francis and Bécancour, Quebec, and in 1747 only a few families remained in Maine, who soon afterward removed also to Canada, where a remnant still exists.

Wharnock. A Kwantlen village on Fraser r., a few miles below the mouth of Stave r., Brit, Col.; pop. 29 in 1910.

Hō'nak. - Hill-Tout in Ethnol. Surv. Can, 54, 1902. Stcuwā'çeI.—Boas, MS., B. A. Z., 1891 (probably identical). Wharnock.-Can. Ind. Aff., pt. 11, 160, 1901. Whonnoch.-Hill-Tout, op. cit. Whonock.-Can. Ind. Aff., 74, 1878.

WhatIminek (Whatl-min- $\tilde{\epsilon}k'$). An Okinagan village $6\frac{1}{2}$ m. v. of Deep er., Okanagan lake, Brit. Col—Dawson in Trans. Roy. Soc. Can., see. 11, 44, 1891.

Whulk. A Nimkish village at the mouth of Nimkish r., E. coast of Vancouver id., Brit. Col.—Dawson in Trans. Roy. Soc. Can., sec. rr, 65, 1887.

Wickaninnish. Originally the name of a chief, but used by authors to designate several tribes, separately and collectively, between Nootka sd., Vancouver id., and Juan de Fuca str., Brit. Col.

Wickaninnish.-Jewitt, Natr., 37, 1849. Wick-anook.-Ross, Adventures, 159, 1849 hear Nootka). Wickinnlnish.-Jewitt, op. cit., 76.

Widja ($W\bar{\imath}'dia$). A Haida town of the Widja-gitunai family formerly on the N. coast of Graham id., just w. of the entrance to Masset inlet, Queen Charlotte ids., Brit. Col. (J. R. S.)

Wi'dja .- Swanton, Cont. Haida, 281, 1905. Wi'ts'a .-Boas in 12th Rep. N. W. Tribes Can , 23, 1898.

Widja-gitunai (Wī'dja gītAnā'-i, 'Gituns of the town of Widja'). A Haida family of the Eagle clan, named from its town on the N. coast of Graham id., Brit. Col., between Masset inlet and Virago sd. This with the Tohlkagitunai, Chets-gitunai, and Djus-hade formed one larger related group.

(J. R. S.)

Wī'dja gītanā'-i.—Swanton, Cent Haida, 275, 1905. Wi'ts'a gyit'inai'.-Boas in 12th Rep. N. W. Tribes Can , 23, 1898.

Wigwam. (1) A name for an Algonquian dwelling, an arbour-like or conical structure in which, from Canada to North Carolina, was employed the same general mode of erection, which varied mainly in the plant materials (saplings, barks, rushes, or flags) used, and which differences in soil and climate changed here and there to a certain extent (see Habitations). The word, which appears in English as early as 1634 (Wood, New England's Prospect, 65, 1634) was, like the terms skunk, musquash, etc., borrowed from Abnaki by the colonists of E. Massachusetts, who adopted it as the name for an Indian habitation, in preference to the term wetu (witu) used by the natives among whom they settled. The Massachusett Indians, like the Narraganset, used also as the name for a house the word wetuom (wituóm), formed from the same base. Eliot (Indian Grammar Begun, 11, 1666), who was ignorant of the origin of the word under eonsideration, mentions, we may suppose through an inadvertence, a word wekuwomut (for wetwomut), which he interprets 'in his house,' and adds: "hence we corrupt this word

[to] wigwam." This erroneous etymology, based on a word nonexistent in the Massachusett dialect, and, in fact, impossible in any Algonquian dialect, has unfortunately been copied by nearly every English dictionary.

The Abnaki word wigwâm, literally 'dwelling,' is from wigw, 'he dwells,' + the formative -am, from the Algonquian root wig, wik (ig, ik, in composition), 'to dwell,' and is coguate with Micmae wigwam, Mohegan wikwam, Lenape (Delaware) wikwam, and Chippewa wigiwam (from wigiw, 'he dwells,' a word obsolete in Chippewa but preserved in Cree), and Nipissing wikiwam, and by change, in this dialect, of w to m, mikiwâm. The Virginia Renape seem not to have employed the word wikwâm used by their relatives of the N_{ij} but substituted for it the term $k \delta m \tilde{u} k$. which, like its cognates in other Algonquian dialects (Lenape gámík, or kámík, Abnaki gámik, Cree and Chippewa kámik, Masachuset kóműk, Narraganset kómők, etc.), was always used in compounds, and never disjunctively. The word wigwang used by Beverley (Hist. Virginia, 1705) is merely a corruption of the northern vocable wigwâm, with which he was evidently unfamiliar.

- (2) A name applied by travellers to the dwellings of Indians other than those of Algonquian stock, or to the habitations of the natives of countries other than North America, as for example: "Their houses or wigwams which they [the Caribs] call carbets" (Stedman, Exped. against the Revolted Negroes of Surinam, I, 403, 1806); "The Fuegian wigwam resembles in size . . . a haycock" (Darwin, Jour. of Researches, 212, 1845); "rude jackales, somewhat resembling the wigwams of the Pawnees" (Gregg, Commerce of the Prairies, I, 286, 1851).
- (3) A name applied by the founders of the Tammany Society of New York City to their headquarters.
- (4) A name sometimes applied to a large structure in which a nominating convention or other political meeting takes place.

Certain summer hospital tents for children are known as "wigwams," and there is also a "wigwam shoe" or "wigwam slipper."

(W. R. G. A. F. C.)

Wikeno (Wik'ē'nō, 'the portage makers'). A Kwakiutl tribe speaking the Heiltsuk dialect and living on Rivers inlet, Brit. Col. Their clans, according to Boas, are: Koikaktenok, Gyigyilkam, Waokuitem, Wawikem, Guetela,

and Nalekuitk. Their towns are: Tlaik. Niltala, Wikeno, Nuhitsomk, Somhotnechau, and Tsiomhau. Pop. 131 in 1901, 108 in 1911.

Awi'k'enôx.—Boas in Nat. Mus. Rep. 1895, 328, 1897. Awi'ky'enoq.—Boas in 6th Rep. N. W. Tribes Can, 52, 1890. Oweckano.—Sproat in Can. Ind. Aff., 145, 1879. O-wee-kay-no.—Can. Ind. Aff., 304, 1893. Oweckayo.—Ibid., 361, 1897. Wee-kee-moch.—Kane, Wand. in N. A., app., 1859. Weekenoch.—Scouler (1846) in Jour. Ethnol. Soc. Loud., r., 233, 1848. Wikanee.—Brit. Col. map, 1872. Wikeinoh.—Tolmie and Dawson, Vocabs. Brit. Col., 1179, 1884. Wik'enő.—Boas in Petermanns Mitteil, pt. 5, 130, 1887. Wykenas.—Scott in U. S. Ind. Aff. Rep., 316, 1868.

Wikeno. A town of the Wikeno tribe (q. v.) of British Columbia.

Wikoktenok (Wi'k'ōxtēnóx, 'eagle'). A clan of the Bellabella, a Kwakiutl tribe.—Boas in Rep. Nat. Mus. 1895, 328, 1897.

Wikyuwamkamusenaikata ('painted lodge'). A Cree band, taking the name of its chief, living in 1856 about Fort de Prairie,*
—Hayden, Ethnog, and Philol. Mo. Val., 237, 1862.

Williams Lake. A Shuswap village or band on Williams Lake, which drains westward into Fraser r., Brit. Col., about lat. 52° 10′. Pop. 155 in 1911. The name is applied also to an Indian agency.

Windigo ('cannibal'). A mythical tribe of cannibals said by the Chippewa and Ottawa to inhabit an island in Hudson bay. Some of the Chippewa who dwelt on the N. w. shore of lake Superior were said to practice cannibalism and were called by this name. The Maskegon on the shores of Hudson bay, though reproached as cannibals by the other tribes, were said to be themselves in constant fear of the Windigo.

Onaonientagos.—Bacqueville de la Potherie, Hist, 11, 49, 1753 (misprint). Weendegoag.—Tanner, Narr., 316, 1830 (Ottawa form). Weendigoes.—Kane, Wanderings of an Artist, 60, 1859. Windigos.—Kingsley, Stand. Nat. Hist., pt. 6, 153, 1883.

Wininish. See Ouananiche.

Winnepeskowuk. A division of the Upeshipow living in 1770 on Eastmain r.,

^{*}An old post on the N. side of the Saskatchewan, in the vicinity of Nipawi, seems to have been the first—ante 1757—to acquire the name Fort des Prairies. Later, it was applied to various different establishments as trade gradually pushed up the river; thus, in 1810, Forts Vermilion, George and Augustus were called Fort des Prairies and any two such in simultaneous operation were distinguished as Upper and Lower. (Coues, Henry and Thompson Journals, 11, 481.)

Quebec—Hutchins 11770 quoted by Richardson, Arctic Exped., 11, 38, 1851.

Wiokemae (Wi'oqEnotë, 'whom no one dares to look at'). A gens of the Tsawatenok, a Kwakiutl tribe.—Boas in Rep. U. S. Nat. Mus. 1895, 331, 1897.

Wisakedjak. See Nanabozho.

Wiweakam (W7'vägam, 'true frog tribe'). Two Lekwiltok gentes, one belonging to the Wiwekae sept, the other to the Kucha. There seems to be considerable confusion between the people bearing this name and those called Wikae. The population of each is enumerated separately in the Dept. of Indian Affairs reports, and in 1911 the number of persons in this division was placed at 58. In 1885 their principal town was called Tatapowis.

(J. R. S.)

Weewaikun.—Brit. Col. map, 1872. Weewok.—Ibid. We-wai-ai-kum.—Can. Ind. Aff., 270, 1889. We-wark-kum.—Kane, Waud. in N. A., app., 1859. We-way-a-kum.—Powell in Can. Ind. Aff., 119, 1880. Wi-waigam.—Boas in Mem. Am. Mus. Nat. Ilist, v., pt. n, 318, 1902. Wi-wai-ai-kum.Can. Ind. Aff., 364, 1897. Wi'wēak'am.—Boas in 6th Rep. N. W. Tribes Can., 55, 1890. Wi'wēaqam.—Boas in Petermanns Mittell, pt. 5, 131, 1887. Wi'-wē-ēkum.—Dawson in Trans. Roy. Soe. Can., sec. n, 65, 1887. Wi-wi-kum.—Telmie and Dawson, Vocabs. Brit. Col., 119n, 1884.

Wiwekae (Il'ī'wēq'aē, 'the Wē'qaēs,' from an aneestor of that name). A sept of the Lekwiltok, living between Bute and Longhborough inlets, Brit. Col. Its gentes, according to Boas, are: Gyigyilkam, Gyeksem, Wiweakam, and a fourth, the name of which is unknown. Their principal town, according to Dawson, is Tsakwalooin, at cape Mudge. Pop. 86 in 1911.

M-Wai-ai-kai.—Can. Ind. Aff., 435, 1896 (misprint). Waiwaiaikai.—Ibid., pt. 2, 41, 1999. We-wai-ai-kai.—Ibid., 189, 1884. Wé-wark-ka.—Kane, Wand. In N. A., app., 1859. We-way-a-kay.—Spreat in Can. Ind. Aff., 149, 1879. We-way-a-ky.—Powell, ibid., 119, 1880. Wi-wai-ai-kai.—Can. Ind. Aff., 362, 1895. Wiwayiki.—Brit. Col. map., 1872. Wi-wē-eke.—Dawson in Trans. Roy. Soc. Can., sec. II, 65, 1887. Wi'-wēk'aē.—Boas in 6th Rep. N. W. Tribes Can., 55, 1890. Wi'wēqaē.—Boas in Rep. U. S. Nat. Mus. 1895, 331, 1897. Wi'wēq'aē.—Boas in Petermanns Mitteil, xvii, pt. 5, 131, 1887.

Wohuamis (Wōxuā'mis). A gens of the Koskimo, a Kwakiutl tribe.—Boas in Rep. Nat. Mus. 1895, 329, 1897.

Wyah. A Nitinat village on the E. shore of the outlet of Nitinat lagoon, s. w. eoast of Vancouver id.; pop. 63 in 1902.

Whyack.—Whymper, Alaska, 73, 1869. Wyah.—Can. Ind. Aff., 264, 1902.

Wyandot. See Huron.

Xumskhumesilis (Xûms\u03c4umesiLis). An ancestor of a Quatsino gens after whom the gens was sometimes named.—Boas in Petermanns Mitteil., pt. 5, 131, 1887.

Yaaihakemae (Yaai'x'aqEmaē, 'the crabs'). A gens of the Komoyue, a sept of the true Kwakiutl, and a clan of the Tenaktak.

Yaai'Hak'/maë.—Boas in 6th Rep. N. W. Tribes Can., 54, 1890. Yaai'x'aqemaë.—Boas in Rep. U. S. Nat. Mus. 1895, 330, 1897. Yi\(\frac{5}{4}qem\)\(\frac{2}{6}em\)\(\frac{1}{6}em\)

Yadus (Ya'd.1s). An important subdivision of the Stustas, a great Haida family of the Eagle clan. It constituted one of the Kaigani families, and was subdivided like them (in the Tlingit style) into 5 house-groups: Ildjunaihadai, Naalgus-hadai, Nakons-hadai, Otkialnaas-hadai, and Otnaas-hadai.—Swanton, Cont Haida, 276, 1905.

Yagun. An ancient Haida town formerly on the N. coast of Queen Charlotte ids., Brit. Col.

Yā'gan.-Swanton, Cont. Haida, 281, 1905.

Yagunkun-lnagai (Ya'gun-kun-lnagā'-i, 'Yagun river point-town people'). A branch of the Kuna-lanas, a great Haida family belonging to the Raven elan. The Yagun is the largest stream on the Queen Charlotte ids.

(J. R. S.)

Yāgun kunilnagai',—Boas, 12th Rep. N. W. Tribes Can, 23, 1898. Ya'gun kun lnagā'-l.—Swanton, Cont. Haida, 271, 1905.

Yagun stlan-lnagai (Ya'gun sL'an lnagā'-i, 'Yagun river rear-town people'). A local subdivision of the Stlenga-lanas, a Haida family belonging to the Raven elan.—Swanton, Cont. Haida, 271, 1905.

Yaku (Yak!"). A Haida town of the Dostlan-Inagai family, that formerly stood on the N. w. coast of Graham id., opposite North id., Queen Charlotte ids., Brit. Col. This town, or it and the neighbouring one of Kiusta together, may be that designated Lu-lan-na by John Wark, 1836-41, to which he assigned 20 houses and 296 people. Old people remember 4 large houses and 4 small ones in Yaku, and 9 houses in Kiusta. This would seem to indicate a population in Yaku proper of about 100 to 120. (J. R. S.)

Hā'k'ō.—Boas, 12th Rep. N. W. Tribes Can., 22, 1898.
Kakoh.—Dawson, Q. Charlotte Ids., 1628, 1880 (corrupted form). Yak!a.—Swanton, Cont. Haida, 281, 1905.
Yukh.—Deans, Tales from Hidery, 94, 1899.

Yaku-gitinai (Yā'ku gitinā'-i, 'the middle Gitt'ns'). A subdivision of the Hlgahet-gitinai, a Haida family of the Eagle clan. They received their name from having lived in the middle of Skidegate village; there they killed a chief and fled to the w. coast.—Swanton Cont. Haida, 274, 1905.

Yaku-lanas (Yā'ku lā'nas, 'middle-town people'). A large and important Haida family belonging to the Raven clan. By the Skidegate people it is said they were so named because they occupied the middle row in a legendary five-row town, where all the Raven side formerly lived (see Skeena). The Masset people attributed it to the fact that wherever the members of this family settled they occupied the middle of the village. They are said to have come originally from the s. end of Queen Charlotte ids., but the greater portion finally moved to Alaska, where they constituted the most important Raven family among the Kaigani. One subdivision, the Aovaku-hagai, settled in Masset, inlet. Of the Kaigani part of the family there were 4 subdivisions, the Kaad-naas-hadai, Yehlnaas-hadai, Skistlai-naihadai, and Nakaduts-hadai. The extinct Ta-ahl-lanas of North id. perhaps belonged to it. Before they left Queen Charlotte ids. their principal town was Dadens. In Alaska it was Khnkwan. The Hlgahet-gu-lanas are said to have once been a part of this family.— Swanton, Cont. Haida, 271, 1905.

Yak' lā'nas.—Boas, 12th Rep. N. W. Tribes Can, 22, 1898. Yākwū Lennas.—Harrison in Proc. Roy. Soc. Can., sec. II, 125, 1895.

Yan ('directly opposite' a ledge). A former Haida town on the w. side of the mouth of Masset inlet, Queen Charlotte ids., Brit. Col. It was built in comparatively recent times after troubles between two Masset families. One family stayed in Masset, while the other, the Aostlan-lagai, settled at Yan.

la'an.—Boas, 12th Rep. N. W. Tribes Can, 23, 1898.
Yan.—Dawson, Q. Charlotte Ids, 163, 1880. Yen.—Harrison in Proc. Roy. Soc. Can, sec. 11, 124, 1895.

Yaogus (Yáog.4s). A Haida town of the Kagials-kegawai family, formerly on the s.w. side of Louise id., Queen Charlotte ids., Brit. Col.—Swanton, Cont. Haida, 279, 1905.

Yaqatlenlish (Yaqatlçnlisch). An ancestor of one of the gentes of the Kwakiutl proper, after whom the gens itself was sometimes named.—Boas in Petermanns Mitteil., pt. 5, 131, 1887.

Yarahatssee (Ya-ra-hats'-see, 'tall tree'). A clan of the Hurons (q. v.).—Morgan, Anc. Soc., 153, 1877.

Yastling (Yastli'ñ). A Haida town of the Koetas family, formerly in Naden harbour, Graham id., Queen Charlotte ids., Brit. Col.—Swanton, Cont. Haida, 281, 1905.

Yatcheethinyoowuc (Wood Cree: Ayâtchi-thtutwûk, 'foreign men,' 'foreigners.'—Lacombe.) A name applied indiscriminately by the Cree to all tribes w. of themselves and the Assiniboin, in Canada. It has no ethnic significance.

Jatche-thin-juwuc.—Egli, Lexicon, 532, 1880. Yat-chee-thin-yoowuc.—Franklin, Narr, 108, 1823.

Yatza ('knife'). An important camping place on the N. coast of Graham id., between North id. and Virago sd., Q. C. ids., B.C. A house or two were erected here and potlatches were held for the purpose, which circumstances led Dawson (Q. Charlotte ids., 162B, 1880) to suppose it was a new town.

(J. R. S.)

Yehlnaas-hadai (Ye'l na's xā'da-i, 'Raven house people'). A subdivision of the Yakulanas, a Haida family of the Raven clan, probably named from one house, although they occupied a large part of the town of Kweundlas.—Swanton, Cont. Haida, 272, 1905.

Yatl nas: had'ā'i.—Bons Fifth Rep. N. W. Tribes Can, 26, 1889.

Yekolaos. One of the two Cowichan tribes on Thetis id., off the s. E. coast of Vancouver id., Brit. Col. If identical with the Tsussie of the Dept. of Indian Affairs reports, the population was 55 in 1911.

Tsussie.—Can. Ind. Aff., pt. 11, 66, 1902. Yéqolaos.—Boas, MS., B. A. E., 1887.

Yesheken (Yè'cEqEn). A division of the Nanaimo on the E. coast of Vancouver id., Brit. Col.—Boas in 5th Rep. N. W. Tribes Can., 32, 1889.

Yucuche. A Tatshiautin village at the head of Stuart lake, Brit. Col., and the portage between it and Babine lake. Pop. 36 in 1911.

Ya-ku-tce.—Morice, Notes on W. Dénés, 26, 1893.
Yucutce.—Can, Ind. Aff. Reps.

Yukuts. A Squawmish village community on the right bank of Skwamish r., Brit. Col. Yik'ts.—Boas, MS, B. A. E., 1887. Yū'kuts.—Hill-Tout in Rep. Brit. A. A. S., 474, 1900.

Yukweakwioose. A Chilliwak village on lower Chilliwak r., which flows into the lower Fraser r., Brit. Col.; pop. 28 in 1911.

Yahweakwioose,—Can. Ind. Aff. Rep., pt. 2, 44, 1909. Yakweakwioose,—Can. Ind. Aff. Rep., 277, 1894. Yak-y-you.—Ibid., 309, 1879. Yukkweakwioose.—Ibid., pt. 11, 160, 1901. Yukūkwēū's.—Hill-Tout in Rep. N. W. Tribes of Can., 4, 1902. Yu-kwea-kwioose.—Can. Ind. Aff. Rep., 414, 1898. Yuk-yuk-y-yoose.—Brit. Col. map, Ind. Aff, Victoria, 1872.

Yuquot. The principal town of the Mooachaht, situated in Friendly cove, Nootka sd., w. coast of Vancouver id. In olden times it was a widely known place, continually frequented by trading vessels. Pop. 172 in 1904, 140 in 1910.

Moacha.—Can. Ind. Aff., pt. 2, 88, 1910. Nootka.— Jewitt, Narr, passim, 1849. Yucuatl.—Galiano, Relacion, 117, 1802. Yuquot.—Cap. Ind. Aff., 264, 1902

Yutsutkenne ('people down there'). A Sekani tribe whose hunting grounds are between McLeod lake and Salmon r., Brit. Col. From time immemorial they have bartered stone axes, arrows, and other implements with the Takulli for beads and articles of metal.

Yu-tsú-tqaze.—Morice, letter, B. A. E., 1890. Yu-tsu-tquenne.—Morice, Notes on W. Dénés, 28, 1893.

Zakhauzsiken (Zaxxauzsi'kEn, 'middle ridge' or 'middle hill'). A village of the Spence Bridge band of Ntlakyapamuk ½ m. back from Thompson r., on the s. side, about 31 m. above Lytton, Brit. Col.—Teit in Mem. Am. Mus. Nat. Hist., II, 173, 1900.

Zoar. A Moravian mission among the Suhinimiut Eskimo on the E. coast of Labrador, established in 1865.

Zoht. A village of the Nicola band of Ntlakyapamuk living near the w. end of Nicola lake, 50 m. above Spence Bridge, Brit. Col. Pop. 31 in 1901, the last time the name appears.

Nicola.—Brit. Col. map, Ind. Aff., Victoria, 1872 (one of two villages so named on Nicola lake may correspond to this town). Yoht.—Can. Ind. Aff., 277, 1894. Yon-kt.—Ibid., 198, 1885. Zoht.—Ibid., 232, 1886. Zöqkt.—Hill-Tout in Rep. Ethnol. Surv. Cap., 4, 1899.

Zutsemin ('red oehre,' or 'red earth'). An Okinagan town on upper Similkameen r., Brit.

Vermillion.—Teit in Mem. Am. Mus. Nat. Hist., 11, 174, 1900 (white men's name). Zu'tsamin.—Ibid. Zu'tsemin.—Ibid.

APPENDIX I

SCHEDULE OF INDIAN RESERVES IN CANADA

Note.—The orthography of names of reserves is practically in accordance with that used by the Department of Indian Affairs except that, where the names have been ruled on by the Geographic Board, Canada, the spelling conforms to the rulings of the Board.

This list includes practically all the Indian reserves in Canada except some timber berths, meadows, fisheries and hay l ands.

		Fourth cr., about 3 m. below Moosehide village	640

APPENDIX II*

BIBLIOGRAPHY

Note —The names of authors and the titles of their papers appearing in magazines and other serial publications are not separately given in this list of works, unless the paper referred to is cited by title in the body of the Handbook. For example, Dr. A. L. Kroeber's memoir on The Yokuts Language of South Central California, published as Volume V, part 2, of the University of California Publications in American Archæology and Ethnology, is referred to by the entry "Kræber in Univ. Cal. Pub., Am. Arch. and Eth., v, pt. 2, 1907," consequently, it is included in this list only under the caption (University of California.) Many manuscripts in the archives of the Bureau of American Ethnology have been consulted in the preparation of the Handbook, but, as they are not readily accessible to students outside of Washington, they are not included in this list.

APPENDIX III

SYNONYMY

Aa'niněna = Atsina

A-anh-wanh = Ahrdoveh.

Abanakees, Abanakis, Abanaquis, Abanaquois = Abanaki

Abbāto-tenā', Abbā-to-tenah, Abbato-tinneh = Abbatotine.

Abbetikls, Abbitibbes = Abitibi.

Abenaguis, Abenaka, Abena'kes, Abenakias, Abénakis, Abena'kiss, Abenakki, Abenaques, Abenaquioicts, Abenaquioicts, Abenaquiois, Abenaquios, Abenaquis, Abenaquis, Abenaquis, Abinaqui, Abinahiohkie = Almaki

Abitibis, Abittibbes, Abittibis = Abitibi.

Abnaki = Algonkin, Delavare

Abnakis, Abnaquies, Abnaquiois, Abnaquis, Abnaquis, Abnaquotii, Abnasque, Abnekais, Abonakies, Abonnekee = Abnaki.

Acadean, Acadian Indians = Micmae

Acapatos = Atsina

Ac-cool-le, Acculee - Akuli

Achagué =Outchouga

A-cha'-o-tin-ne = Ltcharcottine,

Achaque = Oatchongai

Achelaci, Achelacy, Achelaiy, Achelayy - Hochelayi,

Acheto-tenà = Ftelegrestine

Achena = Atsing

Achē'to-tinneh = Titshotinn

Achiganes = Sooke

Achiligouiane = Achiligousia

Achipoés, Achiponé = Chippewa

Achirigouans = Achiligouan.

Achoto-e-tenni = Etcharcottine

Achsisaghecks, Achsissaghecs = Missisauga.

Achwlget = Hagwilget

Ackoolee = Akuli

Acolta = Lekwiltok

Acquinoshionee, Acquinushionee = Iroquois

Adams Lake = Kwikooi

Adams Lake Band = South Andrian Band.

Adawadenys = Potawatomn.

Addick, Ad-dik = Ahdi.

Ad-dik-kun-maig = Udekunning.

 $\mathbf{Ad\hat{e}n\hat{e}} = A \operatorname{thapasean} \ \Gamma \operatorname{anily},$

Adgecantehook = Arosaguntacook

Adi'kamäg = Udekumaig

Adirondaes, Adirondaks, Adirondax, Adirontak, Adisonkas = Adirondaek.

Ad-je-jawk = Ojeejok.

Adla, Adlahsuin, Adlat = Adlet

Adnondecks = Adirondark

Affats-tena = Abbatotine

Aganuschioni = Iroquois

Aghquessaine, Aghquissasne = Saint Regis

Aghsie sugichrone = Missisauga.

Agnichronons, Agnée, Agneehronon, Agneronons, Agnic, Agnichronnons, Agniehroron, Agnierhonon, Agnieronnons, Agnieronnons, Agnieronnons, Agniers, Agnizez = Mohawk.

Agoneascah, Agonnonsionni, Agonnousioni, Agonnousionni = Iroquos,

Agotsaganens, Agotsaganes, Agotsakann, Agozhagauta = Tsaganha

Aguanoxgi = Abnaki.

Aguierhonon = Mohawk

Aguskemaig = Eskimo.

Agutit = Kinipetu

Ababaelins = Atsigg

Ah-ah-wai, Ah-ah-wauk = Ahahweh.

Ahaknañélet, A-hak-nan-helet, Ahaknan-helik = Avilirmigt

Mawhwauk = Mahweh.

Ah-bah-to-din-ne = Ablactatine

Ah-hi-ta-pe=Siksil.a.

Abhousaht = Ahousaht

Ah-knaw-ah-mish, Ah-know-ah-mish = Hahuamis.

 $\mathbf{Ah\text{-}mah\text{-}oo} = \mathbf{Komoyue}$

Ah-meek = Ahmik

Ahnenin, Ahni-ninn = Atsum.

 $A hondihronnons = A \operatorname{ondironon}.$

Ahosett = Ahousaht.

About ndate = Haron.

Abouseht Ahowartz, Ahowsaht, Ah-owz-arts =

Ah'-pai-tup-iks = Ahahpitape.

Ah-pe-ki', Ah-pe-ki'-e = Apikniyiks.

Ah-qua-sos-ne=Saint Regis

Ahrenda, Ahrendah-ronons, Ahrendaronons = Arendahronons

M-shu-ah-har-peh = Salish.

Aht = Nootka, Wakashan Family.

 $\mathbf{Ahtawwah} = \mathbf{Ottawa}.$

 $\mathbf{Ahulqa} = \mathbf{Ahulka}.$

Ah-wah-sis'-sa = Awansee.

Ahwāndate = Iluron.

Ah-wa-sis-se = Awausee.

 $Ahwbacknanhelett = {\it Aivilirmint}.$

Ahwilgate = Hagwilget

 $Aitchelich,\ Aitchelitz = Atselits.$

Ai-tiz-zarts, Aitzarts = Elliatisalit.

Aivillirmiut = Aivilirmuit

Aiyaush = Aiyansh,

Akiskinookaniks = Akiskenukinik

Akkolear = Akuliarmiut.

Akkoolee = Akuli

Akoklako = Lower Kutenai.

 $A kononsion ni = 1 {\rm requois}. \\$

A-ko-t'ås-kå-ro'-něn' = Tuscarora.

A-ko-tcă-kă' něn ', A-ko-tcă-kă-nhà', A-kots-haka-nen = Delaware.

Akotsakannha, AkSanake = Abnaki,

Akuchāklactas = Lower Kutenai.

Akudliarmiut, Akuliak-Eskimos = Akuharmiat,

Akuliaq = Akuliak.

Akusash-rónu = Saint Regis.

A-ku-tcă-ka"-nhă = Delaware

A-kwā'-amish = Hahnamis

Akwanake = Algonkin.

Akwesasne = Saint Regis

Akwilget = Hwotsotenne.

Akwinoshioni = lroquois.

Alagonkins = Algonkin.

A-lân-sâr = Atsina.

Albenaquioue, Albenaquis = Abnaki Alesar = Atsina.

Aleut, Aleuten, Aleutians = Eskimauan Family.

Alexandria = Stella.

Alexandria Indians = Tautus.

Algokin, Algomeequin, Algomequins, Algommequin = Algenkin.

Algomniequin de l'Isle = Kichesipirmi.

Algoriquins, Algoricains, Algorians, Algorian, Algonic Indians = Algonkin

Aigonkin Inférieures = Montagnais.

Algonkin-Lenape, Algonkins, Algonkin und Beothuk = Algonquian Family

Algonméquin, Algonovins, Algonquains, Algonquens = Algordin

Algonquin = Algonquian Family

Algonquins à têtes de Boule = Têtes de Boule.

Algonquins Inférieurs = Montagnais

Algonquins of Rainy Lake = Kojejewininewug.

Algonquins Superieurs = Ottawa.

Algoomenquini, Algoquins, Algoquois, Algouin-. quins, Algoumekins, Algoumequini. Algoumequins, Algumenquini = Algonkin.

Alimibegoueci = Alimibegouek.

Alinconquins = Algorkin

Alkakalilkes = Alkali Lake

Alkonkins = Algonkin.

All Chiefs = Motwainaiks.

Allenemipigons = Chipper a of Lake Nipigon

Alnânba $\ddot{i} = Abnaki$.

Alquequin = Algonkin.

Alsigantégwi = Arosaguntacook

Alsigôntegok = St Francis

Al-ta-tin = Sekani.

Al-tá-tin of Bear Lake = Saschutkenne

Altenkins = Algonkin

Altignenonghac = Attigneenongnahac.

Altihamaguez, Altikamek, Altikameques = Attikamegne.

A'lva-yê'lilit = Eskimo.

Amahim = Anahim.

Amalecites, Amalicites, Amalingans, Amalistes = Malecite.

Amarascoggin, Amarascogin, Amarescoggin, Amariscoggins, Amaroscoggen = Arosaguntacook.

Amasaconticook, Amasacontoog, Amasaguanteg = Amaseconti.

Amasagunticook = Arosaguntacook.

Amasconly, Amascontie, Amasconty, Amasecontee, Amassacanty, Amassaconty = Amaseconti.

Ambahtawoot, Ambah-tawút-dinni, Amba-ta-ut' tinė, Am-ba-ta-ut'tinė, Ambatawwoot; Ambawtamoot, Ambawtawhootdinneh, Ambawtawhoot Tinneh, Ambawtawoot, Ambawtowhoot = Abbatotine.

Amehouest, Ameko8es = Amikwa.

 $21A - 38\frac{1}{2}$

Amelestes, Amelicks, Amelingas, Amelistes, Amelistis, Amenecis = Malecite

Amerascogen, Amerescogin, Ameriscoggins, Amerriscoggin = Arosaguntacook

Amicawaes, Amicois, Amicoues, Amicoures, Amicours, Amic-ways, Amihouis = Amikna.

Amik = Ahmik.

Amikois, Amikones, Amikoüai, Amikoüas, Amikouek, Amikoües, à Mikouest, Amikouest, Amikouets, Amikouis, Amikouys = Amikwa.

A - miks' - eks = Inuksiks.

Amilicites = Malecite

Amircankanne, Amireaneau = Arosaguntaccol.

Amitigoke, Amitioke, Amitoq. Amittioke, Amitvook = Amitok

Ammarascoggin, Ammarescoggin, Ammascoggen =Arosaguntaeook.

Ammisk-watcheéthinyoowuc = Paskwawininiwuz

Amonak = Molank.

Amonoscoggan, Amonoscoggin, Amoscongen = Arosaguntacook.

Amosequonty = Amaseconti

Amresscoggin = Ar. sagur.tacook.

A'muhak = Mohawk.

Ana = Cree.

Anagonges, Anaguanoxei = Abnaki

Anaguas = Mohawk

Anahem, Anahim, Anahim's Tribe = Anahim

Anakwan'ki = Delaware

Anandagas = Onondaga

Anantooeah = Senera

Anasaguntacooks, Anasaguntakook, Anasagunticooks = Arosaguntarcok

Anasaquanans = Naskapi, Tsaganba

Anasuguntakook = Arosaguntacook.

Anayints, Anayot hága = Oneida.

Anchipawah = Chippenti

Anda-kpæn = Eskimo

Andata honata, Andatahouat, Andatohats = Ot-1:373:5

Anderson's River Esquimaux = Kitegareut.

Andiatae = Andrara

Andoouanchronon, Andowanchronon = Atare achronon

Androscoggins = Arosagantacook

Anenatea = Λ nonatea.

Anendaonactia = Arendaonatia

Añénépit = Kopagniut.

Angīt Hāadē = Gunghet-haidagai.

Angmalortoq = Angmalortuk

Angsiens, Angstenc = Angoutenc

Aniáka-háka, Anié, Aniez = Mohawk

Ani'Nûn'dăwe'gî, Anî Sê'nika = Seneca

An-ish-in-aub-ag = Chippewa. Ani'Skālâ'li = Tuscarora.

Anmesoukkanti, Anmessukkantti, Anmiss\kanti = Ama-econti

Anmoughcawgen = Arosaguntacook.

Annah = Cree.

Annanactook = Umanaktuak.

Annanatook, Annanetoote = Anarmitung.

Annegouts = Oneida.

Anniegué, Anniehronnons, Anniengehronnons, Annienhronnons, Annieronnons, Annieronons, Annieronons, Annierronons., Anniés, Anniez = Mohawk.

Annirkakan = Aro-aguntacook

Annogonges = Abraki

Annunciation = Sault ou Recollet.

2 GEORGE V., A. 1912

Anogongaars = Abuaki

Anonatra = Anonatra

Annyints = Oneida

 $\Lambda^{n'}$ tl-hä $^{n-i}$ = Muncey

Antouhonorous. Antouoronous. Antovorinos =

Aoechisacronon = Mississuga.

Anndironnons = Vandironan

Aosaannen = Tsaganha

Aouasanik = Ouasonarini.

A-pa-năx '-ke = Abnaki.

Apaptsim = Spatsum

A -pe-tup-i = Ababbitane

Apinulboines = Assiniboin.

Aqk'āmnik = Akamnik

Aqk anequnik, Aqk'an qu'nik = Akarokanik,

Aqkiskanūkenik, Aqki'sk.

 $\mathbb{E}\mathbf{n}\mathbf{\bar{u}}^{'}\mathbf{kinik} = \Lambda kishenukinik$

Aukogtla'tloo = Lower Kutenai.

A-qua-mish = Hahuamis,

Aquannaque = Mnaki

Aquanoschioni, Aquanuschioni, Aquanuschionig = Ironnois.

Aquasasne = Saint Regis.

Aquieeronons, Aquiers = Mohawk.

Aquinoshioni, Aquinushionee = Iroquoj-

Aquiqua kgô, Aquiqtla'tlgô = Lower Kutenai.

Arabasca = Athapascan Family.

Arabaskaw = Atlabaska.

Aragaritkas = Neutrals

Ara-k è = Eskimo.

Arapahoes = Algonquian Family.

Arathapescoas = Athapascan Family,

Archirigouan = Achiligouan

Archouguets = Outchougui.

Arc Plattes, Arcs-a-plats, Arcs-Plats, Arcsplattes = Lower Kutensi.

Arenda, Arendacronous, Arendaehronous, Arendaenhronons, Arendarhononons, Arendaronnons, Arendaronous, Arendarrhonous, Arendoronnou Arendahronous.

Aresaguntacooks = Arosaguntacook.

A-re-tear-o-pan-gă = Atsina

Arhosett = Allowsahr

Aridgevoak, Aridgewoak = Norridgework,

Arisaguntacooks, Arosagantakuk, Arosaguntacook, Arosaguntakůk, Arouseguntecook = Arosaguntacook.

Arransoak = Norridgewock,

Arrasaguntacook, Arreaguntecooks, Arreguntenocks, Arreraguntecook, Arreruguntenocks, Arresagontacook, Arresaguntacooks, Arresaguntecook, Arreseguntecook, Arreseguntoncook, Arresuguntoocooks. Arseguntecokes = Arosagunta-

Arsenipoitis, Arsenipoits = Assimilatin

Arsikanteg8 = Arosaguntacook.

Arsikantekok = St. Francis.

Artigoniche = Antigonish

Arundaes, Arundax = Adironde .k.

Arunseguntekooks = Arosaguntacook.

Asco = Dooesedoowe.

Aseguang = Gahlinskun.

A'seq = Aseik.

A-se-quang = Gablinskun

Ashcroft = Stlahl.

Asinbols, Asiniboels, Asiniboines, Asi'-ni-bwan, Asinibwanak, A-si-ni-poi'-tuk, Asinipovales =

Asistagueronon, Asistaguerouon = Potawatomi,

REPORT ON SHIPPING

To the Honourable

J. D. HAZEN.

Minister of Marine and Fisheries.

SIE,—I have the honour to submit herewith the twenty-fist List of Shipping issued by this Department. The List has been prepared from records kept in the Department and care has been taken to make it as complete and accurate as possible.

Supplements to the List of Shipping are published every month, and those affecting this List which have issued up to date, are bound with this volume.

The total number of vessels remaining on the Register Books of the Dominion on the 31st of December, 1911, was 8,088, measuring 770,446 tons, being an increase of vessels and tons, as compared with 1910. The number of steamers on the Register Books on the same date was 3.444, with a Gross Tonnage of 588,741. Assuming the average value to be \$30 per ton the value of the Net Registered Tonnage of Canada on the 31st December, 1911, would be \$23,113,380.

The number of new vessels built and registered in the Dominion of Canada during last year was 339, measuring 27.736 tons Net Register. Estimating the value of the new tonnage at \$45 per ton gives a total value of \$1,148,120 for new vessels.

A comparative statement showing the tonnage of each of the Maritime States of the world is given which shows that Canada is now ninth.

During the year 279 vessels were removed from the Register Books, and a detailed statement is given showing the cause of their removal.

It is estimated that 41,447 men and boys, &c., inclusive of the Masters, were employed on ships registered in Canada, during the year 1911.

RAPPORT SUR LA MARINE MARCHANDE

A l'honorable J. D. HAZEN,

Ministre de la Marine et des Pècheries.

Monstet n.—J'ai l'honneur de présenter la vingt et unième liste de la Marine publiée par ce département.

Cette liste a ete computee à même les dossiers du département et on a eu soin de la rendre aussi complète et aussi exacte que possible.

Des suppléments à la liste de la Marine sont publiés chaque mois et ceux qui modifient cette liste et qui ont eté publiés jusqu'à ce jour sont reliés dans ce présent volume.

Le nombre total des navires portés sur les registres du Canada au 31 décembre 1911 était de 8,088, d'un tonnage de 770,446 tonneaux, ce qui donne une augmentation de vaisseaux et de tonnes par rapport à l'année 1910. A la même date, le nombre des vapeurs figurant au registre était de 3,444, d'un tonnage brut de 588,741 tonneaux. En estimant la valeur moyenne du tonnage à \$30 le tonneau, le tonnage enregistré au Canada au 31 decembre 1911 serait de \$23,113,380.

Le nombre total des vaisseaux construits et enregistrés au Canada durant l'année dernière a été de 339, d'un tonnage de 27,736 tonneaux. En estimant la valeur du nouveau tonnage à 345 le tonneau, on obtient une valeur totale de \$1,148,120 pour les nouveaux vaisseaux.

Un tableau comparatif, indiquant le tonnage de chacun des pays maritimes du monde, démontre que le Canada reste à la neuvième place comme pays maritime.

Durant l'année écoulée, 279 vaisseaux ont été biffés des registres pour les raisons lonnées.

On estime à 41.447 le nombre des hommes et des garçons, etc., y compris les capitaines, qui furent employés a bord des vaisseaux enregistres au Canada, pendant l'annec 1911.

STATEMENT showing the number of Vessels and number of Tons on the Registry Books of the Dominion of Canada, on December 31, 1911.
